This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

+ *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.

+ *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.

+ *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.

+ *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at `http://books.google.com/`

COMMUNICATIONS.

Communications on all questions pertaining to the Trade and Profession are wanted. Stamps should be enclosed if rejected communications are desired returned.

QUESTIONS SOLICITED.

We solicit questions on all points of general interest to the trade. Technical questions will be answered by the editor, W. R. Ogier, or Prof. Geo. B. Kauffman. Correspondents must send their names, not for publication, with each query. No attention paid anonymous questions.

Editorial

THE HOROSCOPE.

WITH this issue we begin the second volume of the MIDLAND DRUGGIST. We are gratified that the publication has been so well received, and but for the determination reached some months ago we would have gladly published some of the many complimentary words which our friends have written and spoken of the journal. Our ideas may in the future change somewhat, but for the present we regard these testimonials in the light which we look upon expressions of regard between members of a family; they are intended for our encouragement and help, and are treasured by us far more than they can be appreciated by the public. Our ideals for the publication have not been approximated in the first volume. In fact, the labor given it during the past year has been given under exceedingly unfavorable conditions, so much so that at times it seemed impossible to continue in it. This much should perhaps be said, not by way of an apology, but as a statement of fact due the management.

Of what may be done hereafter toward making this a useful and helpful magazine to the retail druggists of this section of the country it may be well not to prophesy; "Let not him that girdeth on the harness boast himself as he that putteth it off," is an ancient warning to which we feel constrained to take heed. Results are more than promises; pleasing surprises better than disappointed expectations.

Digitized by Google

Our ambition has been toward making the MIDLAND different in its general tone and arrangement from other publications of the same kind. In a measure we may have succeeded, but not to the extent we have desired.

We hope to reach and benefit the retail druggist as he is found in the unceasing routine of his daily toil. We desire to stimulate, strengthen and encourage him. We are conscious that his pathway is not one hedged about with flowers, for we traveled the same dusty highway for many years. We would, however, impress upon him the fact that he is a man doing his full share in the world's work, even though he fails to secure a fair degree of its rewards and emoluments for his service.

For every honest, earnest man in this calling there is the promise of better things if he will intelligently and faithfully perform his part toward bringing in the pharmacal millenium, for we are convinced that the period of wandering in the wilderness which has covered the past twenty years at least will soon be over.

To help our readers seize their opportunities and to rightly employ their faculties in working out their destinies for their own good and for the good of others is our ambition, and for this purpose we enter upon the duties and responsibilities of another year. To the attainment of this end we ask the co-operation which the humblest may give if he will.

The past is a memory, the future is in anticipation.

—W. R. O.

YOUNG MEN AND THE SCHOOLS.

THIS has grown to be a nation of schools to the extent that September might properly be called for the youth of the land the month of beginnings.

Into the public schools thousands of little ones who have just reached the proper age will enter to begin their preparation for the work of life.

Into the high schools, the academies, the colleges, the universities, the technical, the professional, the post graduate schools, other thousands are entering to continue and perfect the training which is to afford them some advantages in the race for success which those less richly endowed by nature and less fortunately favored by circumstances do not possess.

To most normal minds there is a stimulating and visionary interest in first things, the impressions of which once made upon the plastic brain of youth are never wholly obliterated. What man is there who, seeing his boy or girl start from home for the first day at school, does not recall the incidents of his own "first day"? or who with greater or less emotion sends out from beneath his roof the son or daughter who is to be no longer the same factor in the home life that the past years have known; for, after the college days of preparation, there will come the more profound, difficult and exacting school of human experience—does not at the same time remember vividly the day when he departed from his father's house to begin his collegiate or university course?

"What a 'jay' I was," said a young man who was recounting some of the incidents of his life, and recalling the day on which he entered a professional school in a great city to which he had gone from a quiet home in a large western town. But he was not to remain a "jay," for the enthusiasm of youth was in his brain, the fever of ambition in his veins, and after a very few years a career of great promise opened out for him in that city which had given him his training first and his opportunity for usefulness afterward. Splendid young fellow! What a pity, to mortal ken, that from such a field he was called out into that higher school, the curriculum of which has never yet been revealed to the mind of man.

To the young men entering the professional schools at this period our thought persistently reverts. We long for words with which to adequately express our interest in them, and the ability to impress upon them the value which the coming months and years are to possess to their future careers.

It is a singular fact that youth fails to appreciate, to a large degree, the value of time, or to measure the scope of opportunities. The full appreciation of these comes with mature years, when the seed time has passed and the strenuous toil of life's harvest is upon them.

Relatively, few men who have now crossed middle life, especially in the profession of pharmacy, were afforded any such advantages as are now thrust prominently before the young men of this day. These have gone limping through life, realizing almost to the point of despair their limitations, but they will not have lived without profit to their fellows if they may in some

Digitized by Google

manner burn into the thought of the generation following them the necessity for thorough preparation in the schools opening wide their doors for admission on every side.

Not much allowance will be made for narrowness of men in the professions in future years, because few can claim then the lack of opportunities for adequate preparation, and the advanced scientific training will barely supply the demand for the best culture which the science of teaching can produce.

No young man in this day can possibly afford to enter the profession of pharmacy without securing an education in the best regular school of pharmacy which his means will command. He should remember that he is not living in this day only, he must assume that naturally he has from twenty-five to forty years of active work ahead of him, and that the equipment which might, perchance, enable him to hobble along for the present will be found wholly inadequate for the years which are before him.

He should choose from the many schools brought to his attention the one that in his judgment is the best for his needs, and enter it satisfied with his choice, with a zeal for instruction that knows no abatement, an enthusiasm for excellence that is not to be subdued, a determination for hard work that will not yield to any outside pressure, and a resolution to build on an enduring foundation a superstructure, the stability and workmanship of which he will not be ashamed in all his subsequent life.

A young man who enters a school of pharmacy for temporary purposes, except as an aid in some kindred profession, with no loftier idea than to pass a state board examination, whose object is simply to crowd into the smallest period of time the largest number of disconnected statements, will never be known with any credit as a pharmacist, no matter what his *commercial* success may be in the field of the tradesman. Pharmacy in its best sense will be better off without men of this type, and the school which fosters and encourages them will gain no real profit from their connection therewith.

If we are able by any message to place before young men higher ideals than those they have hitherto held, and can encourage even a limited number of them to pursue them with fidelity and devotion, our labor will not fail of its reward.

—W. R. O.

ARSENIC IN SODIUM PHOSPHATE.

THE latest sensation in the pharmaceutical world, and one that is creating a decided impression, is found in the fact that in Great Britain sodium phosphate has been found to contain a considerable quantity of arsenic, variously reported as from eight to seventeen grains to the pound. Such an announcement may well cause consternation when it is remembered that this article is in such general use in Europe and America.

This discovery has led to the examination of many samples of this salt in this country, but with what results we are not now informed, although it will be something of a surprise if the American product is found free from this dangerous contamination.

Pharmacists should be impressed by such revelations as this with the fact that the retail dealer is held responsible for the quality of the drugs he dispenses. We do not think it probable that the courts of the United States will widely differ on this proposition. The pharmacist is supposed to know that what he sells for sodium phosphate is an article that is relatively pure, or at least is free from a deleterious or toxic agent. If he is not competent to ascertain this, a fair question may be raised as to whether he is competent to practice pharmacy at all. A physician who will stick a septic probe in a gunshot wound in order to locate a ball, when modern methods would advise that the wound be sealed up and let alone, might easily be convicted of malpractice should serious results arise from his ignorance. He is supposed to be informed as to the latest theories regarding sepsis in the treatment of wounds, and if in ignorance of them he should not cause others to suffer from his obsolete methods.

Many pharmacists do not give sufficient attention to the tests given in the pharmacopœia for the purity of the articles they dispense. The manufacturer cannot always be relied upon, nor his statements as to purity accepted, as is clearly shown in these phosphate of sodium cases, the heaviest adulterations being found in one of the most favorably known brands of the English effervescent salts.

The pharmacist owes it to himself to exercise the greatest possible precaution as to the purity of his goods, since his professional reputation is involved and his financial resources in peril should he be involved in a legal contest charged with disastrous results which might have been prevented.

—W. R. O.

"WORK AND REST."

AN editorial appears in *The Outlook* for August 25th under this title, which contains so much sound reasoning that we feel constrained to reprint it entire, and urge all our readers actively engaged in the retail drug business to read it carefully and seek to profit by its advice.

We would especially call attention to that portion of the article which relates to the dealing with details. We note with pleasure an increasing trend toward some relaxation on the part of retail druggists, but there is still a great number who rarely think of taking a vacation.—[ED.]

"It is beginning to be thoroughly understood that the summer rest is an integral part of the working year; that vacations are not matters of favor and ought not to be matters of caprice; on ths basis of pure working power they are in the last degree necessary as a business investment. Every man owes it to himself to take a summer's rest; every employer owes it to his own interests to give his employees a summer rest; for work is not simply the mechanical doing of things which are put into one's hands: it is the expression of freshness, intelligence and devotion through skill; and these qualities can be transferred only when one has them in abundance.

"The jaded man, however conscientious, cannot give his work the element of interest and of power which the man of fresh spirits puts into it. In fact, fatigue is fatal to excellence of work. When a man tires of his work he is no longer able to do it well, no matter how conscientious he may be. The secret of growth is the constant renewal of one's interest in what he is doing. The explanation of arrested development and of decline is the ebb of the tide of interest in one's work. The man whose interest is fresh is always in the way of development, and must, by a psychological law, not only retain but enlarge his fund of original power. So long as a man cares supremely for the thing he is doing, and does it because it is a pleasure to him, he will not only do it well, but with increasing efficiency. This is a prime law of the working world, and must be taken into account by every man who wishes to get the most and best out of himself, and the best and most out of others.

"It is for this reason that rest is absolutely essential; it is for this reason that vacations have come to be recognized as forming an integral part of the working year, and not as simple expressions of philanthropic interest in others.

"A man must go to a distance from his work and the field in which he does it to see either in true perspective. The tired mind loses the power of judging accurately, either its own efficiency or the best methods by which that efficiency can be expressed; it has been held so long and so closely to its task that it can no longer see the task in its entirety; it becomes absorbed in details. It is essential to deal with details thoroughly and skilfully, but the great workman is not made by his mastery of details; that which gives his work its power is the continual vision of the completed task which enables him to adjust each part to its fellow, and to charge the details with the informing spirit of the whole; for the man who deals with the highest skill with any kind of work is not only a manual but a spiritual worker. He is, above all, a builder and an architect. He knows how to lay the foundations, but he has continually in mind the completed structure; and so he works by the inspiration of an idea as well as by the guidance of a rule. To get away from one's work and look at it from a distance is as essential as to take a vacation from it. When work begins to press too keenly, and to drive the worker instead of inspiring him, it is time to drop the work and flee from it; for the sense of pressure is the beginning of slavery.

"In a word, work needs to be continually spiritualized if it is to be saved from drudgery. The drudge has conscience and devotion, but lacks insight, freshness, power, joy and the ability to grow. The world is full of painstaking, overburdened people; what it needs is an army of fresh, enthusiastic workers, full of the contagion of the spirit of joy in work. In the great army of drudges there are many whom conditions have fixed in their places, and who cannot escape into the freedom of intelligent and spontaneous work; but there are many more who are drudges simply from lack of intelligence in regard to their work, who need to be emancipated, not by being set free from the necessity of working, but by gaining a true idea of what work stands for in human education, and what it means to the individual worker."

The inner half of every cloud
Is bright and shining;
I therefore turn my clouds about,
And always wear them inside out,
To show the lining.

—*The Evangelist.*

EDITORIAL NOTES.

EDUCATIONAL NUMBER.—We devote quite a good deal of space in this issue of the MIDLAND to descriptive announcements of a number of the Schools of Pharmacy within the territory most thoroughly covered by our subscription list. We take pleasure in making the September issue a sort of educational number, thereby showing in a most practical way our interest in the education of young men to be good pharmacists, and contributing our share in bringing to their attention the several schools in which such education may be secured.

* * *

THE MODEL PHARMACY LAW.—Persons interested in the Model Pharmacy Law, adopted at the last meeting of the American Pharmaceutical Association, can procure copies of the same, free, by addressing J. H. Beal, Scio, Ohio.

* * *

IT is with profound regret that we note the death of the Misses Lowe, daughters of Prof. Clement B. Lowe, of the Philadelphia College of Pharmacy.

The young ladies were bathing with friends at Ocean City, on July 31st, and in some unaccountable manner were carried out by a strong under current into the ocean and drowned.

Prof. Lowe and the members of his family have the sympathy of many professional friends in this and other countries.

* * *

THE Board of Pharmacy of North Carolina has, during the current year, abandoned the practice of issuing certificates of registration on diplomas from colleges of pharmacy. This is a wise and proper step. The examination given by any State board should possess no terrors whatever to a graduate from any reputable college of pharmacy. Boards of pharmacy have a legitimate field in determining to their own satisfaction, the competency of any individual for the practice of pharmacy, and this fact should be determined irrespective of a diploma from any school.

* * *

OUR free want column is proving to be a popular method of communication between pharmacists, and we offer space in this department to clerks seeking positions, proprietors in want of assistants, and those having stores or merchandise for sale. Frequent inquiries are received at the editor's office for competent clerks. Our facilities for supplying the demand are necessarily limited, and a much more satisfactory method will be found in making use of our want pages.

* * *

WE are pleased to note the return of Messrs. G. L. Hechler and Geo. W. Voss, of Cleveland, from a three months' tour of Europe. They report having had a most delightful trip, with no unpleasant incidents to mar its interest and enjoyment.

We beg to acknowledge our indebtedness to Mr. Voss for his very interesting and instructive letters written solely for the readers of the MIDLAND. These letters received a great many favorable comments and were highly appreciated. A good many pharmacists are like our friend Voss, having a talent for communicating their ideas and observations to others, but are rolling their genius in a napkin and hiding it where it will do no good. Mr. Voss has shown what he can do; let others follow his example.

* * *

PHARMACY IN PORTO RICO.—The United States Government has provided regulations for the sale of drugs, poisons and patent medicines in this island, the code taking effect July 1st, 1900.

It is a practical revision of the former Spanish law. All formulas for pharmaceutical preparations which have not been published, must be stamped with the number corresponding to a copy deposited with the Board of Health.

The matter of counter prescribing seems to be definitely settled without room for controversy, in the following clause: "No pharmacist not a legally qualified physician shall prescribe for the sick." The doctors of Porto Rico have a clear field if this portion of the code is enforced, as no doubt it will be.

The sale of poisons is carefully guarded. They may be sold in containers, carefully labeled with the name of the article, or, if dispensed on a prescription, the latter must be numbered and the name of the prescriber written thereon and the name of the dispenser must also be written.

The definition of a poison is as vague as that found in most of the State laws; "pharmacists must not sell arsenic, strychnine or their compounds, or other drugs commonly known as deadly poisons, except on the prescription of a legally qualified

Digitized by Google

physician." The regulation further provides for the registration, or rather how the record of all sales of poisons must be kept. Ownership of prescriptions is fully vested in the pharmacist, as, "pharmacists must file all prescriptions dispensed by them."

Penalties for violation of any of the provisions of the code are from $10.00 to $200.00, or imprisonment from five to ninety days, or both, at the option of the court. District courts have jurisdiction over all cases under this order.

* * *

ON another page of the MIDLAND we publish for the information of our readers a revised list of the secretaries of the several boards of pharmacy, giving also the term of service of each. The study of this list, so far as time service is concerned, is quite interesting. G. F. Underhill, of New Hampshire, heads the list with a period of twenty-five years as secretary of the board of that State. Then comes W. Simpson, of North Carolina, with nineteen years, followed closely by E. B. Heimstreet, of Wisconsin, with eighteen; E. S. Dawson, of New York State, with fifteen; E. R. Beckwith, of Virginia, with fourteen; E. P. Galt, of Alabama, H. G. Webster, of Minnesota, and W. R. Ogier, of Ohio, each with thirteen years; W. S. Parker, of North Dakota, has served for nine years; W. W. Kerr, of Arkansas, C. D. Sypherd, of Delaware, W. C. Porterfield, of New Mexico, and C. H. McCoy, of Utah, each eight years, and C. T. George, of Pennsylvania, seven years. The remainder having served from five years downward, fourteen being on their first year.

The indications point to the fact that boards of pharmacy are inclined to retain in the chief office of the board men who have become familiar with their duties, and the members of such boards know that the office properly conducted is no sinecure.

* * *

THE Illinois Board of Pharmacy not long since determined to lay its hands upon the opium joints of Chicago. A Chinaman, Yee Way, kept a laundry in that city, and by way of a side issue, a den for opium smoking. A member of the Board of Pharmacy caused his arrest, and he was convicted by the police magistrate, for selling the drug in violation of the State pharmacy act.

Yee Way appealed to the Cook County Criminal Court, which confirmed the judgment of the magistrate. A second appeal to the Circuit Court was then taken, and again the original verdict was sustained.

The plaintiff, in his appeal, claimed that he was not keeping a drug store, but a laundry in which he sold opium for smoking purposes, and for that reason the pharmacy law did not apply to his place of business, moreover that opium for smoking had not been shown to be a drug, medicine or poison, and that the State had not made out a case against him.

We quote from the decision of the Circuit Judge on these points: "The statute, in defining the term drug store or pharmacy, says that it shall mean a store, shop, or other place of business where drugs, medicines or poisons are compounded, dispensed, or sold at retail. A laundry is a place of business. Opium is commonly and generally known as a drug, medicine and poison. Webster says it is a stimulant narcotic poison, and is smoked with baneful effects as an intoxicant. The evidence shows that plaintiff in error kept a place of business, a laundry, and that he sold opium from that place of business at retail, and we are, therefore, of the opinion that so far as this contention is concerned, plaintiff in error comes within the definition of the statute.

"What we have said as to what opium is commonly and generally known to be, and the evidence recited, is, we think, a sufficient answer to the claim that the prosecution failed to make a case, because it did not prove that opium used for smoking was a drug, medicine or a poison."

This is an important decision in general, and to boards of pharmacy in particular, in those States having large cities with a considerable population of Orientals addicted to opium smoking. We have no recollection of a similar attempt being previously made for the suppression of this traffic, but we see no reason why these places should be exempt from the force of the law. Evidently any community would be infinitely better off without them.

* * *

FOR APPLICANTS FOR STATE BOARD EXAMINATIONS.

In filing your application, wait until the limit has expired and then denounce the board for being arbitrary in declining it.

—

Get letters of recommendation from members of Congress, legislators of your district, county officers, ministers, physicians and school teachers, then have as many as possible call on the Secretary and urge him to see that you are passed. The

Digitized by Google

law says you must pass a satisfactory examination, but a little matter of that kind is easily overcome.

—

Study all the books, including quiz compends, you can secure for one month before the examination, and after you have failed, write the board that you were not given a fair chance.

—

During the examination, let your eyes wander about the room at frequent intervals. Walls have been heard to speak quite entertainingly.

—

Gaze longingly at the ceiling of the hall with that far away, inquiring look in your eyes. The "spirit" may tell you the proper answer to some of the questions that you feel you don't know.

—

When asked how paregoric is made, say that you "always consult the dispensatory when in doubt." This reply will insure your receiving a certificate.

—

Write your answers in a miserable, scrawling hand, with a blunt pencil, and as close as you can crowd the letters. This indicates that you have a great deal to communicate on every subject, and the more difficult it is to decipher the better are your chances of success.

—

Advise each member of the board that you have bought a store, or that you have a good position waiting for you, and that your sister or mother is depending on your earnings to get bread. The "sympathy racket" works when all other means fail.

—

Carry to the examination room, dose books, note books, etc., and write a full list of answers to questions on your linen. These precautions have helped some young men "to get through" before the examination was over.

* * *

THE UNIVERSITY'S NEW DEPARTMENT.

While the University of Chicago and other American colleges have introduced in their curricula special courses designed to better fit their graduates for business careers, the University of the City of New York is the first American institution of learning, we believe, to establish a regular school of commerce, accounts and finance—that is, this will from now on form a department of the university, like a law or a medical school, fully equipped with a corps of professors and other instructors of its own.

In no sense does this new department take the place of the so-called "commercial college" or "business college," however useful these institutions may have been and are in our educational system, and only in slight part will it perform any of the functions of these. Its object, if we mistake not, is not to fit young men to become wage earners as accountants, clerks and secretaries, but to educate them for business in its highest sense—to render them competent for intelligent leadership in the commercial and financial world. There has long been need of just this sort of education, and it is most gratifying to note that the new institution has first come into existence here in New York, where the field for the graduate is the largest and most inviting. It was wise, too, for Chancellor MacCracken to call to his aid in the preliminary work practical business men of the highest intelligence, men of experience and progressive ideas who know the needs of the business world in this regard.

As the *Commercial* has before remarked, the trade expansion of the United States now going on and foreshadowed makes highly educated and highly trained business men a necessity more pressing than ever before in our history. And it is therefore a matter for especial congratulation that the best educators of the country are keenly appreciative of its needs and quick to provide the means for meeting them.—*N. Y. Commercial.*

NOT only so, but the colleges of pharmacy recognizing the value of commercial training for pharmacists, are providing courses of instruction in the various phases of business, so that students may secure during their professional studies sufficient knowledge of the methods of conducting their business to enable them to do so successfully. This is also a sign of the times.—[ED.]

RED CLOVER BLOSSOMS

ASSOCIATION MEETINGS.

The Columbus Druggists' Association held an outdoor meeting at Collins's Garden on August 20th. About thirty members were present. Two new members were elected to membership, Gottleib Lindeman and S. W. Cox. Following the business session was a bowling contest between the members from the several sections of the city, the North Side playing the South Side and the East Side playing the West Side Druggists. The Southerners scooped the Northerners and the Orientals defeated the Occidentals by a close score. A pleasant afternoon was spent, and it is pleasing to note that this organization is one of the best in every respect in this part of the country.

The British Pharmaceutical conference opened its thirty-seventh annual session in London on July 23d. We take from the *Phar. Era* the following extract of the address of the President, Mr. E. M. Holmes, which will give some idea of the condition of pharmacy in Great Britain.

Mr. Holmes dealt first with the great progress which had been made during the century in chemistry and then touched on the general progress in science. From this he passed to the position of pharmacy in this country, pointing out that of the 15,500 registered chemists in the kingdom, scarcely one-tenth derived their incomes from the practice of pure pharmacy; the remainder living out of the general trade and a small number depending largely on counter prescribing. In some parts of Scotland there was a fair proportion of genuine pharmacy and also in a less degree in certain parts of England, but this only obtained where doctors did not dispense for their patients. There was little doubt that the practice of medicine and pharmacy by the same individual was disadvantageous to both professions and to the community.

The cry of the present day was for cheapness, but in drugs, where purity was so essential, this was a mistake. The recent contamination of phosphate of sodium with arsenic was due to the use in course of manufacture of a cheap sulphuric acid containing arsenic. In countries where a legal tariff of charges for medicine was in force no such danger occurred, as the manufacturer and retailer could each be sure of a reasonable profit.

With regard to the keeping distinct of the professions of pharmacy and medicine, he thought much could be done by a conference between the medical and pharmaceutical authorities. He considered that the two bodies, if working in conjuction, would be able to secure disciplinary powers which would enable them to deal with offenders.

With regard to the Pharmacopœia as a legal standard, he was of opinion that while all medicines should be judged according to the Pharmacopœia, it should not be held a standard for any articles sold for other purposes.

An international Pharmacopœia could scarcely yet be considered within the range of practicability, but he thought something might be done to render more uniform the various formulæ of different pharmacopœias as regards powerful and toxic preparations.

Mr. Holmes then proceeded to deal with the unjust assumption of the pharmacist's titles by limited companies, and passed from this subject to the consideration of proprietary medicines, condemning such of these as were of a quack nature.

The present state of pharmacy is an anomalous one. It consists partly of a trade and partly of a professional side. What the present day pharmacist needed most was a commercial education, such as was provided by the Philadelphia College of Pharmacy. The future of pharmacy, too, must depend largely on the ability of its followers to keep themselves up to date in scientific discoveries. There was much work to be done in connection with bacteriology, microscopy, radiography and other branches which the chemist and druggist should be competent to perform, and his very existence depended on his power of accommodating himself to new conditions.

Mr. Holmes concluded with a short notice of the year's obituary. This included Thos. Greenish, E. C. C. Stanford, Richard Reynolds, R. J. Downes and John Borland, all of whom have been noted in previous issues of the *Era*.

Hoxsie's Croup Cure

Is the Life Saver of Children.

It is a positive, swift and sure cure for Pneumonia, Croup, Coughs, Colds and Whooping Cough, while as a preventive of Membraneous Croup and Diphtheria, it has no equal.

COLORED LIGHTS — GREEK FIRE — SPONTANEOUS COMBUSTION.

By JOHN WEYER, Cincinnati, O.

For the general benefit of the drug trade, and particularly for druggists who handle or make up certain chemical mixtures known as "colored fires," we wish to call attention to certain dangerous and hazardous conditions.

First: Colored light mixtures are known to insurance men as "Greek Fire," and as a majority of general policy forms include that term along with benzine, gasoline, gun powder, dynamite, phosphorus, crude petorleum, etc., as articles which, if handled without permission, renders the policy void if fire results therefrom, we advise particular caution in handling or making up of such preparations.

Many accidents occur from the use of materials of a cheap or impure quality, as sulphur containing sulphurous acid, and nitrates containing free nitric acid.

Sulphur should not be used when shellac or some other safer substance may be used. If, however, sulphur be used at all, it should be previously washed and well dried. Nitrates of strontium and barium, chlorate of potassium, and any other chemicals used, should be of a *commercially pure* quality free from moisture.

The writer of this has had considerable experience in making up colored fires and never had an accident, but he always followed the above precautions and never carried any in stock. Most of the accidents that have come under our notice have started in green or blue lights. In the process of spontaneous combustion, at first the chemical action is slow, but as the heat is generated the combustion is more rapid, which continues until the temperature is raised to a certain point and the explosion occurs. The greater the bulk of material and the more closely confined—if the conditions for spontaneous combustion exist—the more certain it is.

It is a question whether the making up or handling of such compounds are not *always* hazardous. The manufacture of gun powder, dynamite, nitro-glycerine and pyrotechnics, by skilled workmen in their particular lines, is always done away from any danger to other people, and each particular part of the work separated by sufficient space, so that when an explosion does occur the damage shall be at a minimum.

To illustrate the particular danger arising from the use of cheap or impure materials, let me give some instances of damage in the vicinity of Cincinnati about the first days of July, of this year: A certain jobber or broker solicited orders for chemicals for making colored fires, furnishing them cheaper than the regular prices for such goods; a few persons on both sides of the Ohio river bought, and in every case, so far as we could learn, there was spontaneous combustion. One person's store was damaged seven or eight hundred dollars by a considerable bulk made up and set in a side case; another was damaged about fifty dollars by the sudden going off of a couple of jars of it, just finished, while setting on a table back of the prescription case; others were heard from but not investigated. The man who sold the chemicals made up a package for a friend and sent it to him by messenger—but it went off at the time of delivery, and before the messenger got away.

The manufacture of pyrotechnics has become a considerable business, in the hands of skilled workmen, who thoroughly understand all the precautions necessary to be observed, and they are prepared to make and handle colored lights with less danger to themselves and other people than the ordinary druggist. Therefore, when we consider the danger to life and property, the profits are not comensurate. Personal injuries or disfigurements for life can never be paid for in any amount of profit on the sale of such things for a day or two out of the year.

In the second division of this subject—Spontaneous Combustion—we will give a few specimens to illustrate conditions under which spontaneous combustion occurs. Several cases have come under our observation in which phosphorus, instead of being kept in a glass-stoppered bottle filled with water, and the bottle being kept in a tin can to prevent breakage, was kept only in a tin can with water. The water having separated, or the tin can having rusted and allowed the water to leak out, the phosphorus, on exposure to the atmosphere, ignited and there was damage. A case in which a small amount of red fire was left over: it was put in a can and set back in a side case near where a steam pipe went up; as the cold weather came on, steam was

Digitized by Google

turned on, and the red fire went off early in the morning, before the store was opened. Another case was where a box of saw dust was set under a faucet to catch the drippings from an oil can in the back room. Other cases have occurred in which the cause is not so clear; one in which waste paper and sweepings were put in a box under a sink—perhaps there may have been mice and matches. Another where a package of chlorate of potassium had been laid behind a shelf bottle after the bottle had been filled up.

These examples are presented for what they are worth, and with the hope that others who have had experience in the same line may be drawn out.

MEETINGS OF BOARDS OF PHARMACY.

OHIO.—Examinations of this board will be held in Columbus, on Tuesday and Wednesday, October 9th and 10th, 1900. Applications must be filed in the Secretary's office by Thursday evening, October 4th, or they will not be entered for this examination. This rule will be strictly adhered to. Send for blanks and circulars of information, stating whether you wish to take the examination for pharmacist or assistant pharmacist. W. R. Ogier, Secretary, Columbus, O.

INDIANA.—The next examination of this board will be held on Thursday, October 11th, at New Albany, in the St. Charles Hotel. The Secretary is C. E. Crecelius, New Albany, Ind.

ILLINOIS.—The next meeting of the Illinois Board of Pharmacy will be held in Chicago, on October 9th, at 9 A. M. Address L. T. Hoy, Secretary, Springfield, Ill., for information.

MINNESOTA.—This board will hold a meeting in Minneapolis on Tuesday, October 16th. Applicants who desire to be examined should address the Secretary, H. G. Webster, Minnesota, Minn.

"Looking out upon his age, he beheld young men crazed with a mania for money. He saw them refusing to cross the college threshold, closing the book, neglecting conversation, despising friendship, postponing marriage, that they might increase their goods. Yet he remembered that earth's most gifted children have been content with small means, performing their greatest exploits midst comparative poverty."—*Hillis.*

QUERIES.

"L. A. B.," Dayton, Ohio.—The Indiana Board of Pharmacy does not register without examination the holders of Ohio certificates but requires every person to take an examination preliminary to registration.

The secretary of this board is C. E. Crecelius, New Albany, Ind.

"J. E. D.," Cincinnati.—According to Meyer Bros., *Druggist* physicians are not pharmacists in Missouri unless their qualifications are proven to the satisfaction of the board of pharmacy.

The secretary of the Missouri board is A. T. Fleischman, Sedalia, Mo.

"H. F.," Chagrin Falls, Ohio.—Standard works on therapeutics recommend the combination of pepsin and bismuth subnitrate especially in intestinal diseases of children, but none of them so far as we have found explain why they may be profitably administered in combination.

The effects of pepsin are usually more satisfactory in diseases of children than of adults, presumably because it is given in relatively larger doses. We hazard an opinion that the great majority of physicians prescribe pepsin and bismuth from force of habit, and that similar results might be secured from bismuth alone.

"J. H. B.," Brampton, Can.—You can not be registered in Ohio on your diploma from the Ontario College of Pharmacy nor on your certificate of registration as pharmacist in New York City. Ohio certificate holders are given no recognition in New York, and the Ohio board can only register under the reciprocal idea.

You must pass the examination of the Ohio Board of Pharmacy.

"S. M. B.," Marysville, O.—You cannot be registered in Ohio for any period longer than three years. A certificate is renewable every three years provided the holder continues in the practice of pharmacy in this State and makes application for such renewal, and pays the fee of two dollars for pharmacist or one dollar for assistant pharmacist.

Sydney Smith said: "I have gout, asthma, and seven other maladies, but—am otherwise very well.

—

The MIDLAND DRUGGIST was greatly favored and much complimented by the following callers, who were in the city attending the recent successful Ohio State Fair:

Mr. Lamb, Kingston, Ohio.
Dr. J. Utley, Galena, Ohio.
R. J. Hooker, Roscoe, Ohio.
J. R. Conway, Osborn, Ohio.
A. M. Irwin, Gallipolis, Ohio.
W. H. Geyer, Norwich, Ohio.
H. L. Day, Blanchester, Ohio.
C. A. Heiner, Byesville, Ohio.
J. H. Moody, Thornville, Ohio.
F. B. Tissot, Mt. Vernon, Ohio.
A. W. Seebohm, Pomeroy, Ohio.
Fairfax West, New Vienna, Ohio.
R. H. Schrader, Nelsonville, Ohio.
Dr. D. H. Squires, Ashville, Ohio.
Dr. Chas. Steward, Ashville, Ohio.
Geo. W. Brown, Wilmington, Ohio.
M. E. J. Helmick, Muncie, Indiana.
Dr. C. B. Hempstead, Croton, Ohio.
G. W. H. Roberts, Tremont City, Ohio.

A. W. Toler, of Buckeye Store, Springfield, Ohio.

Mr. Ferguson, of Ferguson & Allen, of Brinkhaven, Ohio.

A. T. Baldwin, of Baldwin & Blackmer, Washington C. H., Ohio.

Joe Osborn, Mansfield, Ohio, is spending his vacation on the Lakes.

C. E. Pell, druggist, Canton, Ohio, made an assignment August 21st.

Chilcote & Co., druggists, Edon, Ohio, have dissolved partnership.

J. W. Shaff and family are away for a few weeks during September.

Mason & Dorr, druggists, of Marietta, Ohio, have dissolved partnership.

The National Extract Company, of Zanesville, Ohio, made an assignment August 29th to C. T. Marshall and H. W. Baker.

The drug store of D. I. Gasser, Newark, Ohio, was recently damaged by fire.

C. E. Hildebrand, New Washington, Ohio, is at Ada, taking a course in Pharmacy.

Karl G. Ayers, Perrysville, Ohio, is taking a course in Pharmacy at Ada, Ohio.

Dr. B. W. Pickering, Glouster, Ohio, was in Columbus Labor Day and favored us with a call.

F. A. Grandle, Centerburg, Ohio, recently returned from a ten days' outing at Niagara Falls.

Arthur Hursh, Mansfield, Ohio, is showing wisdom in taking a rest for a week "down on the farm."

W. W. Mowrer has closed his store at Mansfield, Ohio, and expects to reopen at Alliance, Ohio.

W. F. Harper, of Jamestown, Ohio, recently returned from a visit to his former (Indiana) home.

F. E. Taugher, of Croft & Taugher, Mt. Vernon, Ohio, has been spending two weeks along the Lakes.

V. O. Peters, Shelby, Ohio, has been visiting at his old home, in the northeastern part of the state.

R. F. Baker, Somerset, Ohio, was in attendance at the State Fair and made us a very pleasant call.

B. F. Carter and family, Mansfield, Ohio, recently returned from a three weeks' vacation at Lakeside.

Ira E. Finfrock, Mansfield, Ohio, recently spent a week at Lakeside. Ira is brown as an Indian.

John A. Nipgen, of Chillicothe, Ohio, recently returned from a pleasure trip to Mackinac and the Soo.

Mr. John C. Miller, the Xenia avenue druggist, Dayton, O., has returned from a pleasant visit to Detroit.

We regret to note the continued illness of Murray Scharfer, with Wyker's drug store, Fredericktown, Ohio.

Hanes & McLaughlin, Marysville, Ohio, have recently sold their store to W. P. Roberts, of Sunbury, Ohio.

Frank Bloor (Caldwell & Bloor), Mansfield, Ohio, enjoyed his vacation at Mackinac and other points of interest.

Digitized by Google

Will Dice, Mansfield, Ohio, recently returned from a two weeks' vacation spent at Mackinac and on the Lakes.

Lawrence Kettler, with W. S. Richardson, Marietta, O., is off duty for a few days, visiting various places in Ohio.

Mr. Joe Davis, of the Davis Pharmacy at Mt. Sterling, O., visited his brothers "Deck" and "Marve" at Marietta lately.

Mr. Waldo Wolfe, with the L. E. Eyman Drug Store at Lancaster, O., has taken a week "off," rusticating in the country.

John Rallison, formerly with J. A. Nipgen, Chillicothe, has accepted a position with Harry Christopher, Greenfield, Ohio.

B. F. Sproat, of Chillicothe, is back from the east, where he has been for the past month, and reports a very pleasant trip.

J. W. Headly and D. M. Odaffer, both prominent politicians as well as druggists, of Marion, Ohio, recently favored us with a call.

It is unofficially announced that the next annual meeting of the Ohio Pharmaceutical Association will be held in Dayton June, 1901.

Mr. Frank Templin, formerly with W. P. Jenkins, Dayton, O., has accepted a position with Ad. Bakhaus, Springfield, O., his former home.

Pearl Clewers, with W. F. Harper, of Jamestown, Ohio, has been spending a week's vacation at his former home, in Jackson, Ohio.

F. P. McGhee, of Wellston, Ohio, recently returned from Williamsport, where he was called on account of the sickness and death of his mother.

C. S. Gibson and wife, of McConellsville, will spend September at Chicago. During their absence the store will be in charge of Mr. Sam Gibson.

Mr. Charles Buchholtz, of the firm of Higgins & Buchholtz, Springfield, O., spent a few days of this month in business and pleasure at Toledo, O.

Harry Ward, manager of Hildebrand's drug store, New Washington, Ohio, recently returned from a two weeks' vacation at his old home, Girard, Pa.

Mr. Theo. Troupe, of Springfield, O., is spending a few weeks in New York and other eastern cities. The most pleasant event of his trip will be the meeting of his daughter, who returns from Europe after a sojourn of several months.

J. Halliday Cline, proprietor of Cline's Pharmacy at Athens, O., is home from Detroit, where he attended the annual encampment U. R. K. P.

E. E. Drury recently started a new drug store at Glouster, Ohio, which he has very nicely furnished and fully stocked. We predict success for him.

B. G. Ridgeway, Caldwell, Ohio, is confined at his home with a severe attack of inflammatory rheumatism. We hope to hear of his recovery soon.

B. S. Barrett, Rutland, Ohio, is home from a three weeks' tour of the Lake region. During his absence the business was conducted by "Deck" Barton.

Ambrose Middleton, proprietor of Middleton's Pharmacy at Malta, O., is back on duty after a few weeks' camp life at Lake Chute, on the Muskingum.

Mr. Edwin Robison, connected with the Arcade Drug Store, Springfield, is spending a vacation of several weeks at Macinac, Petoskey and surrounding points.

Mr. Otto Moosbrugger, the Riverdale Druggist, Dayton, O., has returned from a pleasant visit with friends, relatives and college chums at Philadelphia, Pa.

Mr. F. L. Walborn, the South Brown street druggist, Dayton, O., spent several weeks of the past month with friends and relatives at Carey, O., his old home.

Mr. Geo. Ort, of the firm of Ort & Klostermeyer, Charleston, W. Va., who has been on the sick list for some time is rapidly recovering at Clendenin, W. Va.

Mr. Price, of Kreig & Price, of Charleston, W. Va., has been spending a few weeks' vacation among his Ohio friends, where he met with a royal welcome.

John Neely, with Wm. Moss, Cambridge, O., is back on duty after a pleasant season at the seashore. "Big John" has the color, says he is feeling fine, and looks it, too.

We are informed of the death of Mrs. S. J. Rees, Georgetown, Ohio. She will be remembered as formerly being in the drug business at South Charleston, Ohio.

Fred Dysle, head clerk with J. W. Dysle & Co., Marietta, O., is back to the store after a pleasant visit to his home at Orrville. He also toured the lakes during his vacation.

We regret to learn of the death of Mr. John E. Wenz, the Dayton druggist, the latter part of last month. His serious illness was mentioned in the August MIDLAND.

Digitized by Google

Mr. G. A. Wilson, of Ely & Wilson, Barnesville, O., accompanied by his wife, spent a few weeks very pleasantly at Chatauqua and other points of interest in the East.

Mr. James Cooper, with F. D. Hall, Newark, O , who has been suffering with rheumatism for the past three or four weeks, has returned from Magnetic Springs, greatly improved.

Mr. Ben Fields, of Charleston, W. Va., is in possession of a new pet, in the shape of a young coon. The animal makes itself perfectly at home and attracts a great deal of attention.

E. Lincoln Neal, Gallipolis, Ohio, is off to the Lakes for an indefinite time. "Linc." has not been in good health, and it is to be hoped that he will find in the north the tonic required.

W. S. Richardson, of Marietta, visited with his family at Brooklyn, N. Y., during August, their visit being to Mr. Jarve McClosky, formerly of Clarington, O., now in business in Brooklyn.

Geo. Ribby, with A. B. Howson, Chillicothe, Ohio, has been spending two weeks at Niagara Falls and the Thousand Islands. Mr. Howson expects to soon take a pleasure trip in the same direction.

Jas. T. Blaser, of Waverly, Ohio, expects to start soon on a pleasure trip through West Virginia and Virginia to the coast, then by steamer to New York and Boston. He is anticipating a grand time.

W. W. Steele, of Chillicothe, Ohio, has recently returned from Buffalo Lithia Springs, Va., where he has been for the past two months for his health. He feels somewhat benefited by his trip and stay.

Thomas & Porterfield, of Charleston, W. Va., are now installed in their new business room, which presents a beautiful appearance. They are justly proud of their resurrection from the *ashes* of the past.

Mr. Bernard Kaithe, formerly with Crain & Co., Springfield, Ohio, has accepted a position as manager of the store of B. F. Stone, Chillicothe, Ohio. We predict a successful business under Mr. Kaithe's management.

Mrs. Mollie Nixon has returned from Atlantic City, and is to be found in her accustomed place in her bright, clean little pharmacy at New. Lexington, O. Ed ("McGinty") Elder was in charge during her absence.

W. F. Warning & Co. is the style of the new firm at Blanchester, Ohio. Mr. Warning has been in the drug business for some time and his new store is to be the finest in Clinton county. We predict a very successful future for him.

Mr. Will Hodson, who has been head clerk at the Jenkins Ludlow Street Store, Dayton, O., for several years past, has taken charge of the East Third Street store which Mr. Jenkins started recently, and reports that business is starting off very encouragingly.

Lightning recently struck the wareroom of J. R. Kelch, Tarlton, Ohio, setting it on fire and destroying the building and about ten tons of prepared sealing-wax. Mr. Kelch was very fortunate in having it mostly covered with insurance. He will rebuild at once.

Geo. H. Chapman of Zanesville, has gone for a few weeks to Colorado. George is a sufferer from asthma and hay fever, and has hopes that the climate will benefit him—a hope in which THE MIDLAND shares. Durlng his absence the store is in charge of his brother "Erve."

A druggist is occasionally a good politician and we mention that E. A. Squire, of Squire & Simons, Greenfield, Ohio, has moved his home to Hillsboro, Ohio, where he will soon become the treasurer of Highland county, to which position he was elected last fall. Mr. Squire will still retain his interests in Greenfieid.

J. W. Ackley, Granville, Ohio, seems to be having more than his share of misfortune. August 22nd one of his little daughters was overcome by heat, which resulted in quite an illness. August 29th another daughter was run over by a boy on a bicycle, which broke her leg in three places. Mr. Ackley has the sympathy of the MIDLAND in his misfortune.

W. E. Stansberry, of Middleport, is at Hot Springs, Arkansas, hoping to benefit his health. He has been suffering from severe attacks of rheumatism. It is to be hoped that the baths will give him the benefit he anxiously seeks. During his absence his retail business will be ably conducted by Mr. Adam Morhart, while Mr. Fred. Shriner will look after Mr. Morhart's business on the road.

Among the druggists that attended the National Encampment U. R. K. of P. at Detroit, Michigan, this month we mention: Kern Grantham and Will McKenzie, of Wilmington, Ohio; W. F. Clewers and family,

DUFFY'S PURE MALT WHISKEY....

The Standard of Excellence for half a century

An invaluable remedy in all Pulmonary Diseases, Coughs, Colds, Grip, Dyspepsia and Stomach Difficulties of every nature; the most efficient medicine for those troubles peculiar to the heated season, an invaluable tonic, a mild and healthful stimulant.

"IT ALWAYS HELPS, NEVER INJURES."

SOLD AND RECOMMENDED BY ALL DRUGGISTS.

of Jackson, Ohio; Mr. Louis May, of Waynesville, Ohio, and Jesse Blackmer, of the firm of Baldwin & Blackmer, Washington C. H., Ohio. They have returned, reporting a very pleasant and enjoyable time. The name of K. of P. is sufficient assurance of a good time.

President Young, of the Ohio Pharmaceutical Association, has appointed the following to represent the Association at the N. A. R. D. meeting in Detroit, September 12–14: G. L. Hechler and L. C. Hopp, Cleveland; Alfred DeLang, Cincinnati; Charles Toby, Troy; J. C. Firmin, Findlay, and John Byrne, Columbus. Dr. John Rauschkolb will represent the Columbus Druggists' Association.

The MIDLAND DRUGGIST is pleased to receive such acknowledgments of its usefulness to the druggists as the following shows:

Gentlemen: Through your valuable journal secured services of Adolph D. Carpenter, Coshocton, Ohio. Thanks. J. D. ALDRIDGE, M. D.
Sherrodsville, Onio.

What's the masculine for laundress? Chinaman, of course.

Death of William D. Matthews.

William D. Matthews died at Zanesville on Wednesday, August 29, aged 27 years. The immediate cause of death was cancerous tumor of the rectum. He had been employed for many years as head clerk at the Adams Pharmacy, and was at his post on the Tuesday preceding his death. Interment was made on Sunday, September 2, at Woodlawn Cemetery. The funeral cortege was composed of various orders of which he was a member, and of the members of his profession. It was the largest funeral seen in Zanesville for many days. Will was popular, and deservedly so; of even temperament, cheerful disposition, able and unassuming. THE MIDLAND extends sincere sympathy to his family and also to Mr. Adams, who will have difficulty in supplying his place. Good drug clerks, in the fullest sense of the term, are born, not made, and Will was one of them.

"What's Mrs. Breezely in such a stew about?"

"She asked the pleasure of Lieutenant Slick's company to tea, and he appeared on the scene with forty of his men."—*Tit-Bits.*

FIRST ANNUAL OUTING OF THE N. O. D. A.

The first annual outing of the Northern Ohio Druggists' Association, held at Manhattan Beach Tuesday, August 28, 1900, was a success. About five hundred druggists and their friends and families were present. Excursions came from Canton, Akron, Wooster and Youngstown.

There were base ball games, races and athletic contests of all kinds. The women did themselves proud in the base ball throwing contests. Although they did not have the speed of their husbands they knocked down more rag dolls. This was due to the fact that the man in charge of the rag doll booth was prejudiced and helped the women by standing before the dolls. They endeavored not to hit him, but some of the balls went straight for his head, and if he dodged them in time a doll fell.

The base ball game between the wholesale and retail druggists was an exciting one. The retailers won by the score of 7 to 3. The feature of the game was the home run of McLaren. As a result of the game the retailers smoked ten-cent cigars the rest of the day, and the wholesalers solaced themselves with stogies. All the prizes were judiciously awarded. The winners of the sack races were given cases of tanglefoot flypaper, and the winners of the contest among men for base ball throwing were given suspenders. Each contestant, when he received his prize, disappeared into the woods.

The picnic will be given next year in Cleveland.

Confide ye aye in Providence, for Providence is kind,
And bear ye a' life's changes wi' a calm and tranquil mind.
Though pressed and hemmed on every side, hae faith and ye'll win through:
For ilka blade o' grass keeps its ain drap o' dew.
—*James Ballentine.*

Ammonia is said to have been first analyzed by Joseph Priestly, in 1774. The substance was well known to the alchemists and by them was assigned many remarkable powers. Its pungency caused it to be regarded with much superstition.

"How much is this soap a cake?"
"Take two for 15 cents."
"Two? Do you think I buy soap by the wholesale?"—*Fliegende Blatter.*

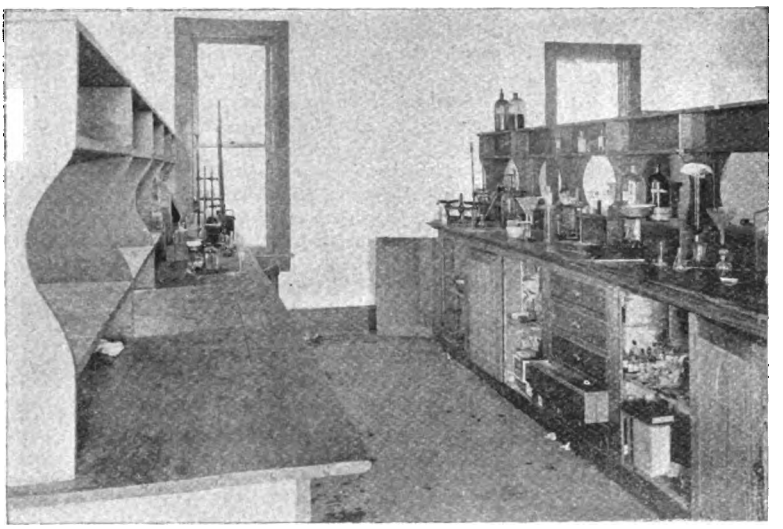
OHIO SCHOOLS OF PHARMACY.

A Brief Account of the Several Schools of Pharmacy, Giving General Requirements, Courses, Methods of Instruction, Expenses, Etc.

OHIO NORMAL UNIVERSITY SCHOOL OF PHARMACY, ADA, OHIO.

ADMISSION REQUIREMENTS—The O. S. P. A. conditions apply. Students are admitted *without* examination, but those who are found to be deficient in arithmetic, grammar and other common school branches, will be required to enter those classes in the Literary department of the University, and show a satisfactory proficiency before the degrees will be conferred. All literary branches, including book-keeping and penmanship, are free to those paying tuition in the Pharmacy Department.



SENIOR LABORATORY, O. N. U.

COURSES.—Two courses are provided in this department. The first leading to the degree of Ph. G. (Pharmaceutical Graduate) and the more extended course leading to the degree of Ph. C. (Pharmaceutical Chemist).

PH. G. COURSE.—This course requires an attendance of ten months, which may, at the student's pleasure, be divided into terms of ten or twenty weeks each. The first twenty weeks constituting the Junior course.

The branches embodied in the instructions are Practices of Pharmacy, 20 weeks; Materia Medica, 35 weeks; Chemistry, Inorganic, 20 weeks; Organic, Volumetric and Gravimetric, 20 weeks; Urine Analysis, Toxicology, Prescription Analysis and Compounding, 10 weeks. Laboratory work every day during the entire course.

Particular attention is given to laboratory work. Any student who fails to average three hours per day for six days each week will not receive his degree.

Minimum hours of instruction and laboratory work 1200, average 1400 to 1600.

PH. C. COURSE.—This course requires an attendance of at least eighteen months, which may be divided into terms of ten weeks each. The first ten months covers the regular work of the Ph. G. course. The remaining months are devoted to the study of Physics, Geology, Mathematics, Microscopy, Assaying and Advanced Chemical Research; the laboratory work is of the most practical character. The final work being elective, fitting the student for the particular line he may desire to pursue when through school. Minimum hours of instruction and laboratory work 2160, average 2500.

CREDITS.—Students who can present certificates of work in recognized schools of Pharmacy or Medicine, will be admitted to the advanced standing without examination. Credit will also be given for work in botany and chemistry in Universities or other schools, when accompanied with practical laboratory work. Applicants for admission claiming such credits but who are not provided with certificates may be admitted to advanced standing by special examination.

SPECIAL STUDENTS.—Students who can not enter at the opening of a term may be admitted at any time as "Special" students

Digitized by Google

until the opening of the next regular term. No extra fee for private tutors.

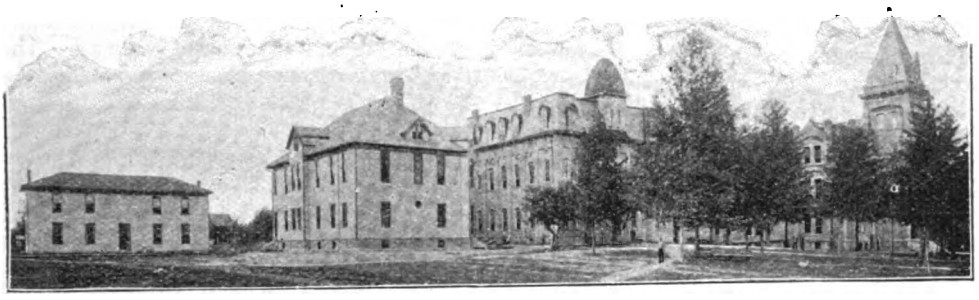
METHOD OF INSTRUCTION. — Lectures, Recitations, Quizzes and Laboratory Instruction.

EXAMINATION.—Written examinations are held at the end of each term in all branches. Special examinations are held as necessity demands.

EXPENSES.—The minimum expense for the Ph. G. course is as follows: Tuition, for full course, $60.00. Per term of ten weeks, $16.00. Board and room rent, $140.00. Per term of ten weeks, $20.00. Books, $30.00; Laboratory drugs and chemicals, $30.00; Light and Fuel (estimated) $20.00; Graduation, $3.00.

LABORATORIES.—The department is provided with Four laboratories. For the equipment see University catalogue.

OUR GUARANTEE.—We guarantee everything to be as represented. We court the fullest investigation. Over 1,000 young men engaged in the Drug trade in Ohio,



CAMPUS, O. N. U.

weeks, $16.00. Board and rent, ten months, $80.00. Per term of ten weeks, $20.00. Books, $15.00; Laboratory drugs and chemicals, $15.00; Light and Fuel, $10.00; Graduation, $3.00. Tuition, board and room rent for either Junior or Senior course, $72.00.

The minimum expense of the Ph. C. course is as follows: Tuition, $105.00; Per term have attended our School of Pharmacy, and we regard this fact as our best recommendation. We refer you to them; they will be glad to tell you of the strict economy of a course under our instructions, and the success of our methods.

ANNUAL CATALOGUE.—For catalogue, and further particulars, address

B. S. YOUNG, Ada, O.

CINCINNATI COLLEGE OF PHARMACY,

THE history of the Cincinnati College of Pharmacy may fairly be said to date from the act of incorporation of March 23d, 1850.

Fifty years ago the opportunities for the interchange of thought were extremely limited, and consequently the diffusion and cultivation of the science of pharmacy was of necessity slow. Notwithstanding the many difficulties encountered and the great obstacles to overcome, the institution had a steady and substantial growth. Its career of usefulness and success has been remarkable. The Cincinnati College of Pharmacy from its infancy has been recognized a prime factor in matters pertaining to pharmacy, and to-day stands as the recognized leader in true pharmaceutical education.

THE COLLEGE BUILDING.

The Building is centrally located and readily reached from all the suburbs by a perfect system of electric street railway. The College building is large, well built and imposing in appearance.

The Chemical and Pharmaceutical Laboratories are located on the the third floor and are provided with working tables completely equipped with apparatus insuring every opportunity for first-class instruction.

The Lecture Halls are located on the second floor and have ample seating capacity, well lighted and ventilated, insuring both health and comfort to the student.

The Microscopical Laboratory is located on the first floor and is provided with microscopes and all the implements neces-

Digitized by Google

sary for thorough instruction in this important and fascinating branch.

The Dispensing Laboratory is located on the top floor and filled with an equipment especially designed for instruction in the art of compounding and dispensing prescriptions, used to drill the student in reading and calculating doses, etc.

COURSES OF STUDIES.

The courses are so arranged as to meet every requirement of the present age without losing sight of the importance and advantage of a well grounded preliminary educatlon. The courses of study are logical, progressive and comprehensive. They are arranged to be both interesting and instructive; and at the same time cultivating a desire for correct pharmaceutical knowledge. This is accomplished by systematic daily installments, each day having its own individuality and yet forming an essential part of the course. Class Recitations and careful laboratory work promote the incentive for acquiring the knowledge necessary for the successful practice of pharmacy.

DEGREES IN GENERAL.

Prior to the session of 1898-'99 this college conferred the degree of Graduate of Pharmacy, following the prevailing custom existing among other colleges of pharmacy in this country. Preliminary service in the drug store being the *sine qua non* to admission to examinations entitling to this degree. The apprenticeship period, the essential of former requirements no longer existing, induced the management of this college to recognize the inconsistency of granting a degree of Ph. G. To issue this degree to-day would be upon false premises and consequently the management was warranted in withdrawing the degree of Graduate of Pharmacy in justice to those having met the previous requirements for this degree and also in justice to the institution as a teaching institution. In view of this fact the college now confers four degrees, each degree in conformity with the course pursued and the conditions required: Bachelor of Pharmacy, Phar. B.; Pharmaceutical Chemist, Phar. C.; Master of Pharmacy, Phar. M.; Doctor of Pharmacy, Phar. D.

The Cincinnati College of Pharmacy long ago realized that a division of the course into two periods with a long vacation between the two periods, was detrimental to the best interests of pharmaceutical education and consequently adopted a continuous course, covering the same period of time as formerly, from Matriculation to Graduation, for the degree of Graduate in Pharmacy. The results of the past few years have proven conclusively that such a course has been productive of better skilled and more thorough students of pharmacy, and therefore this institution will continue upon the same system with a longer period of time. This period is upon a University basis and consists of 34 full weeks.

Thr student's whole time is now occupied with college work and consequently the greatest opportunity is presented to him for special and systematic training. The school year of each course is divided into three terms, Fall, Winter and Spring. The Fall term commences September 17, 1900, and ends December 10, 1900; the Winter term commences December 10, 1900, and ends March 4, 1901; the Spring term ending in June, 1901, with the graduation exercises.

REQUIREMENTS FOR ADMISSION.

Students entering the institution for a degree must have a preliminary general education, at least equivalent to that required for admission to a public high school. These requirements are adopted by the Ohio State Pharmaceutical Association, and are also in accord with those advocated by the American Pharmaceutical Association.

VALUE OF DEGREES.

This institution sets its lowest standard for a degree upon the requirements advocated by most institutions for their highest degree. This institution aims to give a thorough and complete scientific education for the calling of professional pharmacy. To realize this aim, this college has inaugurated four courses, each course being distinct and separate, and progressive. Each course endowed with its own individuality and subject to specific conditions and requirements. Each course closing with a degree, specific in nature and embodying within itself the conditions and requirements of the course designated by it. The Cincinnati College of Pharmacy stands second to none and offers courses for the degree of Bachelor of Pharmacy, Pharmaceutical Chemist, Master of Pharmacy and Doctor of Pharmacy, upon specific conditions.

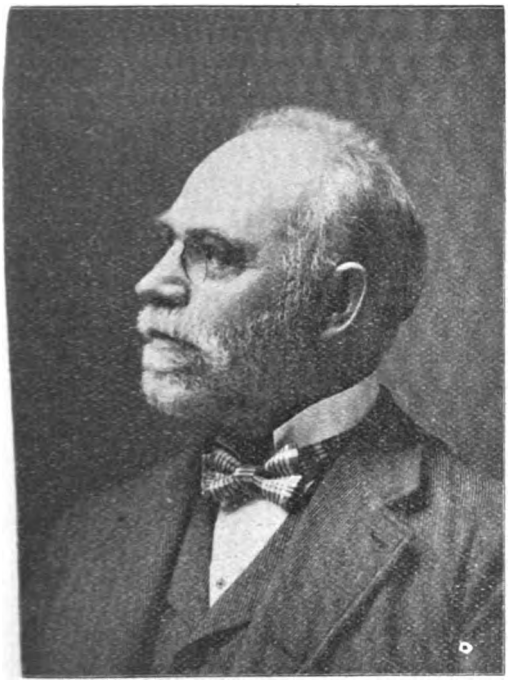
THE CLEVELAND SCHOOL OF PHARMACY.

ON October 6, 1882, Mr. E. A. Schellentrager, then President of the Cleveland Pharmaceutical Association, offered a resolution to the effect that a lecture course be instituted to aid the drug clerks of Cleveland in acquiring a thorough knowledge of of pharmacy and chemistry. Lectures were given once a week and a nominal fee of $5.00 was charged for the course of about fifty hours.

From this small beginning the school has gradually developed by small and gradual additions with each succeeding session, until to-day it has a full complement of teachers of ability and education, three well-equipped laboratories and a perfectly appointed lecture room. In addition there are two supply rooms, a weighing room and trustees' room.



E. A. SCHELLENTRAGER,
Founder and President, Cleveland School of Pharmacy.

At first the course consisted of lectures with experiments, demonstrations, etc., given in the meeting room of the Cleveland Pharmaceutical Association. As the School grew a large room was secured in the same building and finely fitted up for a chemical and pharmaceutical laboratory; then two smaller rooms were secured and used as weighing and stock rooms.

The School now occupies two entire floors of the Cleveland Gas Company's new stone structure in the heart of the business portion of the city, each floor measuring 40 by 75 feet, well heated, thoroughly lighted and ventilated, and exactly arranged to suit the requirements of a modern School of Pharmacy.

The new quarters were secured through the indefatigable energies of the Board of Trustees, especially of President Schellentrager and Treasurer Krauss. The present Board of Trustees consists of E. A. Schellentrager, G. L. Heckler, John Krause, Dr. E. B. Lane, Eugene R. Selzer, Prof. W. F. Kuder and Philip Lehr, all of whom have given liberally of their time and money to make the institution a success, and not one of these gentlemen receives or has received any remuneration for extremely valuable services rendered.

The faculty consists of Joseph Feil, Ph. G., Dean, Prof. of Physics and Chemistry, and Director of the Chemical Laboratory; Henry V. Arny, Ph. G., Ph. D., Prof. of Theoretical and Practical Pharmacy, and Director of the Pharmaceutical Laboratory; Robert A. Hatcher, Ph. G., M. D., Prof. of Materia Medica and Microscopy, Director of Microscopical Laboratory. Prof. H. W. Stecker and Prof. W. Kuder also give lectures occasionally.

Not a single member of the active faculty is at present engaged in the drug business, although all have had extensive experience in wholesale, retail and manufacturing establishments.

The fact that Profs. Feil, Arny and Hatcher devote all their time to teaching makes this school distinctly an educational establishment of unequalled character in the State.

OHIO STATE UNIVERSITY.

The College of Pharmacy.

THE Department of Pharmacy was created at the University immediately after the passage of the State law requiring the examination and registration of all persons desiring to engage in the practice of Pharmacy. Later, when the growth of the University made it advisable to form separate colleges, the College of Pharmacy was established. This college endeavors to offer to the student every facility for thorough training in all that pertains to the subject of pharmacy.

The opportunities for profitable employment to the skilled pharmaceutical chemist are many and his services are in constant demand. In addition to his usual work as a prescriptionist and dispensing chemist he is often found employed as chemist to the physician, expert in manufacturing establishment, general analyst, sanitary expert or in some of the many lines of industrial chemistry.

THE COURSES.

Two courses of study are offered in this college, viz.: The Short Course, extending over a period of two collegiate years; and the Long Course extending over a period of four collegiate years The object of the Short Course is to train students for the general work of the dispensing pharmacist. The Long Course, on the other hand, furnishes much more extensive and more thorough training, thus enabling the graduates to successfully follow any line of chemical or pharmaceutical work.

LONG COURSE.

This course has been prepared to meet the growing demand for men thoroughly trained in all lines of pharmaceutical work. Its graduates are not only thoroughly grounded in the principle and practice of Pharmacy, but also have a comprehensive knowledge of the allied sciences. They are thus able to enter wider fields of industry and to fill more responsible positions.

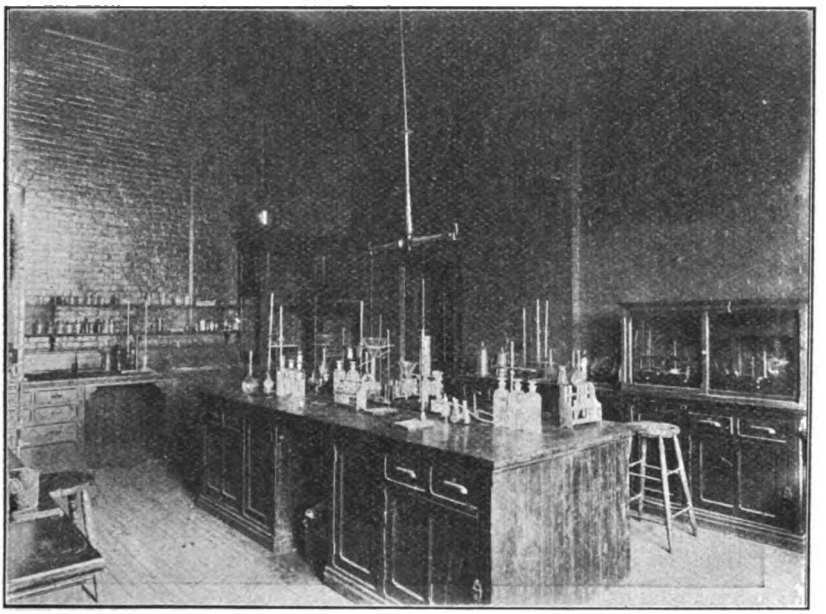
DISPENSING ROOM.

The course is mainly compulsory, only a small amount of elective work being offered in the fourth year. The chemical work begins in the first year with elementary chemistry and qualitative analysis, following in the second year with quantitative analysis. A full year is then devoted to the important subject of organic chemistry. In the fourth year the student is given an opportunity to choose between a number of courses, as sanitary analysis, metallurgical

Digitized by Google

chemistry, agricultural chemistry, advanced special work, etc. Toxicology is compulsory. The work in Pharmacy proper does not begin until the second year of the course. An entire year is devoted to the study of the methods and preparations of the Pharmacopœia. Another year to unofficial preparations, prescription practice and dispensing, and pharmaceutical assaying. The last year to a study of the alkaloids, the synthetic preparations, and to pharmaceutical chemistry.

The courses in Physics, Physiology and Botany are arranged to furnish the student with such training in these sciences as will have a practical bearing upon the work of a pharmacist.



LABORATORY FOR ADVANCED WORK IN PHARMACY.

As a requisite for graduation, each candidate must present an acceptable thesis, embodying the results of a special study. The subject of this study must lie within the field of Pharmacy, and must be announced to the President of the University not later than the beginning of the second term of the fourth year.

On the satisfactory completion of the course, the student is granted the degree of Bachelor of Science (B. Sc.) in Pharmacy.

SHORT COURSE.

This course is arranged for students who wish to prepare themselves in as short a time as possible for the duties of the dispensing pharmacist. It is also possible for students to enter this course who cannot meet the entrance requirements of the long course. Students who complete the work satisfactorily will have no trouble in passing the examination given by the State Board of Pharmacy.

The greatest amount of time is devoted to Chemistry and Pharmacy, each of which is studied throughout the conrse. The student also acquires sufficient knowledge of Latin to enable him to understand pharmaceutical and medicinal terms. Physics, Physiology and Botany receive due attention. On the satisfactory completion of this course the student is granted a certificate of "Pharmaceutical Chemist."

THE LABORATORIES.

The several laboratories, Pharmaceutical, Chemical, Physical, Botanical and Physiological are all splendidly equipped, and offer advantages for special training which are not exceeded. All are large enough to permit each student to have a working place exclusively his own, and all are in charge of competent instructors.

Catalogues and detail information will be cheerfully furnished on application to the President of the University or the Dean of the College.

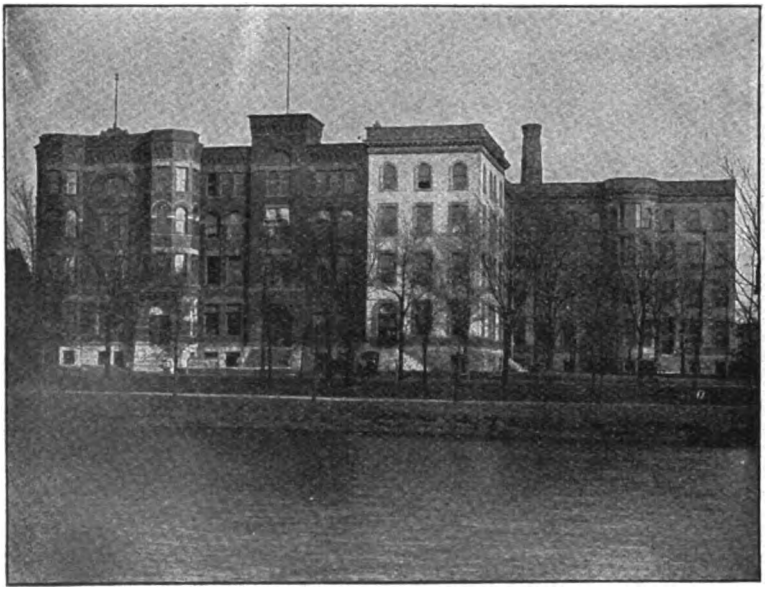
THE OHIO MEDICAL UNIVERSITY.

RECOGNIZING Medicine as the parent of Pharmacy, the Ohio Medical University, in order to preserve the validity of their relations, established a permanent department, which now enters upon its ninth year of usefulness. It should be known that this is the only medical institution in the United States having a Pharmacy and Dental department in conjunction, the advantage of which will at once be manifest to all.

By this union students are enabled to receive practical experience in the clinical dispensary, where medicines are by them compounded for the public and gratuitously for the poor.

The regular work contemplates the entire course in one of the departments, with the privilege of taking any single branch in each of the other departments.

The scholastic term of Pharmacy consists of two years of seven months each. In this new departure the Ohio Medical University submits that it has demonstrated both wisdom and expediency in dignifying and erecting into a distinct function a branch of learning so important; in this union and the methods of instruction, which vary so from the long trodden paths, they claim the applause due the pioneer.



OHIO MEDICAL UNIVERSITY.

The didactics dictated by modern experience requires the assignments of topics and recitations, a policy of unqualified advantage to students who are encouraged to rely upon their own mental resources.

Instead of as formerly practiced, rating students upon their final examinations, their *oral recitations*, together with final examinations, are taken as the gauge of merit. This we think an incentive to persistent and thorough devotion to study.

The faculty, impressed with the conviction that skill and dexterity in pharmaceutical manipulations must spring from actual experience, have made the laboratory feature to extend through the entire course.

They refer with pride and confidence to the success of the past eight years, and feel it a guarantee of future prosperity.

DEPARTMENTS OF THE UNIVERSITY.

The University comprises the departments of Pharmacy, Medicine and Dentistry. Each department has its own faculty, separate apartments for general class work, and shares in the greater facilities made possible by this union of allied forces.

LOCATION OF THE UNIVERSITY.

The University is centrally situated opposite Goodale Park. The Protestant Hospital joins it on the south.

Digitized by Google

UNIVERSITY BUILDINGS.

The main building is a four-story structure, exclusive of the basement, having a frontage and depth of fifty and one hundred and fifty feet respectively. It contains the offices, faculty room, museum, library, chemical, pharmacy and dental laboratories, five recitation rooms, a locker room, Y. M. C. A. room and a clinical amphitheatre.

THE LABORATORY BUILDING.

This joins the main on the north. It is forty-four by sixty-four feet and four stories, exclusive of the basement, and includes the anatomical and pathological amphitheatre, laboratory of histology and microscopy, bacteriologic laboratory and dissecting room.

PROF. G. H. MATSON,
Department of Pharmacy, Ohio Medical University.

THE NEW BUILDING.

This is forty by eighty feet, four stories, and includes several rooms especially designed for clinical purposes, the drug room and the dental operating room occupying the entire second floor, four large recitation rooms on third floor, and a large assembly hall on fourth floor. The basement is arranged for a gymnasium, being provided with baths, lockers and other essential equipments.

OHIO INSTITUTE OF PHARMACY.

INCORPORATED under the laws of Ohio in 1896. President, P. A. Mandabach, M. D. Object to afford those having neither the time nor the money for a regular course in pharmacy to secure a higher degree of proficiency while engaged in their vocations than is possible without some systematic course of study. The method employed is home study under the direction of the institute.

The advance in pharmacy and the multiplication of new remedies render it absolutely imperative for those who wish to become successful pharmacists to acquire a more thorough training in the various branches connected with this profession, and in this channel the Institute is lending its efforts with increasing success.

Those in charge of this course of study are constantly seeking to improve the methods which will enable their students to derive the greatest possible benefit while pursuing their studies in this course.

Persons who are interested in this system of instruction should write the president for prospectus and full particulars.

P. A. MANDABACH, M. D.,
Columbus, Ohio.

Why is the year 1900 not a leap year? It can be divided by four without a remainder.

A. The Gregorian rule for the calendar, adapted to make the year agree with the true solar year, is this:

Every year the number of which can be divided by four without a remainder is a leap year;—except the centesimal or centurial years, the years from which the century takes its name, which are *not* leap years unless they can be divided by four hundred, or by four with the two zeros suppressed.

1600 was a leap year; 1700, 1800, 1900 are not; 2000 will be.—*Ex.*

Perpetual devotion to what a man calls his business is only to be sustained by perpetual neglect of many other things. And it is not by any means certain that a man's business is the most important thing he has to do.—*Stevenson.*

Prescription-Dispensing Ethics.

If a druggist is alone in the store putting up two prescriptions, and there comes transient trade, not knowing what they want, is he supposed to leave his prescriptions and attend to the transient people, while his prescription patient is waiting?

We have asked several prominent pharmacists for expressions on this subject, and give their views below:

"Under the existing conditions from which pharmacy is suffering at the present time, the ideal pharmacist of former days must give way to the commercial merchant of to-day. Ninety per cent. of all prescriptions presented are composed of ready-made or of a proprietary character, and require but little skill in compounding and corresponding less close attention. Therefore, we should not hesitate to attend to the wants of a customer that might come in under such circumstances. Should it, on the other hand, be of the ten per cent. character, where it requires care and skill in the compounding, we would not allow our attention to be diverted during the compounding under any ordinary circumstance.

N. A. R. D. Notes.

Mr. Thos. Voegell, Chairman of the Executive Committee of the Minneapolis Retail Druggists' Association, has this to say about the conditions in his city: "I look back upon the work of our Association during the past year with much gratification. We are now a united and harmonious organization and have settled the cut-rate question in a way eminently satisfactory to all concerned. The department stores are well pleased, and our daily papers are no longer filled with cut-rate advertisements. Druggists have all taken down their cut-rate signs, and the dove of peace hovers over all. Business is good and we are all happy. I thoroughly believe that our plan of dealing with the cut-rate question is the only one that will prove satisfactory, because by it we enlist the hearty co-operation of all —the manufacturers, jobbers and retailers, which fact you will readily see must strengthen the movement in the right direction."

—

One of the largest New England proprietary manufacturers writes as follows to a brother-manufacturer: "As regards ——— of ———, he has been a good customer of ours for a long time, but when it developed that he could not qualify under existing conditions, we at once notified him that we could not fill further orders. Of course this seems like heroic treatment, but we are determined to give the new plan our most cordial support until it is definitely shown whether or not it is the long-hoped for solution of the cut-price difficulty."

—

Tennessee will be well represented at the Detroit Convention. The attendance from the South, generally, promises to be large.

—

The advertising by cutters of proprietaries to the consumer at less than the jobbing price is attracting the attention of proprietary manufacturers. It is becoming generally understood that this practice is the tap-root of the "substitution" evil.

—

The Secretary will gladly send free of expense, to any address, copies of Bulletin No. 9, the revised Constitution and By-Laws, or other literature issued by the Association.

The Seattle, Washington, Association, is doing very effective work.

—

A prominent member of the Knoxville, Tenn., Association writes: "Our scale of prices has been maintained to the letter, and if there has been one single violation it has failed to come to my notice. . . The partial restoration of prices has not only increased our business, but it has had a very soothing effect upon the trade; in other words, the customer is better satisfied to pay one price everywhere than he is to pay various prices at various stores."

—

The Montana Pharmaceutical Association, at its recent meeting, passed resolutions reaffirming the organization's loyalty to the N. A. R. D., and directing its Treasurer to pay the dues of its membership. The members were urged by resolution to advance the interests of the National Association, and arrangements were made whereby all the populous counties of the State are to be canvassed with this end in view."

—

The National Secretary is receiving letters from druggists who write that they are threatened with department store competition, and ask what they had better do. There can be but one answer, Organize. Don't wait, do it now. Cast your lot with the N. A. R. D. and let us work together. By such an arrangement you have everything to gain and nothing to lose except, possibly, the notion that your ideas of the drug business are the only ones worthy of consideration. The inability of individual druggists to relinquish this impression is costing the trade thousands of dollars every year. Get your neighbors together and talk organization; there is money in it.

—

The St. Cloud, Minn., Aassociation has joined the N. A. R. D. This organization includes all the druggists of St. Cloud, Melrose, Richmond, and Park Rapids.

—

Member of the Executive Committee, D. E. Prall, writes that the recent meeting of the Michigan Pharmaceutical Association was better attended than for years, and that interest seemed to center in N. A. R. D. work more than in any other section. Mr. Webber made a report in behalf of the delegates to the Cincinnati meeting and introduced a resolution endorsing the N. A. R. D., which was promptly voted. Mr. Prall made an appeal for financial support and suggested that Michigan should raise

Digitized by Google

$1,000.00, which should include the amount of the Association's dues. It was voted to make an effort to raise the $1,000.00 and give it to the N. A. R. D., conditionally that if this amount is turned over to the National Association an organizer is to be sent into Michigan. It was not stated how much of the money should be spent upon organization. Charles F. Mann was elected President, and Jas. W. Seeley Secretary of the Association. Messrs. Webber, Phillips and Brown were elected delegates to the Detroit Convention. Those who were present subscribed $177.00 toward the $1,000.00 to be secured.

—

The North Dakota Pharmaceutical Association held its annual meeting in Fargo, August 8th and 9th. The N. A. R. D. was reindorsed, appropriate resolutions in reference thereto having been adopted. In one respect this association surpasses all other state bodies; the total number of its registered pharmacists is only one hundred, yet the membership of the state organization is 100. The meeting was very successful.

—

The Paint, Oil and Drug Review in summarizing the condition of the trade says: "Dealers in drugs, in city and country, have not been in as good shape for years; this is due in part to the prosperity that came with the recent world-wide industrial revival and, partly to reforms secured through N. A. R. D. instrumentality."

—

The most recent accession to the ranks of the N. A. R. D. is the New Orleans Pharmaceutical Association, composed of the druggists of the city of New Orleans, La. Price cutting is reported as a serious evil in this city. Confidence in the efficiency of the National Association is generally felt.

To clean spatulas, keep handy a common building brick which the kiln has left soft; and when the blades are attacked by rust, rub them over the surface of this, using a little water if necessary and a degree of friction commensurate with the coating of rust.

The Cubans and the Ayers.

The Cuban teachers, in number about 1,500, who have been attending summer school at Harvard University, have been making a tour of some of the principal places of interest before their return home, and among others Lowell, Mass., was included in the itinerary. The accounts indicate that they had a royal good time at this typical Yankee town, among the places of special attraction being the establishment of the J. C. Ayer Co. Of course the Cubans knew a good deal about Ayer Remedies but it was a revelation to them to make a tour of the extensive plant where the celebrated Sarsaparilla, etc., is prepared. They were escorted to the "House of Ayer," where they had a reception with a welcoming speech by the Mayor of the city. They were treated to an elegant luncheon and afterward were escorted in companies through the different departments of the large establishment, each company being in charge of an interpreter, who made proper explanations. The visitors were presented with handsome souvenirs and went on their way evidently greatly pleased with the entertainment to which they had been so cordially treated.

Points in Practical Pharmacy.

BY FREDERICK DAVIS. *

CHANGE OF COLOR IN AN ARSENIC MIXTURE.

The first example is a mixture, apparently of great simplicity, but it was found that when dispensed by different pharmacists the color varied:

Liq. arsenicalis.....dram 1
Tr. card. co.....dram 4
Aq. ad.....ozs. 4
Fiat mistura.

Two specimens were sent for comparison, the one red, the other with a decided blue tint. The latter, by analysis, proved to have been prepared with ordinary in place of distilled water, with consequent change of color of the cochineal contained in the tr. card. co. by the salts contained in the ordinary water.

DECOMPOSITION OF CHLORAL BY ALKALIES.

Chloral hydrate.....drams 2
P. boracis.....drams 4
Syr. tolu..... oz. 1
Aq. ad..... ozs. 6
Fiat mistura.

It is a well-known fact that alkalies decompose chloral, producing chloroform. Borax does the same in hot solution, but not in cold. Hence insure the solubility of the borax in hot water, and permit the solution to become cold prior to adding the solution of chloral. That is, dissolve each separately and add the one to the other in cold solution.

EMULSION OF TURPENTINE.

Ol. terebinth.....drams 4
P. tragac ..... q. s.
Tr. aurantii..... dram 1
Aq. ad..... ozs. 4
Fiat mistura.

Here, if the whole of the turpentine be introduced into a perfectly dry bottle, the necessary quantity of powdered tragacanth (20 grains) shot into the centre of the turpentine without touching the sides of the bottle, and slightly shaken, then at least three-fourths of the distilled water added at one addition and quickly shaken, afterward adding the tr. aurant. and the remainder of the distilled water, a perfect mixture results, yet I have seen men vainly attempting to prepare the same by rubbing in a mortar.

* Read at a meeting of the Public and Poor Law Dispensers' Association of London.

ALKALOIDS?

Tr. nucis vom.....drams 2
Sp. ammon. co.....drams 4
Tr. card. co .....drams 4
Aq. ad..... ozs. 6
Fiat mistura.

In this mixture undoubtedly the prescriber had overlooked the fact that alkalies precipitate alkaloids; it would be necessary in this case to attach a "Shake the Bottle" label.

THIS DOES NOT PRECIPITATE.

Resin. podophylli..... dram 1
Sp. rectificat..... dram 1
Sp. ammon. arom.....drams 6
Syr. aurant..... oz. 1
Aq. ad..... ozs. 4
Fiat mistura.

There is no difficulty whatever about this mixture. Many dispensers, however, seem to imagine that after dissolving the resin in the spirit the addition of the sal volatile will immediately reprecipitate it; this is not so. Resin of podophyllin is more soluble in solution of ammonia than in spirit, hence it would be advisable to dissolve in the sp. amm. aromat. together with the spirit.

WHERE LIQ. ACID ARSEN. SHOULD BE USED.

Liq. arsenicalis.....drams 2
Liq. strych ..... dram 1
Tr. aurant.....drams 2
Sp. chlorof..... dram ½
Aq. ad..... ozs. 6
Fiat mistura.

If this mixture be prepared and kept for a day or two it will be found that a crystalline deposit takes place, due to the strychnine thrown out of solution by the pot. carb. in the liq. arsenicalis. This may be obviated by using liq. arsen. hydrochlor., but whether such substitution is permissible without consent of the prescriber I am not in a position to say.

THE RED COLORATION OF SALICYLIC ACID MIXTURES.

Acid salicylic.....drams 2
Sp. ether. nit.....drams 6
Syr. tolut..... oz. 1
Aq. ad..... ozs. 6
Fiat mistura.

Every dispenser knows that a mixture similar to the above assumes a red color. It appears, however, that a general opinion prevails that this color only occurs when artificial salicylic acid or impure salicylic acid is employed. Such is not a fact. I have experimented with a large number of chemically and physiologically pure salicylic acids, absolutely free from cresotic or paracresotic acids, and had obtained in each a

Digitized by Google

similar coloration. Whether a nytrosyl methyl ester compound is formed I leave you to judge.

DECOMPOSITION IN LITHIA MIXTURES.

Lithii salicylatis .....drams 2
Syr. tolut.....drams 4
Aq. anethi ad..... ozs. 6
Fiat mistura.

In this mixture if the lithium salicylate be neutral a brown coloration is developed in a few days. This, however, may be obviated by adding 4 grains of salicylic acid. No tendency to decomposition then occurs and no brown coloration is produced.

PRESERVING IODOFORM SOLUTIONS.

Iodoform.....dram 1
Ether. pur..... ozs. 2
Fiat nebula.

This spray, which is now much used by surgeons, when first prepared is of a pale canary color, but in a day or two a brown color is developed, produced by free iodine. This may be prevented by carefully corking; in other words, by excluding air, the oxygen of which in the presence of ether causes the liberation of iodine and the color referred to.

REACTION OF A LEAD COMPOUND.

Plumbi perox..... ozs. 2
Sodii hydrox .....drams 10
Glycerini.....drams 10
Ol. olivæ..... ozs. 2
Aq. ad..... ozs. 10
Fiat applicatio.

It was found in making this preparation, heat being used, that a pungent vapor was generated, and it was first thought that acrolein had resulted from the decomposed glycerin. This, however, was not the case, for upon further investigation the vapor evolved proved to be formic acid, and I presume, therefore, the reaction occurs as follows:

$2C_3H_5OH + 3O = 6HCHO_2 + 2H_2$.

I have ascertained by experiment that this reaction does take place if peroxide of lead, sodium hydroxide and glycerin be heated together.

LEAD AND ALUM POWDERS.

Plumbi acet.....
P. alum. ana .....oz. 1
Fiat pulvis.

If these two substances be rubbed together in a mortar the result is a moist mass. To prevent this and dispense as a powder, the substances must be separately dried and then mixed, or they may be separately powdered and then mixed on paper with a bone spatula. The formation of a pasty mass is, of course, easily accounted for by the interchange of radicles and setting free of the water of crystalization.

SUPPOSITORIES OF IRON AND TANNIN.

Ferri sulph. exsic.....grs. 3
Acid tannici..... gr. 1
Ol. theobrom..... q s.
Fiat suppos.

It will be observed that sooner or later tannate of iron will be produced, but a suppository having the color of oil of theobroma may be prepared by reducing the ferrous sulphate and the tannic acid to powder rubbing each separately with a little oil of theobroma with separate bone spatula, then adding the two to the remainder of the melted oil, and stirring and pouring into molds.

CAMPHO-PHENOL COMPOUNDS.

Camphor..... oz. 1
Phenol .....dram 1
Ft. application.

About half a dozen different chemical compounds may be obtained from camphor and phenol in varying proportions, of which, perhaps, the most simple is phenol camphoride.

PETROLATUM SUBSTITUTE.

Zinci oxidi.....dram 1
Saxolei purificati..... oz. 1
Fiat unguentum.

The only difficulty in this prescription is the intention of the prescriber respecting the latter ingredient. I take it if soft paraffin were employed little objection could be raised. Saxoleum purificatum meaning, of course, purified rock oil.

SILVER NITRATE INCOMPATIBLE.

Argenti nit.....dram 1
Sodii chlor.....dram 1
P. amyli ad ..... oz. 1
Ft. pulv. pro. insper.

It was found that after a time this powder assumed a dark color. It was at first thought that the formation of oxychloride of silver was the cause of this darkening, but upon analysis no oxychloride could be detected, but subchloride of silver was present to a marked degree.

The Tree of Life.

BY HENRY AUSTIN.

Plant patience in the garden of thy soul!
The roots are bitter, but the fruits are sweet;
And when, at last, it stands a tree complete,
Beneath its tender shade the burning heat
And burden of the day shall lose control—
Plant patience in the garden of thy soul!

—*Harper's Weekly.*

Digitized by Google

—the precipitate is immediately redissolved, but, if double these doses be ordered in the same volume of water, a dangerous heavy double compound of strychnine and mercury is thrown down. Bromide of potassium is frequently ordered with strychnine, and in ordinary doses gives no trouble. The following was made up, and large quantities of acidular crystals were formed. This mixture has caused death on one occasion within recent years (see "Art of Dispensing," page 192):

Pot. brom	ʒj.
Liq. strych	m xx.
Aq. dest	ʒj.

Iodide of potassium reacts similarly, but in small doses it does not cause any deposition. The following, after a few hours, deposited crystals in abundance:

Pot. iodidi	gr.xxx.
Liq. strych	m xx.
Aq. ad	ʒj.

Although it is possible to dispense small doses of sal volatile and strychnine, such is not the case with larger doses or in concentrated "drops." The mixture below deposited many crystals:

Liq. strychnine	ʒss.
Spt. am. co	ʒss.
Aq. dest. ad	ʒj.

A small quantity of potassium carbonate will cause decomposition of strychnine, but the potassium and sodium bicarbonates can be freely dispensed without any such result. Ammonium carbonate, even in large doses, does not affect solution of strychnine.

In every well-conducted pharmacy distilled water is always available and extensively used in dispensing, but in those places where the demand exceeds the supply it is well to remember that in most mixtures containing alkaloids the liability to chemical change is much greater in the presence of tap-water than distilled. This is well illustrated when one tries to make solution of strychnine or morphine with tap-water; nearly all the alkaloid is precipitated after a few hours.

Many cases of incompatibility might be quoted from the dispensing column of this journal in which the use of tap-water has been the cause of the correspondents' trouble, also of incompatibility with mixtures containing strychnine. Some of them are used in this note, which, I hope, will, to a certain extent, give confidence to dispensers when called upon to compound preparations of strychnine with alkalies or alkaline preparations.—*Chem. and Drug.*

Better Education.

There is a strong movement for better educated pharmacists, as a class. Not that there are no pharmacists competent and capable, but that the general tone of pharmacy is much below what it should be. The recent organization of Teaching Colleges of Pharmacy, which was made at Richmond in May, is simply one of the signs of the times. It will some day answer the question, already asked by some of our State Boards, "What is a *Recognized* College of Pharmacy?" Then the question of registration will be modified, and the character of the apprentices in pharmacy will be advanced. Medical men complain, with too much cause, that pharmacy has not kept pace with the advances in medicine and chemistry, and a better educated class of pharmacists will do much to hold and regain the confidence and patronage of physicians.—*Spatula.*

When compounding prescriptions do not let your mind wander off to something else, but remember that you hold in your hands the life of a human being, and act accordingly. Label every package of drugs sent out, and when a poison, be sure and give the antidote.

Laxative Bromo Quinine

Is a Valid Trade Mark, And Must Not Be Imitated.

The Paris Medicine Company won a suit in the United States Circuit Court for the District of Indiana, establishing the validity of **Laxative Bromo Quinine** as a trade mark, and perpetually enjoining the defendant, Newton C. Davis, of Frankfort, Indiana, from using these or any similar words to describe a medicinal preparation of his manufacture. On account of the popularity of **Laxative Bromo Quinine,** it still has a few imitations put up under similar names, which are calculated to deceive the public.

A rank imitation is manufactured by a concern at Detroit, and suit against them is now pending in the courts, and the indications point to a favorable decision in behalf of the Paris Medicine Company. The Paris Medicine Company will bring suit at once against any and all infringes of their product.

There is no excuse for druggists handling imitations of **Laxative Bromo Quinine,** as long as the Paris Medicine Company deal with the Druggists on the same liberal basis as heretofore.

The Genuine LAXATIVE BROMO QUININE is for sale by all Wholesale Druggists.

YOU MAY SUBSTITUTE Wampole's Milk Food for mother's milk without interfering with the baby's nutirition or digestion.

There is nothing in it that is not found in mother's milk; there is nothing in mother's milk that is not found in

WAMPOLE'S MILK FOOD.

It is thoroughly cooked, and ready for use by simply adding warm water.

Furnished only in glass containers which are securely sealed.

Samples cheerfully furnished wtthout charge. Correspondence on the subject of artificial foods solicited, which will receive prompt and courteous attention.

Made by **HENRY K. WAMPOLE & CO.** Specialists in Progressive Pharmacy.

Originators and Sole Manufacturers of

Wampole's Perfected and Tasteless Preparation of the Extract of Cod Liver Oil,

MAIN OFFICES AND LABORATORIES, PHILADELPHIA, U. S. A.

VICTIM OF DOCTOR AND DRUGCIST.

The French pharmaceutical and medical journals contain accounts of a fatal error which occurred recently in the practice of a Parisian physician, and for which, in almost any other country on the globe, except France, he alone would have been made responsible, but for which, under that peculiar quirck, or turn in the Gallic mind, which makes all men guilty until they prove themselves innocent, the apothecary and his clerk were also made to suffer. The facts, in brief, are:

Dr. T. wrote a prescription for a patient, calling for "20 gm. of tincture of Baume," to take at once in a cup of tea. The druggist filled it, the patient took it, and died promptly. The physician was arrested, tried and condemned to pay a fine aggregating 8,000 francs (about $1,600); the pharmacist to pay 6,400 francs ($1,300, about), and the clerk, 100 francs ($20).

In another case a physician wrote a prescription for a patient, and for some reason took a dose of it before it was sent to the party for whom it was prepared, and as a consequence found himself very ill. He recovered, and brought suit against the pharmacist, claiming 5,000 francs (about $1,000) damages. The case coming to trial, the court gave him 500 francs. It appeared on the trial that the doctor had written his prescription with a pencil instead of ink (which latter the law requires), and in such an illegible, scrawly hand that the court refused to punish the clerk who put up the remedy (which contained atropine), yet, illogically enough, as it seems to us, condemned the pharmacist to pay $100.

The French judges, all of them, and not a few of the German, seem to have a special grudge against pharmacists, and never miss an opportunity to give them a "whack."—*Nat. Drug.*

Electric Light and Eyesight.

After an investigation into the effect upon the eyesight of the incandescent electric and the incandescent gas lamp, the University of Heidelberg has decided that neither light, if properly placed, has any bad effect upon the eyes. On the question of lighting, the committee in charge decided that for the lighting of rooms, especially concert rooms and lecture halls, where many people remain for long periods at a time, the electric light is without doubt to be preferred to all others from a hygienic point of view.

German surgeons have discovered that the delicate membrane which lies inside of an eggshell will answer as well as bits of skin from a human being to start healing over by granulation, in open wounds which would not otherwise heal. The discovery was used for the first time in this country on a patient in the Seney Hospital in Brooklyn, and the trial of it has been most successful.—*Scientific American.*

HOW TO KEEP PLASTERS.

H. C. KNILL, PORT HURON, MICH.

Plasters should be kept at an ordinary temperature in a dry place; never keep them in the cellar or any place where they are apt to gather moisture, but exclude them from the air as much as possible in tin, wood or very heavy cardboard boxes. The only way I know of displaying spread plasters is in a show case, and then always in their original package; never put them in your window, as they are affected by the heat, and would be spoiled by the sun. Never dispense or sell any but the very best made, and those you know are up to strength and properly medicated; there is no money in buying cheap plasters, as they will spoil on your hands and will not give satisfaction to your customers; and then again, when you get a prescription from a doctor, you should know that the plaster dispensed is up to the standard of the United States Pharmacopœia, as the M. D. always expects to get the physiological effect of the plaster.

When selling plasters always tell your customers to wash and dry the parts thoroughly where the plaster is to be applied, and if they will take equal parts of ether and alcohol and apply to the parts by rubbing with the hands before applying the plaster, they will find it a great benefit, as it will open up the pores of the skin and allow the medication of the plaster to take immediate effect.

So far as spread plasters are concerned, the term dispensing has lost its earlier meaning, since the pharmacist of to-day is not called upon to prepare them, but dispenses spread plasters by handing them to his customers in good form and with proper directions for their use. This is true because of the modern machinery in use by the manufacturer, which makes them better, cheaper and more convenient for general use. The present custom is of advantage to all concerned, since time and trouble are saved for the pharmacist, and the customer is guaranteed an article possessing full strength as demanded by the United States Pharmacopœia, if the pharmacist is careful to buy from a reputable firm.

—*Red Cross Notes.*

In the school of life many branches of knowledge are taught; but the only philosophy that is worth anything, after all, is just the secret of making friends with our luck.—*Van Dyke.*

The Age of Aluminium.

There can be no doubt that, at a time not very distant, iron, in many of its now uncontested domains, will have to pass the scepter to another; the coming age will be the age of aluminium. The absolutely unavoidable consequence of the advance of the aluminium industry will be the annihilation of the copper industry. They cannot exist and prosper together, and the latter is doomed beyond any hope of recovery. Even now it is cheaper to convey an electric current through aluminium wires than through copper wires; aluminium castings cost less, and in many domestic and other uses copper has no chance of successfully competing.

—*N. Tesla in the Century.*

When one apologized to the Rev. Charles Marriott by saying: "I'm afraid I made a fool of myself last night," it could not have been very comforting to hear in reply: "My dear fellow, I assure you I observed nothing unusual." Nor could it have been wholly agreeable to the clergyman, who told a lady that he had once taken a little strychnine to clear his brain, when she asked him, "How soon did the effect pass off."

THE LEADING OPTICAL COLLEGE OF AMERICA.

It appears that one idle day the frog, the duck, the lamb, and the skunk started forth together to visit the show. Just what sort of a show it was the chronicler doesn't state. Anyway, it was something that the queerly assorted quartet was anxious to attend, and they hopped and waddled, and gambolled and trotted towards the big canvas enclosure with delighted throbs of anticipation. Finally they reached the door-tender, the frog leading the line. Well, the frog had a greenback and passed right in. The duck had a bill and followed the frog. The lamb had four quarters and followed the frog and duck. But the unfortunate skunk was left on the outside. He had only a scent, and that was bad. Naturally he turned away, feeling pretty blue. As he was slowly going back over the hill he met a hoop snake rolling along at a lively rate towards the show. The skunk greeted him, but the snake did not stop. "Don't interrupt me," he cried over his shoulder. "I've got to do a turn, and I'm a little late," and he rolled along. At the top of the hill the skunk noticed another old friend approaching. It was the sardine. "Hello!" cried the sardine. "What's the matter?" So the skunk told him. "I can guess how you feel about it," said the sardine, sympathetically. "I belong to the smelt family myself. But, say, old fellow, you come right back and go in with me—I've got a box." And the skunk and the sardine went back together.—*Can. Druggist.*

Dionine Analgesia.

At the last meeting of the Paris Academy of Medicine, Dr. Darier referred to the fact that oculists are frequently powerless to relieve certain classes of pain in the eye; cocaine in such cases being only momentarily effectual. He finds, however, that "Dionine," the hydrochloride of ethyl morphine, gives long and complete analgesia when applied in the form of a powder to the eye. Its only inconvenience is that it has a tendency to inflame the eyelids, and there is at first a little irritation in the eye, which disappears after a few minutes.

The "Allcock" Belladonna Plaster

The Extract of Belladonna leaves used in this Plaster is made especially for this Company by Parke, Davis & Co.

The advice of competent physicians has been followed in the amount of Belladonna used.

This plaster has been examined by many physicians and chemists who unite in saying it is the best they have seen, both in its medicinal qualities and its softness and pliability.

The "Allcock" Belladonna Yard Plaster

36 X 11 INCHES.

Full U. S. Pharmacopœia strength guaranteed.

ALLCOCK MANUFACTURING CO. (Successors) - Salesroom, 274 Canal Street, New York.

PHYSIOLOGICAL STANDARDIZATION.

Although the question of the physiological standardization of drugs was shelved at the recent Pharmacopœial Convention, this does not by any means dispose of it finally; for when we consider that almost all of our knowledge of the exact use of drugs has been determined by physiological experiment it is not unreasonable to look for the adoption of some method of estimating definitely the action of drugs on the human system by comparative experiments on animals.

The history of the principal drugs of both vegetable and animal origin shows that the indications for their use have been ultimately determined by the physiologists and not by the clinicians. The opponents of the physiological method make the objection that drugs act differently on animals and on men, but Professor Fraser, to whom we are indebted for the introduction of strophanthus and an extension of the medical uses of many other drugs through experiments on animals, has shown that this objection does not hold. It is true that there is an apparent difference of action in the case of belladonna which apparently exerts no effect upon the rabbit, while a small dose administered to a dog or a man accelerates at once the action of the pulse; but it is now known that the difference in action is due to a well understood physiological condition in the rabbit. The action of the drug is the same with all three, the belladonna paralyzing the power of the nerves controlling the heart. The vagus (or nerves controlling the heart) normally exerts but little action on the heart of the rabbit, and the ultimate effect of the drug is consequently not perceptible, though the paralyzing action of the drug on the vagus is the same.

The whole subject of the physiological action of drugs is one of the utmost interest to pharmacists, for its study is sure to result ultimately in the adoption of some standard method of estimating the strength of drugs by physiological experiment.

SENSE AND NONSENSE.

"Of plain sound sense life's current coin is made."
—*Young.*

"A little nonsense now and then
Is relished by the wisest men."—*Anon.*

(*When origin is known credit is given.*)

Christian Science.

Dear Christian Science people,
You are a funny folk;
The funniest things you tell us,
And swear they are no joke.

A discovery you've made
Astounding all creation;
Diseases don't exist,
They're just imagination!

Oh, what good news you bring,
How much it ought to please us,
That neither ache nor pain
Can any longer tease us.

And yet it's very queer,
And this in you I'm blaming,
That, when there's no disease,
To heal disease you're claiming.
—*The Living Church*

"We come now," said the campaign orator, pausing a moment to take a drink of water, "we come now to the marrow of the subject." "How do you know it is the marrow?" interrupted a jeering auditor near the door. "I feel it in my bones," retorted the orator. Hereupon the enthusiastic crowd cheered for five minutes, to the great and overwhelming confusion of the other fellow.—*Chicago Tribune.*

The pretty girl was admiring herself in the mirror over the soda fountain as she slowly sipped a hot chocolate. The soda fountain noticed her and whispered consolingly, to himself, "You are a beauty, I'll admit, but I have a pretty good phiz myself."

▲ ▲ ▲

Mother Goose Revived.

Sing a song of grocerdom, boss is full of rye;
Stock it is neglected, customers are shy;
When the store was opened, there wasn't anything
Fit for decent tables or to set before a king.
Clerk was mashing maiden, feeling very "funny,"
Boy was in the cellar, filling up on honey;
Boss was 'neath the counter, sleeping off the gin;
'Long came the sheriff's man and scooped the whole thing in.
Merchants' Review.

"Mind yoh talk, sonny," said Uncle Eben; "you kin git into trouble even by speakin' de truth when de truth doesn' happen ter be none o' yo' business.

The Fickle Maid.

"Why do you go to Vassar?"
I asked my heart's own queen.
"Because," she said, "I want to be
A little Vassarline."
But she changed her mind, the fickle maid,
As she'd done many times before;
'Twas not, she confessed, that she liked Vassar less,
But she really liked Bryn Mawr.
—*Harvard Lampoon.*

WAR TAXES.

RATES PROVIDED BY SCHEDULE B.

On medicinal proprietary articles, perfumery, cosmetics, hair and tooth preparations, cachous, etc., the retail price of which is

5 cents or less	.00⅛
Above 5 cents and not above 10 cents	.00¼
Above 10 cents and not above 15 cents	.00⅜
Above 15 cents and not above 25 cents	.00⅝
And for each additional 25 cents	.00⅝

On chewing gum or substitutes therefor, on each box, carton, jar or other package containing chewing gum, the actual retail value of which is not more than

$1.00	.04
For each additional $1.00	.01

On sparkling or still wines, when bottled for sale, upon each bottle of

One pint or less	.01
More than one pint	.02

Articles subject to stamp tax under Schedule B, are liable to tax when sold in what are termed bulk packages, as well as when sold in retail packages, and the value of the stamp or stamps to be affixed must correspond with and be proportionate to the price of a single retail package.

Dealers may retail directly to the consumer from such bulk packages as have been properly stamped by the manufacturer or importer, drawing from the same in quantities to suit their customers without any additional stamping, but the stamps attached to such bulk packages will only protect the original contents. If bulk packages are broken up by the dealer drawing off the contents into smaller vessels to be put upon his shelves, or otherwise kept for future sales, the contents so drawn off cease to be identified with the stamped package in which they were originally put up by the manufacturer or sold by the importer, and such contents so put up become liable to seizure if stamps are not affixed to them.

The contents of bulk packages liable to tax under Schedule B, which were in the hands of retailers on July 1, 1898, and therefore unstamped, must be stamped when sold at retail from said packages proportionately to the retail price of the whole package.

Articles liable to tax in the hands of a retail dealer who is not the manufacturer thereof, July 1, 1898, must be stamped by such retail dealer when he sells them at retail. In stamping such articles the retail price fixed by the manufacturer must be adhered to by the retail dealer.

RATES UNDER SCHEDULE A.

Editorial

MISSOURI PHARMACY LAW MUDDLE.

THE Missouri Board of Pharmacy finds itself in an embarrassing position from the discovery recently made that two sections of the pharmacy law of that state are in antagonism. Section 3037 of the act of 1889 exempted physicians from examination as pharmacists and gave them the privilege of registration as such on diplomas from colleges of medicine. Section 3052 of the act of 1895 provides for the examination of every person as a condition of registration, and was enacted for the express purpose of supplanting Section 3037 relating to the registration of physicians. Unfortunately the later amendment did not specifically repeal the former one and the Board of Pharmacy is at sea as to which Section is in force. It is rather singular that the amendment of 1895 has been accepted as the law of the state for five years or more without controversy and the question as to which Section should have precedence appears to have been un-necessarily raised by the Board of Pharmacy itself in an inquiry addressed to the Attorney-General of Missouri for an opinion upon the question at issue. He decided that both Sections were in force and that the Board must examine all applicants, except physicians, who were to be registered without examination, as provided in Section 3037, act of '89.

Digitized by Google

Herein we think the Board erred. It is not the duty, or the privilege, of the Attorney-General or the Board of Pharmacy of a State to interpret a law. That is the business of the Courts, and for this purpose, among others, Courts are constituted. The Board of Pharmacy should have exercised its deliberate judgment in a just and equitable construction of the law, and any person convinced that he, by such construction, was deprived of his rights, could have taken the matter into the Courts and a decision there secured would place at rest any controversy that arose. We submit that the opinion of the Attorney-General of Missouri has no specific force in law, and that the only method by which the status of the pharmacy law of that State may be definitely determined is by a decision of the Supreme Court. It is a well-known principle of law that when two statutes or parts of statutes enacted at separate times conflict the later one takes precedence over the earlier one. The Supreme Court of Ohio has decided this point in more than one instance, and particularly elaborates it in its decision in the case of the State v. the Commissioners of Shelby County, Ohio, 36 O. S., page 326. In this decision the only question apparently to receive consideration was, did the legislature intend that the later act should be the law? If we are correctly advised, this question is undisputed so far as the act of the General Assembly of Missouri in passing the amendment to the Missouri pharmacy law of 1895 is concerned for the entire effort of the pharmacists of that state was directed in securing the change embodied in Section 3052.

We think the Missouri Board of Pharmacy acted with undue haste in seeking an opinion from a source which is reported to be unfriendly instead of consulting a good attorney familiar with the principles of law and the decisions of Courts on similar questions in other states.

This controversy should teach those who attempt to secure new legislation or to amend existing Statutes to secure the services of a competent attorney who is familiar with the method of drawing up ready for presentation such proposed laws or changes, so that errors of this kind may be avoided. Too many of our pharmacy laws bear the marks of persons who are unfamiliar with legal forms, and the wonder is that more such difficulties have not arisen.

W. R. O.

INSURANCE ON RETAIL DRUG STORES.

THE subject of fire insurance is one that has received spasmodic attention from retail druggists for several years. The conviction among them is well nigh universal that the rates paid to regular stock companies for insurance are out of all proportion to the hazard involved. A natural result of such conviction is the search for a remedy. Few men expect to get something for nothing, but the vast majority protest vigorously against paying more for any commodity than it is worth, or more than some other individual or class pays for the same thing.

Retail druggists pay too much for their fire insurance. This assertion is capable of positive proof and is not made without ample foundation in fact.

The Retail Druggists' Assurance Association, of Cincinnati, Ohio, has been in existence for ten years, and the average ratio of losses for that period has been but two-fifths of the premiums paid, the rates being the same as those charged by regular stock companies. In other words, forty per cent. of stock company rates on drug stocks pays for losses and sixty per cent. is profit to the companies. Such margins offer sufficient inducements to tempt retail druggists to sell out their stores and go into the business of insuring drug stocks.

In the city of Cincinnati on nearly $100,000 of risks the loss in eight years was $114.00. The secretary of the Druggists Insurance Association makes the astounding statement, "We do not anticipate an average loss per year on all risks we are carrying in Ohio at over $1,500 and the amount of insurance is nearly one million dollars." He further states, "There is no doubt in my mind that the stock companies could carry retail drug risks at one-half the rates they now charge and still pay 25 per cent. to agents for securing the business." These statements are based on an experience of ten years in insuring drug stores.

The retail druggists of the United States carry about eighty millions of dollars insurance; on this they pay in premiums at least eight hundred and eighty thousand dollars. It costs not over forty per cent. average to pay all losses incurred, leaving a net profit to the insurance companies of five hundred and thirty thousand dollars, which amount is annually taken out of the scanty earnings of American druggists.

Digitized by Google

The Ohio Insurance Association does not write insurance outside the State of Ohio. It is a mutual association, pure and simple. It has no capital stock and the policy holders pay the regular stock rates when a policy is issued and at the end of a year the losses are figured up, the expenses paid and the surplus returned to the assured, either in cash or in credit on premiums for the ensuing year.

An organization for the sole purpose of insuring retail drug stocks with a cash capital sufficient to enable it to enter any State, comply with the insurance laws of that State, have a board of control of local retail druggists in charge of the business of that State, would be a most successful enterprise in a financial way as well as in the way of giving retail druggists first-class insurance at a comparatively small rate to what is now paid by them in every State in the Union. The business would roll into it as fast as it could be taken care of and an investment in the stock of such a company would pay good interest and be as safe as an investment in Government bonds.

In such a company the majority of the capital should be in the hands of retail druggists, in order that its affairs should be administered by those in perfect sympathy with the interests of its patrons so far as consistent with the welfare of the organization.

Unfortunately for this feature retail druggists have little surplus capital for outside investments, but distributed over a wide area of territory a capital of $200,000 could be raised by retail druggists alone in relatively small amounts, and if the matter could be presented to them in its real light it would not take long to secure it. This amount deposited with the Insurance Commissioner of the State which charters the company would enable it to write insurance in any State in the United States.

A scheme of this kind was projected in Ohio in 1895. A number of practical retail druggists who had given the question of insurance on drug stocks considerable study secured a charter from the State of Ohio providing for a capital stock of $200,000, and included a unique feature in making the policy holders participants in the profits of the company after providing for a fair return to the stockholders and a surplus sufficient to guarantee the solidity of the organization. It was the distinct purpose of the incorporators that the controlling interest in the company should be held by retail druggists, or by those whose interests were identical with theirs. This determination alone prevented the stock being fully taken soon after the incorporation papers were issued, for capitalists who had investigated the subject fully were satisfied as to the desirability of the stock as a profitable investment and stood ready to take the entire amount without special solicitation.

The insurance laws of Ohio are very rigid. The entire amount of the proposed capital of any insurance company must be deposited with the Insurance Department of the State before permission is given to write a single policy of insurance. This capital cannot be drawn upon, or in any manner impaired, and the laws of the State fully protect the insured in every particular.

If centers in different States were established under the supervision of retail druggists with a keen interest in this subject and some knowledge of the insurance business as it relates to druggists that the matter might be fully presented to the retail druggists of the country it is our conviction that this stock would be taken within three months and a strong company organized under the immediate control of representative men of ability in the retail drug business, and no more useful enterprise to the entire body of retail druggists can be conceived than this.

We hope to see the pharmaceutical press of the country take this matter in hand and urge its speedy consummation. The National Association of Retail Druggists could also with entire propriety lend a hand toward its fulfillment and in so doing manifest still larger interest in the affairs of its adherents in a most practical and useful manner.

W. R. O.

Price versus Quality.

Price doesn't always indicate quality, but it has considerable influence upon it. Yet, after all, the only merchant who secures the best quality of goods, is the one who knows a good quality by sight rather than by price. A willingness to pay for the best does not insure getting the best, nor does it aid in business. There are often real bargains lying languishing because few buyers know how to tell a good article when they see it. There is nothing lost in applying simple tests and a close scrutiny to the goods one is buying. Most times it makes little difference, but sometimes it detects a bargain.

EDITORIAL NOTES.

"The Horoscope," in our September number, appears to have touched a responsive chord in the mind of at least one old friend in a northern Ohio town, and he writes a letter that warms the editor's heart.

He has been a pharmacist for forty years in the town of Grand Rapids, and for more than sixteen years—since Ohio has had a pharmacy law—his name has stood on the registration records of the Ohio Board of Pharmacy as No. 1. May he continue to be No. 1 for a quarter of a century to come.

No, the millenium has not appeared, and your eyes and ours will doubtless close in their long sleep before its morning dawns. But we are helping to bring it in, you by your fidelity to high commercial and professional ideals, and we, let us humbly hope, by speaking words of helpfulness to those who care to hear them.

It is not an unworthy ambition to cherish that our deeds or words may have a potent influence, or a voice to speak in the years when the acts, as such, are forgotten and the voice is forever silent. One of the brightest gems in the author's mental museum is a tribute spoken by a woman who now fills a chair in one of the most influential schools for young women in this country, when she said: "To you I owe my first stimulus in the way of intellectual pursuits, and the first inspiration I received for my life-work came from words spoken by yourself."

No true man goes through life without leaving his mark upon those he touches, be his occupation what it may, hence let us be careful of both words and deeds.

"We live in deeds, not years; in thoughts,
not breaths;
In feelings, not in figures on a dial."

* * *

"THREE OF THEM ARE DRUGGISTS.—The personnel of the Committee on Revision of the U. S. P., elected at the last convention, is interesting and furnishes some food for thought.

"Twenty-two of the twenty-six members are teachers in pharmaceutical or medical colleges; three are connected with pharmaceutical manufacturing houses; one is in charge of the pharmacy department of public charities in New York.

"Of the twenty-two teachers, fifteen are in colleges of pharmacy. No college has more than one representative, save Philadelphia, which has three, and the medical department of the University of Pennsylvania, which has two.

"The geographical distribution is still more unequal. Philadelphia heads the list with six members—nearly one-fourth of the entire committee, New York and Chicago follow with four each, and Baltimore with three, making seventeen in these four cities, or two-thirds of the entire committee. The following have one representative each on the committee:- Ann Arbor, Atlanta, Boston, Buffalo, Detroit, Lawrence (Kans.), Louisville, Madison (Wis.), and St. Louis. Thirty-four States are without representation.

"Only three members are actively engaged in the retail drug business at the present time. Nine of the present committee were on the last committee of revision."

We take the above from the *New Idea*. The information, which we have not verified, is quite interesting. Why are there but three persons engaged in the retail drug business selected for this responsible duty? Are teachers in colleges of pharmacy and medicine the only ones who are really competent for such work?

Are any of the methods of political conventions in vogue in the selection of this committee? What is regarded as the standard of qualification for efficient service on this commission? With all our advance in pharmacy as a science one would naturally conclude that out of more than 40,000 retail druggists in the United States, more than three persons might be selected for so important a work as the decennial revision of the pharmacopœia.

* * *

"LIQUOR LEAGUE AFTER DRUGGISTS.—Piqua, Sept. 13.—John T. Norris, the Springfield man who writes "detective" after his name, yesterday entered into a contract with the Ohio State Liquor League, then in session here, whereby he is to receive $100 for the prosecution, under the Middleton law, of every druggist or other person who handles liquor without retail license. According to the agreement, Norris can resort to any means to trap the druggist and prosecute him."

We clip the above from the telegraph columns of a daily paper. The Ohio Liquor League recently held its annual meeting in Piqua, and there is not much doubt but that the agreement specified was entered into

Digitized by Google

for the purpose of holding up as many druggists as possible in this State. The preliminary steps to this procedure were taken last winter in the enactment of what is known as the Middleton amendment to the Dow law, concerning which our readers have been fully informed in previous issues of the MIDLAND. Mr. Norris, as the employe of the Ohio Liquor League, was the leading man in that play, and is now to reap his full reward in the shape of $100 for each victim. The object is not to reach the few retail merchants who masquerade as druggists in order that they may carry on a saloon business, but to go after every druggist in the State, to harass and distress him in every possible manner. Our advice to the pharmacist who is doing a legitimate business in selling alcoholic liquors is to continue right along selling only on prescription written in good faith by a physician, or in cases where he knows they are to be used for medicinal purposes.

By so doing he may fearlessly meet the Ohio Liquor League, Mr. Norris or any other organization or individual. We strongly urge full compliance with law, no matter what the law may be, no matter how much we may individually dislike its provisions; nevertheless, it is to be complied with, and having done that, stand unmoved by any threats of any kind from any person whatsoever.

* * *

N. A. R. D. CONVENTION.—We give this month a complete outline of the work of the recent convention of the National Association of Retail Druggists. We ask our friends in the retail drug business to give careful reading to this report in order that they may thoroughly understand the working plan of this association, which is undoubtedly destined to work a reformation of the retail drug trade in America.

In subsequent numbers we will discuss at length the different phases of work of the N. A. R. D.

* * *

What a misfortune it is that retail druggists are so careless and indifferent to their business interests. This note of reproach is sounded in every journal devoted to the drug trade in this country, and apparently without much evidence of good results. To play upon this single chord fails in large measure to bring forth fruit in the way of reform. Still it is "the voice of one crying in the wilderness," and the trade journals have their mission in using that voice to its utmost capacity, no matter whether it is heeded or not. The responsibility is thereby shifted from the shepherd to the sheep. But sheep are idiotic beasts and do the best in his power, there are times when a shepherd can do naught but let them go headlong to destruction.

There are local associations of retail druggists with here and there one which can succeed in securing a quorum for the transaction of important business, while the general ones in many States are but little better attended and the interest is practically *nil*.

In one of our large cities recently a meeting of the local association was called for the purpose of selecting delegates to the National Association of Retail Druggists, and of the one hundred members but three put in an appearance. It was announced in the evening papers that a band would play somewhere on the city plat that night, and that was sufficient for ninety-seven out of one hundred druggists to remain away from the meeting of his association.

If a fragment of the interest was taken in their work by retail druggists that is taken by members of such organizations as the Ohio Liquor League, for instance, the cut-rate problem, the long hours question, and a thousand other matters of supreme importance to retail druggists would be speedily settled.

"Watchman, what of the night? Will the morning ever dawn?"

* * *

A rather unusual case is reported as occurring in the town of Mulliken, Michigan. Charles McCarger, a druggist of that town, has been arrested for causing the death of Cyrus Bennett, on the charge that Bennett purchased whiskey at McCarger's store and as a result of the use of the whiskey he fell down an embankment and broke his neck. The complaint is made by the dead man's brother and McCarger gave bond for his subsequent appearance in the sum of $1,000.

If dealers in intoxicating liquors are to be held responsible for all the accidents to life, limb and property from the excessive use of such liquors what a lively time the courts will have, and what a rush of business for the lawyers. We suspect this alleged Michigan offense is one in which the poor druggist is to be run to the ground while the saloon-keeper smiles complacently at the prospect. If so, the moral is for the druggist to stick to his purges and pukes and let the whiskey business alone.

Digitized by Google

IMPORTANT CONVENTION MEETINGS.—The National Wholesale Drug Association and the Proprietary Association of America held annual meetings in Chicago, beginning September 20th. The meetings of these organizations, following closely on the annual meeting of the National Association of Retail Druggists in Detroit, are of great importance to the retail druggists throughout the entire country, for upon the unity of purpose and action of these three great associations depends the existence of the retail druggist.

The great majority of druggists, however, scarcely realize this fact, nor do they apparently comprehend that the tri-partite arrangement agreed upon by members of these trade assemblies depends for its ultimate triumph upon the unanimous support of the retail druggists themselves, and that in the complete success of the plan lies the only hope of commercial salvation to the retail dealer.

The situation is growing clearer every month and the retail men hold the key to it in their hands. The prominent men in the trade fully realize the conditions and are straining every fibre to establish a new order upon a secure foundation.

What is most needed now is not the enthusiastic efforts of the few, but the strong and unwavering support of the many. There is no longer any necessity for failure, and if failure comes it will be due in large measure to the indifference of those engaged in the retail drug business. The wholesale dealers and the proprietors are meeting the overtures of the retail men with frankness and cordiality, and are in earnest in their efforts for a complete and harmonious agreement. Let the men engaged in the retail trade rally to the support of the "Big Three."

* * *

CARBOLIC ACID.—The *Buffalo Courier* observes:

"Carbolic acid is becoming so common an agency of suicide that the State Medical Society desires the Legislature to prohibit its sale except on a physician's prescription. This seems proper precaution."

No, it is not! The proper precaution is that druggists everywhere shall sell it after exercising the same care as in the sale of any other deadly or dangerous drug. They should also endeavor to instruct their patrons in every case to exercise the greatest care possible in the use, and especially as to the place of keeping carbolic acid where it may not be accessible to children, or mistaken for some other article. The idea of placing the sale of an article in such general use as carbolic acid wholly in the hands of physicians is ridiculous in the extreme. The pharmacist is in a much better position to discriminate when it should or should not be sold, as well as to give warning as to its nature and the manner in which it should be kept, if kept at all, about the house.

"Ill-timed truth we might have kept—
Who knows how sharp it pierced and stung?
The word we had not sense to say—
Who knows how grandly it had rung?

"Our faults no tenderness should ask—
The chastening stripes must cleanse them all;
But for our blunders—oh, in shame
Before the eyes of heaven we fall."

QUERIES.

————, OHIO, Sept. 21, 1900.

Editor Midland Druggist:—Having a retail liquor license (U. S. Int. Rev.) have druggists the right to sell whisky to practicing physicians without a written prescription, this being a local option (dry) town?

Also, if a person was to bring a prescription now and then for whisky and you were not sure how he would use it, could the physician compel you to fill it?

We give the above letter from an Ohio druggist, omitting the name of the town for proper reasons. Druggists who pay the U. S. Internal revenue tax have a right to sell physicians alcoholic liquors if they are satisfied that such are used properly by the physician in his own practice or in compounding his own medicines. He should not sell them, however, to a physician who is in the habit of getting intoxicated, or whom he may suspect furnishes them to those who are in the habit of getting intoxicated.

If a person appealed to you for alcoholic liquors either with or without a prescription and you were satisfied they were not to be used for medicinal purposes you should refuse to supply them. Neither a physician nor any one else can compel you to do any thing connected with your own business which is contrary to your judgment.

No self-respecting pharmacist should contribute to the sum total of human misery by becoming a dealer in intoxicants to be used as beverages. Nor should he be a party to evading or circumventing any law of his country, his state, or his town or city. Let men in less honorable callings and with less self-respect have a monopoly of that sort of business.

—

"L. M. T.," Grafton, North Dakota.—The pharmacy law of Ohio says, regarding the renewal of certificates of registration, "Every pharmacist or assistant pharmacist who desire to continue in the practice of his profession *in this state* shall, etc." A strict construction of the Statute will require that renewal certificates shall be issued only when the applicant is engaged in the practice of pharmacy in Ohio at the time his certificate expires. The Board of Pharmacy does, however, by a ruling which may be set aside by the Courts, issue renewal certificates to persons who will make affidavit that they are but temporarily out of the practice of pharmacy in Ohio and that it is their intention to return and reenter such practice at an early date.

The answer to "S. M. B." in the September MIDLAND is correct and in accordance with law, but the rule of the Board makes the above exception in cases which are meritorious.

—

"J. C. W.," Greenville, Ohio. If required to state what is known as "Rectified Spirit of (1) Tar" we should say wood alcohol. This was known in the British Pharmacopoeia of 1864 as Spiritus Pyroxyilicus Rectificatus. We are unable to find any mention of "Rectified Spirit of Tar" and offer the above as an off-hand opinion. The Rectified Oil of Turpentine of the U. S. P. may have been the article desired.

(2) Pyroligneous Acid is always made from hard wood because it yields a larger product than soft wood.

(3) "Essence of Smoke" is crude pyroligneous acid.

Scott & Bowne,
Manufacturing Chemists,
Cor. Pearl & Rose Sts.

New York, May, 1900

To the readers of the Midland Druggist:

Do you know that we were the pioneers in advertising an Emulsion of Cod Liver Oil? That we are, and always have been, far and away, the largest advertisers of a Cod Liver Oil Preparation? Do you realize that the demand you now have for Cod Liver Oil Emulsions was made, and is largely maintained by an enormous expenditure of our time and money? Stop a moment and think.

How much of this demand have YOU created? Haven't we tilled the soil and sown the seed? Hasn"t our commodity always given satisfaction? Yes? Then aren't we honestly and justly entitled to the sale, when SCOTT'S EMULSION is asked for? That is all we ask.

Yours sincerely,

SCOTT & BOWNE.

E. L. Dye, of the firm of Hanney & Dye, McComb, Ohio, is dead.

Dougherty & Co., Tiro, Ohio, have been succeeded by Devine Brothers.

Jos. W. Noertker has purchased the drug store of James Mossman, Cincinnati, Ohio.

J. G. Wilder, of Circleville, Ohio, recently visited Cincinnati, and while there took in the Fall Festival.

It is to be conceded that Dr. Grotthouse, of North Columbus, enjoys a good joke with the rest of 'em.

Dwight Williams, lately of Mechanicsburg, Ohio, has accepted a position with R. F. Johnson, of Bucyrus, Ohio.

Homer Thrall, with E. C. Fleming, Xenia, Ohio, was an attendant at the National G. A. R. Encampment at Chicago.

G. W. Lucky, South Charleston, Ohio, has returned from Chicago very much improved in health. He can't see any pleasure connected with being doctored.

E. A. Hulbert, of Zaleski, Ohio, is very low with dropsy, and at last reports was not expected to live over night.

John C. Miller, the Xenia avenue, Dayton, Ohio, druggist, is lying seriously ill at home with an attack of malarial fever.

Murray Scharfer, with Okey Wyker, Fredericktown, has returned to work, after a three months' siege with rheumatism.

T. H. Dunn, of Bainbridge, and H. L. Day, of Blanchester, Ohio, were among the Fall Festival visitors at Cincinnati recently.

The Stewart Pharmacy, at Cadiz, Ohio, of which Mr. Henry Stewart is manager, will be removed to Steubenville this month.

Frank and Charlie Amann, of Portsmouth, Ohio, and J. W. Slater, of Ironton, Ohio, were among the visitors in Cincinnati during Festival week.

Mr. Swint, formerly with the Columbus Pharmacal Company, can now be found at C. F. Lentz' popular west side pharmacy, Columbus, Ohio.

Mr. Browning, of Browning & Older, Charleston, W. Va., recently visited his old friends in Columbus; he favored the MIDLAND with a call.

Louis G. Homeier, the State street druggist, has purchased an elegant new residence on Pugh avenue, in which he will make his future home.

The stock of goods assigned by the National Extract Company, of Zanesville, O., has been bought by Newark, O., parties and removed to that city.

James Cooper, formerly a clerk in the store of F. D. Hall, Newark, Ohio, has purchased a half-interest in a drug store at McCombs, Ohio, his former home.

M. J. Browning, of Browning & Older, Charleston, W. Va., is enjoying a pleasant visit with friends and relatives over in Ohio. We wish him the best time possible.

Charlie Kinnear, with W. A. Henry & Son, Greenfield, Ohio, recently surprised his many friends and acquaintances by getting married. Our best wishes are with him.

John F. Friedland, of Coalton, Ohio, is moving his store back to the old quarters. John likes the idea of being nearer home. His son Frank has accepted a position in Chicago.

Digitized by Google

Mr. David Stevenson, of Cadiz, Ohio, formerly for several years with Dr. Stockon, at Carrollton, Ohio, is doing "relief" for Oct. with Seigrist & Williams, Coshocton, Ohio.

Herman Hoppe, one of Columbus' popular German druggists, is completing his last course in medicine at the Ohio Medical University, and will soon be a full-fledged physician.

We are pleased to note the return of Prof. George H. Matson from Mt. Clemens, Mich., very much improved in health. Prof. Matson has suffered for a long time from acute rheumatism.

B. H. Slater, Chesterville, Ohio, is moving his stock into the new storeroom in the Masonic Temple. He has new furniture of natural oak, and when all complete will have a very handsome store.

J. G. Bell, formerly manager of Hughey's drug store, Frankfort, Ohio, has accepted a similar position with G. C. Gooderl & Co., Washington C. H. We predict a good business under Jim's management.

Dr. O. H. Finnical, of the drug company bearing that name at Cadiz, Ohio, is home from a trip to New York and other eastern cities, and is now working in his store and practicing with renewed vigor.

James A. Davidson, of Lancaster, Ohio, attended the "Fall Trot" of the Columbus Driving Association. Jim is a great lover of the noble horse and is the owner of a few, which he says are not so slow.

W. P. Kirkpatrick, of Utica, Ohio, who has been doing the Paris Exposition, sailed from Liverpool on the 10th inst., on his way home. We expect soon to be entertained with stories of his experience.

W. G. Dawson, of Laurelville, Ohio, is among the sick ones of late and is confined to his bed. We trust the sickness is only temporary and we will again have the pleasure of seeing him up and around.

Mr. John M. Ogier, the widely-known druggist of Cambridge, Ohio, left Sunday, October 7th, for a trip South. Mr. Ogier will visit various places during his absence and will combine pleasure with business.

A young stranger arrived at the home of W. S. Shoop, of W. S. Shoop & Co., Cadiz, Ohio, on September 28th. "Will's" face is like a "sunbeam" since the advent. The MIDLAND sends congratulations and suggests that the babe be christened "William," thus perpetuating an honored name in good old Cadiz and Harrison county.

George H. Matson is reported to be very much improved in health in the last two weeks. Mr. Matson has been quite a sufferer with inflammatory rheumatism and has been at Mt. Clemens, Mich., for treatment.

F. L. Case, formerly of this city, has removed with his family to Tiffin, Ohio, where he will engage in the practice of medicine. Mr. Case's drug store, at Spruce and Park streets, has been left in charge of Dr. Peasley.

A. W. Kiler says that it is now a case of hustle with him and his efficient clerk, Mr. Fred Barrick, since the Ohio State University opened. Mr. Kiler enjoys a first-class trade from students who attend the University.

A. W. Teter has opened a drug store in Bainbridge, Ohio. Mr. Teter has had long experience as a clerk, is a graduate in pharmacy, and well equipped to conduct the business. We think he has good prospects of success.

M. L. Cockerill, formerly a clerk for F. T. Icenbarger, Dayton, Ohio, but for the past two years connected with the hospital service of the U. S. A., has purchased the drug store of the late John E. Wenz, on East Fifth street, Dayton, Ohio.

Mr. Miller, who bought the Ernest Schueller pharmacy, at High and Main streets, Columbus, Ohio, has moved his family here from Delaware, Ohio, his former home. Mr. Miller now considers himself a voting resident of this city.

Dr. George A. Newton, druggist at Springfield, Ohio, has returned from Mackinac and surrounding points, where he spent five or six weeks of the late summer. The Doctor is a sufferer from asthma and is obliged to make this trip each year.

On October 9th, at Ironton, Ohio, there was solemnized the wedding of Miss Norma Otten and Mr. Harry Paul. Miss Otten is the beautiful and accomplished daughter of Otto Otten, the popular druggist, and Mr. Paul is city editor of the Ironton *Register*. Our best wishes go with them.

What's the use of closing up as the people of Catlettsburg, Ky., believe in drinking soda the year around? In order to satisfy their needs Mr. John C. Hogan has decided to put in a hot soda fountain and in serving through the winter months to come will keep up his already well established reputation.

Digitized by Google

Mr. F. H. King, member of the Ohio Board of Pharmacy at Delphos, underwent an operation on one of his eyes last month in a private hospital at Cincinnati. We are gratified to learn that the operation was successful and that he is rapidly recovering.

What is the matter with the retail druggists' bowling teams this year? They are somewhat late in getting organized. If they don't get a move on them the other teams of the city will get ahead of them. Come, boys, wake up and do something.

Mr. George Strome, of Millersburg, was in Columbus on Tuesday, taking the examination before the Ohio Board of Pharmacy, which was in session on that day. George has been attending school at Ada this Fall, taking the practical course in pharmacy.

Mr. Klostermeyer, of the firm of Ort & Klostermeyer, Charleston, W. Va., is away from business for a few days, down on the Kanawha river. Mr. Ort, who has been away on the sick list for some time, is now giving Mr. Klostermeyer a chance to recuperate.

H. D. Carnell, druggist at corner of Third and Main streets, Dayton, Ohio, is obliged to move his stock of drugs to another location, as his old building is to be torn down to make room for a sky scraper. He expects to be able to return to his old location in about a year.

Mr. J. W. Headley, of Marion, Ohio, is making a new departure in an effort to supply the wants of physicians in his section. He has placed an agent on the road who calls regularly on that trade, and we are told is meeting with success. We commend Mr. Headley's enterprise and energy and hope his success will continue.

A. H. Dean, of Waverly, Ohio, recently passed through Columbus, on his way to Detroit and the Lakes. Mr. Dean has not been feeling well of late and we are sure the trip will benefit him. After about one week in that section he will return and go to Lexington, Ky., and try to see some fast trots at the Fall meeting.

There are all sorts of rumors going the rounds at Xenia, Ohio, and some are facts; this one anyhow, that a certain crowd of young ladies gave a linen shower for one of their number recently, and we have been told that Ed. Davidson, the popular druggist of that place, can tell something if he would. Ed. won't tell, but a "sure tip" says you may look for something to happen soon.

When a person is in search of recreation after a year's hard work they should select places that will relieve both mind and body. In our opinion A. B. Howson and his estimable wife, of Chillicothe, Ohio, certainly are very tasty in this matter. They are enjoying themselves at Lake Saranac, in the Adirondack mountains, and last heard of them were thoroughly enjoying the trip. Drug stores are entirely forgotten when one is amid the beautiful scenery of those mountains.

R. Ney Williams, of Kenova, W. Va., has just removed his store from the old room where he has been for the past nine years to a new one in the Glenwood Hotel building. Besides moving, he has revarnished and placed a touch here and there, adding to the appearance of things until he can now be proud of owning as pretty a store as there is on the Ohio river. He expects to start soon to Roncevert and his old home to take a well-needed vacation. While he is gone Mr. Neil, of Guyandotte, W. Va., will be in charge and attend the wants of the trade.

Mr. E. B. Hall, of Parkersburg, W. Va., a member of the Board of Pharmacy of that State, called upon the MIDLAND recently. Mr. Hall is originally an Ohio pharmacist. He reports quite an advance in the methods of examinations as conducted by the board of which he is a member and anticipates that the approaching session of the State legislature will give them some much needed changes in the pharmacy law. The next meeting of the West Virginia board will be held in Charleston on October 19th. W. H. Hamilton, of Fairmount, is secretary.

James T. Blaser, the bachelor druggist of Waverly, Ohio, is making plans for a trip to Florida the coming winter and is on the outlook for some good company. We suggested that he had better select some nice girl and pay the expenses for two, but his face assumed such an ominous expression that we withdrew the suggestion at once and promised to make known his desire for male company. Now, if any of our readers have such a trip in contemplation we commend to them our friend as a companion, and will say that he can do anything, from dancing a sand-reel to choking an alligator, and never ruffle his temper.

Mr. John Byrne, of Columbus, represented the Ohio Pharmaceutical Association at the recent meeting of the National Wholesale Drug Association in Chicago, and responded

Digitized by Google

in a neat speech in behalf of the retail druggists of that State. Mr. Byrne is one of the most energetic supporters of the tri-partite arrangement and predicts that the prospects are very favorable for the perfect and satisfactory adjustment of the problem relating to proprietary preparations, and that the continued support of the retail dealers, coupled with sufficient patience to wait until a great plan may be successfully carried out in its smallest detail is all that is necessary for its ultimate accomplishment.

Miss Anna Morhart, of Middleport, Ohio, was married on September 26th to Mr. Henry Albers, of Washington, D. C. Miss Morhart is a sister of Adam, whom anyone who ever stopped in W. E. Stansbury's store will remember. Anna Morhart was for a long time employed in the laboratory and in the retail store of W. E. Stansbury, where she made hosts of friends, who will much regret her departure from this field. Mr. and Mrs. Albers will visit Columbus and other western cities before making their permanent home at Washington, D. C., where Mr. Albers has a fine retail jewelry business. The best wishes of the MIDLAND will follow them, and every one who ever knew her will register a wish for the future happiness of Anna Morhart Albers.

'NOTHER DRUGGIST DOES THE DEED.

It was "Dave" Williams who did it. He quietly went over to Newark the other day and was married, and never said nothin' to nobody, nohow. The pleasant event occurred at the home of the fortunate young lady, in Newark, on Wednesday evening of last week. She was Miss Hattie Rowe, a most estimable and prepossessing lady of that city. The ceremony was performed by Rev. Sifferd. Mr. Williams remained in Newark until Monday evening, and Mrs. W. arrived Tuesday evening, her delay being occasioned on account of the home on Park avenue being not quite ready for her reception. It is a very pleasant and cozy one, and many friends join in the hope that it may be one of supreme and extended happiness. The bride will no doubt receive the usual cordial Coshocton social reception, and both she and her popular husband have the congratulations and best wishes of many friends. It is hardly necessary to say that Mr. Williams is the junior member of the well known drug store firm of Siegrist & Williams, doing business at the southwest corner of Fifth and Main streets.

—*From Coshocton Standard, Oct. 5th*

The MIDLAND heartily congratulates Dave and his bride and wishes them all sorts of happiness. We pause here to remark that John's example was contagious.

An Unusual Demand.

Everybody is out of Carbon Bi-Sulphide and everybody is crying for a supply, and nobody is successful in filling their wants on this item. The bugs in the grain are the cause of it and the stocks the country over have been completely exhausted. Manufacturers were caught entirely unprepared to meet the unusual call and will be unable to furnish even moderate quantities for ten days to come.

A prominent New York broker writes one of his customers as follows: "There is positively not a pound in this market and I don't know what to do, for the entire trade is pushing me to procure immediate supplies."

It is not likely this condition will again occur, for the lesson of to-day will not pass unheeded.

CURES INFLUENZA, DISTEMPER, PINK EYE, EPIZOOTIC, CATARRHAL FEVER, CHRONIC COUGHS,

And prevents attacks of these Diseases, no matter how the Horse, at any age, is "exposed."

The "Allcock" Belladonna Plaster

The Extract of Belladonna leaves used in this Plaster is made especially for this Company by Parke, Davis & Co.

The advice of competent physicians has been followed in the amount of Belladonna used.

This plaster has been examined by many physicians and chemists who unite in saying it is the best they have seen, both in its medicinal qualities and its softness and pliability.

The "Allcock" Belladonna Yard Plaster

36 X 11 INCHES.

Full U. S. Pharmacopœia strength guaranteed.

ALLCOCK MANUFACTURING CO. (Successors) - Salesroom, 274 Canal Street, New York.

Glutol.

Glutol is a combination of gelatin and formaldehyd. It appears as a gray, odorless and tasteless powder. When brought in contact with living tissue it liberates formaldehyd, and so acts as an antiseptic. Henry (*These de Lyon*, 1899; *British Medical Journal*, December 9, 1899,) finds that the formaldehyd is set free only in the presence of tissues which are still vital, and not by contact with dead tissue. On this account glutol would seem to be of use in wounds, ulcers, etc., when there is little tendency to cicatrization from any cause whatever; thus, chronic varicose conditions, diabetic sores, trophic lesions, are cases in which it is indicated. It is also useful in venereal sores, syphilitic or otherwise, the chronic suppurative foci of tubercle and deep burns. In short, in those cases in which iodoform has up to the present proved of greatest service, glutol may be employed, and the advantages which it presents are the continued liberation of an antiseptic principle which is much greater than that of iodoform. The absence of toxic or irritant properties, and of odor, are further important points in its favor.

Progress Promoted by Poverty.

Poverty is an incentive and a discipline. If most of us were rich and had nothing to work for the world would be lazy and degenerate, softened with luxury, spoiled by lack of healthful opposition. Any condition that deprives us of hope is a condition of living death; but a poverty that makes us industrious, resolute, hardens our bodies and sharpens our wits is far from unfortunate, for it contains within itself the element of cure, and prime among its happy attributes is that heaven-sent faculty of living in a future that has no offset to its perfectness—the faculty of hope.

—*Saturday Evening Post.*

Gift to the University of France.

A magnificent gift, amounting to 5,275,000 francs in value, has been received by the University of France from M. Raphael Bischoffsheim, a deputy and a member of the institute. It consists of the observatory of Nice, with eighty-six acres of land, two auxiliary observatories, with their instruments, and the library, and, further, 2,500,000 francs in cash for the maintenance of the observatory.

Ohio State University
Pharmaceutical Association.

On Monday evening, October 8th, a large number of students of the college of pharmacy met in Professor Kauffman's lecture-room and formed an association, to be known as the Ohio State University Pharmaceutical Association. The society will meet every Monday evening at 7:00 o'clock. The idea of organizing such a society originated with Professor Landacre and was enthusiastically taken up by the students with the above result.

The officers were chosen by ballot and resulted in the following: President, C. H. Young, Wooster, Ohio; Vice-President, H. L. Morris, Springfield, Ohio; Secretary and Treasurer, C. B. Cassaday, Alliance, Ohio; Master of Ceremonies, E. N. Webb, Rome, Ohio.

A committee was appointed by the president to draw up a constitution and by-laws for the association; this committee to report at next meeting.

After a short recess, Professor Landacre delivered an address, outlining the work and method of procedure which he thought would be of benefit to the association. Following are the ideas and plans which will be followed by the society: Together with the social feature, which is of importance to organizations of this character, the society will devote ten to fifteen minutes each evening to a spirited quiz, to be conducted by members of the society, after which the regular program of the evening will be furnished. The program will consist of papers on subjects of interest to pharmacists, together with reviews of magazines and impromptu talks on subjects of interest to the association.

It is the purpose of the association to have an open meeting once a month, at which time the society will be addressed by some person prominent in this line of work. These addresses will be full of inspiration and good advice and at the same time show the practical side of the drug business as it is at the present time.

It is the intention of this association to present from time to time in the pages of the MIDLAND DRUGGIST extracts of articles read before this society and notes on work being done in this department, which will be of interest to the drug trade in general.

It is our intention to make this association one of the best features of the College of Pharmacy of the O. S. U., and a cordial invitation is extended to all students and pharmacists who are interested in subjects of pharmacy or allied branches to be present at the meetings.

C. H. YOUNG, *President.* C. B. CASSADAY, *Secretary.*

The books tell us Virgil, whose words we will quote,
Was the son of a worker in clay.
And Milton, that lyrist of loftiest note
A scavenger's child, so they say.
Our great Shakespeare's pa was a stapler of wool,
Which perchance the bard carded and spun;
But our loved "Bobbie Burns" so the student soon learns
Was a rollicking son-of-a-gun.—*Waterman.*

NATIONAL ASSOCIATION RETAIL DRUGGISTS.

SECOND ANNUAL MEETING HELD IN THE CITY OF DETROIT, SEPTEMBER 12, 13, 14, 1900.

THE second annual convention was called to order at 10 A. M., Wednesday, September 12. About 200 delegates were present in the Convention Hall of the Russell House. Invocation by Rev. H. P. De Forest. Addresses of welcome by Hon. W. C. Maybury, Mayor of Detroit; J. W. Seeley, President Detroit Retail Druggists' Association and Chas. F. Mann, President Michigan Pharmaceutical Association.

President Jones then called for brief responses to these addresses from delegates representing different States. Messrs. B. E. Pritchard and J. C. Perry responded for Pennsylvania; W. K. Forsyth for Illinois; L. C. Hopp and A. O. Zwick for Ohio; F. Hirseman for New York; F. H. Carter for Indiana; J. L. Nelson for Tennessee, and Henry Willis for Quebec.

Addresses were made by representatives from kindred associations in the drug trade. E. C. DeWitt of Illinois and H. L. Kramer of Indiana spoke for the Proprietary Association of America; J. E. Davis for the National Wholesale Druggists' Association and Wm. F. Hall for the American Pharmaceutical Association.

The following gentlemen were appointed as assistant secretaries of the meeting: Messrs. Willis, of Quebec; Hopp, of Ohio, and Vaughan, of North Carolina.

The Committee on Credentials was appointed as follows: Messrs. Way, of New Hampshire; Lillie, of Oklahoma; Rumsey, of Pennsylvania; Arrington of Georgia, and Pardee, of Wisconsin.

Mr. William Muir moved that the hours of the sessions be 9 o,clock A. M., and 2 o'clock p. m., which motion was carried.

On motion of Mr. Anderson, the convention adjourned until 2 o'clock P. M., of the same day.

WEDNESDAY AFTERNOON SESSION.

The meeting was called to order at 2:30 P. M., by President Jones, who introduced First Vice-President W. C. Anderson.

President S. N. Jones then delivered his annual address.

Mr. L. C. Hopp, of Ohio, moved that the report of the President be sent to the Committee on Resolutions, when selected. Mr. William Muir, of New York, moved to substitute Mr. Hopp's motion by sending the address to a special committee of five to be appointed by Vice-President Anderson. The substitute prevailed, and Mr. Anderson named as members of the committee Thomas Voegeli, Minneapolis; J. W. Seely, Detroit; William Bodemann, Chicago; J. L. Nelson, Jackson, Tenn.; W. H. Gregory, Buffalo.

Secretary Thomas V. Wooten then read his report.

On motion of Mr. J. C. Gallagher the report of Secretary Wooten was referred to a special committee of five members. The committee was composed of M. L. Porter, W. E. Bingham, T. B. Wood, B. E. Pritchard and C. F. Huhn.

The report of Treasurer Charles T. Heller was then received and, following the usual order, was sent to the Auditing Committee.

The Treasurer's report shows the following totals:

Miscellaneous receipts	$ 534.06
Dues	4,397.00
Donations	523.37
Balance from Mr Lowe	641.76
Total	$6,096.17

Mr. F. L. Way submitted the report for the Committee on Credentials.

Mr. F. E. Holliday stated that the rule established by the Executive Committee, in the absence of action by the association, had been that proxies presented by delegates residing at a distance greater than fifty miles from the association should not be accepted. He thought the association should be made familiar with the facts, and that such action be taken as would determine the question of recognizing proxies.

Mr. Wm. Muir thought that proxies represented in the report should be omitted, and moved that the question of recognizing proxies be referred to the Committee on Form of Organization with instructions to report at this meeting, and that the remainder of the report of the Committee on Credentials be accepted. Mr. Felix Hirseman and Mr. Thos. Voegeli supported the motion of Mr. Muir, and it was adopted.

The credentials showed that delegates to the number of about two hundred were present, from the states of Alabama, Connecticut, Georgia, Illinois, Indiana, Iowa,

Digitized by Google

Kansas, Kentucky, Louisiana, Maine, Massachusetts, Michigan, Minnesota, Missouri, Montana, New Hampshire, New Jersey, New York, North Carolina, Ohio, Pennsylvania, Oklahoma, Tennessee, Vermont, Wisconsin, Province of Quebec.

Mr. Thomas Stoddart, Chairman of the Committee on National Legislation, then presented the report of his committee. On motion the report was referred to the Committee on Resolutions.

Chairman Jesse L. Nelson, for the Committee on Commercial Relations, submitted his report.

COMMERCIAL RELATIONS COMMITTEE REPORT.

"The Committee on Commercial Relations conceive it to be our duty to deal with the commercial features of the retail drug business and its relations to the other two branches of the drug trade, the jobbers and the manufacturers.

"To assist in bringing about the closest business relations with each other, and in shaping the business policy of the N. A. R. D.

"This Committee realizes that the proprietary remedies constitute the most important factors for our consideration.

"We realize also that, owing to certain anti-trust laws operating in some of the states of the Union, which seem to a certain degree to interfere with some of our plans, and the tendencies in strictly commercial circles to use these agencies as advertising mediums, makes this the most difficult problem to manage.

"This committee appreciates the work done and good accomplished by the Executive Committee. We realize that in this great commercial conflict they have been truly 'heroes in the strife,' and now at this stage of action we feel it is of paramount importance to urge aggressive measures and early dates for decisive action.

"We have communicated with a number of merchants and manufacturers in other lines, who have been successful in maintaining the retail price of their output, in order to get some ideas from them and profit by their experience. Communications were received from Earl & Wilson, the Oliver Chilled Plow Company, the Eastman Kodak Company, and Spaulding, of sporting goods fame. With some ideas culled from these we believe we can offer some suggestions that will be of value to the work already begun.

The courts of the land have decided that the inventor of a remedy has the right to fix the price of that article, and that he may lawfully insist that the purchaser, or retailer, shall not *cheapen that article* by selling or offering the same for sale below this stated price, providing such an agreement is made; and that he has the legal right to close the doors on purchasers procuring from his manufactory his product after violation of this fair agreement. (We refer to the final decision in the case of Jno. D. Park and Sons against the National Wholesale Druggists' Association.)

"Therefore, we recommend that the manufacturers of proprietary remedies be requested to begin the first day of January, 1901, and enforce the contract or rebate plan through the jobber to the retailer, making it equally binding upon the one as the other. No goods sold until contract signed, be required of each, and at the expiration of each quarter, if a sufficient amount of any one of these articles has been purchased by any one retailer from any one jobber, and the retail trade price of the same maintained—that is, contract kept—the jobber by agreement with the manufacturer shall rebate this purchaser.

"This seems only fair to those who can handle a large quantity of any one of these articles, and it does not conflict with his weaker brother or competitor, so long as he maintains the retail price of the same.

"Should the retail druggist violate his contract and cut prices, this to be decided by 90 per cent. of the druggists of his vicinity, or the local association, then his supplies must be discontinued.

"Furthermore, the jobber, as per rebate contract, must confine his sales to these proprietary remedies to the recognized retail drug business, in communities where retail drug stores exist, for they alone can be expected to maintain prices in good faith. We ask the manufacturers, as an assistance to the retail druggists in regulating prices, and as evidence of an existing contract, that they have stamped on the face of their packages these words: '*This article sold under contract that the price must be maintained.*'

The retailer agreeing not to display any goods not bearing the above stamp, and to regard such as unfriendly to the retail drug trade as do not use the stamp. We also ask the manufacturer to use some private mark whereby he may detect his goods when found in illegitimate channels.

"We consider these demands conservative and reasonable and not conflicting with freedom of trade, and freeing all from

Digitized by Google

the charges of violating the anti-trust laws. We hope this body will urge the inauguration of this plan."

It was moved that the report be referred to the Committee on Resolutions.

An amendment was offered by Mr. Harry Wise making the report of the Committee on Commercial Relations a special order for consideration by the association at the evening session. Mr. Muir stated that the considerations of the questions presented by the report of the Committee on Commercial Relations would probably entrench to some extent upon the work of the Executive Committee, and moved that the consideration of the report go over to a later session. Mr. Thomas Stoddart moved as a substitute for all pending motions that the report go to the Committee on Resolutions, which substitute was supported by Mr. Felix Hirseman.

The motion of Mr. Stoddart was withdrawn and that of Mr. Muir prevailed. The association decided, upon motion, that the report of the Executive Committee be heard at the evening session, and that the recommendations of the Committee on Commercial Relations be considered after hearing the report of the Executive Committee.

Mr. D. E. Prall moved that a recess of ten minutes be taken, during which time the delegates might select members for the Committees on Nominations and Resolutions. The motion prevailed.

Upon the reconvening of the association the States were called for announcements on the Committees on Nominations and Resolutions, and the following selections were reported:

COMMITTEES ON NOMINATIONS AND RESOLUTIONS.

The first name is that of the member of the Committee on Nominations, and the second name is that of the member of the Committee on Resolutions. Where but one name appears, the delegate acts upon both committees:

Alabama—W. E. Bingham.
Connecticut—John W. Lowe, Charles A. Rapelye.
Georgia—H. H. Arrington.
Illinois—John I. Straw, F. Lueder.
Indiana—F. W. Schultz, F. W. Meissner.
Iowa—A. A. Broadie.
Kansas—F. E. Holliday.
Kentucky—Simon N. Jones, T. B. Wood.
Maine—M. L. Porter.
Massachusetts—F. A. Hubbard, J. F. Guerin.
Michigan—Charles F. Mann, A. H. Weber.
Minnesota—C. A. Huhn, Herman Rietzke
Missouri—F. N. Federmann, H. F. Hassebrock.
New Hampshire—F. L. Way.
North Carolina—P. W. Vaughan.
Ohio—A. O. Zwick, F. B. Stevens.
Oklahoma—F. B. Lillie.
Pennsylvania—W. A. Rumsey, W. G. Markell.
Tennessee—Harry Wise, J. L. Nelson.
Wisconsin—A. A. Pardee.
Province of Quebec—Henry Willis.

WEDNESDAY EVENING SESSION.

The convention was called to order at eight o'clock P. M., by the President.

The report of the Executive Committee having been made a special order for the evening session, the report was submitted by Mr. F. E. Holliday, chairman of the committee.

Upon motion of Mr. Pritchard, Mr. Wm. McIntyre, of Philadelphia, was accorded the privilege of addressing the convention, which he did, stating at length the position of the Philadelphia Wholesale Drug Co., an organization formed by retail druggists, and which the Executive Committee, acting under the instructions of the St. Louis and Cincinnati conventions, were unable to recommend be placed on the approved list of wholesale distributers.

At the conclusion of Mr. McIntyre's remarks Mr. Wm. Muir moved that the report of the Executive Committee be received and referred to the Committee on Resolutions.

Mr. Hammer, of New York, urged the immediate consideration of the report section by section.

Mr. Wise moved as an amendment to the pending motion that the report be referred to the Committee on Resolutions with instructions to submit a report at the Thursday forenoon session, the same to have precedence of any other business.

Mr. John I. Straw, of Chicago, moved as a substitute for the pending motions that the report of the Executive Committee be sent to the Committee on Resolutions, and that the report of the Committee on Resolutions be made a special order for the first session on Friday. The substitute motion was supported by Mr. Felix Hirseman, and on being put, was adopted.

Upon motion, the convention then adjourned, to meet at nine o'clock, Thursday morning.

Digitized by Google

THURSDAY MORNING SESSION.

The convention met at 10 A. M.

The first business was the report of the Committee on Trademarks and Patents, which was presented by Chairman John C. Gallagher.

The report was referred to the Committee on Resolutions.

The report of the Committee on Pharmacy Laws was then called for, and was submitted by Mr. William McIntyre, Chairman.

The report was sent to the Committee on Resolutions.

The report of the Committee on Form of Organization was presented by Mr. L. C. Hopp, the ranking member of the committee present, Chairman R. M. Dadd being absent.

The remainder of the forenoon session was devoted to discussions of miscellaneous topics, and, at twelve o'clock M., adjourned to meet Friday morning, September 14, at nine A. M.

THURSDAY AFTERNOON.

Thursday afternoon was devoted to a visit of inspection through the extensive laboratories of Messrs. Parke, Davis & Co., and a trip on the river as the guests of that house.

FIFTH SESSION FRIDAY MORNING.

The convention was called to order on Friday morning at ten o'clock, the Chair calling for reports of special committees as the first business.

The report of the special committee to which was referred the address of President Jones reported through its chairman, Mr. Thos. Voegeli, as follows:

1. We approve the President's recommendation "that this Association should acknowledge the lasting debt we owe to the pharmacal press for its valuable assistance to the officers of the association."

2. We recommend that this association approve the employment of the Chairman of our Executive Committee as an assistant to the Chairman of the Proprietary Committee of the N. W. D. A.

3. We approve the recommendation of the President that this association reaffirm its pledges made to the N. W. D. A. and the P. A. of A., and to that end recommend the adoption of the following resolution of our Executive Committee:

"Retailers, in exchange for this concession on the part of manufacturers to limit the distribution of goods, and on the part of jobbers to refuse all orders from aggressive cutters and brokers, are not to substitute when standard proprietary articles are called for, but in each case will give the customer what is called for without argument."

4. We recommend that the N. A. R. D. place itself upon record as being unequivocally opposed to all practices in handling proprietary medicines and to urging of private goods for advertised proprietaries for which a specific call has been made.

5. We approve the statements of the President upon the subject of organization and recommend that every delegate leaving Detroit should consider himself a committee of one on organization with full power to act in his own locality, whether such district be suffering from cut rates or not.

6. We approve the President's recommendation that special local organizers be employed; and that the Executive Committee be authorized to appropriate sufficient money to carry on the work of local organization.

7. We approve the President's suggestion that in some cases local organization may be made to yield an income to this association and we recommend that this matter be referred to the Executive Committee for its careful attention.

8. We approve the President's recommendation that donations be received from all who will help, or ought to help us in our work, and suggest that this question is covered by the following statement adopted at Cincinnati and appearing on page 28 of the Cincinnati proceedings:

"That this committee recommends that the Executive Committee be authorized to receive any donation from any person, firm or corporation that is actually in sympathy with the principles and objects of the N. A. R. D."

9. We heartily approve the appreciative words of the President, commending the work of our Secretary, Mr. Thomas V. Wooten.

10. We approve the recommendations of the President that the thanks of this Association be tendered to Secretary Wooten, Chairman Holliday and the Executive Committee, the Committee on National Legislation, Mr. Thomas Stoddart, Chairman, and the Committee on Trade-Marks and Patents, Mr. John C. Gallagher, Chairman.

11. In conclusion your Committee on its initiative recommends that a rising vote of

Digitized by Google

thanks be given President Jones for his faithful and capable administration of this association during the past year.

THOS. VOEGELI, *Chairman.*
WM. BODEMANN,
WILLIS G. GREGORY,
JESSE L. NELSON.
JAMES W. SEELEY.

The report of the Committee on Resolutions was then called for and was presented by Chairman Felix Hirseman.

REPORT OF COMMITTEE ON RESOMUTIONS.

The Committee on Resolutions beg to report that it has considered with much care the recommendations contained in the various papers presented for the consideration of the Committee and has embodied the result of its deliberations in the following resolutions, which are submitted with the recommendation that they be adopted by the association.

RESOLUTION A—ORGANIZATION.

The Committee on Resolutions, after giving careful consideration to the recommendations contained in the reports of President Jones, Secretary Wooten and the Executive Committee, respecting the importance to the future of the National Association of Retail Druggists of organization of the drug trade, recommends that the association provide for aggressive organization work as follows:

Resolved, That the Secretary of the N. A. R. D. is instructed to proceed as rapidly as may be practicable, under the direction of the Executive Committee, to begin the work of organizing local associations throughout the entire country.

—That authority is given the Secretary, subject to the action and approval of the Executive Committee, to employ state, local, or other organizers, to prosecute this work with the utmost vigor consistent with the financial condition of the national association.

—That the Executive Committee is authorized to accept donations from retail druggists or allied branches of the drug trade, for the purpose of furthering energetically and unceasingly the work of general and effective organization of the retail druggists of the country.

RESOLUTION B—THE N. A. R. D. PLAN.

Resolved, That the National Association of Retail Druggists is gratified in being able to announce the success which has attended the efforts of its Executive Committee to secure the adoption of its plan for the prevention of price-cutting on proprietary medicines by the manufacturing and jobbing branches of the trade.

That we reaffirm our belief in the efficacy of the plan, and our fidelity to its provisions.

That the success of the labors of the Executive Committee brings home to the retail druggists of every section the duty to themselves, locally, and to the retail trade generally, of prompt and decisive action upon their part, in conformity with the terms of the plan, which became operative August 17, 1900.

That we call upon the associations affiliated with the N. A. R. D. and all organizations of retail druggists throughout North America, to proceed immediately to place their members in position to reap the benefits of the successful work of the national body, the manner of how best to designate aggressive cutters being left to the discretion of the local associations, under the advice of the Executive Committee, wherever desirable.

That the association approve the recommendation of the Executive Committee that local associations confine their notifications to the local jobber, reporting actual conditions to the national association, and that the national association pledges itself in each and every case to render to the local associations prompt, determined and loyal aid in securing the rights of the members of the local body.

That the Executive Committee is instructed to immediately transmit to the officers of the associations in membership, detailed instructions respecting the steps necessary for the guidance of the associations in the enforcement of the terms of the plan.

That, while the local associations have the right, under the plan, to employ their own judgment respecting the formation of a schedule of prices, the national association urges these associations to prepare and maintain the most advantageous schedule possible, because of the great importance to the retail trade as a whole of such action on the part of the affiliated bodies.

RESOLUTION C—ADVERTISING CUT PRICES.

Resolved, That we approve the suggestion contained in the report of the Executive Committee that manufacturers of medicinal preparations should request the public press to refuse to publish advertisements of such preparations offered by others than the maker at prices below that fixed by the maker.

Digitized by Google

That such cut prices are never advertised except in the case of articles made widely familiar to the public by extensive and costly advertising on the part of the manufacturer, and on which preparations the price fixed by the manufacturer has come, in public estimation, to be recognized as a standard.

That we believe the public press which receives the money of the manufacturer is morally obligated to protect the integrity of the preparations of such manufacturer against the assaults through its columns of avaricious tradesmen who seek to reap a benefit for which they return nothing, and which action on the part of such tradesmen injures the reputation and diminishes the sale of such preparation.

RESOLUTION D.

Resolved, That, believing absolute good faith in the fulfillment of every promise made by the manufacturer, jobber and retailer is essential to the fullest success of the N. A. R. D. plan for the regulation of price-cutting on proprietary medicines, the association urges the members of affiliated bodies to continue their loyalty to the terms of the plan; and that it demands of every other person or interest the same steadfast, unequivocal loyalty to every part of the plan.

That failure to act with strict integrity in support of the plan after it has been accepted, shall be deemed an act of open hostility to the best interests of the drug trade as a whole.

The attitude of the house of Wells & Richardson Co. in failing to fulfill its promises to the trade is such as to constitute an act of defiant hostility to the best interests of the trade in all its branches, and should receive the most emphatic expressions of disapproval from every association of retail druggists, and from the individual members of the retail drug trade in the United States.

RESOLUTION E—NATIONAL LEGISLATION.

Resolved, That we commend the efforts of the Committee on National Legislation to secure the repeal of the Special War Tax on medicinal articles and urge that the new committee, when appointed, shall continue these efforts before the approaching session of Congress.

That we earnestly request retail druggists in every section of the country to use their influence as local associations and as individual citizens to secure the support of their respective members of Congress for the early repeal of this unfair and unnecessary Special Tax.

That we urge the drug trade to bring to the attention of congressmen on every possible occasion the fact that the taxes of schedule "B" are an extra and discriminating tax on a class, and therefore merit consideration independently of other taxes and without reference to the repeal or modification of any other tax.

RESOLUTION F—PATENTS AND TRADEMARKS.

Resolved, That we commend the work of the Committee on Trade Marks and Patents in its endeavor to secure more just provisions in the law respecting foreign pharmaceutical products.

That we renew our earnest recommendation that the law be so amended that no patented imported pharmaceutical products shall be accorded a greater measure of legal recognition by the government of the United States than such product is accorded by the government of the country of its origin.

That we assert it as an indispensable principle of public justice that the government should not grant a patent on the product itself, but should confine such patent protection to the process of manufacture. To patent the product is to create monopoly and retard progress in the healing art, to the incalculable injury of our people.

That we assert that the present Patent and Trade-Mark Laws are operating to suppress inventive progress and to stultify the intelligence of our people in the opinion of other countries, the citizens of which countries have the legal power placed in their hands to force monopoly tribute from our sick and afflicted.

RESOLUTION H—PHARMACISTS IN THE ARMY AND NAVY.

Resolved, That Congress be petitioned to advance pharmacists now employed in the army and navy under the classification of "hospital stewards," to the rank of first lieutenants and with the title of "pharmacists."

The Committee has also had presented for its action the following resolution, and after due consideration begs to report the same to the Convention with the recommendation that it be adopted:

RESOLUTION G—GOVERNMENT COMPETITION.

Resolved, That the present encroachments of the National Government and the public institutions upon the drug and allied trades

Digitized by Google

is a matter of much concern to this Association. The manufacture and supply of the medicinal articles of commerce by such bodies in competition with trade is strongly opposed and condemned by this Association as detrimental to the interests of the entire drug trade, comprising manufacturers, jobbers and dealers.

The Secretary of the Association is hereby instructed to transmit this expression of its conviction to the members of the National Senate and House of Representatives.

After considerable discussion of Resolution B the report of the Committee was adopted.

On motion of Mr. Muir, and discussion by Messrs. Heims, Huhn, Pritchard, Wooten and Anderson, it was decided that the printing of the proceedings as an official report be dispensed with, and the Executive Committee be empowered to have as many copies printed as may be necessary.

On motion, the Secretary's report was approved as a whole.

Mr. Perry moved that a vote of thanks be given the Committee on Resolutions. Agreed to.

On motion of Mr. Gallagher, the meeting adjourned.

SIXTH SESSION, FRIDAY AFTERNOON.

Chairman Jones called the Convention to order at 2:00 P. M.

Mr. McIntyre moved a reconsideration of the action taken on Resolution B in the forenoon session, approving the report of the Committee on Resolutions; and this being agreed to, after discussion by Messrs. Muir, Wise, McIntyre and others, Mr. Zwick offered an amendment to section 3 of Resolution B. The amendment was adopted.

On motion of Mr. Layton, the report of the Committee on Resolutions was approved as a whole.

Mr. Hopp reported that at the last meeting of the A. Ph. A. the suggestion was mada that the N. A. R. D. meet at the same time and place as that body. The matter was referred to the Executive Committee.

The amendments to the Constitution and By-Laws contained in the report of the Committee on Form of Organization were then adopted as a whole.

On motion of Mr. D. E. Prall, Mr. H. L. Kramer, of the Sterling Remedy Company, was granted the privilege of the floor for ten minutes.

Mr. Kramer presented an offer concerning the sale of his goods. The offer provides that he will send to every druggist in the United States an order blank covering a special "Ten Dollar Lot," and for every cash order received on this special blank within a period of sixty days from the time the blank is sent out one dollar will be paid to the treasurer of the N. A. R. D.

On motion of Dr. Willis H. Gregory, the offer of Mr. Kramer was accepted.

Reports from delegates from different states were then heard concerning the work done in their respective localities. The following gentlemen spoke, in each case giving the N. A. R. D. credit for valuable assistance:

W. E. Bingham, Alabama; W. K. Forsyth, H. P. Grimm, L. K. Waldron and G. N. Graves, Illinois; F. H. Carter, Indiana; F. E. Holliday, Kansas; S. N. Jones, Kentucky; J. F. Guerin, Massachusetts; A. H. Webber, J. E. Peck and A. S. Parker, Michigan; C. F. Huhn and Thomas Voegeli, Minnesota; Thomas Layton, Missouri; F. L. Way, New Hampshire; J. C. Gallagher, New Jersey; George Thorpe and Dr. W. G. Gregory, New York; P. W. Vaughan, North Carolina; F. B. Lillie, Oklahoma; E. A. Schallentrager, Ohio; W. C. Garber, Pennsylvania; J. L. Nelson, Tennessee; A. A. Pardee, Wisconsin; John Hargreaves, Ontario; Henry Willis, Quebec.

The report of the Committee on Nominations was then called for and was presented by Chairman William Muir. The report of the committee was unanimously adopted, and the following gentlemen declared elected as the officers of the Association:

President—W. C. Anderson, Brooklyn, N. Y.

First Vice-President—James W. Seeley, Detroit, Mich.

Second Vice-President—Jesse L. Nelson, Jackson, Tenn.

Third Vice-President—Frank L. Way, Manchester, N. H.

Secretary—Thomas V. Wooten, Chicago.

Treasurer—Charles T. Heller, St. Paul, Minn.

Executive Committee (members other than President Anderson and Secretary Wooten):

F. E. Holliday, Topeka, Kan.
D. E. Prall, Saginaw, Mich.
Simon N. Jones, Louisville, Ky.
Alfred DeLang, Cincinnati, Ohio.
A. Timberlake, Indianapolis, Ind.
James C. Perry, Philadelphia, Penn.

On motion it was agreed that $100 be appropriated to remunerate Treasurer Chas. T. Heller for his services the past year. It

Digitized by Google

was also agreed that the office of Treasurer should carry with it a salary of $100 a year in future.

On motion of Mr. C. F. Mann the convention gave a rising vote of thanks and three cheers for retiring President Jones.

On motion of Mr. Muir a vote of thanks was given the members of Detroit and Wayne County Druggists' Association, the local committee, the jobbers and manufacturers and the press, for courtesies received.

On motion a vote of thanks was tendered the house of Parke, Davis & Co. for the liberal hospitality extended to the delegates.

On motion of Mr. Seeley, the President was authorized to name delegates to the A. Ph. A.

A vote of thanks was given to Secretary Wooten.

The convention then adjourned.

I have never placed great stress on the glory of a literary name and whether my song is praised or blamed matters little to me. But when I die, see that a sword is laid upon my bier, for I have ever been a steadfast soldier in the war for the liberation of men.—*Heinrich Heine.*

N. A. R. D. Notes.

CHICAGO, October 8, 1900.

President William C. Anderson announced the appointment of the following standing committees :

COMMITTEES.

National Legislation—John C. Gallagher, New Jersey ; Charles A. Rapelye, Connecticut ; F. W. Herbst, Ohio ; Frank N. Drake, California ; Henry Willis, Quebec, Canada.

Trade-Marks and Patents—Louis C. Hopp, Ohio ; William Bodemann, Illinois ; P. W. Vaughan, North Carolina ; Charles E. Ward, Colorado ; D. F. Jones, South Dakota.

Commercial Relations—W. E. Bingham, Alabama ; Dr. M. L. Porter, Maine ; F. B. Lillie, Oklahoma ; W. C. Gordon, West Virginia ; Sid. J. Coffee, Montana.

Pharmacy Laws—J. F. Guerin, Massachusetts ; C. E. Crecelius, Indiana ; John H. Pickett, Iowa ; Robert M. Dadd, Wisconsin ; W. S. Parker, North Dakota.

Form of Organization—A. A. Broadie, Iowa ; W. M. Federman, Missouri ; W. F. Root, Vermont ; F. W. Fenn, Delaware ; James M. Mann, Washington.

Auditing—H. F. Hassebrock, Missouri ; H. H. Arrington, Georgia ; J. A. Ginocchio, Arkansas ; G. Frank Lippold, Maryland ; Charles W. Horner, Louisiana.

Transportation—W. G. Markell, Pennsylvania : George E. Thorpe, New York ; Mason B. Wood, Rhode Island ; J. W. Thomas, Jr., Virginia ; J. A. Connover, Florida ; James L. Hazlett, Texas ; H. A. Small, Nebraska ; A. A. Pardee, Wisconsin ; J. L. Franklin, Utah ; Dr. J. A. White, Oregon.

—

The following extract from a letter of one of the officers of the N. A. R. D. to an interested jobber is deserving of the thoughtful consideration of a number of druggists who are apparently waiting for something to turn up :

"It will be impossible for us to comply with the requests contained in your letter, that ——— be placed on the list of aggressive cutters, unless there is some indication on the part of the druggists of ——— that they desire price-cutting stopped. We have no association in your city, and none of our efforts to form one there have met with encouragement. Our officers and executive committee are doing everything that lies in their power to improve the drug trade of the country ; however, you will appreciate that we cannot go into a community and undertake to improve conditions there if the druggists of the locality will do nothing on their own behalf."

—

The delightful frankness of the following communication is a sufficient excuse for its publication. It emanates from the secretary of an association whose members get full prices for everything, the direct result of exercising a little common-sense :

"After three or four years of vigorous and ruinous cutting of prices we finally got together about two and a half years ago. We called a meeting one night and when each got a fair look at the other fellow (which was really only a reflection) we involuntarily and spontaneously came to the unanimous conclusion that we were an aggregation of damned fools. We adjourned (as such) sine die, and forthwith organized the —— Pharmaceutical Society and went to work on the plan that it was not right or proper to sell goods at a loss. As the story goes, 'we lived happy forever after.'"

—

The unanimity with which the big and little price demoralizers all over the country are talking and writing against trusts is almost pathetic.

—

The watchword of the Association is "Co-operation," but it means only the kind of co-operation that co-operates.

—

At the session of the N. W. D. A., held Thursday morning, September 20th, the following was read :

"The Proprietary Goods Committee desires to make a supplementary report to that submitted yesterday.

"The following telegram has been received relative to placing the name of the house sending it upon the list of manufacturers who have selected a definite list of wholesale distributers :

BURLINGTON, VT., Sept. 19, 1900.

"F. A. FAXON, *Chairman* :—Our President and Treasurer have arrived to-day from Europe. We have decided to sign Proprietors' agreement.

(Signed) WELLS & RICHARDSON CO."

"Respectfully submitted,

F. A. FAXON, *Chairman*."

A Degree Factory Suppressed.

A few weeks ago the United States Government officers pounced upon a degree factory in Chicago and arrested the operatives thereof. The men, who were charged with having used the United States mails to defraud, were taken before the United States Commissioner, and being unable to secure bail, were sent to jail. The institution with which these men were connected was a joint medical college and law school, and the evidence shows that degrees were sold for the practice of medicine and law at prices ranging from three dollars to two hundred dollars, the compensation being determined upon the amount the aspirant for a degree was willing to advance. The post office authorities, who made the arrest, assert that the "graduates" of this pernicious institution are practicing their professions in every State, and even abroad. The regular medical colleges and law schools in various parts of the United States have been striving to suppress this and other illicit institutions for a number of years, but heretofore have been unable to accomplish that worthy end. The British Consul at Chicago has also made repeated efforts to suppress this particular degree factory, his interest in the matter being due to the fact that a large number of diplomas have been sold in Great Britain and in various parts of the British Empire. It is said that the diplomas issued by this particular institution bear the names of an entire faculty, but that two young girls acknowledge that they were employed to write these names on all the degrees issued by the "college."—*Ex.*

Druggists Will Find Good Profit in

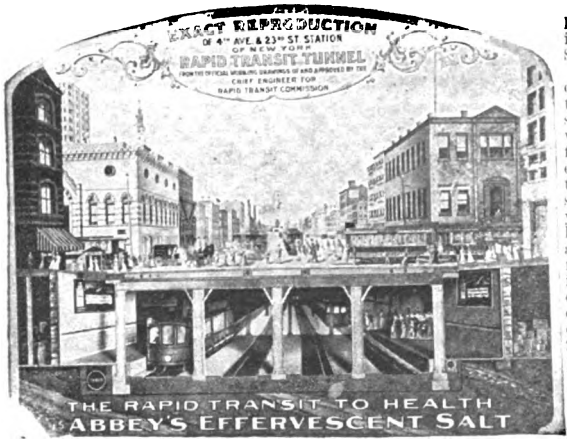
OR OTHER JOBBERS.

THE MOST REMARKABLE WINDOW DISPLAY EVER OFFERED THE RETAIL DRUG TRADE



In actual size, this display cut-out is four feet long by three feet high. It is an exact reproduction, in fourteen colors, of the 23d Street and 4th Avenue Station of the New York Rapid Transit Tunnel.

The design itself has been worked up from the official working drawings of Wm. Barclay Parsons, the Chief Engineer for the Rapid Transit Commission. Mr. Parsons has very kindly examined the work during its intermediate stages, and upon its final completion officially approved it as correct in every particular. As an advertising window display the value of the cut-out cannot be estimated. It is something a person will examine for hours, and yet find some feature of interest. You see the street level, with all its teeming life, as natural as paper and color will permit. The cars and buildings are reproduced from actual photographs. In the tunnel itself you are better able to appreciate the greatest engineering marvel of modern times. You see two center tracks for express trains, while adjoining each side track are the platforms for local service, 23d Street being a local station only. Staircases, tunnel construction, etc., are exactly as they will be. Particular attention is called to the magnificent perspective. You can look into the tunnel, as far north as 42d Street, and the display is so perfectly arranged that in the day time the natural light will answer all purposes, while at night a light can be arranged back of the cut-out, giving an actual tunnel lighting effect. The most satisfactory part of the whole advertisement is its simplicity of construction. It can be put together in a second by any one, as it is practically one piece of heavy cardboard, all joints and connections being reinforced with linen.

The Rapid Transit question is a problem with which every city of any consequence throughout the world is grappling, and it is needless to say that the development of New York's tunnel, and everything pertaining to it, will be given world-wide publicity by newspapers and publications of all kinds during the next few years. We intend as far as possible to take advantage of every item of publicity, and when we are through exhibiting the cut-out in each town, we are safe in saying that nothing locally will have been more talked about than our tunnel window display. Progressive retail druggists who would like to take advantage of this extraordinrry advertisement can do so by ordering one gross of small size **ABBEY'S SALT**, or its equivalent in larger sizes, through their regular wholesaler. All riders to be sent direct to the address below to insure prompt shipment of the cut-out.

THE ABBEY EFFERVESCENT SALT CO., 9-15 MURRAY STREET, NEW YORK.

National Wholesale Druggists Association.

REPORT OF COMMITTEE ON PROPRIETARY GOODS.

THIS organization was formed to promote fraternal and social relations, to guard against feelings of distrust and jealousy, to restrain competition other than by honorable methods, to discountenance all customs not in accord with sound business principles and to establish rules and regulations whereby all grievances and differences might be fairly and equitably adjusted. It has had a career honorable and useful to an eminent degree, and is to-day one of the most influential trade organizations in the country.

The National Wholesale Druggists' Association has given its attention to many important things and has made its work valuable in a wide field, but the Rebate Plan, now, as in the earlier years of the organization, is the paramount issue. Our annual meetings are largely rallies for its support. The members of this Association have been loyal to the plan to an extent that could hardly have been expected. It has had its cloudy and its sunny days, its good and evil times; but it still remains a potent force. In the past it has served well; it must serve well in the future. Sales of proprietary goods are more than half our business. This fact makes the maintenance of the rebate plan an imperative necessity.

Since our meeting at Niagara Falls a year ago, the Proprietary Committee and the Executive Committee of the National Association of Retail Druggists have been working together in developing a plan which it is thought will prove beneficial to the retailer, the jobber and the proprietor. This plan has been called the "New Plan." It is practically the old "Detroit Plan," which was formulated during the brief existence of the "Retail Druggists' Inter-State League." Its features are a list of jobbers to which proprietors will confine their sales at best prices and restrictions to prevent the jobber from supplying rebate goods to the aggressive cutter. It is believed that this plan offers effective means for checking the disastrous cutting evil.

At the Niagara Falls convention the following resolutions were unanimously passed by the N. W. D. A.:

1. *Resolved*, That as it is as much for the interest of the manufacturer as the jobber that the contract plan should be continued, the active interest of both the manufacturer and the jobber should be secured.

2. *Resolved*, That the strength of the contract system lies in the manufacturers adhering to a recognized list of wholesale distributers, to whom sales at their largest quantity discount should be restricted.

3. *Resolved*, That the chairman of the Proprietary Committee be requested to secure the acquiescence of each proprietor who sells his goods on the contract plan to such a list.

4. *Resolved*, That the chairman of the Proprietary Committee be given control of sufficient funds to investigate all reported violations of rebate terms, with power to take such action as may be proper in the premises.

5. *Resolved*, That the recommendations made in the report that the rebate on leading proprietary articles be withheld for three months be favorably recommended for consideration, provided the other work contemplated by the committee does not result in a more thorough control of rebated articles.

To provide adequate funds for a more progressive policy our Constitution was amended so as to make the annual dues of active members $50 and of associate members $20.

The services of F. E. Holliday were engaged, and he became a direct representative of the Proprietary Committee. As he was at the same time chairman of the Executive Committee of the N. A. R. D., the connection had a peculiar value to both organizations.

Immediately following the last annual meetings, the chairman of the Proprietary Committee and chairman of the Executive Committee of the N. A. R. D. undertook to organize the plan already mentioned. The work was extremely slow and there were many vexatious delays. The plan was first presented for acceptance to the five firms of the J. C. Ayer Co., C. I. Hood & Co., Lydia E. Pinkham Medicine Co., F. E. & J. A. Greene and the Wells & Richardson Co., and by them approved.

On March 31 a circular was mailed to all proprietors of medicinal preparations giving a list of those proprietors who had decided to confine their sales at best prices to a uniform list of jobbers and also asking for their support to make the new plan effective.

At the joint meeting of representatives of the three associations, held in Chicago

Digitized by Google

on April 11, no one appeared for the five New England proprietors, the original acceptors of the plan, and in consequence much consultation by wire was necessary. The Conference Committee defined the meaning of the terms "aggressive cutter" and "non-secrets," and wired progress to the five proprietors. A reply was received from them stating that these definitions were satisfactory and they would adhere to the original propositions if all seven conditions were agreed to. To secure successful and early action they insisted that jobbing houses individually agree to this plan, and that orders should be declined from such houses as do not so agree. This, they said, would disclose the friends of the plan at once and put us on the road to immediate success. In the meantime the list of seventeen had grown to sixty-one, and as most of the leading proprietors had accepted the plan, a large percentage of the proprietary goods handled by jobbers was included in the arrangement.

On May 5 the Proprietary Committee issued to wholesale druggists a circular, informing them of the action the proprietors had taken and outlining the conditions under which wholesale agents were to be selected. Jobbers were asked to declare their purpose to accept the conditions of the proprietors and to give the new plan their most cordial and earnest support.

Replies came in slowly. The larger houses of the country were generally prompt to accept the conditions of the new plan, but many of the smaller concerns were dilatory, and a few have never yet responded to the several communications sent them by the chairman of this committee. At this writing, however, those who have not sent in their acceptance represent not more than one per cent. of the distributing power of the trade in the United States, and are therefore an insignificant factor in the operation of the new plan.

On June 14, the proprietors who had signified their intention to adopt the plan were informed by the chairman of the committee that the wholesale drug trade of the United States had almost unanimously accepted the terms and conditions of the new plan for the distribution of proprietary goods, and everything was prepared for the proprietors to go ahead and put the plan into effect. Then occurred a long period of "masterly inactivity" on the part of several leading proprietors, and it was not until August 1 that the chairman was ready to announce the inauguration of the new plan, and that most of the proprietors had issued new price lists and term sheets embracing its provisions. The chairman also announced that of the wholesale druggists throughout the country, 88 per cent., numerically speaking, had accepted the terms and conditions of this plan, and the 12 per cent. from whom no replies were received consist of small dealers representing not more than 1 per cent. of the total volume of distribution.

In the list of sixty-four proprietors who have signed the plan may be found the names of Dr. Kilmer Co., Binghampton, N. Y.; Dr. Miles Medical Co., Elkhart, Ind.; Chamberlain Medicine Co., Des Moines, Iowa; M. M. Fenner, M. D., Auburn, N. Y.; Lightning Medicine Co., Muscatine, Iowa; Omega Chemical Co., New York City, neither of whom have heretofore marketed their goods on the rebate plan.

The chairman takes pleasure in mentioning here the name of Hall & Ruckle, who have placed the staple Sozodont in the list of rebate articles, with discounts to jobbers of 10 and 5 per cent., with free delivery.

Since the list of August 1 was published, other proprietors have adopted the new plan and there will no doubt be frequent additions.

One firm of proprietors was doubtless surprised, disappointed and chagrined at the success attending the committee's efforts in securing the individual acceptance of the jobbers. The Wells & Richardson Company were one of the original five who accepted the plan and pledged their support to it. Yet, since they were advised of its acceptance by the jobbers and requested to issue a new term sheet in harmony with the plan, they have persistently neglected to answer communications from either the chairman of the Proprietary Committee or the chairman of the Executive Committee of the N. A. R. D. The chairman of the Proprietary Committee addressed them by mail, and finally requested them by wire to extend the courtesy of a reply to his previous communications; but up to this moment no recognition of any kind has been given. Mr. Holliday, for the retailers, had a similar experience.

The number of names at present on the list of recognized jobbers is 398. The number on the old list, which was arranged by the N. W. D. A. Committee alone, was 387. Thus the adoption of the new plan has caused an increase of only 11 names in the list of wholesale drug distributers.

It is hoped that the tripartite plan may

Digitized by Google

greatly modify, if it does not cure, existing evils. It ought to prove a valuable arrangement. It is certainly an advantage to the proprietor to deal direct only with his wholesale agents, and since the great army of retail distributers demand that he do this, there should exist in his mind no doubt of its policy. With 400 wholesale distributers located throughout the country, he is assuredly guaranteed a full and free circulation of his products. To the proprietor the plan ought to be especially satisfactory.

The jobber, so long as the present plan is operative, is relieved from the competition of buying clubs, which have of late been springing into existence in many of the larger cities, and he has practically assured him the sale of proprietary articles to most of the large buying retailers. The ninety and nine fair price retailers say to the wholesaler, we will pay you full price for proprietary goods and buy them all of you if you will protect us from the one who is demoralizing trade and undermining our business and we will take it upon ourselves to designate the one. They thus take the real responsibility of the plan upon themselves. The plan is the retailers' plan. They started it. The jobbers endorsed it, and the proprietors accepted it. The retailers are pledged to its success and only ask our co-operation. This should be all the more readily given, for in helping them we help ourselves. Our retail friends are now, it would seem, in possession of means to greatly modify the ills that afflict them. They have been urged to organize. In their hands is now a weapon to be used in their own defense. May they use it wisely and well.

The proprietors who have adopted the new plan are, to the extent of a large majority, unquestionably in sympathy with it and they will be loyal to it.

Of the four hundred jobbing druggists in the United States, less than half are members of this Association, and of those who are members, only about one-fourth attend our annual meetings. Every jobber should keep in touch with the work of this organization. He should be a part of it and do his share of work like a man. He should think it unworthy to reap where others sow. What a power there would be in an association of three hundred or more members, all keenly alive to the issues involved and all meeting for mutual consultation and suggestion once every twelve months. Every member of the N. W. D. A. would do well to consider himself a committee of one on membership and strive to make the list of members what it ought to be. Experience shows that a drug jobber is more effective in the work when in the association than on the outside.

That the plan is a good one for the proprietor there can be no doubt. Leading manufacturers have repeatedly said that it was. It has been to a large extent the life of the proprietary medicine business. Jobbers will never again consent to handle proprietary goods at cost or less than cost, as they did twenty years ago. The destruction of the rebate plan would mean a revolution in the so-called patent medicine business.

We hear of freight allowances, equalizations, etc. This is a pernicious system, and surely not in accord with sound business principles. It is a most disreputable method of evading the letter and spirit of rebate contracts.

The habit of dividing quantities with neighboring jobbers has grown, and is susceptible of endless abuse. We should get the rebate plan to its original status.

Violations do occur, and it has been the untiring effort of this committee to secure proofs of them. It is hoped that those proprietors who, in their contracts, make use of the phrase "should complaints reach us that parties violate these terms, or we have reason to believe that they have done so, we will exercise our right, whenever we are satisfied that these terms have been violated, to decline the orders of parties who have failed to maintain them" will require no stronger proof than indicated in the clause quoted.

There are houses that have failed to recognize that trade has become localized, not because of the rebate plan, but as the inevitable result of growth and enterprise. The tendency is ever in that direction; and whenever a jobber scrambles for trade that is more quickly and cheaply supplied from elsewhere, there the rebate plan is in danger.

If the present tripartite plan does not result in a satisfactory control of rebated articles, the committee would again urge that the rebate on leading proprietary articles be withheld for a period of three months. In the opinion of the chairman, we will in the end come to this; and when we do, the rebate plan will be on a stronger base than it has ever been.

The fears expressed a year ago that the increase in annual dues would greatly reduce our membership, have proven ground-

Digitized by Google

less. The Association is at this time nearly as large as it ever was, but the membership roll should be much longer when we meet in the new century.

The last edition of the Rebate List is nearly exhausted and another issue will soon be necessary. While it it is proper and reasonable to furnish copies to members at exact cost, those who contribute nothing to the expense of this organization should be required to pay considerably more.

The services of Mr. Holliday during the year now closing have been wholly satisfactory. He has found much important work to do, and has proven himself to be the right man in the right place. Secretary Tom has had much experience in the work, and this, in connection with superior natural qualifications, makes him a most valuable assistant. The retiring chairman is pleased to express his sense of obligation to them both.

—

After the reading of the report Mr. Kline moved that the convention go at once into executive session and consider the report. The chair ruled that this could not be done; that the report must be referred to the Board of Control, but suggested that it was within the power of that body to report instanter. The chairman of the Board of Control at once adopted the suggestion of the chair and the report was referred back to the convention, which at once went into executive session to consider it.

RESOLUTIONS ADOPTED.

1. *Resolved*, That we reaffirm the action of the Association a year ago as expressed in the following resolutions:

Resolved, That as it is as much for the interest of the manufacturer as the jobber that the contract plan should be continued, the active interest of both the manufacturer and the jobber should be secured.

Resolved, That the strength of the contract system lies in the manufacturers adhering to a recognized list of wholesale distributers, to whom sales at their largest quantity discount should be restricted.

Resolved, That the chairman of the Proprietary Committee be requested to secure the acquiescence of each proprietor who sells his goods on the contract plan, to such a list.

Resolved, That the chairman of the Proprietary Committee be given control of sufficient funds to investigate all reported violations of rebate terms, with power to take such action as may be proper in the premises.

Resolved, That the recommendation made in the report that the rebate on leading proprietary articles be withheld for three months be favorably recommended for consideration, provided the other work contemplated by the Committee does not result in a more thorough control of rebated articles."

2. *Resolved*, That the thanks of this Association are extended to those proprietors who made the tripartite plan possible by their ready acceptance of the conditions of the same.

3. *Resolved*, That those proprietors who have as yet neglected to accept the new plan be respectfully urged to do so at an early date.

4. *Resolved*, That it is the urgent recommendation of this Association that every wholesale druggist in the country, in or out of this organization, co-operate in every reasonable manner with the retail trade in its efforts to secure protection by the operation of the tripartite plan.

5. *Resolved*, That the incoming Proprietary Committee is hereby instructed to issue a revised edition of the Rebate List at the earliest practicable time.

Laxative Bromo Quinine

Is a Valid Trade Mark, And Must Not Be Imitated.

The Paris Medicine Company won a suit in the United States Circuit Court for the District of Indiana, establishing the validity of **Laxative Bromo Quinine** as a trade mark, and perpetually enjoining the defendant, Newton C. Davis, of Frankfort, Indiana, from using these or any similar words to describe a medicinal preparation of his manufacture. On account of the popularity of **Laxative Bromo Quinine,** it still has a few imitations put up under similar names, which are calculated to deceive the public.

A rank imitation is manufactured by a concern at Detroit, and suit against them is now pending in the courts, and the indications point to a favorable decision in behalf of the Paris Medicine Company. The Paris Medicine Company will bring suit at once against any and all infringes of their product.

There is no excuse for druggists handling imitations of **Laxative Bromo Quinine,** as long as the Paris Medicine Company deal with the Druggists on the same liberal basis as heretofore.

The Genuine LAXATIVE BROMO QUININE is for sale by all Wholesale Druggists.

IS SCHOLARSHIP A PROMISE OF SUCCESS IN LIFE?

Benjamin Ide Wheeler, in Saturday Evening Post.

This is a common question, and the upshot of it is the other question: Do the tests which the college work applies resemble those which life exacts? The answer can be given only in terms of individual experience and observation, and I give mine for what it is worth. There are individual cases, as everyone knows, of success from the lowest third of the class, and the comment of surprise gives them luster. I believe they are comets, however. In my observation, the successful men come chiefly from the first third. When the high scholar turns out a commonplace man, as he not infrequently does, the dunces have their delight, and the one exception outweighs five illustrations of the rule.

A college man wins in life not by virtue of the special knowledge he has acquired so much as by the habits he has formed. Habits of mind involve an attitude toward truth. Habits of thinking involve a control of the mental processes. Habits of work involve sense for time and for duty. A man who does things at the time when they ought to be done is likely to be wanted. It is the men who are wanted that are the successes. The men who are forever toiling to create a demand for themselves, they are the nuisances. The best scholars succeed best in life chiefly, I believe, because they have been most regular and punctual in doing their college work. My experience with college students teaches me that they are intellectually much nearer a level than their achievements indicate. It is power of will more than power of mind that differentiates them. Must and ought have fifty times more stuff in them than might and could. I have known men of the superbest equipment and the finest intellectual and athletic training who were of no possible use for any sublunar purpose, because they could not be relied upon to keep an appointment or to do anything they had agreed to do at a specified time. Having lost faith in their own wills, they had ceased to plan their own work, and went drifting on through life swept with every current.

The college tests are not always such as to prevent some fairly small men and pretty mean men from reaching class honors by sheer digging, but the modern college offers them less opportunity than the old curriculum. Digging is good, for it betrays will-fiber, but the "digs" and "grinds" who lack heart and vision will prove to be men of the muck-rake. There is a type of man found well represented in every class of modern American college from whom one may expect a successful life. He does his college work faithfully and stands well in his class. He takes part in student sports and student affairs without being pure athlete or impure class politician. He is clean in manners, morals, and dress. He holds the solid respect of his class without being flabbily popular. He plans his work, keeps his appointments, moves toward a goal, and spends no time in watching himself grow. It matters little whether such a man is valedictorian or not.

-NAVICULINE-

Every Horseman Knows its Merits.

I will guarantee Professor Mannington's Celebrated Naviculine To cure lameness, no matter how caused, quicker than any other preparation in the market. It is the most powerful paint that has ever been used for Splints, Spavins, Curbs, Bowed Tendons, Knuckling, Weak Kidneys, Shoulder Lameness, Buckshins, Quittor, Navicular Disease, Sprung Legs, Ringbone, Saddle Galls, Shoe Boils, Farcy, Windgalls, Founder Scratches, Grease Heels, Overreach, Thoroughpin, and all bony enlargements, etc. This paint has been used at Newmarket, England, G. B., with immense success; it penetrates muscles, membrane, and tissues to the very bone itself.

☞ **NOTICE!**—Horses entered in valuable stakes may continue their regular work whilst using this valuable preparation. It will not blemish or destroy the hair on any part to which it is applied. Horses need need not be kept standing in the stable eating their heads off through lameness; it is absorbent and exercise assists action thereof.

Blisters, Liniments and Embrocations are counter-irritants, not absorbents being composed mostly of grease; it is impossible for them to reach the muscles, tendons, joints, and absorbent glands. "**NAVICULINE**" will reach them all; it does not contain any grease. Ask your druggist to order it for you; he will do so; it is invaluable to Horsemen, Trainers, Stockraisers, Farmers, etc. Be sure and ask for Professor Mannington's Celebrated "**NAVICULINE**," Yellow Label.

Many well known Owners and Trainers have used this valuable preparation, and will testify to its merits.

PRICE, $3.00 PER BOTTLE.

The Precipitate that Forms in Syrup Hypophosphites, Compound, N. F.

By FERDINAND A. SIEKER.

Syrup of Hypophosphites, Compound, N. F., contains 3.5 parts of calcium hypophosphite, 1.75 parts of each potassium and sodium hypophosphites, 0.225 parts of each ferric and manganese hypophosphites, 0.5 parts of potassium citrate, 0.2 parts of citric acid, 0.1125 parts of quinine hydrochlorate, 2.2 parts of tincture of nux vomica, 77.5 parts of sugar and enough water to make 100 parts. The first edition of the National Formulary does not refer to the precipitate that forms in this syrup when it is set aside for some time, especially in a cool place. The second edition of that semi-official work states that, "it is not intended to be perfectly clear and should be shaken before using." The precipitate that forms in this syrup is of a crystalline character and adheres to the bottom of the bottle. When the syrup is agitated, this precipitate separates in the form of scales, which cannot be properly incorporated.

An examination of the washed precipitate showed that it is calcium citrate, $(C_6H_5O_7)_2Ca_3.4H_2O$. Heated in a glass tube or on a platinum wire, carbonization takes place and an alkaline residue remains. A little of the precipitate dissolved in acetic acid and ammonium oxalate, T. S., added gives a reaction for calcium. The acetic acid solution treated with lead acetate, T. S., gives a precipitate soluble in nitric acid. The precipitate separated from the solution is insoluble in potassium hydroxide, but soluble in cupric chloride, T. S. No iron or manganese was found in the precipitate.

As the precipitate that forms in this syrup is inert and cannot be properly incorporated, it may be removed by decanting the clear syrup from the crystals or by straining the syrup through muslin.

According to Warrington, 1 part of crystallized calcium citrate dissolves in 1180 partsof water at 14° C. and in 1730 parts of water at 90° C.

Opium Confiscated.

Four hundred kilos of opium which was being smuggled into Havana packed in tins labeled sausages has been seized. Collector Bliss has long had a suspicion that opium was being smuggled into Havana and finally succeeded in detecting the smugglers. The opium was confiscated.

A HOPEFUL VIEW OF THE DRUG TRADE.

Whether from his indoor life and sedentary occupation, that prevent him from getting out into the sunlight and rubbing up against his fellow man, or from other causes we wot not of, the average druggist seems more inclined than men in other lines of trade, to take a pessimistic view of affairs, to look only on the dark and seamy side of life, and see its shadows and hardships; the clouds, but not their silver lining. It is only when he gets out upon a vacation that he brightens up, and for a brief time recovers cheerfulness. For this reason alone, if for no other, we regard the annual meetings of the various State associations as most valuable institutions, which repay ten times over all the trouble, expense and worry they cost.

The retail drug trade is unhappily no longer (if it ever was) a royal road to wealth, and the big profits of which the old-timers love to tell, before and during the war, and immediately after it, have gone glimmering, never more, we fear, to return; but for all this, the average retail druggist of to-day gets along about as well as the "average" doctor, or "average" lawyer, on the professional side of his calling, or the average retail grocer or shoe dealer, or hardware man, or retailer of any sort on the trade side.

It goes without saying that the retail druggist does not stand much chance of making a fortune in the legitimate practice of his profession or business; but this is true of the retail grocer and of the retailers generally, and of the doctor and lawyer, as well, nor is this a fact peculiar to our times, out of joint in some respects though they may be. In times past the retailers who have grown rich have, as a general thing, made the "shop" the stepping stone to greater things—the retailer becomes the wholesaler, the manufacturer, and in wider fields gathers the assets which finally aggregate into fortunes, great or small. We must remember too that "fortunes" are comparative, and what constitutes wealth to one man would by another be looked upon as comparative poverty.

The very trials and hardships of the retail trade, and even its failures are frequently among the accidents which blindly force men to fortune. How many a millionaire of to-day became such because he was a failure as a retail merchant, or was an unsuccessful doctor or lawyer in some country town, discouraged, pursued by "unmerciful disaster, following fast and following faster," he left the scenes of his misfortunes, went to some growing city and struck the right thing at last.

The retail drug trade has perhaps been the cradle and nursery of more wealthy men of to-day than any of the whole category of petty trades. If proof of this statement were needed the retail druggist has but to look around him and see upon his shelves the names of dozens of men, who, starting in the back shop, have achieved fame and fortune.

"Aye," may be the answer, "but they commenced when opportunities were plenty. They were lucky—and beside the field is exhausted." Not a bit of it! The opportunities are as plentiful as ever, and as to "luck," the man who trusts to *that* to aid him on to fortune, will always remain poor. To achieve success in any line, one must learn to save, to labor and to wait. He must watch for the opportunity, know it when it presents itself, and seize it then and there. He must know how to adapt himself to circumstances and conditions, must watch the changing times and change his methods to meet them—in a word, he must be thoroughly up to date.

Even with all these qualifications, success is not certain. All cannot be millionaires, any more than all can be masters, but all can make an effort to better their conditions, and fortunately the great majority of efforts in this direction are successful.—*Nat. Drug.*

Standard Preparations:

Mrs. Winslow's Soothing Syrup,
For Children Teething.

BORAX
in 1, 2 and 5 lb. packages, will prove good sellers for the household trade.

How important scientific training is in the wholesale drug, pharmaceutical manufacturing and allied lines of business, is illustrated by a story told at the expense of a certain drug jobber in an eastern city. This gentleman, who handled large quantities of tonka beans, took it in his head one day to clean out his bins, and he raked out of those holding the tonka beans a barrelful of brown refuse. Finding the latter rather fragrant, he asked an offer from a perfumer who, seeing his advantage, bought the lot at the rate of twenty-five cents a pound. The jobber was glad to get "something," at least, for his "dirt," while the astute perfumer is thought to have been glad also, for the brown sweepings he purchased so cheaply consisted of ninety-five per cent. cumarin, worth from twelve to fourteen dollars a pound.—*West Drug.*

"Theodore E. Otto, of Columbus, has been elected president and C. B. Woodworth secretary of the Ohio Board of Pharmacy."
—*Western Druggist.*

Do any Ohio pharmacists know either of these gentlemen? The Ohio Board of Pharmacy does not.

Land Rich in Rubber Trees.

Upon the recommendation of the war department the agricultural department is preparing an order setting apart as forest reserves the Island of Romblon, which is north of the Island of Panay; also the Island of Pauitaui, which is one of the extreme group of the Jolo Islands. Officers of the army who have been investigating the islands have found that these are the richest lands in the world for rubber trees, and it is the intention of the Washington authorities to have the trees preserved and cared for, especially as some fears lately have been expressed that the rubber supply might become exhausted.

The Telectroscope.

Among the marvelous improvements in the uses of electricity to be on exhibit at the Paris exposition, not the least among these new inventions will be that exhibited by M. Szczcpanik, a Polish scientist, who has just completed an instrument called the telestroscope, by means of which, when attached to the telephone, one may not only talk with those at the other end of the wire, but see them as well.

THE EDUCATIONAL USE OF HYPNOTISM.

John D. Quackenbos, in the July Harper's—Condensed.

Many persons are born with unbalanced minds in dissymmetry, one group of faculties developed at the expense of another group, a single talent or aptitude monopolizing almost the entire output of mental energy. The restoration to equilibrium of such asymmetric minds may be accomplished by appropriate hypnotic suggestion. A recent experiment of the writer's establishes the fact that disequilibration may be adjusted, a congenital cerebral deficiency overcome; a personality crippled with thought-inhibition, mental apathy, and defective attention transformed into a personality without a blot upon the brain, and so impending insanity shunted—by the use of hypnotic suggestion as an educational agency. In October, 1899, I accepted for experimental work the case of the Russian Hebrew boy George Rubin, known to his school-fellows as "Crazy George," and to the newspapers as the music-mad boy genius of Brooklyn. An examination showed at once that young Rubin occupied the neutral ground which divides the sane from the insane. He exhibited many of the prodromata of madness—viz., exaggerated irritability, sullenness, preternatural suspicion, accompanied with a slowness of all thought-processes, great difficulty of recollection, general incoherence, ill-timed hilarity, lack of interest in both amusement and occupation, aversion to the society of other children, absurd fears, hallucinations and night-terrors, and a conspicuous one-sided attention, pathologically diminished for ordinary things, but morbidly increased for music. His one passion was violin-playing; on this subject he was a monomaniac.

At the second seance young Rubin was hypnotized in one hour with the help of a suspended diamond, and this method has since been pursued in his case. The earlier suggestions were to the effect that he was no longer nervous, that he had no fear of the dark or of phantom rats, that he would sleep without terrorizing dreams. The post-hypnotic fulfillment of these suggestions indicated the appropriateness of more direct educational work. The temper was first dealt with; the outbursts of passion were forbidden; obedience and docility were inculcated. Then at a subsequent meeting followed the cultivation of the attention and the memory. A most gratifying response to these lessons suggested the development of the reasoning powers, and the automatic mind was directed to the study of arithmetic, and prepared for its successful and enthusiastic pursuit. A marked character change has certainly been effected. The boy is now docile, obedient and happy. The tangled faculties have been unraveled, and he has become rational and quick of comprehension, has acquired powers of observation, concentration, and recollection that he was entirely without before the first treatment. He can describe and narrate with ease, and answer questions without hesitation. His face beams with an intelligent expression entirely new to it, and his interest in his surroundings is absorbing.

Prof. Coy of Cinncinnati tells a good story of an applicant for examination for entrance to a medical college. The young man knew absolutely nothing of United States history, and Prof. Coy after having his patience nearly exhausted. in desperation asked the question, "Why do the people of this country celebrate the Fourth of July?" Answer, "Because it is the birthday of Christ."

That fellow might make a good physician but a pharmacist never!

YOU MAY SUBSTITUTE Wampole's Milk Food for mother's milk without interfering with the baby's nutirition or digestion.

There is nothing in it that is not found in mother's milk; there is nothing in mother's milk that is not found in

WAMPOLE'S MILK FOOD.

It is thoroughly cooked, and ready for use by simply adding warm water.

Furnished only in glass containers which are securely sealed.

Samples cheerfully furnished without charge. Correspondence on the subject of artificial foods solicited, which will receive prompt and courteous attention.

Made by **HENRY K. WAMPOLE & CO.** Specialists in Progressive Pharmacy.

Originators and Sole Manufacturers of

SENSE AND NONSENSE.

"Of plain sound sense life's current coin is made."
—*Young.*

"A little nonsense now and then
Is relished by the wisest men."—*Anon.*

(*When origin is known credit is given.*)

O, What a Difference!

His business never leaves a chance
To take a holiday
When his wife makes the announcement
Of a coming matinee.
Life is too short for trifles,
And his time she must not claim,
But when a friend invites him out
To see a baseball game—
That's different.

He vows a man should ne'er complain
About the tax he pays,
But gladly help the government
Its revenues to raise.
Each one should swell the public purse,
That threatens to grow slim,
Yet when the bland assessor comes—
That's different.

He ever counsels gentlemen,
And says no person ought
To let himself forget the claim
Of philosophic thought.
Nothing in life is great enough
To justify our ire,
But when, eleven miles from home,
A tack sticks in his tire—
That's different.

▲ ▲ ▲

Conscientious.

"He's a vegetarian, is he?" "Oh! the strictest kind. He won't even eat oyster plant."—*Philadelphia Record.*

▲ ▲ ▲

In the biography of Dr. Hawtrey, a famous English schoolmaster, there is a description of his unkempt appearance and the story of artless criticism thereon.

He was one morning reproving a boy who was tardy at his lessons, and the pupil asserted that he had not time to dress.

"But I can dress in time," said Dr. Hawtrey.

"Yes, sir," replied the boy, innocently, "but I wash."

▲ ▲ ▲

He Lost His Opportunity.

The Tramp—"Once I wuz in a fair way ter becomin' a millionaire, but a darn labor-savin' device ruined me."

The Farmer—"Ye don't say! How's that?"

The Tramp—"I wuz gittin' along nicely as a bartender in a saloon when de boss bought a cash register."—*Puck.*

A Bad Shot.

"Sir, the men on the firing line refuse to go out again if Private Pineknot goes with 'em." "What is the matter with the private?" "He used to hunt deer up in Maine, sir, an' the other men are afraid of their lives."—*Cleveland Plain Dealer.*

▲ ▲ ▲

From the Farmer's Point of View.

Mrs. Oatcake (reading newspaper)—"There are fifteen thousand Poles in Philadelphia."

Farmer Oatcake—"Gracious! What a place to raise beans!"—*Philadelphia Record.*

▲ ▲ ▲

A Good Man.

"They say the cheap magazines may have to be discontinued, because the price of paper has gone up."

"Indeed? Who is responsible for the rise?"

"Oh, I suppose some philantropist."
—*Life.*

▲ ▲ ▲

Waman's Love of Mystery.

Sacharissa—"I wouldn't marry you for the world—the whole world."

Strephon—"Why, may I ask?"

"Oh, it will be so lovely to spend the rest of my life wondering whether I wouldn't be more unhappy if I had married you than I am because I didn't."—*Life.*

▲ ▲ ▲

"It's simply impossible for me to find bread for my family," said the loafer.

"Same way here," remarked the grocer "I have to work for it."—*Chicago News.*

▲ ▲ ▲

"I want to ask one more question," said little Frank, as he was being put to bed.

"Well," acquiesced the tired mamma.

"When holes come in stockings, what becomes of the piece of stocking that was there before the hole came?"—*Tit-Bits.*

▲ ▲ ▲

Teacher—"How many bones are there in the human body?"

Pupil—"I don't know. I haven't learned to ride a wheel yet."—*Detroit Free Press.*

▲ ▲ ▲

From Princeton.

The Doctor—"And the baby is no better. Did you get those little black pills I spoke to you about?"

Mrs. Newlywed—"Well, you see, the druggist had some awfully cute pink ones, that just matched the darling's new dress, for eighteen cents marked down from twenty-five, so I got those instead.—*Spatula.*

Nature's Tonic.

Are you broken with the din
Of the street?
Are you sickened of your thin
Hands and feet?
Are you bowed and bended double
With a weight of care and trouble,
Are you spectral with a skin
Like a sheet?

Take your body and your soul
To the woods,
To the tonic and control
Of its moods,
Where the forest gleams and quivers,
Where the only roads are rivers,
And the trunk line bears the whole
Of your goods.

You shall breathe the pungent air
Of the firs,
Till your blood shall make you dare
When it stirs.
Let the camp cook with his kettle
Make you fat and full of mettle;
You must take the forest fare—
No demurs.

O! the sunsets and the break
Of the day,
When the vapors from the lake
Swirl away;
O! the clouds in snowy ranges,
With their gold and ruby changes,
And the fading flake by flake
Into gray.

O! the mist about the stones,
How it shines,
And the squirrels dropping cones
Out of pines!
O! the sunshine on the summit,
And the jay that bugles from it—
Of the vigor that atones
These are signs!

▲ ▲ ▲

"Do you regard late rising as injurious?"
"It certainly shortens one's days."

Mrs. Homespun (suspiciously)—"I wonder why Hennery's college diploma is writ in Latin, Josiah?"

Mr. Homespun (grimly)—"Well, Sarah, to tell you the truth, I think the professors have got suthin' to say about Hennery in that diploma that they don't want us to know about."—*Puck.*

▲ ▲ ▲

"My friends," exclaimed the eloquent minister, "were the average man to turn and look himself squarely in the eyes, and ask himself what he really needed most, what would be the first reply suggested to his mind?"

"A rubber neck!" shouted the precocious urchin in the rear of the room, and in the confusion which followed the good man lost his place in his manuscript and began over again.

▲ ▲ ▲

Mrs. Youngling—"John, do you suppose you can hear the baby from where you are if he wakes up and cries?"

John (who is reading his newspaper)—"I dunno. I hope not."—*Cleveland Leader.*

▲ ▲ ▲

New England Apprehension.

"What reason do you think that Boston girl offered for rejecting me?" "I can't imagine." "Land of goodness! She said she was afraid to marry me for fear she would outgrow me."—*Chicago Record.*

▲ ▲ ▲

Bjones—"Thompson, the consumptive, died on a sleeping car." Smythe—"What did he expect, with Pullmanary trouble?"
—*Harvard Lampoon.*

SYNOPSIS OF OHIO LAWS RELATING TO PHARMACY.

PHARMACY LAW.

There are two grades of licentiates, pharmacists and assistant pharmacists. Every pharmacy or store where drugs are sold at retail or where medicines are compounded or dispensed must be under the immediate supervision of a registered pharmacist. An assistant pharmacist can only perform the duties of a pharmacist in a store which is under the supervision of a registered pharmacist. A pharmacist can not have supervision of more than one drug store or pharmacy, nor can he be regarded as being in charge of such when he spends a portion of his time in another occupation.

Physicians may compound or dispense their own prescriptions and keep a stock of drugs for that purpose, but they can not legally sell drugs in the same way as a druggist, nor compound the prescriptions of other physicians.

The following articles may be sold by persons not registered: Copperas, borax, blue vitriol, saltpetre, sulphur, brimstone, licorice, sage, juniper berries, senna leaves, castor oil, sweet oil, spirits of turpentine, glycerine, glauber's salt, cream of tartar, bicarbonate of sodium, quinine, rochelle salts, epsom salts, alum, gum camphor, oil of cinnamon and oil of lemon.

The following articles may be lawfully sold by persons not registered, if put up in boxes, vials or packages by a registered pharmacist or wholesale druggist, and bearing the name of the article, the directions for its use and the name of the firm or person who prepares them: Paregoric, essence of peppermint, essence of cinnamon, essence of ginger, hive syrup, syrup of ipecac, tincture of arnica, syrup of tolu, syrup of squills, spirits of camphor, number six, sweet spirits of nitre, compound cathartic pills, quinine pills and paris green when put up in bottles or boxes, bearing the name of a legally registered pharmacist or wholesale dealer, and labeled as required by Section 4364 54 of the Revised Statutes.

Registration is secured by examination only. Examinations are held in Columbus on the second Tuesdays and Wednesdays of January, May and October. The fee is $5.00 for pharmacist and $3.00 for an assistant pharmacist. Applications must be filed at least five days in advance of any examination.

Applicants for first grade certificates must be at least 21 years old and have at least four years experience in the study and practice of pharmacy.

Assistant pharmacists must be at least eighteen years old and have at least two years experience.

Certificates are issued for three years and are then renewable if the holder is engaged in the practice of of pharmacy in Ohio.

Certificates obtained through fraud or misrepresentation are subject to being revoked.

The board of pharmacy may grant certificates to those registered as pharmacists in other states by examination, if their grades are high enough in the state where the examination was taken, but only when such state recognizes on like terms the holders of Ohio certificates. But few states however interchange with Ohio.

Penalties for violation of the law are from $20 to $100 fine and from twenty to one hundred days imprisonment or both. Each day constitutes a separate offense.

POISON LAW.

Whoever sells or gives away, any quantity of arsenic less than one pound, without first mixing therewith soot or indigo in the proportion of one ounce of soot, or half an ounce of indigo to the pound of arsenic, or except upon the prescription of a physician, sells or gives away any quantity of any article belonging to the class usually denominated poisons, to any minor, or sells or gives away any such article to any person, without having first marked the word "poison" upon the label or wrapper containing the same, and registered in a book to be by him kept for that purpose, the day and date upon which it is sold or given away, the quantity thereof, the name, age, sex and color of person obtaining the same, the purpose for which it is required, and the name and place of abode of the person for whom the same is intended, shall be fined not more than two hundred nor less than twenty dollars.

LABEL LAW.

SECTION 1. Be it enacted by the General Assembly of the State of Ohio, That whenever any pharmacist, druggist or other dealer in poisons, chemicals, medicines and drugs, whether wholesale or retail, shall sell any drug or chemical, an indiscriminate or careless use of which would be destructive of human life, such dealer shall affix to each bottle or package of such drug, chemical or poison, a label printed in red ink, having on it the name of the article by which it is commonly known, the cautionary emblem of the skull and cross-bones, the words "caution and poison," and in addition thereto at least two of the most readily obtainable effective antidotes to such poisonous article.

SEC. 2. Whoever violates the provisions of section one (1) of this act shall upon conviction thereof, before any court having competent jurisdiction, be fined in any sum not exceeding one hundred (100) dollars, nor less than ten (10) dollars.

MORPHINE LAW.

SECTION 1. Be it enacted by the General Assembly of the State of Ohio, That it shall not be lawful for any person, other than a wholesale druggist or other dealer in drugs and medicines, to sell or offer for sale at wholesale, or for any person other than a registered pharmacist or a registered assistant pharmacist, to sell or offer for sale at retail, morphine or any of its salts, in this state, and it shall not be lawful for such person to sell or offer for sale, morphine or any of its salts, in any bottle, vial, envelope or other package, unless the same shall be wrapped in a scarlet paper or envelope, and all bottles or vials used for the above purpose shall contain not more than one drachm each, and shall have in addition to said scarlet wrapper a scarlet label lettered in white letters, and the same must be upon both vial and wrapper, when vials are used, plainly naming the contents of said bottle; and further, that no person shall have the right to change any preparation of morphine from its original package to any other receptacle whatever for the purpose of retailing or dispensing therefrom, but it must be retailed or dispensed only from the original package with scarlet wrapper and scarlet label as aforesaid.

SEC. 2. That any one violating the provisions of the above section shall be guilty of a misdemeanor, and on conviction thereof shall be fined not less than ten or more than fifty dollars, at the discretion of the court, for each and every violation of the preceding section.

SEC. 3. That all laws and parts of laws in conflict with this act be and the same is hereby repealed.

WAR TAXES.

RATES PROVIDED BY SCHEDULE B.

On medicinal proprietary articles, perfumery, cosmetics, hair and tooth preparations, cachous, etc., the retail price of which is

5 cents or less	.00⅛
Above 5 cents and not above 10 cents	.00¼
Above 10 cents and not above 15 cents	.00⅜
Above 15 cents and not above 25 cents	.00⅝
And for each additional 25 cents	.00⅝

On chewing gum or substitutes therefor, on each box, carton, jar or other package containing chewing gum, the actual retail value of which is not more than

$1.00	.04
For each additional $1.00	.04

On sparkling or still wines, when bottled for sale, upon each bottle of

One pint or less	.01
More than one pint	.02

Articles subject to stamp tax under Schedule B, are liable to tax when sold in what are termed bulk packages, as well as when sold in retail packages, and the value of the stamp or stamps to be affixed must correspond with and be proportionate to the price of a single retail package.

Dealers may retail directly to the consumer from such bulk packages as have been properly stamped by the manufacturer or importer, drawing from the same in quantities to suit their customers without any additional stamping, but the stamps attached to such bulk packages will only protect the original contents. If bulk packages are broken up by the dealer drawing off the contents into smaller vessels to be put upon his shelves, or otherwise kept for future sales, the contents so drawn off cease to be identified with the stamped package in which they were originally put up by the manufacturer or sold by the importer, and such contents so put up become liable to seizure if stamps are not affixed to them.

The contents of bulk packages liable to tax under Schedule B, which were in the hands of retailers on July 1, 1898, and therefore unstamped, must be stamped when sold at retail from said packages proportionately to the retail price of the whole package.

Articles liable to tax in the hands of a retail dealer who is not the manufacturer thereof, July 1, 1898, must be stamped by such retail dealer when he sells them at retail. In stamping such articles the retail price fixed by the manufacturer must be adhered to by the retail dealer.

RATES UNDER SCHEDULE A.

Bills of Exchange—	
Inland, for each $1 00 or fraction thereof	.02
Foreign, single, for each $100 or fraction thereof	.04
Foreign, in sets of two or more on each bill, for each $100 or fraction thereof	.02

Scott & Bowne,

Manufacturing Chemists,

Cor. Pearl & Rose Sts.

New York, May, 1900

To the readers of the Midland Druggist:

Do you know that we were the pioneers in advertising an Emulsion of Cod Liver Oil? That we are, and always have been, far and away, the largest advertisers of a Cod Liver Oil Preparation? Do you realize that the demand you now have for Cod Liver Oil Emulsions was made, and is largely maintained by an enormous expenditure of our time and money? Stop a moment and think.

How much of this demand have YOU created? Haven't we tilled the soil and sown the seed? Hasn"t our commodity always given satisfaction? Yes? Then aren't we honestly and justly entitled to the sale, when SCOTT'S EMULSION is asked for? That is all we ask.

Yours sincerely,

SCOTT & BOWNE.

WINE OF CARDUI

Presents the most attractive proposition to a retail druggist. The discounts are exceedingly liberal, and the best advertising makes sales easy. Every home needs Wine of Cardui, and a distribution of our advertising with your name on it will make a large proportion of the homes in your neighborhood your customers.

FOR CASH IT COSTS ONLY:—
$7.84 in one dozen lots.
$7.60 in three dozen lots.
$6.84 in twelve dozen lots.

(THEDFORD'S BLACK-DRAUGHT may be included to make up the quantities.)

For a fine assortment of Ladies' Birthday Almanacs, Cardui Books, Weather Prophet Books and Show Cards, address THE CHATTANOOGA MEDICINE CO., Chattanooga, Tenn.

QUESTIONS SOLICITED.

We solicit questions on all points of general interest to the trade. Technical questions will be answered by the editor, W. R. Ogier, or Prof. Geo. B. Kauffman. Correspondents must send their names, not for publication, with each query. No attention paid anonymous questions.

Editorial.

"THE REIGN OF LAW."

JAMES Lane Allen has recently written a book under the above caption. He touches with the pencil of an artist scenes in nature for he is a profound student of the natural world and any lover of God's out-of-doors will be entertained and profited by his sketches thereof, although he may care but little for the philosophical phases of his writings. Thirty years ago, when the theories of Darwin and other scientists, with tendencies toward evolution, were attracting the attention of thoughtful minds, his ideas in the "Reign of Law" would, no doubt, have received wider notice and made a deeper impression than is possible now, for he is apparently threshing over straw from which the grain has been already pretty well beaten.

But this is not a book review or a criticism on a literary work which would be regarded by many as wholly out of place in a trade journal. This, also, is an open question, for would it not be better if men with the mental endowment requisite to become good pharmacists would get some surcease from their responsibilities by dipping a little occasionally into that type of literature which touches the intellect on a wholly different side from that brought into constant play by the reading, both in books and from the pages of experience, which is constantly thrust before them ?

The title of this book suggests some thoughts which may have some little bear-

Digitized by Google

ing on the conditions surrounding the men engaged in pharmacy, conditions which have come almost wholly upon them within recent years. There is no trade, and we feel safe in stating that there is no profession, which has been made the occasion for so many laws as the trade (which many persist in calling it) or the profession of pharmacy has encountered within the experience of many who are still actively engaged in it.

Pharmacy laws, poison laws, label laws, pure food and drug laws, laws relating to the sale of a class of articles usually sold only by druggists are to be found with greater or less additions in every state, and the most of these have been proposed and many of them enacted only by the untiring efforts of the druggists themselves.

This is a unique spectacle, for it is not often the case that men in any trade or calling which has a mercantile phase are found throwing about their occupations restrictions which may upon the whole be said not to be to their pecuniary advantage. Medical laws, it is true, have been passed at the instigation of physicians, but medicine is a profession wholly, and the ethics of the medical profession are both fearfully and wonderfully constituted. The comparison, therefore, as to medical laws is not a good one.

Laws relating to the entire range of the pharmacist, both commercial and professional, may be laid properly at the door of the pharmacist himself, for without his efforts they would not even now in most instances be demanded by the public at large. What has been the motive that has prompted him in his work toward this end? Has he profited by them in a financial way? Has his status been particularly raised as a professional man? Has his legal responsibility been lightened? Has his social position been improved or his influence as a citizen enlarged?

We will not wait for the chorus of responses without a discord in it which is sure to be the reply to these questions. We will here touch upon but a single phase of this subject, leaving to a subsequent article some additional observations.

A long time ago, as we count time, there was a general impression that any law restricting the sale of drugs to a limited number of persons would be of great benefit to those engaged in such business, there would be a wider field with less competition and prices would be sustained or increased. This was before the days of hard competition in commercial lines and when the educational facilities, particularly in pharmacy, were very limited. Here it was agreed was an opportunity for bettering the condition of a class not then very well paid, and of making more secure their position in the future. Never were a class of men so bitterly disappointed in their hopes as pharmacists who thus reasoned have been with the results under laws of their own seeking. Not one of the good things which they counted upon has been realized. The same, or stronger, competition is met in every town or city, the prices have declined, expenses have increased and the different lines of goods once sold only by druggists are now sold by all sorts and conditions of men. Schools have multiplied to meet the demands of better trained men, made necessary by the new legislation, and all has turned out vastly different from what was fondly anticipated. A large and growing class of men has come into prominence, which, using their superior natural advantages as well as their opportunities for education, has succeeded in maintaining the laws which the pharmacist thought were for his special benefit, and has added others thereto.

Instead of holding his position in the councils of his associates and making himself felt the man actually in the retail drug business has given over the work of his state and national organizations to the professional man who has had his field made for him in great measure by the acts of the retail druggist himself. He is, therefore, suffering from the "reign of law," while the man with superior abilities is drifting away as rapidly as possible from the retailing of drugs, and while holding relations to the professional side of pharmacy of great power he is also taking the lead in matters which should be under the direction of the men who are most deeply interested in them. No more striking evidence of this can be offered than in the fact that the American Pharmaceutical Association is largely given over to those not engaged in the practice of pharmacy and that the Commission chosen for the present revision of the Pharmacopoeia contains but three members actively engaged as pharmacists. Upon whom then does the responsibility for this condition rest? Upon the men who have retired from participation in the larger activities connected with pharmacy and have given their direction over to others without protest. Here the retailer has made his fatal mistake. He has weakly

Digitized by Google

surrendered the field ere the conflict was well begun, when it was his duty to meet the emergencies which changed conditions developed and to contest the ground with courage and determination. He should realize that laws relating to pharmacy or the retailing of drugs are here to remain with the probabilities that other and more stringent ones are to follow. He should reason philosophically that while such laws have been of little advantage to him they have been of great benefit to the citizens of his country in whose well being he should have more than passing interest. He should ally himself to those organizations the aim of which is to guard and promote his business or professional welfare, and it is to his lasting discredit and constant loss that he has refused or neglected to do so. The National Association of Retail Druggists has not received in large measure the support of the majority of the retailers of the country, notwithstanding the urgent appeals made to them through every channel by which they could be reached and in plain view of the fact that this association is now the only *visible* instrumentality through which any amelioration of present unsatisfactory conditions may be accomplished. The retailer has not yet demonstrated that he is worthy the sacrifices which some are making to help him into a better condition, and until he does the stigma of failure rests solely upon his own head.

"In plodding along if the thorns in your track
Seem sharp, don't you never say die;
Don't fall by the way with your heart in your neck,
And say it is no use to try.
Though oft by misfortune your head may be bowed,
Don't look upon life as a sham,
But jack up your nerve and keep up with the crowd—
Toot your horn if you don't sell a clam.

"A man who will sit in the game with the dumps,
And show a big shortage of sand,
Will find to his sorrow that none of the trumps
Will ever fall into his hand.
Though losses may come, keep a grip on your pluck.
Don't bleat like a motherless lamb,
Make a noise in the world if you never have luck—
Toot your horn if you don't sell a clam!

"The man who will weaken and throw up his hands
When the clouds gather over his head,
Is just the poor coward who well understands
What it is to go hungry to bed.
Present a bold front to your menacing foes,
In the heat of the battle be calm,
And never say die till you turn up your toes—
Toot your horn if you don't sell a clam."

—W. R. O.

MISTAKE COSTS A CHILD'S LIFE.

THE above headline from a Cleveland paper heads an account of an unfortunate accident recently in that city. The press accounts are to the effect that a physician was called to see a small child which was not very ill. He wrote a prescription for one ounce of tincture of aconite, the directions being to put ten drops in a glass of water and to give a teaspoonful (of the solution) every hour. The druggist dispensing it wrote the directions as follows: "ten drops to glass water, then teaspoonful every hour." The mother mistook the directions to mean that ten drops of the tincture was to be given in water then a teaspoonful (of the tincture) to be given every hour. The dose of ten drops first administered necessarily made the child very ill, and while a messenger was in search of the physician the mother, thinking the remedy was to relieve the child, was actually engaged in trying to force a teaspoonful of the poison into the child's mouth when assistance arrived. Of course the infant was then beyond human aid and died soon afterward.

If this is a correct account there are two important lessons which such an occurrence should teach; first, the physician who will prescribe one ounce of tincture of aconite in any case unless it is to be used for external application, when it should be labeled "poison, for external use only," is not a discreet physician.

If, in this case he wished to administer aconite he should have written for a three or four ounce solution to be prepared by the pharmacist and in this manner no possible harm could have come to the patient.

Second, there was not sufficient care used in writing the directions on this prescription. The best pharmacist as a rule is not the one with the greatest amount of technical learning but the one who combines with theoretical knowledge a large amount of caution, and a minute attention to very small matters. If this label had been written "put ten (10) drops in a glass of water. Then give of the mixture one teaspoonful every hour," the directions might not have been mis-read.

A pharmacist should always remember that there are a great number of careless and a still larger number of ignorant people in the world and he should endeavor always to so express himself in writing and otherwise in a manner that cannot be easily mis-understood by the careless or ignorant.

Digitized by Google

A case came to our notice not long since in which the directions written for a prescription, which called for a teaspoonful, were so written that the "tea" was separated from the "spoonful" and the patient read it "two spoonsful" and was taking just double the amount intended; fortunately it was not a poisonous compound and no serious results followed aside from a rather disagreeable sensation from the effects of the larger dose. If this label had been written "Take one (1) teaspoonful every two (2) hours," instead of "Tea spoonful every two hours" it would not have been possible to make such a mistake.

The point is one what the surgeons or artists would call "technique."

It is not a matter of knowledge but of skill in appreciation of what the dotting of an "i" or the crossing of a "t" may involve, and most accidents are the result of some little unforseen matter which might easily have been avoided.

It is common phrase "eternal vigilance is the price of liberty." For a pharmacist it should be "eternal vigilance and caution is the price of a quiet mind, a good reputation, the lives, health and comfort of his patrons." —W. R. O.

SELF-IMPOSED BURDENS.

RETAIL druggists would make good missionaries. They challenge mankind in sacrifice and self-denial. Whether the motive is purely selfish or not is a question we will not discuss here and now. But what other class of men except religious devotees would give so much of their comfort and get so little for it? The whole tendency of the time is toward relaxation in other vocations. The laboring man will not work longer than eight hours. The barber has revolted against work on the seventh day, surely not because his religious tenets impel him to a sacred observance of that day but because he wants a little time for the parks, the excursion, the Sunday fishing, the bowling alley, etc.

Even at that he is more religious than the druggist, for he is thereby making a better barber for the other six days. But here he is grinding for one hundred and twelve hours at least in every seven days and swearing villainously at the fate to which he is consigned. Poor fellow, why o ‹‹ he not write a declaration of indepento the effect that all men are created free and equal, that "governments derive their just powers from the consent of the mis-governed" or some other equally sensible or non-sensical phrases and then fight for his rights, or rather his privileges? The cry is now that there is no longer any prescription business, that the doctors carry their own medicines, that the art of dispensing is reduced to pouring out of a semi-patent medicine bottle a prepared article and writing a label for it. Then what is the use of keeping open all night and all day Sunday to sell the class of goods which buyers would purchase during reputable hours if the druggist had not meekly catered to an erroneous idea without solicitation? There is not a town, and there are but few cities, in which the drug stores could not be closed at least as early as eight o'clock to give the clerks and owners the opportunity for social entertainment of one sort or another, and the net result would be an equal volume of business with better service to the patrons and a jolly good time for the boys, young and old. Ideal? Why bless you, every thing is ideal these days and the men who are walking with their backs to the sunrise are stepping in their own shadows, they are not disturbing other people a great deal.

Why may not some local association take up the matter of shorter hours and push it to a solution? It can be done.

—W. R. O.

THE TARRANT EXPLOSION.

THE most plausible theory of the terrific explosion which occurred in the building of Tarrant & Co., New York, is that it resulted from chlorate of potassium and sulphur, of which there were two tons or more of the former and a ton of the latter in close proximity. It does not seem credible that any person or firm with even the smallest knowledge of the nature of these substances when brought together could have been so reckless of their own personal affairs not to mention those of the large number of others necessarily involved as to permit such large quantities of these dangerous explosives to be stored in a building in the heart of a great city.

Not only was such action a gross violation of the civil law relating to the storage of combustibles or explosives within the city limit but it was a still more infamous trans-

Digitized by Google

gression of the moral law of consideration for the well being of others.

If men have no sense of personal hazard, if they are so reckless of their own lives and indifferent to their own property loss, they at least should have sufficient interest in the lives and property of those about them to avoid placing them in such jeopardy. Who of the persons interested in this concern or all of them combined are able to restore the property loss of a million and a half of dollars or bring to life again those whom their recklessness destroyed ?

There should be but one remedy for such criminal carelessness and that should be promptly visited upon the responsible members of this firm if it is shown that they permitted the storage of such amounts of explosives as the reports indicate, and that is an indictment and conviction for the crime of manslaughter.

The public awaits with interest the verdict of the coroner's jury and the subsequent action of the authorities in this case.

The latest reports are that the body of Benjamin Moorehouse has been found in the ruins ; Moorehouse is the only person whom it is said had any knowledge of the amount and character of the chemicals stored in the building and, if this is true, the cause of the explosion may never be revealed.

THE Retail Druggists' Association of Jersey City, N. J., recently held a meeting at which a schedule of prices was agreed upon for all proprietary articles in harmony with the plan of regulating prices in localities adopted by the National Association of Retail Druggists. The prices fixed were not less than 20 cents for 25-cent articles, 45 cents for 50-cent articles, and not less than 85 cents for $1.00 articles. Eugene Hartnett, the noted cutter of that city, was present and contributed to the adoption of the schedule. There is no question that the rates for prices must be adjusted to localities and the recognition of this fact is a long step in the solution of the complicated question of price-cutting. Full prices cannot be established and maintained in some localities. It is better to fix a minimum rate affording a small margin than to sell at cost, as many have been obliged to for several years.

It is with narrow souled people as with narrow necked bottles; the less they have in them the more noise they make in pouring it out.

DEATH OF DR. E. R. SQUIBB.

Was One of the Best Known Manufacturing Chemists in the U. S.

Dr. Edward R. Squibb died of heart trouble, incident to his extreme age, at his home, No. 152 Columbia Heights, Brooklyn, Thursday evening, October 25th, after a brief illness. Dr. Squibb was a manufacturing chemist of national reputation. He was of Quaker parentage, and was born on July 4, 1819, in Wilmington, Del.

After being graduated from the Jefferson Medical College, Philadelphia, he was appointed a surgeon in the United States army. Subsequently he was appointed as passed surgeon, in charge of the Brooklyn Navy Yard medical station. While he was there the civil war broke out, and his skill was utilized by the Government in the preparation of pharmaceutical supplies.

Later he resigned and started a private laboratory on Furman street, and still later he moved to Doughty street, where the laboratory now is. It is devoted to the manufacture of standard medicines and is said to be one of the most complete in the country. He prepared a remedy during the cholera epidemic in the early '60s which is still in favor. Fifteen years ago he retired from active business, but under his counsel his sons, Dr. Edward H. and Charles F. Squibb, continued the laboratory.

Dr. Squibb married Miss Caroline F. L. Cook, of Philadelphia, 48 years ago. She survives him, as do also his sons and a daughter, Mary, wife of Dr. J. C. Munro, of Philadelphia. Dr. Squibb made many friends and kept them during his long residence in Brooklyn. He was a man of rare integrity and of genial disposition. He was a member of Holy Trinity P. E. Church and also of the American Medical Association, the New York State Medical Association, the Kings County Medical Association, the Metropolitan Museum of Arts, the Philosophical Society of Philadelphia and many other societies of kindred character.

—*N. Y. Com.*

Carbolic Acid.

The extraordinary demand for this article from Galveston has threatened to exhaust the country's supply. Three hundred barrels were sent from New York and Philadelphia to Galveston in three days and other large shipments will follow.

Digitized by Google

EDITORIAL NOTES.

THE schools of pharmacy which have inaugurated a system of commercial training for pharmacists in order that the young men may have some knowledge of business transactions and business customs might profitably combine therewith some instruction in penmanship. It is true that the young man who cannot write a legible hand should not be permitted to study or practice pharmacy until he learns to write, but a great many things are true which are not remedied. But the number of applicants for examination before state boards who cannot write at all fit to be read is appalling. Penmanship is an important qualification for a pharmacist and one which thousands of them do not possess or even cultivate.

That reminds us ; why is not penmanship taught in our public schools ? In the older times it was thought to be a very important accomplishment. A rather more than casual acquaintance with many graduates from our high schools would lead one to suppose that no attention whatever was given to instruction in writing.

A school boy or girl graduate who can write a good, round intelligible hand is almost as much a curiosity as one who is a good reader or correct speller.

Would not a little of the old fashioned system in public school training be a good thing for a change ?

* * *

THE druggists should see that the stamp tax so far as it relates to their particular line of business is repealed. Now is the time to get in some good work in that direction. The drug journals of the country have given much of their space within the past year toward urging a redress of this useless and unbearable burden. This is not sufficient. The retail drug men must take an individual interest in the matter if they desire results and we urge once more upon all our readers that petitions and appeals for the repeal of this tax be made with persistence until the end is attained.

* * *

THE Retail Grocers' Association of Pennsylvania want the pure food laws of that state amended. They want the embargo on oleomargarine removed except when it is sold for butter ; punishment for misrepresentation in advertising ; abolition of company stores ; penalty added to the law compelling semi-monthly payment of wages, and that the use of trading stamps be made unlawful. Some of these propositions may be well enough, but the one on misrepresentation in advertising is a real gem. What a glorious state of affairs when one can read all the advertisements published and know that the statements made therein are all true ! Bah !

* * *

THE pure food law enacted by a recent legislature in Illinois is not to have clear sailing. The first case of prosecution under it was in the city of Chicago, where a charge was brought against a firm of grocers. The case was tried to a jury but before offering any evidence the defense asked that the court take the case from the jury and discharge the defendant, on the ground that the state had not shown guilty knowledge on the part of the defendants. The court granted the motion and the case was dismissed. Since it is well nigh impossible to prove guilty knowledge in any such cases it is difficult to see how the law can be made effective provided the action of the court in this case is sustained by the higher tribunals.

* * *

A PROMINENT lady in Zanesville, Ohio, is reported to have lost her life from taking ten grains of arsenic instead of a headache powder. Why will people permit such drugs as arsenic to be about a house ? How is it possible to have arsenic in a house without a label to indicate its nature ? If any druggist sold it without a label he should be arrested for manslaughter. We do not believe a sane or sober druggist in Ohio could be so reckless. Moreover, if he had colored it as required by the Ohio poison law the chances of mistaking it for a headache powder would have been greatly reduced. Evidently some one has in this case been seriously at fault.

* * *

IT is incredible that any human being, especially any woman, can be so fiendish as to commit such a deed as throwing into the face of a young and handsome woman a pail of sulphuric acid. Yet this was done at Van Wert, Ohio, on the evening of September 16th, the victim lingering in awful agony until October 16th, when she died. An assassin who will stab, shoot or club his victim in order to dispatch him quickly is an angel of light compared with a person capable from any motive whatsoever of an

Digitized by Google

act of such monstrous cruelty. The woman charged with the crime is the wife of a bank cashier and has been prominent in social and religious circles. The evidence is altogether circumstantial but appears to point toward the accused. It is sincerely to be hoped for humanity's sake that she may fully establish her innocence.

* * *

REPORTS indicate a very general neglect of the laws relating to the practice of pharmacy in the state of Pennsylvania. The Board of Pharmacy of that state finding the cases in which violations of laws were reported so numerous as to require a thorough canvas of the entire state turned the matter over to a detective agency in Pittsburg. This agency claims to have gone over the state and to have discoveaed that but little attention has been paid to the pharmacy law, the poison law, the pure drug law, etc. In fact, it is stated that of 4,000 or more drug stores but a small percentage of them have been found in which the laws were not disregarded in some form or other.

It is surprising that druggists do not take greater interest in the observance of all laws relating to their business for themselves and also to see that there is a similar observance on the part of others. They labor often very earnestly that these laws may be secured and are apparently much concerned when they are afterward placed in jeopardy, but when it comes to a strict observance of them that is a matter of little concern.

Once in a while one will fall out personally with his neighbor or competitor and will attempt to get "even with him" by placing a watch on his movements and since he usually has not long to wait for an opportunity will report him for violation of law but always with the strict injunction, "My name must not be used in this matter." It is a cowardly trick, and yet the majority of all complaints of violation of law made to the authorities are of this contemptible character. It is the duty of every citizen to observe with care the laws of the state, and it is not much less his duty to see that others do the same thing, especially in laws relating to a profession like pharmacy. If the general sentiment of pharmacists was in this line the boards of pharmacy would find the enforcement of law relatively easy, and in fact, there would be but few cases of violation of law compared to what are now found. The greatest hindrance to the enforcement of laws relating to the selling of drugs is from retail druggists.

* * *

STRINGTOWN-ON-THE-PIKE.—Prof. John Uri Lloyd's new book appeared on the market late in October. It has been published as a serial in the Bookman for the past year and the appearance of the story in book form has been keenly anticipated for some months. The first edition consists of 150,000 copies and is to appear simultaneously in Europe and America. Pharmacists will remember that the proceeds from this book are to go toward the extention of the Lloyd Library of scientific works on pharmacy and kindred subjects in Cincinnati, an enterprise which should be cordially supported by every pharmacist.

Our publishers make a generous offer of Stringtown-on-the-Pike and the MIDLAND DRUGGIST for one year for the price of the book alone, $1.50.

* * *

THE Supreme Court of Illinois has declared invalid that portion of the Illinois Pharmacy law which restricts the sale of proprietary medicines to druggists. We print in this issue of the MIDLAND the decision of the court in full and urge pharmacists every where to give it careful reading. While we, with pharmacists generally, regret that this phase of the law if found to be unconstitutional, we can not but feel that the grounds upon which the Illinois Supreme Court declares against it are good and sufficient. To say that one class of persons only may sell articles which require no skill or knowledge in such act of selling does not seem to be in accordance with our ideas of the province of the law-making power. In our form of government there must necessarily be a good deal of margin allowed in matters where it is clear there is no specific need of knowledge or training to perform certain acts, and the act of selling patent medicines is purely a commercial one. We are not surprised at the decision.

My heart is fixed firm and stable in the belief that ultimately the sunshine and the summer, the flowers and the azure sky, shall become as it were, interwoven into man's existence. He shall take from all their beauty and enjoy their glory.

OHIO BOARD OF PHARMACY.

The following is the list of persons who passed a satisfactory examination by the Ohio Board of Pharmacy at the meeting of the board in Columbus on Tuesday and Wednesday, October 9th and 10th.

The next examination of this board will be held in Columbus on Tuesday and Wednesday, January 8th and 9th, 1901. All applications for examination must be filed with the secretary by the Thursday preceding the dates fixed. Those entitled to a second examination must file new applications the same as in case of first examination, except that affidavits of experience are not required for the second examination.

W. R. OGIER, *Secretary*, Columbus, O.

A RESEARCH ON THE COMPOSITION OF COMMERCIAL CALCIUM CARBIDE.

J. W. Forbing, Ph. C., B. L.

There are but few substances of commercial importance that have escaped a thorough chemical examination. The commercial carbide of calcium though it has been subjected to a careful examination by the eminent Moissan presents still, in its many impurities, interesting compounds which may furnish the analyst much for serious study and research.

The ordinary process for producing calcium carbide is that of subjecting an intimate mixture of charcoal or coke and limestone to the intense heat of the electrical furnace. As we may imagine the resulting gas-producing carbide is by no means one hundred percentum CaC_2. The raw material limestone contains besides the metal calcium a rather high percentage of that of magnesium, along with considerable quantities of iron, aluminium and silicon. In coke and wood charcoal are encountered silicon, iron, aluminium, magnesium, sodium, potassium, manganese and the metaloids, sulphur and phosphorus. It may be readily deduced that compounds of these foreign elements enter into the composition of the substance in question.

In appearance the carbide is crystaline, reddish brown to black, and shining. It is remarkably hard, which fact, along with that of its being quickly decomposed in the ordinary atmosphere, due to the presence of aqueous vapors, renders pulverization for analysis an impossibility. For the sample of the author's experiments a large piece of the carbide was selected, quickly transferred to a clean, dry iron mortar, and reduced to small lumps, the weight of each averaging about .1 gm. These were placed in a glass-stoppered bottle and set aside for analysis.

The result of a qualitative analysis of the residue left, after decomposition of a small portion of the sample with water, showed the presence of, besides calcium, graphite uncombined carbon, magnesium, silicon, aluminium, iron, manganese, potassium, sodium, sulphur and a trace of phosphorous. The quantities and combinations in which these elements are found are of much interest.

On decomposing the carbide with water there remains after the evolution of acetylene, calcium, magnesium, and aluminium hydroxides, floating black particles of graphite and uncombined carbon, bright, shining lamina of iron silicide, and mixed with the sediment of hydrates, the other mentioned metals with sulphur, carbon, and silicon in various combinations.

To facilitate the study of this residue a few grams of the carbide were decomposed by a solution of sugar, and filtering, thus eliminating the hydroxides of calcium and magnesium. The residue was washed with water, alcohol, finally ether, and dried. This residue is seen to be made up of black particles of graphite and uncombined carbon, mixed with a white powder, and the previously mentioned lamina of iron silicide. Upon a more careful examination made by spreading the residue on a piece of white paper, small globules of a yellow metallic appearance were isolated. A microscopical examination of these globules was made with the Zeiss instrument. The globules and the heavy gritty matter were obtained in sufficient quantity for examination by decomposing 100 gms. of the carbide with an excess of water, and treating the remainder with dilute hydrochloric acid. On adding the acid, hydrogen sulphide is set free from the sulphides in considerable quantities. The solution was then agitated to suspend the lighter portion of graphite, uncombined carbon, and lamina of iron silicide, thus enabling me to get rid of all but traces of these substances by repeated decantation. The weight of the residue obtained in this manner was .5446 gms. This residue was made up mostly of the globules, which were found in all sizes from those measuring 4 m.m. in diameter to those so small as to be seen with the microscope only. By some investigators these globules have been claimed to be iron silicide. A peculiar thing presented itself in the fact that some of the globules were attracted by a magnet, while others, having the same appearance, were not in the least affected by it. This fact enabled me to separate .4448 grms. of globules and metallic looking particles from the .5446 grms. The sp. gr. of this portion of the residue gave in two determinations 5.46 and 5.228. When viewed whole under the microscope, the surface of the globules appears metallic with the colors of iron sulphide, uneven and acicular. They are very brittle, and

Digitized by Google

are easily broken up in a glass mortar. A microscopic examination with reflected light of the broken pieces showed their uniformity of composition. Considered as a whole they appear crystalline, but no definite form could be ascribed to them. They enclose a few hexagonal crystals of graphite almost perfect, with angles measuring with the goniometer 60°. A few crystals of cubical iron silicide also appeared.

From the microscopical appearance of the globules, their physical and chemical properties, I am led to believe them a mixture of iron, silicon, iron sulphide, and silicide, enclosing a small quantity of graphite. Part of the iron goes into solution when heated with nitric acid. They are with difficulty soluble with hydroflouric acid and sulphuric acid. Digestion for eight hours in a mixture of these two acids failed to completely dissolve the globules. They are more readily attacked by a mixture of hydroflouric and nitric acids. They are also partly soluble in potassium hydroxide, and on fusion with the carbonates of sodium and potassium. In their composition enters traces of phosphorous and manganese.

The greater part of the portion of the residue not attracted by the magnet consists mostly of iron sulphide, salicide, and carbide. The salicide is found both in crystalline and amorphus form.

With paraboloid poorly crystallized particles of silicon dioxide of a peculiar milky appearance resembling somewhat the Alaskan diamond were easily recognized, isolated, and chemically identified. Hexagonal crystals of silicates and silicides of carbon were also seen. Some of the latter present a very beautiful appearance. Those most prominent are colored a deep fine blue, dark green and violet. Crystals of calcium silicate were also seen.

A complete elementary analysis of the carbide gave as a mean of several determinations the following :

Calcium	56.2500	per cent.
Magnesium	2.1450	"
Silicon	1.4830	"
Iron	.5660	"
Aluminium	.7335	"
Potassium	.0730	"
Sodium	.0510	"
Manganese	.0125	"
Phosphorous	.0206	"
Sulphur	1.3065	"
Graphite and Uncombined Carbon	1.9613	"
Combined Carbon (by difference)	35.3976	"
	100.	

Tests showed the absence of sulphates, chlorides and phosphates. The sulphur is present as the sulphides of calcium, aluminium, sodium and potassium.

The total amount of smlphur present was determined by decomposing 1 gr. of the carbide with a small quantity of a moderately strong solution of potassium hydroxide. The resulting solution was evaporated to dryness, and the residue decomposed with a mixture of sodium nitrate and sodium carbonate, taken up with water, filtering and acidulating with hydrochloric acid. The sulphur in the latter solution was determined in the usual manner by precipitation with barium chloride.

The sulphur remaining in the residue after decomposition of the carbide with water was determined by the following method:

Five grams of the carbide were treated with a sufficient amount of water in a porcelain mortar to bring about complete reaction. The mortar and contents were transferred to a water-bath and contents evaporated to dryness. The residue was mixed with one gm. calcined magnesia free from sulphur, and 0.5 gms. of a mixture of potassium carbonate and sodium carbonate. This mass was heated to redness in a platinum crucible, cooled and intimately mixed with about 1 gm. of finely powdered ammonium nitrate. The crucible and contents were again heated to a dull redness, and the heat maintained until all the ammonium nitrate was decomposed. The resulting sulphates were extracted with hydrochloric acid and the sulphur determined in the usual manner. This sulphur is considerably lower than the total sulphur obtained in the former process as a comparison of the two will show :

Total Sulphur	1.3065 per cent.
Sulphur in residue	.9180 "
Difference	.3885

This difference represents the amount of sulphur that has been set free from the aluminium sulphide as hydrogen sulphide to enter into the composition of the disengaged gas.

The amount of calcium as sulphide and hydrate, resulting from the decomposition of the carbide, and phosphide of calcium, along with the soluble sulphur were determined by the following process:

1 gm. of carbide was decomposed with the least quantity of water possible. The water used in the decomposition was freed from carbonic acid by boiling, the remaining residue was then digested with sugar

Digitized by Google

water also free from carbonic acid, and filtered. The filtrate was divided into two portions.

For the sulphur, one portion was treated with a solution of lead nitrate made alkaline with potassium hydroxide. The resulting solution containing the black precipitate of sulphide was filtered, and the sulphide well washed with water. The filter and contents while still moist were thrown into a beaker in which had been placed just a moment previous some powdered potassium chlorate, and about 15 c.c. strong hydrochloroic acid. The solution was allowed to stand in a warm place until most of the fumes had passed off. Twice its volume of hot water was added, and the solution then filtered. The filter was washed with hot water, and the filtrate heated to boiling, and ammonia added until the solution was slightly alkaline to litmus-paper. After acidulating with hydrochloric acid, the sulphates thus obtained were precipitated with barium chloride, the barium sulphate estimated, multiplied by two, and calculated to sulphur.

The mean of three such determinations gave .2003 per cent sulphur.

To estimate the calcium in the remaining portion, the sugar solution was treated with a sufficient quantity of hydrochloric acid to convert the sulphides and hydroxides into chlorides. The calcium and magnesium were separated and estimated by adding ammonium chloride, precipitating the calcium with ammonium oxalate, and subsequently, the magnesium with disodic hydric phosphate.

The mean percentage of calcium magnesium in two determinations of each was:

Calcium	55.696
Magnesium	2.145

The fact that when the sugar solution obtained by the above means is treated with hydrochloric acid, hydrogen sulphide was liberated, furnishes additional proof of the sulphur present as the sulphides of calcium, sodium and potassium, all of the two later entering into the solution.

On account of the extreme instability of magnesium sulphide, its presence as a sucrate cannot be doubted, and we have reason sufficient to claim that the calcium obtained from the sugar solution represents the calcium as combined with the soluble sulphur minus the sulphur in combination with the sodium and potassium, the remaining calcium being calcium as hydrate, or sucrate, resulting from the decomposition of calcium carbide and phosphide.

The percentage of magnesium entering the sugar solution as magnesium hydrate, the result of the decomposition of magnesium carbide, represents all the traces of that metal present in the carbide. The traces are, in all probability, present as silicates.

—

CALCULATIONS.

Total calcium extracted by nitric and hydrochloric acids	56.250 per cent.
Calcium as carbide, phosphide and soluble sulphide	55.696 per cent.
Calcium as insoluble sulphide	.554 per cent.
Sulphur as soluble sulphides	.2003 per cent.
Sulphur as potassium and sodium sulphides	.0623 "
Soluble sulphur as calcium sulphide	.1380 "

.138 per cent. sulphur as soluble calcium sulphides equals .3105 per cent. calcium sulphide containing .1725 per cent calcium.

Calcium as carbide, phosphide and soluble sulphide	55.696 per cent.
Calcium as soluble sulphide	.1725 "
Calcium as phosphide and carbide	55.5235 "

—

The amount of phosphorous remaining in the residue after decomposition of the carbide with water being but a trace, I accepted the mean of the analysis made by Lunge and Cedercreutz for the amount of hydrogen phosphide in the gas produced by the carbide. The hydrogen phosphide was calculated to phosphorous.

According to the above authority in the gas produced by 100 gms. of carbide there is .022 gm. of hydrogen phosphide.

.022 per cent. of hydrogen phosphide equals .0588 per cent. calcium phosphide.

.0588 per cent. calcium phosphide contains .0387 per cent. calcium.

Calcium as carbide and phosphide	55.5235 per cent.
Calcium as phosphide	.0387 "
Calcium as carbide	55.4848 "

55.4848 per cent. calcium equals 88.776 per cent. calcium carbide containing 33.292 per cent. combined carbon.

We have now to calculate the magnesium to carbide, and we have accounted for the sugar solution.

2.145 per cent. magnesium equals 4.290 per cent. magnesium carbide containing 2.145 per cent. combined carbon.

The difference of the calcium extracted by nitric hydrochloric acids and the calcium of the sugar solution, accounts for part of the sulphur of the residue.

Digitized by Google

Difference..... .544 per cent calcium.
.554 per cent. calcium equals .9970 per cent. insoluble calcium carbide.
.3105 per cent. calcium sulphide soluble.

1.3075 per cent. calcium sulphide total.

1.3075 calcium sulphide contains .443 per cent. sulphur.

The total sulphur in the residue after decomposition with water, as previously stated, was .918 per cent.

Soluble sulphur..... .2003 per cent.
Insoluble sulphur as calcium sulphide.. .4430 "

Sulphur as calcium sulphide. sodium sulphide and potassium sulphide. .6433 "

The .6433 per cent. of sulphur not reaching the .918 per cent. accounts for the presence of iron sulphide to which compound the difference is calculated.

Sulphur total in residue..... .918 per cent.
.6433 "

Sulphur as iron sulphide..... .2747 "
.2747 per cent. of sulphur equals .7554 per cent. iron sulphide containing .4807 per cent. iron.
Total iron..... .5660 per cent.
Iron as sulphide..... .4807 "

Difference..... .0853 "

This difference of .0853 per cent. iron represents the iron as metallic and as silicide and carbide.

Further proof, besides the microscopical examination, that such a large portion of iron is present as sulphide was obtained from the residues remaining after decomposition, and extraction with sugar water. Supposing the iron to be present as sulphide these residues were treated with hydrochloric acid and the iron entering into solution titrated.

	I.	II.	III.	IV.	V.
Percentage of residues.....	7.6	8.9	7.8	6.4	7.8
Percentage of iron.....	.41	.49	.39	...	...
Percentage of residues remaining after treatment with hydrochloric acid.....	3.4	3.9	3.6	4.3	3.0

The mean percentages of iron thus obtained correspords closely to the amount of iron calculated to sulphide,

Calculated..... .48
Found..... .43

This difference is in all probability due to too much of the sulphur being theoretically combined with the iron. Part of the sulphur may have remained as aluminium sulphide that escapes complete decomposition in the sugar solution. It is also possible that some of the iron in the hydrochloric acid extract may be iron resulting from the action of hydrochloric acid on some of the carbides of iron. The error due to the possible correctness of either, or both of the two above hypotheses is so small as to be disregarded in the author's calculations.

The aluminium is present after the decomposition of the carbide with water as the hydroxide due to the action of the water on the carbide and sulphide of that metal. The sulphide of aluminium explains the presence of hydrogen sulphide found and estimated by many investigators in the commercial acetylene gas. The difference of the percentages of the total sulphur in the carbide, and of that remaining in the residue after decomposition represents the sulphur in combination with the aluminium.

Total sulphur in carbide.....1.3065 per cent.
Sulphur in residue..... .9180 "

Sulphur as aluminium sulphide ... .3885
.3885 per cent. of sulphur equals .607 per cent. aluminium sulphide containing .2185 per cent. aluminium.
Total aluminium..... .7335 per cent.
Aluminium as sulphide..... .2185 "

Remaining aluminium.. .5150 "

As all of the carbon is in combination with the calcium and magnesium, the remaining aluminium accounts for part of the high percentage of silicon.

Remaining aluminium equals .515 per cent. equals 1.068 per cent. aluminium silicide containing .553 per cent. of silicon.

Total silicon.....1.483 per cent.
Silicon as aluminium silicide..... .553 "

Silicon as metallic, carbide and silicide. .930

The remaining element manganese as it was not encountered in the microscopical examination, I am led to believe it present in the metallic form as one of the mixtures of the globules previously spoken of.

As it does not enter into the hydrochloric acid extract of the residue, its absence as either carbide or silicide is unquestionable. It was estimated in the residue after eliminating the calcium, magnesium, aluminium and the greater portion of the iron with hydrochloric acid by digestion on a water bath with a mixture of hydrochloric and nitric acids, evaporating to dryness, dissolving in hydrochloric acid and filtering. The manganese in the filtrate was then determined according to Blair's "Acetate Method."

RESUME.

Calcium carbide	88.7760	per cent.
Caclium phosphide	.0588	"
Calcium sulphide	1.3075	"
Magnesium carbide	4.2900	"
Iron sulphide	.7554	"
Potassium sulphide	.1030	"
Sodium sulphide	.0866	"
Aluminium sulphide	.6070	"
Iron, metallic and as silicide and carbide	.0853	"
Aluminium silicide	1.0680	"
Silicon, metallic, carbide and silicides	.9300	"
Graphite and uncombined carbon	1,9613	"

1 gm. of the carbide of the above composition when treated with water would produce theoretically 314.52 c.c. of gas, weighing .3881 gms.

I GM. CARBIDE.

	CC.	GMS.	
Calcium carbide	309.75	.3606	acetylene
Magnesium carbide	1.99	.0232	acetylene
Aluminium sulphide	2.71	.0041	Hydrogen sulphide
Calcium phosphide	.075	.0002	" phosphide
	314.52	.3881	

In three practical determinations made by the author one gm. of carbide gave the following volumes (reduced to standard conditions) and their corresponding weights:

	I.	II.	III.
Volume	309.1	310.7	312.0
Weight in gms	.3865	.3842	.3894

The difference between the theoretical amounts and those found, I believe to be undoubtedly due to the apparatus used in their determination.

Dangers of Carbolic Lotion.

In a recent article on "Carbolic Gangrene" Dr. F. B. Harrington warns his medical confreres against the indiscriminate use of dilute solution of carbolic acid as a dressing for wounded surfaces. He reports eighteen cases of gangrene, seen by himself during the last five years at the Massachusetts General Hospital, which resulted from the free use of dilute carbolic acid for the treatment of slight wounds and bruises. He states as a matter of fact, that an aqueous solution of carbolic acid (1 to 5 per cent.) if applied to an extremity, as the fingers or toes, for a number of hours in the form of a moist dressing, may produce gangrene and total destruction of part. The result is directly due to the action of the carbolic acid, which slowly penetrates into the deeper tissues, where it acts directly upon the red and white blood corpuscles, producing thrombosis, and so destroying the nutritive process of the tissues. Dr. Harrington urges the profession to teach the public some safer treatment. Equally effective and far safer dressings are, he says, witch-hazel essence or solution of borax or boric acid. Pharmacists should remember this in view of the widespread use of carbolic lotion for wounds.

—*London Chemist and Druggist, Oct.* 13, 1900.

THE MOST REMARKABLE WINDOW DISPLAY EVER OFFERED THE RETAIL DRUG TRADE

In actual size, this display cut-out is four feet long by three feet high. It is an exact reproduction, in fourteen colors, of the 23d Street and 4th Avenue Station of the New York Rapid Transit Tunnel.

The design itself has been worked up from the official working drawings of Wm. Barclay Parsons, the Chief Engineer for the Rapid Transit Commission. Mr. Parsons has very kindly examined the work during its intermediate stages, and upon its final completion officially approved it as correct in every particular. As an advertising window display the value of the cut-out cannot be estimated. It is something a person will examine for hours, and yet find some feature of interest. You see the street level, with all its teeming life, as natural as paper and color will permit. The cars and buildings are reproduced from actual photographs. In the tunnel itself you are better able to appreciate the greatest engineering marvel of modern times. You see two center tracks for express trains, while adjoining each side track are the platforms for local service, 23d Street being a local station only. Staircases, tunnel construction, etc., are exactly as they will be. Particular attention is called to the magnificent perspective. You can look into the tunnel, as far north as 42d Street, and the display is so perfectly arranged that in the day time the natural light will answer all purposes, while at night a light can be arranged back of the cut-out, giving an actual tunnel lighting effect. The most satisfactory part of the whole advertisement is its simplicity of construction. It can be put together in a second by any one, as it is practically one piece of heavy cardboard, all joints and connections being reinforced with linen.

The Rapid Transit question is a problem with which every city of any consequence throughout the world is grappling, and it is needless to say that the development of New York's tunnel, and everything pertaining to it, will be given world-wide publicity by newspapers and publications of all kinds during the next few years. We intend as far as possible to take advantage of every item of publicity, and when we are through exhibiting the cut-out in each town, we are safe in saying that nothing locally will have been more talked about than our tunnel window display. Progressive retail druggists who would like to take advantage of this extraordinrry advertisement can do so by ordering one gross of small size ABBEY'S SALT, or its equivalent in larger sizes, through their regular wholesaler. All orders to be sent direct to the address below to insure prompt shipment of the cut-out.

THE ABBEY EFFERVESCENT SALT CO., 9-15 MURRAY STREET, NEW YORK.

Free Want Column.

Notices for sale, wants, etc., will be published free of charge for three months. After the expiration of that time we will have to make a charge of ten cents per line. If parties wish the same to continue, we ask that they kindly advise us.

Answers, to receive attention should be directed to the addresses given.

Advertisers will please notify us to discontinue advertisements, if their "wants" have been supplied prior to three months.

The Midland Druggist is constantly having inquiries for Registered Pharmacists. Those wishing positions of this nature will find it advantageous to avail themselves of these free columns.

WANTS.

WANTED—A good location for a drug store. Will put in new stock and fixtures if can find satisfactory location and room. Address N. L. B., care Midland Druggist. Sept.-3t

WANTED—Registered pharmacist in town of 3,000 inhabitants. Good Wages to right man. Address M. O. R., care Midland Druggist. Sept.-3t

WANTED—Reliable, experienced, registered drug clerk. In one of the best towns in western Ohio, of 5,000 population. Address W. M., care Midland Druggist. Sept.-3t

WANTED—Pair ballances; must be practically as good as new, with a range from ½-grain to 8 ounces. Give full description and price. W. R. L. Durger, M.D., New Petersburg, O. Sept.-3t

WANTED.—Soda fountain, must be nearly new, no old style. Give full description, price, etc. Address G. V., care Midland Druggist. Oct. 3t

WANTED.—Registered pharmacist to take charge of store in town in Central Ohio. Good wages and permanent position to right man. Address J. R. C., care Midland Druggist. Oct. 3t

WANTED.—A good reliable drug clerk, registered pharmacist or assistant. In one of best towns in Southern Ohio. Furnish reference. Address F. C. M., care Midland Druggist. Oct. 3t

WANTED—A Registered Pharmacist with good references. Permanent position. Address B. C., care Midland Druggist. Nov.-3t

WANTED—Good, modern, second-hand drug fixtures. Will open drug store in new room in spring. Address C. A. H,, care Midland Druggist. Nov.-3t

WANTED—U. S. Dispensatory. First and second editions. State conditions and price. Address H. M. W., care Midland Druggist. Nov.-3t

WANTED—Drug Clerk with one or two years experience. To one who wishes advancement with thorough training, a good place is offered. Address T. C., care Midland Druggist. Nov.-3t

WANTED—A bright young man to learn drug business. Must be upright in every way. An unusual opportunity. Address, giving age and size, J. C., care Midland Druggist. Nov.-3t

WANTED—Assistant Pharmacist in one of best stores in Northern Central Ohio. German preferred. Address, with references, F. G., care Midland Druggist. Nov.-3t

FOR SALE.

FOR SALE—Away down low, will be sold a drug store in a beautiful city of 10,000; best location; must be sold, on account of old age. Address "Drugs," care Midland Druggist. Sept.-3t

FOR SALE—Drug stock and fixtures in good town; will invoice $960. Everything new two years ago; would sell a half interest to registered druggist with proper reference; part cash and long time on balance. Reason for selling, have other business to attend to. Address G. M. E., care Midland Druggist. Sept.-3t

FOR SALE—A well-paying drug store, in medium-sized town in Ohio; invoice $1,000 to $1,200. Address C. D. F., care of Midland Druggist. Aug. 15-3t

FOR SALE—Drug store in town of 3,000 inhabitants, doing a business of $6,000 a year. Good soda fountain and best location in town. Address M. O. R., Midland Druggist. Sept.-3t

FOR SALE—An old established drug store; best location in good town in northern Ohio, with large surrounding country. No cut prices. Good reasons for selling. Price $3,500.00. An excellent bargain. Address B. W., care Midland Druggist. Sept.-3t

FOR SALE - Drug fixtures; solid cherry; patent medicine cases, counters, show cases, soda fountain, etc. A bargain. Address Lock Box 573, Paulding, Ohio. Sept.-3t

FOR SALE—Hand-carved oak fixtures with a complete set of shelf ware, etc. Address Frank C. Wilson, Hamden Junction, O. Sept.-3t

FOR SALE—Cheap; second-hand set of shelf bottles; late pattern. Address E. W., care Midland Druggist. Sept.-3t

FOR SALE—Drug Store of John E. Wenz, dec'd. Good, money-making stand, clean stock. Will invoice about $3,000, exclusive of good-will and leasehold. Address Carl L. Baumann, Dayton, O., Attorney for Executor. Sept.-3t

FOR SALE.—An old established drug store in a country town in Central-Southern Ohio. Located in one of the best business corners in the city. Address D. M. M., care Midland Druggist. Oct.-3t

FOR SALE.—Good drug business in Central Ohio. For particulars address C. C. B., care Midland Druggist. Oct.-3t

FOR SALE.—Drug store, near Columbus, well located. Invoice about $1,800. Address E. D. L., care Midland Druggist. Oct.-3t

FOR SALE—Drug Store; one of the best locations in Toledo, established 1894. Sales, $7,000. Address, F. L. G., care Midland Druggist. Oct.-3t.

FOR SALE.—Drug store in a good town in Central-Western Ohio. Stock will invoice $4,000, will reduce to $2,500 if required. Cause of sale, ill health. Address F. B., care Midland Druggist. Oct.-3t

Digitized by Google

FREE WANT COLUMN—Continued.

FOR SALE.—Bound copies of the Druggists' Circular from 1871 to 1898—by the lot or single volume. Also Edingburg Dispensatory of 1798—leather bound; price $10. A rare book. Address A. F. E., care Midland Druggist. Oct.-3t

FOR SALE—An old established Drug Store in Ohio town of 1,200, doing cash business of $6,500.00 a year. No cut prices. Address W. S. B., care Midland Druggist. Nov.-3t

FOR SALE—Drug Store in one of best towns in Central Ohio. Fresh Stock; well located; established trade. Also business block with two other good store rooms. Will sell store and building together or separately. Death of owner cause of selling. Address W. I., care Midland Druggist. Nov.-3t

FOR SALE OR EXCHANGE—Drug Store in village of 800. Invoice $1,800; 10 per cent. off for cash. Aggregate sales $10.00 per day. Rent $10.00 per month. Address T. E., care Midland Druggist. Nov.-3t

FOR SALE—Drug Store. Good location in Columbus. Very cheap for cash or easy payments. Low rent. Must sell at once. Address E. L., care Midland Druggist. Nov.-3t

FOR SALE—Drug Store in Columbus. Good location: established trade; splendid opportunity. Address S. C. S., care Midland Druggist. Nov.-3t

FOR SALE—Fixtures and Stock of an established Drug Store in Central Southern Ohio. Building to be torn down. Must sell store at once. Address D. M. M., care Midland Druggist, Nov.-3t

FOR SALE—Fixtures and Stock of one of best stores in Northern Ohio. Room must be vacated at once. Will sell 50 per cent. less than invoice. Address J. D. O., care Midland Druggist. Nov.-3t

SITUATIONS WANTED.

SITUATION WANTED—By a registered pharmacist, who is also a fine watch-maker and jeweler. Single. Best reference. Long experience. State salery. Might buy interest in combined drug and jewelry store. Address Barlow, care Midland Druggist. Sept.-3t

SITUATION WANTED—By a registered pharmacist, experienced, competent. Good references furuished. Address W. L. P., care Midland Druggist. Sept.-3t

SITUATION WANTED—By a registered pharmacist of 8 years experience. Single; 31 years of age. Best references furnished. Address A. I., care Midland Druggist. Sept-3t.

SITUATION WANTED.—As manager or clerk, ten years experience; as manager four years Married. Address H. B. L., care Midland Druggist. Oct. 3t

SITUATION WANTED.—By registered pharmacist. Married; experienced, reliable, energetic; good salesman. A permanent position wanted. No. 1 references. Address A. C. T., care Midland Druggist. Oct.-3t

SITUATION WANTED.—By a registered pharmacist. 15 years experience, married, age 28 years. Graduate of University of Illinois. Acquainted with both city and country trade. References furnished. Address E. E. P., care Midland Druggist. Oct.-3t

SITUATION WANTED—By a practical and experienced druggist of more than twenty years constant work as manager and proprietor of a drug store. Have recently sold store, hence free for a good position. Best of reference furnished. Address L. E. L., care Midland Druggist. Oct.-3t.

SITUATION WANTED—As Sales Lady to travel and sell holiday goods, rubber goods peculiar to ladies or surgical instruments. Long experience; best references. Address Lady Clerk, care Midland Druggist. Nov.-3t

SITUATION WANTED—By Registered Assistant Pharmacist. Competent and reliable; good references. Address H. T., care Midland Druggist. Nov.-3t

DR. W. S. BURKHART, Cincinnati, Ohio.

Allhallow Eve.

The fire burns low upon my study hearth ;
I am alone to-night, and midst the dying embers
I can see faces and forms that once were mine to love,
And now—are gone. The night wind moans,
As 'round the dying leaves he whispers his farewell,
And one by one they sink upon the earth.
Dear Mother Earth ! who folds them tenderly
In her embrace for their long sleep.
'Tis but the symbol of our own short lives,
Which, like the leaves and flowers,
Blossom to die. When winter's frost the life-blood chills,
Then Mother Earth receives our mortal part
And sends the soul to God.

So on this calm October night the spirits of the past
Come to me with this message : "They are not dead
Whom we have laid into the brown earth's heart,
For at the last they'll rise, and like the leaves,
That in the spring return to us again,
We shall behold them glorified."

—*L. H. C.*

The kind of honesty that won't actually steal is a kind of fool honestly that's common enough ; but the kind that keeps a feller's mouth shut when he hadn't ought to talk 's about the scurcest thing goin'.

Detection of Formaldehyde in Milk.

Leys points out (Pharm. Cent.) that as formaldehyde very quickly forms an albuminoid compound with casein, it should be tested for in milk within ten to sixteen hours of the possible addition, and that only very sensitive reagents should be employed. He recommends testing the distillate with Gayon's reagent: Fuchsim solution, 1:1,000), 1,000 c.c.; bisulphite solution, (sp. gr. 1.246) 10 c.c.; pure hydrochloric acid, 10 c.c. On account of frothing, 100 c.c. of the milk should be distilled in a 4-liter flask till 20 c.c. come over As confirmatory tests, the author recommends the phloroglucin reaction, in which to 25 c.c. of milk 10 c.c. of phloroglucin solution (1:1,000) are added, and then 5 to 10 c.c. of solution of potash, and the color developed compared with that obtained from pure milk with the same reagent. He also applies the Gayon reagent direct to the milk; pure milk gives a red coloration, due to the action of the casein, but this disappears on the addition of several drops of strong hydrochloric acid, while milk containing formaldehyde gives a blue color, lasting from eight to twelve hours.

—*Drug Circular.*

DUFFY'S PURE MALT WHISKEY....

The Standard of Excellence for half a century

An invaluable remedy in all Pulmonary Diseases, Coughs, Colds, Grip, Dyspepsia and Stomach Difficulties of every nature; the most efficient medicine for those troubles peculiar to the heated season, an invaluable tonic, a mild and healthful stimulant.

"IT ALWAYS HELPS, NEVER INJURES."

SOLD AND RECOMMENDED BY ALL DRUGGISTS.

Personal and Trade Notes.

[Items of interest, personal and otherwise to the drug trade, are solicited. No attention paid of anonymous communications, although the name to the sender of such news will not be published.]

—

The recent Knights Templar conclave held at Columbus brought quite a number of "Sir Knights of the pestle" to the city. Among those who favored us with a call we note:

John C. Firman, Findlay, O.

John F. Friedland, Coalton, O.

Geo. R. Baker, Mt. Vernon, O.

Fred Baumgartner, Middletown, O.

The following druggists visited the capital city recently and favored us with a call:

R. D. Jacobs, Vinton, O.

D. H. Squire, Ashville, O.

J. W. Headley, Marion, O.

Jas. T. Blaser, Waverly, O.

F. B. Tissot, Mt. Vernon, O.

W. A. Higgins, New Carlisle, O.

Mr. Beers, New Comerstown, O.

John Bevan, Mendon, O., has sold out.

W. A. Bowlin, Kokomo, Ind., has sold out.

Near & Wells, Wellington, O., have dissolved.

L. C. Collier has sold his drug store at Findlay, O.

Frank A. Haines, Huntington, Ind., has sold out.

John W. Beck, of G. G. Beck & Son, Lancaster, O., is dead.

D. C. Norman, Rossville, O., made an assignment on Nov. 3rd.

J. W. Slater, of Ironton, O., was a recent visitor in Cincinnati, O.

Baker, Lewis & Co., Rushville, O., sold out to Ker, Show & Co.

Chas. Schubert, druggist of Fostoria, O., is reported to have sold out.

Mrs. J. L. Timberlake, of Lima, O., has sold her store to Lee Beeler.

Will Hunt, of Mansfield, O., is at Ada, taking a course in pharmacy.

J. Chas. Schaffer, Zaleski, O., made us a pleasant call on the 10th inst.

Oscar Myers, Toledo, O., has sold his drug store to Albert F. Egger & Co.

Henney & Dyer, McComb, O., have been succeeded by Henney & Cooper.

Lew Gaitree is employed in Dr. Mason's new pharmacy at Marietta, Ohio.

Jas. F. Freeman, Howell, Ind., has been burned out, the loss being complete.

W. C. Woodrow succeeds to the business of Woodrow & Williams, Hillsboro, O.

E. G. Dabney, of Proctersville, O., has opened up a very pretty new drug store.

P. H. Reed, London, O., has gone to Hayesville, O., for a few days on business.

Geo. H. Chapman, of Zanesville, is home from Colorado, and is much improved in health.

G. F. Foster, Merengo, O., recently sustained a small loss by fire in a building located near his store.

Dr. F. H. Hurd, Dexter City, is home from a visit to his son, who is attending medical lectures at Cincinnati.

Mr. Fred Tyler, of Ironton, O., is rapidly completing his new business block and expects to open a first class drug store soon.

Mr. A. B. Michael, for several years in the employ of Geo. Latin, Dayton, O., is starting a new store at West Carrollton, Ohio.

Reinhard Wisster, of the firm of Wisster & Elsass, Chillicothe, O.. recently spent a week in New York, enjoying himself immensely.

Dave Spencer, London, O., has the sympathy of the MIDLAND in the death of his brother, which occurred at Hayesville, O., Oct. 25th.

R. Ney Williams, of Kenova, W. Va., has returned from his vacation but says vacations are not the best thing for a busy man sometimes.

Ben. Ridgway, of Cedarville, O., is improving slowly from his inflamatory rheumatism but is hardly well enough to attend to business yet.

W. S. Eingland has completed a new dwelling opposite his store at Jewett, O. The Dr. was his own architect, and the new house is a marvel of convenience and a credit to the town.

Digitized by Google

We are glad to note the continued improvement of T. J. Webber, Plymouth, O., who has been ill for some time past with typhoid fever.

Herman McClarry, for a long time employed at the "Old Wall" drug store at Cambridge, O., has secured a position at Blanchester, Ohio.

Mr. Herman Ward, for a number of years in the employ of E. B. White, Lancaster, O., has purchased a half interest in the Hyde store at the above place.

Jim Smith, London, O., took the 10th of this month off, going after quail. Jim had fair luck but folks do say that Harry Mitchell shot most of the birds.

McGinty Sheran, at New Lexington, O., has a smile that illumin.tes Elder's drug store. Coz why? He met the Ohio Board of Pharmacy and "they are hisn."

Hugh Shaffer has purchased the Miller drug store at Jackson, O. He has secured the services of Ben Jones and will no doubt sustain the reputation of this old stand.

J. W. Shaff, Cambridge, O., has recently refitted his store. He has new floor cases, wall cases and shelving and has made the old "Wall Pharmacy" a thing of beauty.

Wright Bros., of Columbus, have dissolved partnership and Mr. W. C. Wright has purchased the drug store of H. M. Grimes, corner of Long Street and Cleveland Ave.

Fred. Woodard, formerly with O. B. Ream, at Somerset, O., and later manager of McCaws Woodard Pharmacy at Dennison, O., is attending Scio College in the pharmacy course.

"Ote" Green, for a long time with A. J. Richards, Marietta, O., is attending the Ohio Normal University. Al. has a plenty to do to look after the trade during his absence.

W. H. Bowron, at Caldwell, O., has bought out the opposition telephone lines and now has a fine exchange through Noble, Muskingum, Guernsey, Belmont and Monroe counties.

C. A. Hiner, at Byesville, O., has recently purchased a building site, centrally located, and it is said will erect thereon in the coming spring a pharmacy that will be a credit to that thriving community.

Geo. Wursler, of Wurselr Bros., Portsmouth, O., will soon give a minstrel of home talent for the benefit of Portsmouth Bicycle Club. It is needless to say it will be a success with George to manage it.

Clayton Bowers, head clerk for J. H. Brinker, Bellevue, O., was painfully burned a short time ago by the bursting of a bottle of Muriatic Acid. Clayt. is still laid up but got out to vote for McKinley.

L. E. Eyman, the Lancaster, O., druggist, has recently become the possessor of a fine combination saddle and driving horse. Mr. Eyman is quite a fancier and usually has one or more valuable horses in his stable.

A. T. Barton, Pomedoy, O., suffered from fire on Oct. 17. Stock and fixtures badly damaged by water but luckily covered by insurance. It is his intention to resume at the old stand as soon as it can be repaired and put in order.

R. F. Baker, for the past year with O. B. Ream & Co., Somerset, O., has resigned his position to accept a road job with a prominent implement house. "Boody" is well known on the road and we predict a successful year for him.

J. A. Herlihy, of Chillicothe, made arrangements to receive the returns election night and threw them on a large sheet in front of his store. This was a great success and highly appreciated by his customers and all people of the east end.

Erve. T. Chapman, employed in the pharmacy of his brother Geo. H., at Zanesville, is at Washington, D. C., for a few weeks. Erve. was for many years employed in the Capital City and will no doubt greatly enjoy meeting many old friends.

John Oldham, of Reynoldsburg, O., has returned from a trip to New York, Philadelphia and Baltimore. John visited the wholesale drug and manufacturing establishments of these cities and is chuck full of information on how they do things in the east.

Norman T. Boggess, of Huntington, W. Va., is fitting up a laboratory of his own that promises all kinds of good results. He will soon be ready for any kind of analysis. Norm. has good ability and anything left with him to be analyzed will receive the best of attention.

Mark M. Livingston, of the firm of Roth & Livingston, Springfield, O., was married recently to Miss Leah B. Wahl, an estimable young lady of the same city. Mr. Livingston has many friends in the trade who extend to him hearty congratulations and the MIDLAND gladly adds its best wishes.

C. R. Buchanan, long and well known at Marietta, is building a pharmacy suited to his needs. Mr. Buchanan has grown gray

Digitized by Google

in the service having been in the business at Hamar, O., long before it became a part of Marietta. The west side people will no doubt appreciate Mr. Buchanan's improvement.

On Nov. 7th, at 7:30 p. m., Mr. Will Hilton, Perrysville, Ohio, the Democratic member of the Ashland county executive committee, might have been seen standing on a barrel in the Main Street of Perrysville, shouting lustily for McKinley and Roosevelt. No need to say that this was in payment of an election bet.

Geo. J. Ort, of Ort & Klostemeyer, Charleston, W. Va., has recently decided on a little expansion of his own. He purchased the dry goods store of W. A. Bonham, next door to the drug store, and has taken his brother in with him and now has his hands full of business. Judging from his success in the drug business we feel confident of his success in the new enterprise.

—

THE CARBON BI-SULPHIDE FAMINE.

The unusual demand for Carbon Bi-Sulphide is not yet satisfied. For some reason not satisfactorily stated the manufacturers are not able to deliver any considerable quantity and the wholesale dealers cannot secure any at all. As a consequense the retailers are still clamoring for supplies.

The makers are good at promising and for some weeks past have been saying "by the end of the week we will be ready to make deliveries," but the end of the week comes and goes and no Carbon Bi-Sulphide with it. The same promise is now repeated but it must be taken in the spirit of a buyer for a wholesale house who in reply simply said "Rats."

We are therefore unable to advise when relief from present conditions may be expected.

—

WEDDING BELLS.—The "sure tip" that the MIDLAND gave in the October issue about a certain event to happen in Xenia, Ohio, soon, proved out. On Thursday evening, October 18th, Mr. E. S. Davidson, the popular young druggist, was united in marriage to the beutiful and accomplished Miss Fanny Garfield, daughter of L. M. Garfield of that city. The wedding was one of the events of the season and the bride and groom were the recipiants of many beautiful presents. Immediately after the feast the couple took a train for the East, to spend two or three weeks visiting relatives and friends. On their return they will step into their new home, which Mr. Davidson has carefully furnished. Our hearty congratulations and best wishes are with the happy couple.

—

DEATH OF JAMES BRUCE.—Paralysis caused the death of James Bruce, the well known Cleveland druggist, after a long illness at his late residence in Willoughby, November 9th. For thirty years he was in business at the corner of Prospect and Perry streets and lived at 544 Prospect street. Mr. Bruce was born in London, England, sixty-four years ago, and went to Cleveland fifty-one years ago.

Mr. Bruce was a member of the Chamber of Commerce and Oriental Commandery, Knights Templar.

Ohio State University
Pharmaceutical Association.

The O. S. U. Chemical Association met in Chemical Hall on Thursday evening, Nov. 8th, with a good attendance of members and visitors present. This society is devoted to the interest of students in the chemical and pharmacal courses especially, and also to members of other courses interested in investigations embracing chemistry.

The larger portion of the evening was taken up by Prof. McPherson in a very interesting talk on the new method of making sulphuric acid. He said in substance: The principle upon which the method depends is one well known in chemistry, namely, catalysis. This is the process in which, by the aid of an intermediate body, certain reactions take place without apparent change to the body producing the reaction, that is, the catalysing body seems to act merely by its presence. As examples he gave the action of $Mno_2 + Kclo_3 = Mno_2 + Kcl + O_2$, by use of Mno the temp. at which O is liberated being reduced from 370° to 250°C., the Mno_2 being unchanged. Other examples are, $Ca\,O + Ca\,O\,Cl_2$ (bleaching powder) $Pt\,Cl_4$, ($C_{12}H_{22}O_{11}$ to $C_6H_{10}O_5$)$_2$ by ferments, etc.

The method of making sulphuric acid under discussion depends on the oxidation of sulphur dioxide by passing sulphur dioxide gas along with air over a catylizing agent, heated to a temp. of about 400° C. In 1831 patents were taken to form sulphuric acid, using platinum (finely divided) as the catylizing agent, and Nordhausen sulphuric acid was so made, but the expense of Platinum kept it from becoming a prevalent method.

In 1898 patents covering the method now considered were taken by Dr. Max Schoeder of Hamborn, Germany, who developed it, and it has been since used by the Bodischen Anilin and Soda Fabrike, who employ 3,000 workmen. For three months past it has been used by a company in Mineral City, Wisconsin, and the output is said to be twenty tons per day.

The entire process embraces the formation of SO_2 gas from burning sulphur, from Iron Pyrites, or from ZnS, etc., and passing it along with dry air, over the patented catalysing agent, called the Contact mixture, 400° C., the valuable feature of which is that it unites O with the SO_2 forming SO_3, thus $SO_2 + O = SO_3$, and this is readily condensed into its crystalline form, having a great affinity for water, and when water is available forms sulphuric acid, thus $SO_3 + H_2O = H_2SO_4$. The SO_3 being pure of course allows almost any strength of sulp. acid, dependent upon the water added. The efficiency of the method is 98 per cent. against 67 per cent. by old methods.

The composition of the contact mixture is not definitely known, except to patentees, but they say it is composed of soluble salts of alkalies and alkaline earths and platinum chloride. In manufacture of the mixture the materials are dissolved in water, and then evaporated till a crust forms; this is taken off, dried and broken up, and the evaporation continued. After continual use the mixture loses its efficiency to 95 per cent., then it is dissolved in water and regenerated by evap. as before.

The process of making the SO_3 was carried through by Prof. McPherson very successfully and some beautiful crystals of SO_3 formed. The entire experiment and accompanying talk was carried on in a way pleasing and instructive to all.

At the conclusion of the above, Mr. Funk, a student in the pharmacy course, gave us an interesting Biography of Robert Wilhelm Bunsen, a chemist of honored memory and renown throughout the 19th century. He was born in Gottengen in 1811. He showed great ability as a student and received the degree of Dr. of Philosophy at the age of 19. He was a teacher for over fifty years and earned high distinction in this line of work. Dr. S. A. Norton, Emeritus Professor at O. S. U., was for some time a student under Dr. Bunsen and often tells personal remembrances of Dr. Bunsen's scientific skill (privately.) Dr. Bunsen died in 1899, leaving behind him inventions of inestimable value to science and knowledge stored in volumes and in the minds of his students, which will endure forever.

After a few minutes intermission, during which those present made a close examination of the apparatus, process and product of the sulphuric acid experiment, a short business meeting was held.

The Chemical Association has a meeting of this kind every two weeks, on Thursday

evening, in Chemical Hall, at 7:30, and any one interested in this line of work is cordially invited to be present. The next meeting is on Thursday, Nov. 22.

C. H. K.

Mr. C. H. Kimberly, who last year received his Bachelor of Science degree in pharmacy, and who at present holds a fellowship in general chemistry, is engaged in an original investigation, under the direction of Prof. McPherson, on the quantitative estimation of arsenic when in contact with organic matter.

Several years ago this subject was pretty thoroughly studied by Chittenden and Donaldson, of Yale University, and the results of their investigations were published. Their method of determination consists in charring the organic matter by means of sulphuric acid and converting the arsenic into the well known compound AsH_3, this by heat is decomposed into metallic arsenic and is deposited and weighed as such. The latter part of the process is the well known Marsh's test. The process of charring requires several days and there is some loss of arsenic.

Mr. Kimberly's object is to determine to what this percentage of loss is due, whether to a lack of proper decomposition of the organic matter by charring, or to an incomplete decomposition of the arsenuretted hydrogen; also to shorten the process of charring, if possible, which is a consideration of no little importance, when we remember that the reputation and perhaps life of a suspected criminal often depends upon the result of such an analysis. The great importance of an accurate and quick method of determining small percentages of arsenic in the stomach and excretory organs of the human body after death by poisoning is apparent to pharmacists and physicians and we think it warrants our mentioning the fact that this work is being done by Mr. Kimberly and we hope later on to give our readers some of the results of his investigation.

W. A. R.

I am not sure that I want young people always to think just as I do in matters of critical judgement. New wine does not go well into old bottles, but if an old cask has held good wine, it may improve a crude juice to stand a while upon the lees of that which once filled it.—*Holmes*

N. A. R. D. Notes.

CHICAGO, November 3, 1900.

It is a pleasure to note that the last cutter in Stephenson county, Illinois (Freeport, county seat), has restored prices. This is due to the benign influence of the vigorous Northern Illinois Association.

—

The Chicago Retail Druggists' Association now has a competent organizer in the field and the association is growing rapidly. The city is being divided into districts, each of which is a component part of the city organization. The work is progressing in a very satisfactory manner. In this association there are determined men, and they are not a few, who have decided that the conditions of the drug trade in Chicago can be and shall be improved.

—

In the territory covered by the Northern Ohio Association three aggressive cutters have recently restored prices on proprietaries. The work of this society is a credit to the tireless and unselfish men who are directing its efforts.

—

President A. J. Lockie of the Erie Co. (N. Y.) Pharmaceutical Association telegraphed Secretary Wooten Oct. 31st that his society is to be reorganized on the plan of the Northern Ohio Association. There is no doubt of the association's increased usefulness under the new arrangement and the N. A. R. D., as well as the Erie County Association, is to be congratulated on the change.

—

"Mr. Thos. V. Wooten, Secretary, Chicago. Dear Sir:—In the Sept. 25th issue of ——— I find the report of the convention at Detroit of the N. A. R. D. I am not a retailer, simply a clerk. I am very much interested in the effort to organize the drug trade thoroughly. Please let me hear from you giving all the information possible. Truly yours, Fred. W. Thomas, Beardstown, Ill." The National Secretary is receiving many such letters from clerks, who, realizing that their own welfare, both now and in the future, depends upon the success of the National Association's work, are anxious to give it their assistance.

The secretaries of the Association in membership are requested to write to the National secretary without delay as to the action taken by their respective bodies concerning the letters to the affiliated societies issued Aug. 7th and Oct. 1st.

—

A good illustration of the truly national character of the N. A. R. D. is the fact that the last two associations to become affiliated are those of Charleston, South Carolina, and Burlington, Vermont. These associations represent practically the entire drug trade of the two cities.

—

The Committee on National Legislation is receiving many encouraging letters from druggists and others interested in the stamp tax on medicinal preparations. From present indications this measure will rereceive attention early in the approaching session of congress. The members of the National Association are urged to call on their Senators and Congressmen previous to the assembling in Washington and insist upon the immediate repeal of this burdensome and discriminating tax.

—

Since bulletin No. 9 was issued the following manufacturers, in addition to those given therein, have adopted a definite list of wholesale distributers: A. C. Meyer & Co., Baltimore; B. O. and G. C. Wilson, Boston; the B. J. Kendall Co., Enosburg Falls, Vermont.

—

The Sterling Remedy Company reports highly satisfactory results from their N. A. R. D. offer.

—

At a meeting of the Northern Illinois Druggists' Association, held in Elgin, Oct. 16, the decision was reached to put an organizer into the field to form local societies and in every other way increase the organization's effectiveness. The meeting was marked by unusual enthusiasm. The Secretary and the treasurer of the Chicago Association were present.

—

The National Secretary's office was moved during the week from the ninth to the sixth floor of the Association Building. An additional room is thereby secured (a need long felt) and the new arrangement is for many reasons advantageous to the work.

The best rose bush, after all, is not that which has the fewest thorns, but that which bears the finest roses.—*Singlewitz.*

EXAMINATION QUESTIONS—BOARD OF PHARMACY OF THE CITY OF NEW YORK.

MATERIA MEDICA.

1. Name four official Mineral Astringents each having a different base.
2. Name three official drugs that belong to the Natural Order Umbelliferæ.
3. Give the common name of Erythroxylon; *b* What part of the plant is used? *c* Name the alkaloid and dose.
4. Give the botanical name of May Apple; *b* Name the official preparations.
5. From what is Lanoline obtained; *b* To what does Cherry Laurel Water owe its activity?
6. What are Oleates? Name the official Oleates.
7. Is Oleum Copaibæ a fixed or a volatile oil?
8. Give the composition in parts of the following: *a* Dover's Powder; *b* Tully's Powder; *c* Compound Jalap Powder.
9. Give the official name and habitat with official title of each of the following: *a* Bittersweet; *b* Colocynth; *c* Yellow Jasmine; *d* Elder.
10. Name the source from which the following are obtained: *a* Phosphorus; *b* Eserine; *c* Iodoform; *d* Veratrine.
11. Give the official title of: *a* Turpeth Mineral, and *b* Kermes Mineral.
12. Name three official drugs that are gum resins.
13. Mention four official vegetable astringents: *b* Also four official vegetable acids.
14. From what is Creosotum U. S. P. derived? *b* What is the source from which Phenic Acid is obtained?
15. Give the common names of the following:

Lappa,	Cypripedium,
Sambucus,	Caulophyllum,
Matricaria,	Euonymus.

CHEMISTRY.

1. Fefine the following terms:
   a. Matter. *c.* Metalloid.
   b. Homologous. *d.* Molecule.
2. How many grains of Iodine can theoretically be obtained from 532 grains of Potassium Iodide?
3. State how Calcium Carbonate can be converted into Calcium Hydrate.
4. Give the chemical title to each of the following:
   a. $Na_2S_2O_3$ *c.* $FeBr_2$
   b. $BiCl_3$ *d.* Na_2HPO_4
5. Write the chemical formula for each of the following:
   a. Manganic Chloride. *c.* Mercurous Nitrate.
   b. Hydrogen Sulphate. *d.* Potassium Dioxide.
6. What compound is formed when nascent hydrogen is brought into contact with a salt of arsenic?
7. How would you accomplish the separation of silver from mercury (ous) both being contained in the same solution?
8. Name two official organic acids giving the chief source from which each is derived.
9. What is the chemical name of Salol? State how it is obtained.
10. Show by equation how Hydrocyanic Acid can be prepared from Silver Cyanide.
11. What is the chemical composition of Kermes Mineral?
12. What is reduction? Name an official acid which is obtained by the process of reduction.
13. Nitrogen: *a* Name its principal source; *b* Give its physical properties.
14. Name and write the graphic formula of each of the first three members of the marsh gas series.
15. Complete the following equations:
   a. $NaCl + H_2SO_4 =$ *c.* $2NH_4Cl + CaO =$
   b. $KOH + H_2S =$ *d.* $HgSO_4 + 2NaCl =$

TOXICOLOGY AND POSOLOGY.

1. Name two emetics and state emetic dose of each. Name two anticids useful in acid poisoning.
2. Mention some proprietary or other arsenical preparation from which poisoning may occur and give emergency treatment.
3. Mention three stimulants suitable for most poisoning cases requiring stimulation.
4. What is the poisonous ingredient of common matches, and what emergency treatment should be employed for poisoning by them?
5. Name a gas or vapor likely to produce poisoning and give emergency treatment.
6. What treatment should be given for poisoning by Camphor? When and why may the administration of Alcohol as a stimulant in such poisoning be considered objectionable?
7. Give a characteristic chemical test for Strychnine.
8. Poisoning by what drug would be indicated by the following symptoms: Stupor, slow and stertorous breathing, contracted pupils not reacting with light, weak pulse, cold or perspiring surface and livid

Digitized by Google

countenance? What emergency treatment should be given?

9. What precautions should be observed in selling poisons?

10. Of what class of medicines is it unsafe to give children large doses? What is the duty of the pharmacist if a large dose is prescribed?

11. What is the dose of Mercurous Chloride, Mercuric Chloride, Chloral, Ammonium Carbonate, Lead Acetate?

12. What is the dose of Acetanilid, Antimonial Powder, Lithium Bromide, Naphtalin, Potassium Iodide?

13. What is the dose of Alcoholic Extract of Belladonna Leaves, Extract of Digitalis, Extract Nux Vomica, Salicylic Acid, Zinc Valerianate?

14. What is the dose of Croton Oil, Paraldehyde, Spirit of Chloroform, Tincture of Ipecac and Opium, Tincture of Nux Vomica?

15. What is the dose of Tincture of Colchicum Seed, Fluid Extract of Veratrum Viride, Fowler's Solution, Magendie's Solution, Vinegar of Squill?

PHARMACY.

1. What weight expressed in grammes is contained in one cubic centimeter of distilled water at 4° C?

2. Name a good excipient for massing each of the following: (*a*) Creosote; (*b*) Aloes; (*c*) Phosphorus; (*d*) Potassium Permanganate.

3. How many cubic centimeters are contained in five fluid ounces of water?

4. How do mixtures differ from liquors? Name two of each giving their official title.

5. What is a glycerite? Name the official ones.

6. How many cubic centimeters of Fowler's solution can be manufactured from 2.5 grammes of arsenous acid?

7. Name the official infusion which is directed to be made by the cold process. State why such directions are necessary.

8. Give a general formula for the preparation of fluid extracts. State what relation the strength of the finished product has to the drug from which it is prepared.

9. State in what manner fixed oils may be obtained from plant parts. Name three official fixed oils.

10. What quantity of extract of nux vomica assaying 12 per cent. of total alkaloids must be employed in making 500 cubic centimeters of official tincture of nux vomica?

11. Define the term "crystallization." What conditions are necessary for the formation of large crystals?

12. Name three official ointments in which benzoated lard is employed as a base.

13. Acidum Lacticum: Give its source, official strength and state how an admixture of glycerin may be detected.

14. The solubility of boric acid in water at 59° F. is 1 part in 25.6 parts. How much of it would be required to saturate one pint of distilled water at the temperature given?

15. State why precipitated calcium phosphate is employed in the manufacture of many of the official medicated waters. What chief advantage does it possess over magnesium carbonate, which is sometimes employed for a similar purpose?

Rodeback's Eczema Salve ✳ **A Steady Seller**

For Sale by all Retail Druggists.

D. RODEBACK & SON, Granville, O.

DRUGGISTS all want a Remedy for . . .

Gonorrhœa, Gleet, Leucorrhœa, Spermatorrhœa and Piles . . . . .

——that they can recommend.

THE TRADE can feel assured nothing on the market for these diseases will afford so much satisfaction to both dealer and consumer as

Injection Malydor.

It is **Safe, Sure, Quick and Clean. Cures in One to Four Days. Is a Sure Preventive,** and a first-class male syringe goes **FREE** with every bottle; thus making it the most **satisfactory** and **economical** for the consumer, while it also gives the dealer a **good profit.** It is for all concerned **THE BEST** of all similar remedies.

Retail Price, including Syringe, $1.00 per bottle.
Price to the Trade, - - - - 7.80 per dozen.
Affords Dealers 55 per cent. Profit.

COUNTERFEIT CASTORIA FACTORY UNEARTHED.

Manufacturers Arrested and Labels Seized. Plant on South Second Street the Scene of Operations—Defendants Give Bond.

The Centaur Company of New York City, manufacturers of Castoria, recently learned that their well known preparation was being counterfeited in this city, and that worthless imitations were being sold.

Charles H. Fletcher, president of the company, at once dispatched agents to St. Louis, who were instructed to ferret out the counterfeiters.

After a careful investigation it was learned that a preparation in imitation of Fletcher's goods was being prepared by the Palestine Drug Company of No. 107 South Second street, and sold by a few druggists. Detectives who were assigned to the case succeeded in securing admittance to the place and purchased a quantity of the spurious stuff. Later other purchases were made, and when sufficient evidence was secured warrants were sworn out for the imitators. Yesterday John Bick, president of the offending company, and Benjamin Chireaun, chemist for the concern, were arrested, but later were released on bond.

The cases will be tried before Judge Clark of the Court of Criminal Correction. Judge Harvey and the firm of Seddon & Blair will represent The Centaur Company, which has determined to protect the public from worthless imitations of their goods.

Deputy Sheriff Clayton, who served the warrants, found between 5,000 and 6,000 counterfeit labels, which Bick was attempting to hide at the time. Two boxes, which had originally contained the genuine Castoria, were found filled with the counterfeit preparation. Each contained about six dozen bottles of the spurious stuff. A large can of the counterfeit preparation was also found ready to be bottled.

Relation of Occupation to Tuberculosis.

Dr. W. Freudenthal, of New York, points out the predisposition of tailors, sewing-women, printers, and others to tuberculosis. He gives the statistics of others and the results obtained in analyzing fifteen hundred cases. He found that in many instances the primary lesion of tuberculosis was not to be looked for in the lungs, but in the upper respiratory tract, especially the retropharynx.

Laxative Bromo Quinine

Is a Valid Trade Mark, And Must Not Be Imitated.

The Paris Medicine Company won a suit in the United States Circuit Court for the District of Indiana, establishing the validity of **Laxative Bromo Quinine** as a trade mark, and perpetually enjoining the defendant, Newton C. Davis, of Frankfort, Indiana, from using these or any similar words to describe a medicinal preparation of his manufacture. On account of the popularity of **Laxative Bromo Quinine,** it still has a few imitations put up under similar names, which are calculated to deceive the public.

A rank imitation is manufactured by a concern at Detroit, and suit against them is now pending in the courts, and the indications point to a favorable decision in behalf of the Paris Medicine Company. The Paris Medicine Company will bring suit at once against any and all infringes of their product.

There is no excuse for druggists handling imitations of **Laxative Bromo Quinine,** as long as the Paris Medicine Company deal with the Druggists on the same liberal basis as heretofore.

The Genuine LAXATIVE BROMO QUININE is for sale by all Wholesale Druggists.

Cremeline

was a name adopted by us some years ago to distinguish our brand of Pure Petrolatum. "Cremeline" is well and favorably known to the Drug trade of the United States. We are the originators of the idea of using screw-top bottles, and we flatter ourselves that we have always put up our goods with a little more "style" and "neatness" than the many imitators that have bobbed up serenely. Quotations will be found on page 161 of the "Midland Druggist."

THE IRON CITY CHEMICAL CO.
PITTSBURG, PA.

ILLINOIS PHARMACY LAW DECLARED INVALID.

Supreme Court Holds that Portion which Restricts Sale of Proprietary Medicines to Druggists to be Class Legislation. Decision does not Affect the Practice of Pharmacy Proper.

THEODORE NOEL, of Chicago, is engaged in the sale, at retail and wholesale, of preparations made from a kind of iron ore, to which he has applied the fanciful name of "Vitae Ore." He claims for these preparations certain medicinal qualities. For all intents and purposes they may be regarded as patent or proprietary medicines. The said Noel is not a registered pharmacist. On June 28, 1899, a person in the employment of said Noel, not being a registered pharmacist, assistant registered pharmacist or pharmacist's assistant, sold a package of said Vitae Ore; whereupon action was brought against him by the Illinois Board of Pharmacy for violating the State Pharmacy Law. A judgment was rendered for the Board by the Justice of the Peace before whom the case was tried. Noel took an appeal to the Criminal Court of Cook County, which confirmed the judgment of the Justice's Court. Noel then appealed the case to the Supreme Court. On the 19th of October that Court rendered its decision, overruling the Court below, and declaring that portion of the law, which attempts to restrict the sale of patent medicines to registered pharmacists invalid. Mr. Justice Magruder delivered the opinion of the Court, which is as follows:

The question presented for our consideration, is the constitutionality of sections 2 and 8 of the Pharmacy act.

Section 2 is as follows: "It shall be unlawful for any person not a registered pharmacist within the meaning of this act to open or conduct any pharmacy, dispensary, drug store, apothecary shop or store, for the purpose of retailing, compounding or dispensing drugs, medicines, or poisons, and any person violating the provisions of this section shall be liable to a penalty of not less than twenty nor more than one hundred dollars for every such violation: *Provided, however*, that nothing in this act shall prevent any person or persons owning a drug store, or pharmacy who shall employ and place in active and personal charge of the same, a registered pharmacist, and that nothing herein contained shall apply to nor in any manner interfere with the practice of any physician, or prevent him from supplying to his patients such articles as may seem to him proper, nor with the exclusively wholesale business of any wholesale druggist; nor with the sale of patent or proprietary medicines and domestic remedies by retail dealers in localities as hereinafter provided."

Section 8 of the act is as follows: "The Board of Pharmacy may in their discretion issue permits to persons, firms or corporations engaged in business in villages or other localities, empowering them to sell the usual domestic remedies and proprietary medicines under such restrictions as the Board of Pharmacy may deem proper. Each applicant for this permit shall pay to the said board the sum of one dollar before said permit shall issue. Said permit shall specifically state just what the holder thereof is allowed to sell."

Section 4 of the act is as follows: "The term drug store or pharmacy shall for all purposes of this act be construed to mean a store, shop or other place of business where drugs, medicines or poisons are compounded, dispensed or sold at retail."

The proviso to section 2 provides, that nothing contained in the act shall apply to, or interfere with, the sale of patent or proprietory medicines and domestic remedies by retail dealers in localities "as hereinafter provided." The words "as hereinafter provided" refer to section 8 of the act. The latter section confers upon the Board of Pharmacy the power in their discretion to issue permits to persons, firms or corporations engaged in business in villages or other localities, empowering them to sell the usual domestic remedies and proprietary medicines under such restrictions as the board may deem proper. It is manifest that section 8 vests an arbitrary power in the Board of Pharmacy to say who shall, and who shall not, sell the usual domestic and proprietary remedies in villages and in other localities, and just exactly what they are allowed to sell. Section 8 in no way regulates or controls the discretion vested thereby in the board. The official discretion, conferred upon the board, is unregulated, and not subject to any permanent provisions operating generally and impartially. No conditions are prescribed, upon which the permit, authorizing the sale of the usual domestic remedies and propri-

Digitized by Google

etary medicines, is to be issued. A *law, which thus invests any board, or body of officials, with a discretion, which is purely arbitrary, and which may be exercised in the interest of a favored few, is invalid...It makes an unjust discrimination between persons coming within the same class.* A person, firm or corporation engaged in business in a village or other locality may sell these domestic remedies and proprietary medicines if a permit is obtained from the Board of Pharmacy, *provided such board sees fit in its discretion, and under such restrictions as it may deem proper, to issue such permit. The board is thus authorized to confer a privilege upon one person, firm or corporation, and to deny the same privilege to any other person, firm or corporation, and is not required to be governed, in doing so, by any fixed rules or regulations, but may be moved thereto only by its own caprice, or favoritism. Laws, thus conferring discretionary and arbitrary power upon statutory officials, are not only invalid for the reason already stated, but amount in effect to a delegation by the legislature of its legislative functions to the board of officials in question.* The legislature undoubtedly has the power, in the interest of the public health, to pass a law, regulating the disposition of these domestic remedies and proprietary medicines; but, instead of doing so in section 8, it has abdicated its own power upon the subject, and conferred such a power upon the Board of Pharmacy to be exercised according to the discretion of the board.

But, independently of the considerations thus far presented, section 2 not only forbids any person to compound or dispense drugs or medicines, and sell the drugs or medicines, so compounded, at retail, unless such person is a registered pharmacist, but it also forbids any person to sell patent and proprietary medicines and domestic remedies at retail unless such person is a registered pharmacist. In other words, a druggist is not only forbidden by section 2 to sell drugs, compounded by himself, unless he or his employee is a registered pharmacist, but he is also forbidden to sell patent and proprietary medicines and domestic remedies, not compounded by himself, unless he or his employee is a registered pharmacist. Section 2 thus confers upon registered pharmacists the exclusive right to sell at retail patent and proprietary medicines and domestic remedies. This is apparent from the last clause of the proviso to section 2. The fact, that the sale of these remedies in certain localities is mentioned as an exception, makes it clear that their sale in other places was included in the prohibition with all other drugs, medicines and poisons. "When the legislature has attached a proviso to a section, the natural presumption is that, but for the proviso, the enacting part of the statute would have included the subject matter of the proviso." (23 Am. & Eng. Ency. of Law, p. 437.)

The act contains nowhere any provision for the inspection or analysis of these patent or proprietory medicines by the registered pharmacists, who are clothed with the power to sell them.

Undoubtedly the legislature has the right, under the police power, to pass enactments for the benefit and promotion of the public health. But it is well settled, that the exercise of the police power must be limited to such measures, as are designed to promote the public health, the public morals, the public safety, or the public welfare. (*City of Chicago v. Netcher*, 183 Ill. 104). When it can be seen from the provisions of a statute, that it has no tendency to promote the public health, safely, morals, comfort or welfare, the courts are authorized to declare it invalid. It is unquestionably true, that the state has as much right to regulate the sale of patent and proprietary medicines and domestic remedies, as it has to regulate the sale of any other kind of medicines and remedies. But these patent and proprietary medicines and remedies are generally put up in sealed packages. In this form they can as well be sold by any person as by a registered pharmacist. The vice of the present Pharmacy act is, that it gives to the registered pharmacist the exclusive privilege of selling these patent and proprietary medicines and remedies, and excludes all other persons from doing so, while, at the same time, it makes no requirements of such registered pharmacist that they make any analysis, inspection or examination of the same. In this regard the act gives to registered pharmacists a monopoly of the business of selling patent medicines without in any manner protecting the public health. The public health is not protected by limiting these sales to registered pharmacists who make no examination of what they sell.

Section 2 of article 2 of the constitution of this State provides, that "no person shall be deprived of life, liberty or property, without due process of law." Involved in the right to own property is the right to sell it; and, when the owner is deprived of

Digitized by Google

the right to sell his property, he is deprived of his property within the meaning of the constitution, because there is thereby taken from him one of the incidents of ownership. Section 22 of article 4 of the constitution provides, that "the General Assembly shall not pass local or special laws * * * for * * * granting to any corporation, association or individual any special or exclusive privilege, immunity or franchise whatever." To confer upon registered pharmacists the right to sell these patent and proprietary medicines, without requiring of them to make any inspection or examination of the same, is to confer upon them a special and exclusive privilege in violation of said section 22 of article 4, when, at the same time, such right of sale is denied to all other persons, firms or corporations.

The views thus expressed are sustained by a decision, made by the Supreme Court of Minnesota in the case of *State vs. Donaldson*, 41 Minn. 74. In that case, the Supreme Court of Minnesota, in commenting upon the provisions of an act similar to the Pharmacy act of this State, say:

"The manifest purpose of the act was to protect the public against the mistakes and ignorance of incompetent and unskilled persons in the preparation and sale of drugs and medicines. * * * This is the express object of the general provisions of this act. They all look to the protection of the health and lives of the public by restricting the business of preparing and dispensing or selling drugs and medicines to those who have the requisite knowledge and skill on the subject. * * * Now, it is a matter of common knowledge that what are called patent or proprietary medicines are prepared ready for immediate use by the public, put up in packages or bottles labeled with the name, and accompanied with wrappers containing directions for their use, and the conditions for which they are specifics. * * There is nothing that calls into use any skill or science on the part of the one who sells them. One man can do it just as well as another. * * * The fact that the seller is a pharmacist, of itself, furnishes no protection to the public. * * * Merely to limit their sale to pharmacists would furnish no protection to the public, without some further regulation as to inspection or analysis that would tend to exclude from sale those that might be injurious to health, or something requiring pharmacists to exercise their skill and science in determining the quality and properties of such as they sold. If we turn to our statute we find an entire absense of any such provisions. * * * Had the act made pharmacists responsible for their quality, this might have had some tendency to protect the public." after disposing of the suggestion, as being "too uncertain and attenuated to be entitled to any weight," that the mere fact of limiting the sale to pharmacists would tend to protect the public because they would be more likely than others to know the qualities of patent medicines, the court then proceeds as follows: "In the absence of some other regulations, a statute merely limiting the sale of patent medicines to a particular class would not and could not have any natural or reasonable tendency to protect the public. Such a law would not go far enough to amount to a police regulation. It would be merely giving a certain class of men a monopoly of the trade. This is not within the police power of the state. * * * A law enacted in the exercise of the police power must in fact be a police law. If it be a law for the protection of public health, it must be a health law having some relation to the public health. * * * If it is apparent on the face of the act that its provisions, from their very nature, can not and will not conduce to any legitimate police purpose, it is the right as well as the duty of the court to pronounce it invalid, as in excess of legislative power and an arbitrary and unwarranted interference with the right of the citizens to pursue any lawful occupation. According to the construction claimed for it; the provision of the act as to the sale of patent or proprietary medicines would be of just this character. It would be giving pharmacists a monopoly of the business, without in any manner protecting public health."

The reasoning of the Minnesota court is precisely applicable to the case at bar, for the reason that, in the Illinois Pharmacy act, as was the case with the Minnesota Pharmacy act, there is an entire absence of any regulation as to such inspection or analysis of these patent or proprietary medicines by registered pharmacists, as would tend to exclude from sale those medicines that might be injurious to health; nor is there anything in the Illinois act requiring registered pharmacists to exercise their skill and science in determining the quality or properties of such patent or proprietary medicines as they may sell.

We are, however, not disposed to hold that the whole act is unconstitutional because of the limitation of the right to sell

Digitized by Google

these patent or proprietary medicines to such persons as are registered pharmacists. The fact, that a part of a statute may be unconstitutional, will not authorize the courts to declare the remainder void, unless all the provisions are so connected in subject matter, and are so dependent on each other, that the legislature will not be presumed to have passed the one without the other.

An examination of the Pharmacy act, as amended and in force on July 1, 1895, will show, that it had in view the accomplishment of two objects. One of these is to prohibit the compounding of medicines and the sale of the same, as thus compounded, unless such compounding and sale shall be made by a registered pharmacist. The other object is to prohibit the sale of patent and proprietary medicines and domestic remedies by any other person than a registered pharmacist. One case, contemplated by the statute, is where the druggist, or other person, puts up prescriptions, or compounds medicines, and then sells them, while the other case, contemplated by the statute, is the sale of patent and proprietary medicines and domestic remedies without the compounding and putting up of the same by the person selling them. The distinction thus indicated is clearly shown in sections 2, 8 and 14 of the act. While, therefore, we hold the act to be invalid in the respect already pointed out, we yet hold it to be valid, so far as it applies to persons retailing, compounding or dispensing drugs, medicines or poisons where the person so retailing has, at the same time, put up or prepared or compounded the drugs or medicines, so sold by him.

For the reasons above indicated, we are of the opinion, that the trial court erred in refusing to hold as law the propositions of law, submitted to it by the appellant upon the trial below. Accordingly, the judgment of the criminal court of Cook county is reversed, and the cause is remanded to that court for further proceedings in accordance with the views herein expressed.

Reversed and remanded.

MR. JUSTICE CARTER, dissenting.

Death of the Tallest Man in the World.

Harry Cooper, said to be the tallest man in the world, has just died. He was born in Cleveland, in Yorkshire, England, and was eight feet eight inches in height. He was at one time a member of Barnum's troupe, and died in British Columbia.

ORDER FROM YOUR JOBBER

SPOHN MEDICAL CO., Goshen, Indiana
SOLE MANUFACTURERS AND OWNERS.

IT IS A TOUGH PROPOSITION.

There is no escaping the fact that the ways of commercialism are experiencing a crucial transition. The whole tendency is toward combination and concentration. Trusts are striking at the life of competition, and competition is recklessly departing from the live-and-let-live policy that so long had shelter under its unwritter law of honor among rivals. Perhaps the greatest innovation is made by the big department stores, which aims a domination that will permit the average family to find about everything it wants under one roof, but there is the tendency to the go-as-you-please system all along the line.

The grocer will make a run on perfumery, liquors and fine cigars. The clothing merchant handles jewelry, the dry goods retailer puts shoes and "gent's" supplies into his stock, the druggist tries to give the notion store a black eye, you can buy your piano and your bicycle of the same dealer, and there are establishments that will send you home a pair of shoe strings wrapped up in a thrashing machine.

The ox of the retail druggist is gored under this cut-throat system, and they are out for satisfaction. They do not want the legitimate articles of their trade hawked at less than a living profit, or less than cost, by the department stores that are willing to lose money on the bait in order to insure a bigger catch. It is objected that they trade on the advertising of the druggists, and at the same time give them the hot end of the poker. Very naturally, they want this violation of their preserves stopped.

Their preferred alternative is to have manufacturers and wholesalers sell exclusively to druggists what legitimately belongs to the drug business. This would at least make the interlopers pay retail prices if they wanted to make a leader of a proprietary medicine, and we strongly incline to the belief that this necessity would stop them. There is also a strong argument upon the ground of ordinary good faith, that watches should not be sold through the village carpenter or that the egg industry should not find an outlet through the coal and wood yards. In other words, the trade upon which the producer chiefly relies should be protected.

If this fail it only remains to fight the devil with fire. Give an overcoat, a necktie in three colors, a suit of pajamas or a plug hat with each box of pills, each bottle of patent medicine or each prescription filled and paid for. Give these rivals better than they send, and give with both hands. Make them sit out on the curb-stone and talk universal calamity. That would sicken them, and there would be nothing but approval from the public, for they could get clothes for less than the price of washing sheep or picking cotton, and the department stores, as long as they could fight such a fight, would make proprietary medicines cheaper than the labels.—*Free Press.*

TESTED.

BY J. O. E.

Margaret Leland stood in the broad doorway of her father's city home. It was not a modern house. The high ceilings, spacious rooms and wide hearths belonged to the generous architecture of the past; while the tasteful comfort of its appointments betrayed at once the gentle hospitality that reigned therein.

For years Henry Leland's home had been a pleasant place where friends were always welcome. They tried to explain, sometimes, why their steps turned more often here than elsewhere. Other friends were as urgent in invitation and more anxiously kind but in some way you were *at home* here no matter when you came.

The hearty greeting of the host was seconded by the genial smile of his wife, while you were at once fitted into the home life; not a looker on but a part. So it happened, that coming here, you were apt to find others, and it became a quiet centre for congenial spirits whose intellectual life fitted them to enjoy the discussion of live topics and pointed badinage.

A year ago, however, the presiding genius—the kindly friend, the tenderly wise mother, the fair, loyal, loving and much loved wife, had grown tired, even in the midst of such a home and with a look of sweet inquiry, gone on to new friendships and new duties in the dwelling place of those whose fleshly tabernacle is dissolved.

We will not dwell upon the desolation she left in the hearts of husband and only child. He never told it. As Margaret and he looked into each others eyes they understood,—she dimly, because of her inexperience—he, keenly,—that life's joy for him was over. He was a strong man, and such men realize that as long as life lasts it holds duties and kindly ministry even though joy has flown; so he had measured his strength, put on his armor of courage, and trying to be to child and friends all that the absent wife could wish him to become, he found comfort in the midst of pain.

Nature, loyally treated, holds compensation of which the rebellious never dream; leading us to the Infinite, she finds strength and healing balm for sorest hearts. Here Henry Leland followed and found peace; while Margaret lived on in the atmosphere of faith, which was her birthright.

The year had passed, binding the two stricken hearts more closely together. The sixteen-year-old girl had buried her careless childhood in the grave of her mother and came away with eyes opened to the world's hurt in general as well as her father's present pain. She had always been a thoughtful child, but her thoughtfulness was of a cheery sort—never morbid—and even now, while the shadow of loneliness and unsatisfied longing was ever present, her anxiety was for another rather than herself; how best to lessen *his* loneliness was her chief care and it was marvelous how womanly she had in this one year become.

Her father saw and marveled, while she would have been gladly surprised could she have realized how nearly she fulfilled her own desire and how truly companionable he found her.

In appearance she was tall and slender, with a lithe grace of body and a shining beauty of face; her soft brown hair, deep blue eyes and fair complexion were but the natural setting for the sweet clear purpose which touched and lightened the whole. As yet it was an untried purpose, and as her father bent to greet her as she stood in his doorway this beautiful autumn afternoon, the thought of what the future might have in store for her had an anxious throb in it and he determined that, so far as in him lay the power, he would shield her from adverse winds.

The home had not been closed and friends turned away when the dear queen was present no more; they came and were welcome; missing her sweet ministrations, but feeling her presence still in the familiar surroundings and atmosphere of quiet hospitality. Her mantle had fallen upon the shoulders of her young daughter and all were surprised at the grace with which she bore it. The transformation of the eager child into the thoughtful woman was marked by all. Her responsibilities were not heavy, as the old housekeeper was still at the helm and carefully shielded the child she loved from the harder duties of the home; but sorrow is a swift teacher and while losing nothing of her childlike trust in the love of God something of pained wonder had grown in her eyes, and life was not quite the clear sea she had heretofore found it. She had not analyzed her own experience or its effects, only instinctively set herself to lessen the hurt of the heart nearest to her.

Some natures grow selfish through grief; feel only their own sorrow and crying out

Digitized by Google

against it, belittle that of others; but there are rare natures who almost unconsciously cover the graves of their dead hopes with flowers of helpful ministry to others. The graves are there, and they are not unmindful. In the nighttime, in the lonely hours, they are uncovered, but not for your eyes or mine.

To most of us such character is the growth of years, but there are a few souls who seem to have brought with them an impress of what they are to be. Margaret Leland had no conception of her own possibilities. She was a girl, with a girl's hopes and dreams and a girl's expectation that the future held something fair and beautiful for her; but she was a girl with an unselfish heart, and womanhood in such a girl gleams forth early. Had her mother lived and responsibility longer spared her, her development would have been more slow, but the nature was there awaiting but life's demand to reveal its riches.

Henry Leland watched her development with keen delight. She was not conscious of her own growth and when at eighteen years of age she was the beautiful centre of home and friends, sweet, cheery, wholesome, happy in what life held for her, interested in the welfare of others, she felt neither complacency nor doubt. Life was fair and God was good. The past was sweet in spite of its pain and the future full of bright possibilities.

Among the frequent guests at the Leland home were the family of Dr. Stanley. Himself a cheery, kindly practitioner of the old school who was friend as well as doctor to young and old, he found time for little visiting, but sought these friends as often as time and close neighborhood made possible. Here also, wife and child had entered freely since Margaret could remember. George Stanley had been her Knight through childhood. Five years her senior, and like her an only child, Margaret became both his care and delight. Each being distinctly human, there was many a tilt between them, in which neither yielded an inch for friendship's sake, but let another question the right of his playmate to anything she saw fit to claim and George was her champion at once.

With all the unselfishness which characterized her Margaret possessed the fault common to high natures, in youth—intolerance. She was so sure of her own standards and judged all her world thereby. As they grew older George was often brought to answer at the bar of her ideals and not infrequently the war of words waxed high as he defended himself against too severe judgment. Four years ago, however, he had entered college and they had seen less of each other. At first he came home frequently, but for a year and a half Margaret had not seen him. He had taken on extra work and his one short visit home had occurred while she and her father were at the seaside. He had just now completed his course and his home-coming was hailed with as plainly expressed delight on the part of herself and father as on that of his own family.

That at twenty-three he was no longer a boy, did not suggest itself to Margaret with any particular force. There was little coquetry in her makeup. She liked her friends of both sexes genuinely and frankly while, as yet, her heart knew no stronger affection than that she bore her father. George was coming home and they would begin again where they had left off. The changes in herself had come gradually and while she had a girl's interest in long frocks and "done up" hair, she did not realize her own development as others did.

[*To be Continued.*]

In the

BARRY TWIN-BULB THERMOMETER

the mercury registers quickly and is easily read because it has a broad magnifying lens. The twin bulb is the cause, and if you are not chary of praise you will applaud it.
If you want to be "right in line" you can get any quantity of these from your jobber—we know he has got them.

* HOFFMANN'S ANODYNE.

By Geo. W. Boyd, Washington, D. C.

Compound spirit of ether as a therapeutic agent is not superior to spirit of ether and is generally obnoxious to the patient, while spirit of ether is agreeable.

There is constant contention as to which should be dispensed to the laity for Hoffmann's anodyne. When compound spirit of ether is dispensed to the laity for Hoffmann's anodyne it is invariably returned as not the right medicine. The confusion is probably due to the fact that spirit of ether is commonly called by the French "Liquer anodine d'Hoffmann," and by the German "Hoffmann's tropfen," while compound spirit of ether is called Hoffmann's anodyne by the English and United States authorities. The similarity of names for different preparations constantly leads to confusion and dissatisfaction.

The Pharmocopœial test—viz.: Forty drops will render a pint of water milky—is defective, as adulteration with some of the fixed oils will give the same results.

Edes in his "Therapeutics and Materia Medica," says: "Unfortunately this rather expensive ingredient (ethereal oil) is often reduced much below the Pharmocopœial proportions or an inferior product substituted for it."

Wm. Schleif, in his work on materia medica, therapeutics, etc., states that castor oil is occasionally added to produce the milky appearance required in the Pharmocopœial test.

Charles Caspari, Jr. ("Caspari's Pharmacy"), writes that "commercial Hoffmann's anodyne varies greatly in composition; it is probably never identical with the official spirit; in fact, manufacturers do not claim this to be the case, hence the necessity for discrimination between the two preparations when physicians prescribe compound spirit of ether."

In his "Practical Therapeutics," H. A. Hare says: "The writer has experimentally studied very thoroughly the action of the last named ingredient (etheral oil) and finds:

"First.—That the belief in the heavy oil of wine being the quieting agent in Hoffmann's anodyne is fallacious.

"Second.—The calmative effects of this mixture depends largely upon the ether, rather than the oil.

"Third.—It would seem probable that in Hoffmann's anodyne we possess an agent in which there are linked together three drugs of undoubtable power, each of which successfully substitutes the other, stimulating the system in the order here named—viz.: Ether, alcohol and heavy oil of wine."

During the last year the Health Department of Washington undertook to prosecute a number of druggists (under the pure food and drug law) for selling spirit of ether for Hoffmann's anodyne, claiming substitution, but failing to establish the name Hoffmann's anodyne as an official name they failed to convict. Such experiences are very humiliating to pharmacists in general and also produce an unfavorable impression on the public.

A lecturer on materia medica and therapeutics in one of our medical colleges annually instructs his class that they need not expect to get what they write for, when prescribing compound spirit of ether.

In the brief search I have made for these few points of objection I have observed that when authors make comments on the medical properties of spirit of ether and compound spirit of ether, their uses are identical, but in most instances they lay stress on the fact of frequent adulteration of compound spirit and this has a tendency to taint the mind of physicians toward the dispenser.

This preparation tends to lower the standard of pharmacy and affords a ready means of attack for the pharmaceutical critics.

Therefore, compound spirit of ether and ethereal oil should be withdrawn from the U. S. Pharmacopœia, and a most common source of suspicion against the pharmacist removed.

DRUG STORE APPRENTICES.*

BY LEO ELIEL.

Quite recently one of the pharmaceutical journals published a series of letters on the question of "College Graduation as a Prerequisite to Board examinations," and as might well be expected, no two exactly agreed. Nor do I consider it of any vital importance if they do, so long as our schools of pharmacy do not require a standard for matriculation at least equal to high school education. And can we blame them for accepting students lacking in this essential educational requirement so long as we are furnishing the material.

We are to-day moulding and preparing the material from which, in due process of time, the pharmacists who are to take up our burdens and duties will come. And upon them will devolve the duty of advancing and elevating the profession to that high plane we are striving for.

If we are to succeed in that elevation, we must change the methods now in vogue. What are we doing to-day? We need a boy to run errands, etc., and, of course, cannot pay very much for such services; we accept a likely boy, possibly 14 or 15 years of age; in a little while he is at the cigar or soda counter. He is quite handy and ambitious, learns about the sundries, and in the course of a few years aspires to work at the prescription desk. Then he prepares himself for the board examination by cramming in some school of pharmacy, manages to pass, and also passes the board examination. In a majority of these cases the certificates of graduation and board examination were the height of his ambition. He has gotten through; why should he waste any more of his time on study. And how long will it be before what little real knowledge he has absorbed will be evaporated? Can we expect or hope for any professional advancement from this class? If we wish to do our full duty to the public and to those who are to take our places, if we desire to do our share for future advancement and elevation of pharmacy, we must change our methods.

Up to 1862 or '63 there were few schools of pharmacy west of Philadelphia. It was the custom in many of the stores in larger cities and towns to accept apprentices for a stated term, generally two years, the instruction given being considered as ample compensation for services rendered. The apprentice was taught to keep the shop neat and tidy, how to wait on customers, during the proper season was taken into the fields and forests, taught how and when to gather the various vegetable drugs indigenous to that section, their identification, etc. That was the way he got his botany. He was taught how to dry and otherwise care for the drugs he gathered, and he developed his muscles by grinding and powdering these and other drug substances. He had to study and was expected to stand quiz examinations at regular intervals. He got his first lesson in chemistry by learning how to clean the various utensils, and as he progressed, was allowed to assist in the preparation of the various chemicals, pharmaceutical and other preparations in common use at that time. These operations were conducted under the supervision of the master or his assistant, and were accompanied by explanations giving chemical reactions, etc. Thus he was taught all of the things that it was necessary for him to know.

Of course, the first condition of apprenticeship was a good school education, and rarely anyone under sixteen years of age. This system worked satisfactorily, and furnished competent drug clerks and druggists. I would urge the adoption of some such system again, wherever practicable, accepting only such persons as have the proper educational and other requirements, and who will agree that after having served a stated period of apprenticeship, they will enter some school of pharmacy and take its full course.

This would necessarily bar out some worthy young men, and might seem a hardship, but better a few should suffer than to continue the present lines. This step, if adopted, in connection with the higher educational requirements of our colleges and universities, would in a great measure remove all obstacles to the attainment of that higher plane of pharmacy we are striving for, and would also relieve us from that worst of evils, invoking the aid of legislation to protect us from our own thoughtless acts.

*Read before the Indiana Pharmaceutical Association, meeting of 1900.

"It's funny our minister never married," remarked the young husband, who had just refused his wife an Easter bonnet, in his endeavor to change the subject: "I think he'd make a good husband."

"Well," replied the wife warmly, "he didn't seem to make a very good one when he married us."—*Yonkers Statesman.*

DEPARTMENT STORE FRAUDS GIVE DRUGGISTS AN OPPORTUNITY.

There recently came into our hands a package labeled "Borax," which had been purchased from one of the largest department stores in the city of St. Louis, and which, upon examination, was found to contain about 6 per cent. of borax, the residue being sodium bicarbonate. In speaking of the matter to the head of a large wholesale grocery house of this city, he admitted that he had innocently sold to the United States Government, for pure borax, an article which he subsequently ascertained to be substantially the same as this bogus material procured from the department store, as above mentioned.

Of all the long list of articles, comprising spices, pepper, condiments, sugar, tea, etc., the commerce in which was formerly almost exclusively in the hands of the apothecary, not one affords a better example of how the retail druggist has allowed his trade to slip away from him than this very article of borax.

As long as these various substances were comparatively scarce, high-priced and yielding large profits, the apothecary jealously watched and insisted on his rights in commerce in them; but the time came when improved methods of production, the discovery of new sources of supply, cheaper transportation, competition at the hands of producers and wholesalers, etc., brought down prices, the articles became common, and the druggist's interest in them began to lag. He no longer watched his trade rights with the jealous eye of former days, and one by one they began to slip away from him.

The druggists, hampered by professional ethics, etiquette, etc., as they were, standing on their dignity and being more of professional men than merchants or tradesmen, made little or no effort, until within the late few years, to recapture their trade, and the consequence is that the trade in a large number of these articles, once theirs, can never be regained. It has passed to men unshackled by false ethics; keen, wide-awake to the wants of their customers, men in business for profit, and content with small ones, so that they come frequently enough.

Some of the substances, on the contrary, such as spices, condiments, pepper, tea, etc., can easily be recaptured, and one of the easiest is borax, and this in spite of the fact that fully 75 per cent. of the trade in it is, at present, in the hands of grocers and department stores. The perpetration of frauds like that mentioned above, affords the wide-awake druggist the best possible opportunity of taking the article completely out of the hands of the department store, and largely out of those of the grocer. It does not amount to a great deal, it is true, but it is something, and therefore worth striving for.

Let the druggist go around to the various department stores and leading grocers, and obtain a package of the stuff sold as borax from each. Test these and ascertain the amount of borax in each, and label them. At the first opportunity afforded by the incoming of lady heads of families, in a conversational way speak of the adulteration of borax. Bring out your acetic acid dilute (or in such a case, a good article of vinegar would be better) and demonstrate the amount of sodium bicarbonate (almost invariably the adulterant) present. Test your own borax and show her its pur-

Digitized by Google

ity, and insist on the necessity for the use of the pure article, the economy in it, etc. Every druggist will know how to make the most of the situation, and no better chance to regain trade was ever offered.

Pasteur and the Surgeons.

Le Limosnin Medical in reproducing a discourse of M. d'Arsonval, the celebrated surgeon, on Pasteur, tells the following curious anecdote about the great French bacteriologist:

"Pasteur was full of the enthusiasm of youth, and never more so than at the period when his labors and discoveries were fiercely combated by the medical fraternity, and, of course, correspondingly depressed at times. Many a time have I seen him return from a session of the Academie de Medecine, altogether 'out' with himself, and for good reason. One evening, after a seance, Claude Bernard returned to the laboratory in company with Pasteur. Henry Ste. Claire Deville, and a surgeon who shall be nameless, save to say that he was one of the most celebrated of Europe at that time. Pasteur was discouraged and in the dumps, and his company saw it, and the conversation, in sympathy with his humor, soon took on a rather funereal turn. Somebody asked, all at once, what would eventually become of the men whose names were then most prominent in Europe, and Ste. Claire Deville said explosively: 'As for you, Pasteur, they will cut on your tombstone, 'He hunted the little beast' (*il chercha la pete bete*).' At this sally Claude Bernard looked steadily at the great surgeon, as though he disapproved of his utterance, and said: 'Permit me to correct you. They will write, 'He taught surgeons to wash their hands.'—'And pretty much everything else,' instantly replied Deville."

PHARMACISTS AND SUICIDE.

Among the burdens pharmacists have to carry is the occasional accusation of having given too great a facility to would-be suicides in procuring poisons. But a French statistician gives the other side of the picture by publishing figures which show that pharmacists themselves are rather less inclined to suicide than other men. This in spite of the undoubted facilities offered by the poison cupboard. The years between the ages of 21 and 30 appear to be the most fatal, says the Paris correspondent of the "Chemist and Druggist," when buoyant and unrequited hope may have dire disappointment as an aftermath. But, although the percentage of deaths among pharmacists from suicide is small, it is perhaps in the ordinary course of things that the majority should be from taking poisons.

From the statistics of the last fourteen years it transpires that the deaths from this cause average at 2.05 per 10,000, as against 2.10 for 10,000 in other professions and callings of a somewhat similar nature. Of late years there has, however, been a marked tendency to increased suicides among all classes. With pharmacists the percentage was 6.3 per 10,000 in 1888, but fell to 5.5 in 1898 and 1899. Regarding the question of poisons, during the fourteen years under review 56 per cent. of the self-sought deaths among pharmacists were due to poisons. In 1898 the percentage reached 80, but fell to 50 in the following year. One can note with interest, as a sign of how well the poisons regulations work, that of the total number of deaths from suicide only 2.5 were occasioned by poisoning.—*Am. Druggist.*

Opportunities are very sensitive. If you slight them on their first visit they seldom call again.

Miscellany.

THE POWER OF THE EYE.

We often hear people say that they can merely by a steady gaze affect a person at a distance who is not looking at them; and some say that they are able to make one sitting in front turn the head in this way. Mr. Bell in his "Tangweera" mentions this feeling when he says: "Presently I felt as if someone was looking at me, and, raising my head, saw a large puma standing ten yards off." To the physiologist it may seem uncalled for to investigate a manifest absurdity, but it has at least a practical value to explode a common error by direct experiment. I asked a young man, who is very confident of his power, to stand unknown to re-agent A, behind a book case, and look through a carefully concealed peep hole. I gave him the best opportunity, placing A about four feet from the hole and directly facing him, and I engaged A in mechanical writing. To the young man's confessed disgust and irritation he was unable to disturb A. My few experiments were negative in results. However, it may be that telepathic influence is exerted under certain conditions, and experiments with twins and others constantly *en rapport*, especially when under emotional stress and at critical junctures, might be worth trying. If there be nervous telepathy, this is, perhaps, as simple and common a form as any. If disturbance arose subconsciously the test would be that the tracings from an instrument to show nervous conditions should show large fluctuations coincidently with the times when the agent regarded himself as successful.

—*Hiram M. Stanley, in Science, New York.*

The Dissatisfied Customer.

The customer is the merchant's rightful critic and must be carefully studied in his various phases, more especially in his protests. His approval is seldom expressed by other than silent endorsement. Likes and dislikes must be divined from his tantrums when matters go wrong. A man in your own line of trade understands the difficulties and vexations that daily beset you, but the average customer is uncharitable, prone to anger and generally more than ready to fly otherwhere when dissatisfied. While infinite pains are needed to please him, there are several dozen ways in which he may be slighted or offended—many little shortcomings that will creep into the best kept shop despite constant watching. A green clerk can undo six months of his employer's best efforts in five minutes and send a regular purchaser out of the front door full of prejudice against that particular store. Certain goods may have deteriorated in quality or a defective article may have been sold unwittingly; a customer may have been kept waiting beyond his turn, a flippant boy have indulged in a bit of slang repartee—any one of a score of common causes may have aroused his resentment and undermined his good opinion of the place. The merchant must, perforce, regain his good will and remedy the defect by the hard-won hint. Of course almost every business day brings its example of the unreasonable or chronic or habitual grumbler, but it is plainly good policy to study the dissatisfied customer and adjust faults in stock, system and working force by his dislikes, for he is the most reliable indicator of things gone wrong.—*Ad. Sense.*

Repartee is any remark which is so clever that the listener wishes he had made it himself.

-NAVICULINE-

Every Horseman Knows its Merits.

I will guarantee Professor Mannington's Celebrated Naviculine To cure lameness, no matter how caused, quicker than any other preparation in the market. It is the most powerful paint that has ever been used for Splints, Spavins, Curbs, Bowed Tendons, Knuckling, Weak Kidneys, Shoulder Lameness, Buckshins, Quittor, Navicular Disease, Sprung Legs, Ringbone, Saddle Galls, Shoe Boils, Farcy, Windgalls, Founder Scratches, Grease Heels, Overreach, Thoroughpin, and all bony enlargements, etc. This paint has been used at Newmarket, England, G. B., with immense success; it penetrates muscles, membrane, and tissues to the very bone itself.

☞ **NOTICE!**—Horses entered in valuable stakes may continue their regular work whilst using this valuable preparation. It will not blemish or destroy the hair on any part to which it is applied. Horses need need not be kept standing in the stable eating their heads off through lameness; it is absorbent and exercise assists action thereof.

Blisters, Liniments and Embrocations are counter-irritants, not absorbents, being composed mostly of grease; it is impossible for them to reach the muscles, tendons, joints, and absorbent glands. "**NAVICULINE**" will reach them all; it does not contain any grease. Ask your druggist to order it for you; he will do so; it is invaluable to Horsemen, Trainers, Stockraisers, Farmers, etc. Be sure and ask for Professor Mannington's Celebrated "**NAVICULINE**," Yellow Label.

Many well known Owners and Trainers have used this valuable preparation, and will testify to its merits.

PRICE, $3.00 PER BOTTLE.

*FLUID EXTRACT OF SQUILL.
The Best Menstruum for Its Preparation.

By A. B. STEVENS.

When fluid extract of squill is made in strict accordance with the requirements of the U. S. Pharmacopœia it separates into two layers, one a thin fluid, strongly alcoholic and of a decided bitter taste and another lower layer, which is thick, mucilaginous, of a less bitter taste and contains but little alcohol.

By request of the writer, Dr. George B. Wallace submitted each layer, separately, to a careful pharmacological examination. He reported as the result of his examination that the upper layer was four times as active as the lower one, and that when alcohol of 95 per cent. strength was added to the lower layer, a white substance, forming the bulk of the layer, is thrown out of solution, also that it is soluble in water and pharmacologically inactive.

Doubtless the activity of the lower layer is due to the carrying down of a small quantity of the active principle by the mucilaginous substance during separation.

The Pharmacopœia of 1880 directed to use alcohol as a menstruum. The Pharmacopœia of 1890 changed the menstruum to 750 Cc. of alcohol to 250 Cc. of water.

With a view to ascertaining the best menstruum to be used, L. F. Barlow was directed to prepare fluid extracts of squill with 80, 85 and 90 per cent. of official alcohol, but in each case there occurred a separation into two layers, the lower mucilaginous layer decreasing in volume with the increase of the strength of the alcohol. The best results were obtained with full strength official alcohol.

While there seems to be some doubt as to the exact composition of the constituents of squill, it is quite certain that all of the adtive principles are soluble in alcohol and that the gum and sugar which form the mucilaginous part are soluble in water but insoluble in alcohol.

*Presented at the annual meeting of the Michigan Pharmaceutical Association and contributed for publication in the AMERICAN DRUGGIST.

Department Store Post Offices.

A department store development in St. Louis is the addition to the many features of a branch post office. Such offices are to be established in six stores, not for the special benefit of the stores, but for the convenience of their patrons, especially the women, who will then be able to do their postal business as part of their shopping. The branch offices will have money order and registration departments, and women who now have difficulty in establishing their identity at the money order department in the central post office can be vouched for by their acquaintances in the store.

Falling Off in Diamond Business.

The South African war is responsible in a large measure for the falling off during the fiscal year just closed in the imports of precious stones to New York. The total value of cut stones imported was $10,927,-072; uncut, $4,057,037; making a total of $14,984,109. The figures for the corresponding period last year were: cut stones, $11,996,310; uncut, $6,039,491; making a total of $18,035,801. Not only has the war in Africa had the effect of disturbing the diamond market, as far as the imports are concerned, and increased the price of diamonds, but a large number of diamonds have been exported from this country since the war began.

Jones—"She's a fine looking woman; and then such a splendid carriage she has!"

Smith—"Splendid carriage? Guess there's some mistake. Never knew her to ride in anything but the trolley cars."—*Boston Transcript.*

▾ ▾ ▾

"What are you buying all those traps for?"

"Doctor's orders. He tells me I need a little recreation and insists that I should go duck hunting with him."

"Huh! Seems to me that's a sort of quack remedy."—*Philadelphia Press.*

▾ ▾ ▾

Bixby—"I want some liquor for my horse—he has an attack of colic."

Druggist—"What kind of liquor, sir?"

Bixby—"Blessed if I can tell. I supposed you would know."

Druggist—"Certainly, sir. Let me see, what is the color of your horse?"

Bixby—"He's a bay."

Druggist—"Yes, sir. George, half a pint of bay rum for the gentlemen."

—*Cleveland Plain Dealer.*

▾ ▾ ▾

Mrs. Keyboard—"Why do you always sit at the hotel piano? You can't play a note."

"Old Stokes—"Neither can anybody else while I'm here."

▾ ▾ ▾

"You seem to like his attentions. Why don't you marry him?"

"Because I like his attentions."—*Brooklyn Life.*

Hoxsie's Croup Cure

Is the Life Saver of Children.

It is a positive, swift and sure cure for Pneumonia, Croup, Coughs, Colds and Whooping Cough, while as a preventive of Membraneous Croup and Diphtheria, it has no equal.

No Opium to Stupify. No Ipecac to Nauseate.
FIFTY CENTS PER BOTTLE.

A. P. HOXSIE, MANUFACTURER,
BUFFALO, N. Y.

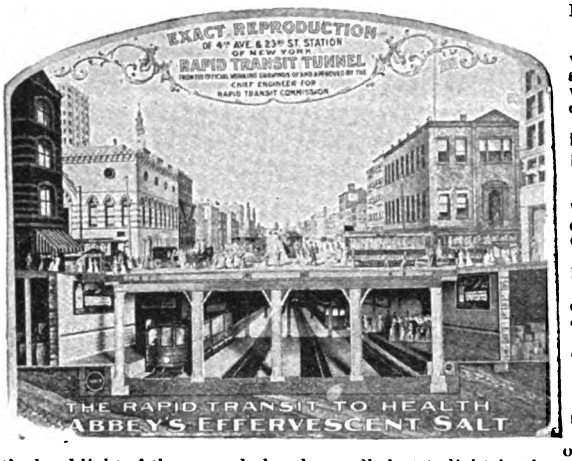
WINDOW DISPLAYS SELL GOODS.

THE PROOF OF THE PUDDING IS IN THE EATING.

Read the reports of a few of the many druggists who have taken advantage of the opportunity and made use of the most remarkable window display ever offered the retail drug trade. Don't be afraid to increase your sales.



F. N. WHEELER & CO., 802 State St., Springfield, Mass., say:

"We received the Display and used it in our window for three weeks, where it attracted a great amount of attention. We used an electric light with the Display which made it more attractive, especially at night.

"We have felt the effect of the Display in an increased demand for Abbey's Salt."

E. F. HUNTING Ph.G., 121 Central Ave., Albany, N. Y., says:

"The Window Display came in good condition. We have used same and it seemed to be effectual in creating an increased demand for your product."

GEO. B. WRAY DRUG CO., Yonkers, N. Y., say:

"The Display came to hand in good shape, and is in our window facing Getty Square.

"We have put an electric light behind it, and it causes much comment. It certainly helps the sale of the goods. We consider it one of the best window advertisements we have ever used."

CHAS. H. WIBERLEY, 250 River St., Troy, N. Y., says:

"The Display reached us in good condition and has excited a great deal of attention and admiration in our windows for the last two weeks. We adjusted some small electric lights across the face of the card, lighting up the subway, and cut out the head light of the car and placed a small electric light in that, which at night showed up entire card to great advantage. It has also materially advanced the sale of the goods."

G. W. HERZBERG, 315 Wells St., Chicago, Ill., says:

"Your Rapid Transit Window Display has drawn much attention in my window and helped the sale of the Salts 50 per cent. People who have been getting 25-cent bottles are now using $1.00 bottles entirely.

"I must say I am well pleased."

CHAS. A. RAPELYE, 853 Main St., Hartford, Ct., says:

"Your Rapid Transit Display, together with a quantity of the Salt, was given a prominent place in my window (using same exclusively) and attracted a great deal of attention and resulted in increased sales of the Salt.

"After having finished my display in my Main Street store I sent it to the Asylum Street store, where it has had a prominent place."

FREDERICK K. JAMES, 700 Eighth Ave., New York City, says:

"We received the Rapid Transit Window Display in good condition and displayed same in our show window for a number of days.

"We think the effect of such display on the trade was very good, as we have noticed an increase in the demand for the Salt since then."

In actual size this display, cut out, is five feet long by three feet high. It is n exact reproduction in fourteen colors of the 23d Street and 4th Avenue Station of the New York Rapid Transit Tunnel.

Send us an order through your wholesaler for one gross of small size Abbey's Salt, or its equivalent in the larger sizes and we will include in the order one of the cut outs.

Abbey's Salt is sold in three sizes, retailing at 25c., 50c. and $1.00 per bottle. Trade list on application.

THE ABBEY EFFERVESCENT SALT CO., 9-15 MURRAY STREET, NEW YORK.

OAKLAND HYDROGEN DIOXID

"The Kind That Keeps."

Laxative Bromo Quinine

Is a Valid Trade Mark, And Must Not Be Imitated.

The Paris Medicine Company won a suit in the United States Circuit Court for the District of Indiana, establishing the validity of **Laxative Bromo Quinine** as a trade mark, and perpetually enjoining the defendant, Newton C. Davis, of Frankfort, Indiana, from using these or any similar words to describe a medicinal preparation of his manufacture. On account of the popularity of **Laxative Bromo Quinine,** it still has a few imitations put up under similar names, which are calculated to deceive the public.

A rank imitation is manufactured by a concern at Detroit, and suit against them is now pending in the courts, and the indications point to a favorable decision in behalf of the Paris Medicine Company. The Paris Medicine Company will bring suit at once against any and all infringes of their product.

There is no excuse for druggists handling imitations of **Laxative Bromo Quinine,** as long as the Paris Medicine Company deal with the Druggists on the same liberal basis as heretofore.

The Genuine LAXATIVE BROMO QUININE is for sale by all Wholesale Druggists.

DRUGGISTS all want a Remedy for . . .

Gonorrhœa, Gleet, Leucorrhœa, Spermatorrhœa and Piles . . . . .

——that they can recommend.

THE TRADE can feel assured nothing on the market for these diseases will afford so much satisfaction to both dealer and consumer as

Injection Malydor.

It is **Safe. Sure, Quick and Clean. Cures in One to Four Days Is a Sure Preventive,** and a first-class male syringe goes **FREE** with every bottle; thus making it the most **satisfactory** and **economical** for the consumer, while it also gives the dealer a **good profit.** It is for all concerned **THE BEST** of all similar remedies.

Retail Price, including Syringe, $1.00 per bottle.
Price to the Trade, - - - - 7.80 per dozen.
Affords Dealers 55 per cent. Profit.

COMMUNICATIONS.

Communications on all questions pertaining to the Trade and Profession are wanted. Stamps should be enclosed if rejected communications are desired returned.

QUESTIONS SOLICITED.

We solicit questions on all points of general interest to the trade. Technical questions will be answered by the editor, W. R. Ogier, or Prof. Geo. B. Kauffman. Correspondents must send their names, not for publication, with each query. No attention paid anonymous questions.

Editorial.

A PERPLEXING QUESTION.

AN editorial appeared in the November number of *The Bulletin of Pharmacy* under the title, "This is the Least the Colleges Owe to Pharmacy," which clearly sets forth the minimum obligations which schools of pharmacy are under to the pupil, the pharmacist and the public, as well as to the college itself.

The writer forcibly and accurately outlines the conditions existing at the present relative to the education of pharmacists, points out some of the weak points in the system and offers some suggestions as to the methods by which these may be strengthened.

It is a perplexing problem, and the one of all others occupying the serious thought of the ablest men who are interested in pharmacy and who hope as well as labor for a higher degree of efficiency among pharmacists. It is this spirit of unrest that offers the most encouragement for an ultimate advance in pharmaceutical education, for when once a sufficient number are aroused to the necessity for action the methods are usually found by which desired results are secured.

Unfortunately for thoroughness in any vocation requiring fine intellectual culture or scientific attainment, the spirit of commercialism runs riot through all modern effort. Is it not a truth that from the primary grades in our public schools to the senior course in the great universities the

Digitized by Google

idea is not so much the completeness of the work undertaken as the speed by which it may be finished in order that the student may take up the next branch or step into a higher grade, the ultimate step being, of course, a vocation, professional or otherwise, that will bring the quickest and largest returns in the real work of life?

How often are young men heard to remark when, after a possible course in a college or university the choice of a vocation is canvassed, that objection is offered first to this and that one with "there is no money in it, there are too many at it now," as tho' the money was the first item in the article of agreement between a youth and his destiny. And generally speaking it is.

Men cannot wait for results. We have become such idolaters to material things that the entrance to any occupation over which the mark of the dollar is not engraved is shunned, no matter what other allurements may be offered in its stead.

So far as pharmacy is concerned it is no exception, but rather an aggravated case of the same general epidemic, because it is a commercial and professional calling in one, the commercial phase only being recognized by the people and the professional by the men with large horizons in the ranks of pharmacists and other allied professions.

The public, with few exceptions, sees but little use for specifically trained men in our retail drug stores. The average citizen, cultured or illiterate, will enter a drug store with a prescription requiring knowledge and skill for its preparation, upon which knowledge may hang the life or health of his dearest friend, and hand it to the boy at the soda counter or the porter cleaning the floors, with no more concern than he would go to the butchers for a beef roast.

Indeed, not nearly so much, for if he is a good liver he will insist upon seeing that he gets a good cut for his money.

Next in the narrow estimate of his professional attainments is the pharmacist himself. In most cases he expects his returns from the commercial side of his business. He is more interested in the profits he derives from the goods he sells, than he is in the price he secures for his knowledge and skill as a pharmacist.

To what depths has he degraded his responsible and laborious duties! The writer has known prescriptions to be prepared which required not a little real skill in dispensing for ten cents! He has seen a competent pharmacist making sixty pills containing among other substances, both strychnia and arsenous acid, and requiring thirty to forty minutes to carefully prepare, charge twenty-five cents for them. The plumber who comes to thaw his frozen water pipes charges sixty cents an hour for *his time* and forty cents an hour for his "helper," usually a cub of a boy, with a ratio of muscle to brain of about 40 to 1.

Is it any wonder that he rises no higher in the esteem of his patrons than he does? Is it surprising that he cares little for the sort of material that comes into his store as apprentices? Can he hope to secure for two dollars a week (he cannot pay more, his profits will not warrant it) a bright, clean, well trained, educated boy who will clean cuspidores and wash bottles in the hope that some day he will blossom out into a full-fledged professional pharmacist, a "manager" or proprietor of a store, with a diploma from a school of pharmacy and a certificate as pharmacist from the "State Board"?

We call next to the stand the teachers in the schools of pharmacy. Mr. Helfman, in his editorial, quotes their testimony in these words: "We are doing the best we can. We build with the lumber which the pharmacist provides. We take the best material we can get. Our pupils are mostly drug store apprentices, and it is not our fault if the druggists debauch their own calling by hiring lads who have no business in a drug store." From the teacher's standpoint this is a fair statement, but it is not *all* of the truth. The schools are founded like everything else, in the commercial spirit. There is not a school in the land that will continue two years in succession if it fails to make ends meet.

How long would it take to organize a syndicate of pharmacists that would establish a school of pharmacy on an ideal plan and support it regardless as to whether it paid its way or not? The schools "take what they can get," it is true, and they take *all* they can get regardless. The more students, the more revenue, and having taken them, does anybody ever hear of any of them being refused graduation after the course is completed? In justice to the schools it must be said that it is bad policy to withhold from any student his diploma after he has completed the required course. If he has been a "good fellow" among the boys, and the bad students are nearly always "good fellows," his being "flunked" will cost the school several students next year and the year after. There is comradeship among students that is not to be ignored.

Digitized by Google

We do not blame the schools. They are a part of a machine that is not accurately geared and are running loose because they must run loosely or not run at all.

Finally comes the Boards of Pharmacy. These are the sacrificial bulls and goats upon which the sins of the people, the pharmacists, the apprentices, the teachers and the editors are laid! These are the filters through which all the discolored fluids are to run, and the residuum is to be carefully held, while naught but the clear, transparent liquid is to be permitted to pass. Every pharmacist knows that there are compounds that will not filter. If they cannot be thrown away he must do the best he can with them and suffer the feeling of intense disgust every time he sees them thereafter. No conscientious pharmacist with high ideals does his best conceptions justice in the performance of his duties as a member of a board of pharmacy. He does the best he can considering the material he gets and the environment by which he is surrounded.

The public does not demand the highest standard of pharmaceutical skill in supplying its needs. The legislatures are uniformly doubtful of pharmacy laws, and will have none of them if they are approximately rigid. The pharmacists, lots of them, care more for a good salesman than for scientific accomplishments. The schools send to the boards of pharmacy a good many men who have been crammed for the sole purpose of "passing the examination." If out of the conglomerate mass the boards were to take twenty per cent. of the number of applicants and reject eighty per cent., as many of the boards would gladly do, the public, the pharmacists, the applicants and the teachers (some of them) would, through the only too eager State legislatures, demolish the whole machinery connected with legislation in pharmacy.

The boards, notwithstanding their willingness to be laid upon the altar, do not deem it best to assume the responsibility for reforms that should be begun at the other end of the line, but prefer to follow a conservative policy until such time as an intelligent public opinion will demand thoroughly skilled pharmacists, for whose service a just compensation shall be given. *Then* pharmacists will be more rigid in their selection of apprentices, the schools more thorough in their teachings, and the profession of pharmacy shall be in fact what many hold it to be in theory. But that period has not arrived; meantime we must wait and—TALK! W. R. O.

MAKE FRIENDS WITH YOUR LUCK.

DR. VAN DYKE has said, that "the only real philosophy in life after all is just the secret of making friends with your luck."

There is a stupendous truth in this statement. I met a young man the other day a little past thirty years of age who has inherited the drug business, and he looks upon it about as many men would an inherited tendency toward tuberculosis or some other equally fatal malady. The store which will sooner or later be his, and in which he has spent all the years of his business life, is a large one and well located, is doing fairly well and will make him comfortable so long as it has reasonable business care, and with strict economy would enable him, in addition, to all life's comforts and many of its luxuries, to save something each year. But he does not like it in any sense and takes no pains to conceal his disgust. This is only a sample of a good many similar cases. All such men are making a mistake and, in a great measure, spoiling the best years of their lives.

When it is not practicable to dispose of such places, and when those in them are in most instances wholly unable to know that they would be better off, or even as well off, in any other place in life, why not make friends with their luck and get all the good out of the environment possible, and make those about them as happy as the circumstances will admit? Why not throw themthemselves heart and soul in their business, taking advanced positions in every new condition which confronts them, become known as men of force as well as of wide influence in at least one sphere of human life? It is surprising how much may be gotten out of one's surroundings if only that one is intent on finding the good and resolutely bent on being blind to the ill. A friend once speaking of the joys of extensive travel and the denial of such privileges to such a large percentage of people who would find delight in them added, "but there is within the reach of every man opportunities for the benefits of travel without going far from his own home; if he can climb a tree, that is a good substitute for mountain climbing, and the effort as well as the view from the top of the tree is as exhilerating as that of ascending a mountain."

Such a man would find pleasure and satisfaction everywhere in life unless he was in the most abject poverty. So far as devotion to an occupation is concerned, there

Digitized by Google

is not so much difference after all in the sacrifices one must make for success in one calling as in another. A busy physician has no moments for anything but his patients. A great lawyer has no time for much else but the claims of his clients. A business man with large and varied interests is one of the hardest worked men in life. The man who labors in a trench with a pick is a prince in leisure in comparison with many a man whom the world envies, because nothing is known of the difficulties and sacrifices by which he has attained and hopes to maintain his present successes. Men leave their native land and go abroad to study art or music. Many of them without means live in garrets and subsist on crusts that they may devote their pittances to ministering to the artistic sense within the soul. If success is attained, such men, amid the acclaim of their fellows, know the thorny route by which it was won. A man finds what he looks for on this earth. If his eyes are fixed upon the ground he beholds the mud which clogs his feet; if lifted to the mighty dome above him he sees the fathomless blue, the sublime systems of the material universe; he feasts upon those things which lift him above the painful experiences of daily toil.

Better your condition? Yes, of course; but be sure you are going to better it and not make it worse. Remember that there has been discovered but one royal road to distinct achievement in any direction, and that is by personal sacrifice, by diligent, earnest effort.

Make friends with your luck!

The writer recently heard a recital of experience from the lips of a woman residing in a small city of Ohio, who a few years since took hold of her father's drug store after he had become too infirm to longer manage it, and finding it $8,000 in debt, went to work with a courage and energy which should shame many a strong man, and has now succeeded in reducing the debt to $1,000, and has maintained the family in the meantime.

That woman made friends with her luck, and instead of whining over the sacrifices of ease which devotion to business demanded, is now rejoicing in the prospects of soon being wholly independent in the possession of her business, as well as a source of comfort to her aged parents. This simply shows what may be done even in the retail drug business by keeping everlastingly at it and being on good terms with one's luck. W. R. O.

A SERIOUS MISTAKE.

WE very much deplore the action of the Executive Committee of the N.A.R.D. in accepting the offer of a proprietary company to contribute to the treasury of that organization one dollar for every ten dollars in goods ordered by the retail druggists of the United States. As might well have been expected, this action paved the way for similar offers from other manufacturers of proprietary goods, and if one is accepted, why not all? If all are accepted it simply makes this great organization an advertising medium for the distribution of patent medicines to the trade of the country.

It is an unfortunate break of the Executive Committee, induced, no doubt, by a desire for the sinews of war without due consideration of the methods by which they were to be obtained.

It is a sound proposition that the National Association of Retail Druggists must succeed, if it succeeds at all, solely by the general support of the entire retail trade of the country. This support must be moral, in the way of influence and encouragement in every possible manner, and financial, in supplying sufficient funds to carry on the work in a dignified, thorough and straightforward manner.

If the retail druggists will not do these things the organization will fail, as it ought to fail. No outside efforts to bolster it up, no attempts of a few to keep it alive, no schemes of any kind to make places with salaries attached for a coterie of ambitious individuals will avail to keep breath in an organization when the fountain head is paralyzed through indifference and neglect.

Whenever the officers of this association find it necessary to coquette with corporations or firms with smooth propositions to donate a certain percentage of returns upon sales made through the association's influence, in order that a sum of money sufficient to carry on the work of further organization and extension, that moment the word ICHABOD is written over the N. A. R. D.

These are plain words, but spoken from an interest in this organization which we regard as the star of hope for the retail druggists of the United States.

The journals devoted to pharmacy, with scarcely an exception, have supported the N.A.R.D. They have given their space without stint, the talents of able men have been exerted to write inspiring words in

Digitized by Google

favor of this recently devised plan for the relief of the retailer, and who has a better right to speak words of warning when danger threatens? "Faithful are the wounds of a friend, but the kisses of an enemy are deceitful." W. R. O.

VITRIOL VAN LIEW, OF VAN WERT.

MRS. VAN LIEW, the "vitriol murderess," of Van Wert, Ohio, plead guilty to the crime of manslaughter in the Court of Common Pleas, at Van Wert, and was sent to the Ohio State Prison for ten years, on November 30th.

No claim of insanity was made and no cause has been given for this horrible crime.

A cry of indignation went through the country over the burning at the stake of a negro murderer and ravisher in Colorado, a few weeks ago, and it was a righteous cry so far as it condemned the method of disposing of the criminal, but to our thought the burning of the negro was a humane act compared with that of Mrs. Van Liew, whose victim was consumed by the action of the acid on the tissues of the face and neck for a period of thirty-five days. The negro's torture lasted a few minutes, when death released him, the innocent victim of a woman's hate had eyes eaten out, nose and cheeks burned off and lived for a month in agony untold and inconceivable.

And the penalty? Ten years in the penitentiary, actually six years and four months. Why? Social position, influence, wealth, is this the answer? Is it any wonder that crime increases and that mobs burn and hang criminals?

It is already announced that the murderess will apply for *a pardon*. Why not?

ANSWER TO QUERY.

"S. D. C.," Nelsonville, Ohio—A good formula for Milk of Magnesia is the following:

Calcined Magnesia (light).....7 ozs. avd.
Glycerine.....20 fld. ozs.
Dist. Water.....3¾ pints.
Triturate the magnesia with the water and add the glycerine.

If a light magnesia is used it will remain suspended for a long time, but will deposit on long standing. It should always be dispensed with instructions to "Shake before taking."

NORTHERN OHIO DRUGGISTS' ASSOCIATION.

On October 1st, eight localities in northern Ohio affected by cutters, had been reduced to five in six weeks.

The regular monthly meeting was held in Cleveland, on December 7th. The subject of poison laws was discussed, opened by Geo. W. Voss, member of the State Board of Pharmacy, in Cleveland. Full reports have not reached us.

Notice has been sent to members to exercise caution in sale of Duffy's Malt Whiskey, since the Dow Law includes this article in the term, "Trafficking in Intoxicating Liquors."

The Board of Control recommends the adoption of an emblem consisting of a mortar and pestle upon a shield background, with the motto in Latin, "Those things are good which are honest." The emblem is to be used as a trade mark, and the officers have been authorized to adopt it.

A grocer in a suburb of Cleveland sent a large order to a Detroit jobber for patent medicines, but was promptly refused upon advice from the officers of the Association, that he was not a legitimate dealer. The leaven is working.

An aggressive cutter in Warren has recently manifested a disposition to turn over a new leaf through the influence of local members of the N. O. D. A.

OHIO BOARD OF PHARMACY.

The regular January examination of this Board will be held in Columbus on Tuesday and Wednesday, January 8th and 9th, 1901. Applications must be in the office of the Secretary not later than Thursday, January 3d. Applicants entitled to second examinations must file applications the same as for first examinations and in every such case the former examination number should be given. W. R. OGIER, *Secretary*,
Columbus, Ohio.

Now I want you to remember that in life troubles will come which seem as if they would never pass away. The night and the storm look as though they would last forever, but the calm and morning cannot be stayed. The storm in its very nature is transient. The effort of nature, as of the human heart, is ever to return to its repose, for God is Peace.—*Anon.*

Scott & Bowne,
Manufacturing Chemists,
Cor. Pearl & Rose Sts.

New York, May, 1900

To the readers of the Midland Druggist:

Do you know that we were the pioneers in advertising an Emulsion of Cod Liver Oil? That we are, and always have been, far and away, the largest advertisers of a Cod Liver Oil Preparation? Do you realize that the demand you now have for Cod Liver Oil Emulsions was made, and is largely maintained by an enormous expenditure of our time and money? Stop a moment and think.

How much of this demand have YOU created? Haven't we tilled the soil and sown the seed? Hasn"t our commodity always given satisfaction? Yes? Then aren't we honestly and justly entitled to the sale, when SCOTT'S EMULSION is asked for? That is all we ask.

Yours sincerely,

SCOTT & BOWNE.

The Prussian Tax on Department Stores.

The experiment of levying special taxes on department stores is to be tried in Prussia. After January 1, 1901, all merchandise is to be divided into four classes, and every concern which sells things belonging to more than one of these groups is to pay a graduated tax, provided its annual sales amount to more than 400,000 marks. From 400,000 to 450,000 marks the tax is 4,000 marks. On sales between 950,000 and 1,000,000 marks the tax 18,000 marks, and for every additional 100,000 marks the tax is 2,000 marks.

Special Terms on Castoria.

Castoria—"the kind you have always handled"—is made by The Centaur Co., 77 Murray Street, New York, of which Charles H. Fletcher is president. Mr. Fletcher thinks that almost any druggist ought to be able to sell a dozen bottles of his specialty a month, or one gross a year, and to induce effort in that direction he authorizes jobbers to allow a special discount of 5 and 2½ per cent. on gross lots.

Druggists are invited to send for counter wrappers, cartons and other advertising matter.

Digitized by Google

EDITORIAL NOTES.

THE Congressional Committee on Ways and Means held a meeting on Nov. 20th, at which the Secretary of the Treasury and the Commissioner of Internal Revenue were present. The object of the meeting was to report a bill to the present session of Congress for the reduction of the war taxes, and it is reported that special attention was given to "Schedule B," relating to the stamp tax on articles sold by druggists. The discussion indicated that the committee was in favor of the elimination of most of the taxes on proprietary articles and medicines, and it is confidently expected that such reduction or elimination will be made during this session.

Meantime the druggists should not relax their efforts. The fact that the committee sees the justice of some modification of Schedule B only emphasizes the importance of persistent work being given until this desired object is attained. Let each one do his part.

Late reports indicate that the committee will report a bill to practically obliterate Schedule B, which includes the tax on medicines and proprietary articles. The taxes on conveyances and mortgages, bank checks, express receipts, telegrams and bills of lading will also be taken off.

* * *

WE reprint this month from *The Laryngoscope* an experience of a physician in using carbolic acid for spraying the throat of a patient, mistaking it for hydrogen dioxide. The mistake occurred because a label showing carbolic acid had been pasted over that on the bottle when it represented the hydrogen. A rule exists in the most systematic pharmacies never to place a label over another under any circumstances, and a better rule exists in some never to use a second-hand bottle for any article that is to be used, or may be used, as a medicine in any form. "New wine in new bottles" is a good motto," and supplement it with "new labels on everything, the old ones to be removed."

* * *

ONE of our cotemporaries, in the leading editorial of a late issue, giving the decision of the Supreme Court of Massachusetts in the Phenyo-Caffein case, attributes the decision to the "United States Supreme Court of Massachussts." We are surprised to find so stupid a blunder in a drug journal of such large ambitions. There is no "United States Supreme Court of Massachusetts," or of any other State.

The case was not heard in a United States Court at all, but in the Courts of the State of Massachusetts, and the final decision by the Supreme Court of that State was in favor of the Phenyo-Caffein Co. Without going into detail, the decision establishes the right of a corporation, firm or individual to fix the price at which a proprietary article shall be sold at retail when such sales are made on a stipulated contract to that effect.

The decision, of course, applies only to the State of Massachusetts, but it is stated that the company intend to test the question in other States as fast as opportunities arise. Should similar decisions be secured in other States, the matter of regulating prices on proprietary articles would seem to be pretty effectually settled, provided the manufacturers desired to maintain the prices at which their products shall be sold, and will sell them only on a contract to that effect.

* * *

THE newspapers have recounted an unusual number of cases of poisoning during the past month, many of them being suicidal. Carbolic acid heads the list of favorite agencies for this important function, while laudanum, morphine and "Rough on Rats" still find favor among those who have not learned the delightful(?) sensation of extinguishing life by the phenol method.

* * *

THE citizens of Baltimore must hereafter eat their "Frankfurter" in its natural state. The roseate hue imparted to this valuable article of diet can no longer be tolerated, the color of the dog, both in flesh and hair, must be a natural and not an artificial hue. The courts in that city have punished several dealers recently for selling "links," the contents of which had been colored with aniline in order to give it that lip-salve tint so familiar to pharmacists. Expert testimony was offered in defense that aniline was a harmless coloring agent containing no arsenic or other deleterious substance, and that "Frankfurter" so colored was a valuable food product, but it was no use. "Twenty and costs," said the court in each case.

Necessity of Inflammation in Healing.

Modern methods of treating wounds neglect one of the most important factors in healing, *i. e.*, the natural reactionary processes of inflammation. We have learned that most of the benefits of antiseptic dressings are due to the slight inflammation they induce, and we know that absolute asepsis is unattainable. Meyer, therefore, claims that wounds should be rendered as aseptic as possible and then the preliminary stage of aseptic inflammation induced, to collect blood and leucocytes at the spot, so that the few invading germs that remain may meet their masters at once, even in the depth of the blood-clots, instead of finding conditions favorable for a culture-medium. He accomplishes this with tincture of iodin on aseptic, and aluminium acetate on infected wounds. He considers treatment without inflammation absolutely dangerous in case of suppurating lesions on elderly or feeble persons. Thick dressings, holding the heat, to supplement the action of the aluminium acetate, attract the leucocytes and have proved very successful in his experience in such cases.—*Journal A. M. A.*

-NAVICULINE-

Every Horseman Knows its Merits.

I will guarantee Professor Mannington's Celebrated Naviculine To cure lameness, no matter how caused, quicker than any other preparation in the market. It is the most powerful paint that has ever been used for Splints, Spavins, Curbs, Bowed Tendons, Knuckling, Weak Kidneys, Shoulder Lameness, Buckshins, Quittor, Navicular Disease, Sprung Legs, Ringbone, Saddle Galls, Shoe Boils, Farcy, Windgalls, Founder Scratches, Grease Heels, Overreach, Thoroughpin, and all bony enlargements, etc. This paint has been used at Newmarket, England, G. B., with immense success; it penetrates muscles, membrane, and tissues to the very bone itself.

☞ NOTICE! -Horses entered in valuable stakes may continue their regular work whilst using this valuable preparation. It will not blemish or destroy the hair on any part to which it is applied. Horses need need not be kept standing in the stable eating their heads off through lameness; it is absorbent and exercise assists action thereof.

Blisters, Liniments and Embrocations are counter-irritants, not absorbents being composed mostly of grease; it is impossible for them to reach the muscles, tendons, joints, and absorbent glands. "NAVICULINE" will reach them all; it does not contain any grease. Ask your druggist to order it for you; he will do so; it is invaluable to Horsemen, Trainers, Stockraisers, Farmers, etc. Be sure and ask for Professor Mannington's Celebrated "NAVICULINE," Yellow Label.

Many well known Owners and Trainers have used this valuable preparation, and will testify to its merits.

PRICE, $3.00 PER BOTTLE.

ALLEN BURROWS,
DRUGGIST,
SHEEPSHEAD BAY, NEW YORK.

Personal and Trade Notes.

[Items of interest, personal and otherwise to the drug trade, are solicited. No attention paid of anonymous communications, although the name to the sender of such news will not be published.]

—

James B. Parnell, druggist, of Toledo, is dead.

Frank H. McGrath, the Toledo druggist, is dead.

E. C. Linger, druggist of Cleveland, has sold out.

Hohnholz & Co., of Ft. Wayne, Ind. have sold out.

J. P. Harley, of Lima, Ohio, has sold his drug store.

William L. Reum druggist, of Cincinnati, has assigned.

Chas. Shubert has sold his drug store at Fostoria, Ohio.

James Bruce, the well-known Cleveland druggist, is dead.

W. M. Mercer, druggist of Rudulph, O., has sold his store.

W. W. Alexander is with H. M. Danly & Co. at Racine, Ohio.

James R. West of New Vienna, was a recent visitor in Cincinnati.

Geo. W. Brown of Wilmington, Ohio, was a visitor in Columbus recently.

Gus Roedell, Gallipolis, Ohio, shows a very pretty Christmas window.

T. D. Cross, Hanoverton, Ohio, has been succeeded by Wm. C. Anthony.

Will Keife has accepted a position with W. S. Vinson, Huntington, W. Va.

Mrs. Chas. F. Grubel has sold her drug store in Toledo to Mrs. Ellen Burns.

F. J. Briggs has bought the drug store of J. E. Strecker at Logansport, Ind.

A. E. Benedict, Utica, Ohio, has the grip; hopes to be up and around in a few days.

Mr. Sol Cline, the senior of Cline & Son, Albany, Ohio, has been indisposed for several days.

Geo. Mayer, the druggist of Milo, a suburb of Columbus, has made an assignment.

E. R. Held, Canal Fulton, Ohio, has sold a half interest in his business to E. R. Shilling. The business will be conducted under the firm name of Held & Shilling.

C. C. Coblentz and wife, Mansfield, Ohio, are rejoicing over arrival of a 10-pound girl, December 6th.

The drug store of W. O. Davis, at Phillippi, W. Va., was burnt in the recent disastrous fire at that town.

Wm. H. Coon and Geo. Davis, the two druggists of Colfax, Ind., have both been seriously damaged by fire.

Fred Roetling, of Huntington, W. Va., has secured the services of J. M. Park, formerly with E. Stenger, Cincinnati, Ohio.

A. S. Houck has bought the interest of his partner—Mr. Wiggins—and succeeds to the business of Hauck & Wiggins, Shirley, Ind.

J. A. Jackson, formerly of the firm of Obetz & Jackson, has recently purchased the Buttles Avenue Pharmacy, of Columbus, Ohio.

W. E. Stansbury, Middleport, was after birds on Thanksgiving day. "Old Doctor Bowen's Golden Tonic" has doubtless been in evidence since.

Chas. D. Kerr, Gallipolis, Ohio, was in Cincinnati week of the 3d of December. His principal business was with the advanced Masonic bodies of that city.

Mr. Jesse Moody of Thornville, Ohio, has purchased the Beck drug store at Lancaster, Ohio, and expects to open shortly with a complete line of drugs and sundries.

A. T. Barton, Pomeroy, Ohio, whose loss by fire was reported in the November MIDLAND, has opened again with everything new and a great improvement on the old.

The firm of Wissler & Elsass, Chillicothe, Ohio, has dissolved and R. Wissler has bought the entire property. Mr. Wissler will continue the business as heretofore.

The druggists of Dayton, Ohio, are to be congratulated on their good sense in closing for half the day on holidays, giving their clerks a vacation that is greatly appreciated.

The clerks and the majority of the proprietors of drug stores in Springfield, Ohio, are considerably displeased over their inability to bring one of their competitors into line on the early closing agreement, which has been in force there during the winter months.

Digitized by Google

Mr. Frank Gallagher, of F. M. Gallagher, at Racine, Ohio, has returned to Louisville, Ky., where he will take the degree of M. D. next spring. John may be found at the old stand.

The MIDLAND is pleased to learn of the improvement in the condition of the father of S. H. Folckemer, who has been seriously ill at his home in Springfield for some time past.

J. H. Moody of Thornville, Ohio, was also a recent caller. Mr. Moody has lately purchased a drug store at Lancaster, Ohio, and will for a time at least operate both stores.

Otto Otten and wife, of Ironton, Ohio, celebrated their silver wedding, or 25th anniversary, on December 2nd by going to Cincinnati and visiting friends and relatives for a few days.

Mr. A. C. Matthews is successor to John Cotton's Arcade Drug Store at Charleston, W. Va. Mr. Matthews will retain Mr. Magill, who has been managing the store since Mr. Cotton's death.

A. C. Van Gilder, at Pt. Pleasant, W. Va., is back at his desk after a surgical operation for a diseased rib. This operation was the fifth in the same location. Mr. Van certainly has sand.

The Rathburn Drug Company, Gallipolis, Ohio, have added a fine hot soda urn to their fixtures. The article is a fine example of Japanese Art Enamel. If the drinks taste as good as the machine looks it will be good enough.

J. R. Noecker of Circleville, Ohio, has leased the room occupied by Cozart & Co., two doors below his present quarters, and with more room to hand will open up a large up-to-date drug store about the 1st of January, 1901.

William Graetz succeeds to the business of Fulton & Graetz, Bucyrus, Ohio. The Fulton name has been connected with the drug business in Bucyrus for forty or fifty years. Mr. Graetz, the successor, has our best wishes, and is assured of success in continuing the old business.

Mr. John Von Stein of Upper Sandusky, the efficient treasurer of the O. S. P. A., made us a pleasant call recently. The next meeting of the association will be held at Dayton and Mr. Von Stein is already making preparations for it. He predicts a large meeting and is now trying to secure some special concession from the railroads for the benefit of the members.

There is certainly something the matter with Dave Barton of Gallipolis, for he was seen to actually decline a fine fat possum last Thanksgiving day. Something strange when Dave allows a possum to get away. He is considered a "connoisseur" in Gallia.

We regret to make mention of the death of Mrs. W. Kelly, wife of the senior member of Kelly Bros., Wellston, Ohio. Mrs. Kelly had but recently moved there and her death, on November 27th, from peritonitis was very sudden. We extend our sympathy to Mr. Kelly.

Harry Leasure, the druggist of Worthington, Ohio, has gone into partnership with Lyman Gardner, the banker of that village, and under the firm name of Leasure & Gardner will extend the business. A new storeroom is being fitted up by them and they will soon have an up-to-date pharmacy.

J. A. Herlihy, the enterprising druggist of the East End of Chillicothe, Ohio, has placed a large clock right over the entrance to his store. The clock has an illuminated dial and is corrected hourly from Washington. It is of great benefit to the general public and highly appreciated by his customers, whom he delights to please.

Dick Williams, of the firm of Williams & Betterton, New Vienna, Ohio, is at present visiting his son in Illinois. Mr. Betterton recently returned from Kentucky and Tennessee, where he was taking in the sights for about three weeks. Mr. Betterton went through Mammoth Cave and many places of interest and returned very much improved in every way.

J. Halliday Cline, proprietor of Cline's Pharmacy, Athens, Ohio, has been honored by the Grand Lodge of Ohio by their appointment of him as District Lecturer for the 17th Masonic District of Ohio. This district is composed of Athens, Washington and Morgan counties. Mr. Cline is to be congratulated on this preferment, as this appointment is conferred only on members in high standing. No mistake was made in this appointment, for though a young man, there is no better posted Master Mason in the state than Hal. Cline.

Persons that are interested in the druggists special friend(?), John T. Norris, will no doubt like to read this. As near as could be learned John T. brought suit against a Mr. Fannon, druggist at Bowerville, Ohio, for selling whiskey without a license. His usual way was used in getting proof. The case was called before the

Digitized by Google

Mayor of the town, who, after careful consideration, decided he (John T.) had no case at all and discharged it, after giving a good lecture to the plaintiff about "'tending to his own business." This is one of the first cases on record and everyone rejoices with Mr. Fannon.

Geo. Wurster, of Wurster Bros., Portsmouth, Ohio, recently visited New York and certainly saw the sights. If you don't believe it, ask him. He will tell you all about it. He says it's the greatest town in the world and his place is right there.

Mr. Ben Fields of Charleston, W. Va., has just returned from one of the best hunting expeditions yet reported. He and nine others went back in Hampshire county, West Va., where they succeeded in killing an abundance of wild game, including deer, turkeys, rabbits, pheasants and quail. He reports a very enjoyable trip and can boast of killing two deer, one of which was a large buck. He saved the antlers and will soon have them on exhibition at his store.

Every once in a while there is a chance in the drug business and we note two at Chillicothe, Ohio, last month. Mr. Reinhard Wissler bought the interest of his partner, Mr. Lou Elsass, and will continue to do business at the old stand. "Reina" is very popular and we predict the best kind of success for him. Mr. Elsass immediately embarked in the nursery business and will sell druggists all the cut flowers and potted plants they want. He purchased the Kellar nursery. A. B. Howson went across the street and bought the store of B. F. Stone, or the old J. M. Davis stand, recently, and now has everything his own way around the corners of Paint and Main streets. He retained Mr. J. M. Davis as manager of the store and Mr. Davis' old customers will be glad to see him there, as he has a pleasant word for all.

Making It Clear.

Somebody has discovered that a Bermuda onion eaten raw will clear the head. A Bermuda onion eaten raw will do more than that. It will clear an entire room. An active Bermuda onion is a complete clearing house all by itself. Take one Bermuda onion—only one—and let the lips of beauty close upon it, and love will turn to hatred, and honey to gall and bitterness. Clear the head? Why, a Bermuda onion in fairly good health will clear the head of navigation!—*Cleveland Plaindealer.*

RED CLOVER BLOSSOMS

And Fluid and Solid Extracts of the Blossoms.

The BEST BLOOD PURIFIER KNOWN

Cures Cancer, Catarrh, Salt Rheum, Eczema, Rheumatism, Erysipelas, Whooping Cough, Sick Headache, Dyspepsia, Constipation, Piles and all Blood Diseases. This is the preparation to Push and recommend.

We will CHEERFULLY keep you SUPPLIED with advertising matter with your imprint on.

D. NEEDHAM'S SONS, CHICAGO, ILLS.

Cremeline.

was the name adopted by us some years ago so as to distinguish our brand of Pure Petrolatum. "Cremeline" is well and favorably known to the drug trade of the United States. We are the originators of the idea of using screw-top bottles and we flatter ourselves that we have always put up our goods with a little bit more "style" and "neatness" than the many imitators who bob up serenely.

Prices for the various sizes of Cremeline, will be found under the list of "druggists sundries." Goods supplied by Wholesale Druggists.

THE MELLOR & RITTENHOUSE CO.

PHILADELPHIA, PA.

COLD CREAM.

To obtain a fine, smooth cold cream the manipulation is almost of more importance than the formula followed. The following process has always yielded an excellent product:

Spermaceti	2 tr. oz.
White wax	2 tr. oz.
Oil sweet almond	12 fl. oz.
Water	4 fl. oz.
Borax	1 dr.
Oil rose	20 gtt.

Melt the spermaceti and the wax in the oil on a steam-bath, taking care not to expose the mixture to heat any longer than is just enough to effect liquefaction of the solids. Pour this solution into a cold, capacious mortar, and immediately add the water, previously warmed, and in which the borax has been dissolved, pouring it in a steady stream into the center of the oily solution, and without stirring. When all has been added, the whole is thoroughly mixed with the pestle, care being taken to frequently scrape the sides of the mortar and incorporate the firmer with the more fluid portion. When the ointment has become fairly solid, which occurs in but a very short time, scrape the sides of the mortar well, and get all the ointment together, then cover the mortar—a piece of paper, towel, etc., will answer—and set aside for a few hours. When perfectly cold and the ointment has "set," add the oil of rose, and triturate until a perfectly smooth preparation results.

The writer prefers to use water and oil of rose rather than rose water, because the latter, although of finer flavor if the distilled product is used, is easily spoiled by heat, and its addition to the hot fat is not only likely to spoil it, but the odorous portion is largely driven off by the heat.

In very hot weather the quantity of wax and spermaceti should be somewhat increased, say about one-eighth, and in very cold weather diminished.—*Merck. Report.*

The straight and narrow path is a roadway of roses compared to the one traveled by a man who has an ambition to do up the other fellows. Nothing but "that mean feeling" comes to the man who lives by the misfortune of others. Time spent in studying one's own business will produce better results than time spent in trying to make it hot for a competitor.—*Hustler.*

Digitized by Google

Communications.

NOVEMBER 26, 1900.

Editor Midland Druggist:

One of the most frequent questions which I have been called upon to answer as organizer of the Northern Ohio Druggist Association, has been: "How do you do it?"

To tell others is one thing, to do it yourself is another, and even when information has been furnished, enthusiasm dies before organization is born.

Upon application, the Inter-State League is prepared to assume initiative, and starting with the individual, give protection for *his* investment. As recruits are gained, associations are formed and organization perfected with city or county lines, as deemed most expedient.

This is the same plan upon which I have successfully organized northern Ohio, and I now propose bringing these benefits to small communities and localities. It is not proposed to take the place of local associations, but to give each body a business basis on which to operate—in short a business clearing house.

Among the benefits derived are protection from litigation through services of competent attorneys, and establishment of uniformity in prices, which is comparatively easy under this system.

Anyone desiring further information regarding the Inter-State League, may obtain full particulars by applying to Organizer, Northern Ohio Druggist Association.

E. R. COOPER, *Lakewood, Ohio.*

THE INTER-STATE LEAGUE

Has been organized to protect isolated individuals and local associations, who in themselves are not strong enough to cope with conditions that retard business prosperity. It is a means of utilizing latent power which is now wasted, for "in union there is strength."

The benefits of such membership include:

1. Protection from law suit.
2. Protection of individual rights.
3. Adjustment of difficulties.
4. Maintenance of established prices.
5. Securing of all legitimate profits.
6. Advantages of general information bureau.
7. Affiliation of members for interchange of business.

The officers of such Association consist of a Board of Directors (appointed by districts), a Managing Secretary, and a Treasurer.

Dues are twenty-five cents per month, payable annually in advance. Upon loss of membership or withdrawal, any unapplied amount to be returned.

E. R. COOPER,
Managing Secretary, Lakewood, O.

"STRINGTOWN ON THE PIKE."

(*Review.*)

Having just completed the reading of our volume of "Stringtown on the Pike," we are in a maze. Never before have we spent a day in an atmosphere laden with such superstitious awefulness. To one bred in the South land, all this may be realistic. To the Northern mind, it seems the product of an imagination set on a quest for all that is fantastic, fanatical and relentless.

We doubt not that to this student of Southern life—familiar with Cupe, Dinah and the mountaineers of "East Kaintuck"—the book is a natural portrayal. But it sets us shivering with its "Bloody Hollow" and its "hants," its dismal predictions and relentless fatalities. If the author hoped to transport us to another realm, to make us feel the awesomeness of frightful ghosts 'mid gruesome shadows, that we might the better understand the character of "Cupe's" sign-ridden race, he has scored a success even as the tremor holds us.

When he uncovers the heart of cursing "Corn Bug," and shows the rugged grandeur of a character who scorns to profit through his neighbor's loss—making a fine contrast later on to that brother whose suave exterior covers lowest villainy—we recognize the artist.

But when he makes our mild and patient *Northern parson* put such concentrated venom into his murderous grasp we cry, "Hold! hold! Let him tell his unsparing tale, goad the wicked Colonel as he plainly dares, but for the sake of eternal fitness, let the *Colonel's* be the murderer's hand as becomes his training and his past."

When we follow old Cupe with his signs and predictions, his faithfulness and loyalty, his stern judgment and vengeance, we love and abhor, respect and fear, while compelled to recognize the kingship of the slave. But when we are expected to bow our heads before his sign lore—recognizing a relentless fate prewritten for the black man's vision—we protest and cannot.

Digitized by Google

The book shows fine descriptive power througout and not the least when touching the simpler phases of life. The picture of old Cupe in his corn shuck chair, the sleeping hound, the primly dressed but dancing maiden, will not soon be forgotten; while we can fairly hear the rythm of "Some fo'ks say dat de nigger wont steal."

None who have gone out from village homes to grow up under more pretentious environment, can fail to recognize the experience of Sammy Drew as he returns to the Stringtown of his boyhood. He feels "like a visitor." "The houses, too, were surely very much smaller than when first I knew them; the pavements more narrow, the flat stones of the walks were uneven and very rough; strange that I had never before observed this last fact," etc. He has lost, as we all must, the magnifying glass of childhood's inexperience.

We are glad to possess this volume of "Stringtown on the Pike," and shall revert often to its pages, while admitting the wish that a few of its characters might have died a natural death.

In Season.

"The naked fields lie wanton in the breeze,
The groves are nude; the woods unfrocked;
Bare are the shivering limbs of shameless trees.
What wonder that the corn is 'shocked.'"
—*John Greenleaf Whittier Stemmons.*

Kinetoscope Views of Plant Growth.

In his studies of slow motions, Professor Charles S. Slichter, by means of kinetoscope pictures, has so magnified the motions that the growth of seedling peas and beans during three weeks is shown in a few seconds. The plants were photographed on the kinetoscope film by artificial light at intervals of a few minutes to a few hours during the three weeks. On projecting the pictures upon the screen at the usual rate, the motion of growth was magnified about 500,000 times, and the different rates of development of the various parts were brought out very clearly. Among the striking results was the curious behavior of a pea struggling to enter impenetrable soil, the root curving and writhing much like an angle worm, while the pea was rolled about very grotesquely.—*Popular Science.*

Ohio State University Pharmaceutical Association.

The meetings of the O. S. U. P. A. have been growing both in interest and membership.

There have been a number of very spirited quizzes, which have been of great benefit to all members.

A number of interesting and profitable papers have been given by members of the association, which show a great deal of interest and preparation on the part of the members. Following are the topics which have been discussed:

"Fractional Distillation," Mr. C. H. Lefferson.

"Perfumes"—Mr. H. L. Morris.

"Heat as Used in Pharmacy"—Mr. Dickerson.

Reading—"Needs of a Library"—Mr. S. B. Crasson.

"Soap"—Mr. E. N. Webb.

"Specific Gravity"—Mr. U. S. Hancock.

Reading—"Necessities of a Good Library"—Mr. J. E. Seeds.

"Assay of Nux Vomica"—Mr. C. H. Young.

"Weights and Measures"—Mr. E. J. Thomas.

"Flavoring Extracts"—Mr. E. S. Bodman.

"Mathematics in the Drug Store"—Mr. J. E. Seeds.

Reading—Mr. W. D. Wilson, Mr. S. M. Baltzby.

"Poisons and Their Physiological Effects"—Mr. R. Royer.

"Dispensing"—Mr. L. J. Eberly.

Reading—"Camphor"—Miss Enright.

Our open meeting, which was held a few nights ago, was addressed by Hon. P. H. Bruck, a member of the Ohio State Board of Pharmacy. His address was well received, being full of good suggestions mixed with wit and humor. During his address he gave a short history of the Ohio State Board of Pharmacy. The speaker brought his address to a close by giving to the association the following good advice: "Get all the knowledge you can, for that is wisdom, and knowing how to use that wisdom is power."

At our last meeting, which was held on December 9, 1900, Prof. Kauffmann gave a very interesting talk on "Ancient Pharmacy." This was a general review of the pharmacy business from the earliest times, and of unusual interest.

After the Professor finished his remarks the remainder of the evening was spent in a social way, music, songs and games occupying a portion of the time, but all these were laid aside when lunch was announced. It is needless to say that the members of the association and their friends did justice to the ice cream and cake, together with the rest of the lunch.

The association "broke ranks" about ten o'clock, all having had an enjoyable evening.

C. B. CASSADAY, *Sec'y.*
C. H. YOUNG, *Pres't.*

PERSONALS.

We like to keep in touch with the students of this department, and will from time to time notify our readers where they are and what they are doing.

A number of last year's students have secured good positions and are on the road to prosperity. Among them are—

Mr. Clarence Squires, who is in the drug business with his father, Mr. D. H. Squires, in Asheville, O.

Mr. Gardner, member of class of '99, is located at Tompkins' Pharmacy, Cincinnati.

Our lady pharmacist, Miss Lucy Harvey, class of '99, is located at Sherodsville, O., and from present reports is making a pharmacist of the highest order.

Our classmate, Mr. John Tracy, of Circleville, O., who was with us last year, is now attending Northwestern University, of Chicago, Ill.

Mr. Noddy, closs of '98, who was in school last year doing special work, is now working in Mt. Sterling.

Mr. Block, of last year's class, is in the employ of The Columbus Pharmacal Co., of Columbus, O.

Mr. Knowlton, member of the class of '99, can be seen at Hall's Pharmacy, Newark, O.

Mr. Horst, who was among us last year, is now in the employ of Berger's Pharmacy, North High street, Columbus.

Mr. H. J. Haudenschild, who was among us last year, is now in the employ of Kuffer's Pharmacy; also attending O. M. U.

Mr. E. J. Eberly, who was called home for a period of two weeks, has returned.

O. S. U. Chemical Society.

The regular meeting of the O. S. U. Chemical Association was held on the evening of November 22.

The address of the evening was by Prof. Kauffman, who talked to the members on "Coca and Cocaine." The talk was of general interest and especial importance to chemists, who are expected to know something about this drug which has recently assumed such an important position in the list of narcotics. The professor described the cultivation and collection of the drug, its use by the natives, and called attention to its rapid growth in importance. The processes for the separation of cocaine were outlined and the difficulty of freeing it from the several closely allied bases noted, as also the synthetic process by which most of these bases are said to be utilized in the commercial production of the hydrochlorate.

The effects of the drug and alkaloidal salt were described, and its growing popularity as an intoxicant was shown. Most interesting was the description of the different effects on different peoples, which seem to be due to subtle racial differences as yet beyond the power of physicist to explain.

The desirability of legal restriction on its sale was discussed and closed the address.

ASSAY OF NUX VOMICA.

Is there any reliable method by which nux vomica may be assayed volumetrically? This is the question which has been uppermost in the minds of the second-year pharmacy students.

That we consider the official method useless is evident from the above question, and we think that no one who has used the official process any number of times will attempt to defend it.

The first objection is that the alkaloids are not sufficiently purified or freed from oily and coloring matter in order to detect a delicate color reaction, and the second is that if it were possible to obtain the alkaloids perfectly colorless, the end reaction is not marked as we will explain later.

Those who have used the assay will remember that an excess of decinormal sulphuric acid is added to the alkaloid, and that the excess of acid over the quantity used for forming the sulphates of strychnine and brucine is titrated back with centinormal potassium hydrate solution.

The objection to the process is that it is difficult to determine the point at which the free acid is combined with the KOH, since an excess of KOH decomposes the sulphates of the alkaloids and hence there is no decided color change till all of the salts have been decomposed and an excess of KOH has been added.

A modification of this process has been used with success by the writer and at our suggestion the method was taken up by Mr. Young, a senior in the long course in pharmacy, and tested with satisfactory results. The method used was to shake out with chloroform, as in the official process, evaporate and dissolve alkaloid in $\frac{n}{10}$ H_2SO_4 and filter to remove oil and coloring matter. Then shake out with chloroform, evaporate chloroform solution and dissolve alkaloids in alcohol, afterwards adding equal quantity of water. Use cochineal indicator and titrate directly with $\frac{n}{10}$ H_2SO_4. The end point is reached when enough acid has been added to form salts with the alkaloids.

It sometimes happens, as our readers may have experienced, that a method will work satisfactorily with one sample of drug and will not be satisfactory when applied to another, and this has proven to be the case with the volumetric method mentioned above. When the students tried it on the drug they were using, it was found to be deficient for the reason that they could not remove all the color.

The change of color in the indicator is not as decided as one would like and if a volumetric method is to be used it is essential that a more delicate indicator be obtained.

Mr. Young gave a very interesting paper on this subject before the O. S. U. P. A., and has chosen the assay of nux vomica for his thesis, and if there is any practical method for the volumetric estimation of nux vomica we hope to give the same to our readers later on in the year.

At present we are using in the laboratory the gravimetric method, which is as follows: Shake out alkaloids with chloroform sol., as in the official process. Reverse the operation and shake out the alkaloids with a dilute sulphuric acid solution, wash the solution of salts with chloroform to remove coloring matter, then add ammonia water alcohol and chloroform, and shake out as at first. Evaporate chloroformic solution to dryness, dissolve residue in alcohol and evaporate again to remove all moisture, then dry to constant weight.

By this process we obtain the alkaloids in an almost colorless condition, and shall continue to use it till a better method is offered. N. A. L.

A small fire occurred recently in one of the local drug houses, due to an explosion of nitric acid, which had been stoppered with a rubber stopper and packed ready for shipment.

Rubber stoppers had been used by this firm for years, and no trouble has arisen till within the last few months. In this time several fires have been traced to this same cause.

Several of the stoppers were sent to this department for examination, and while we have so far only made an incomplete analysis, we can say that the explosion was due to the liberation of nitric oxide, which, accumulating in sufficient quantity, caused the explosion, and the nitric acid, when liberated, as we commonly say, "did the rest."

The gas nitric acid NO, or N_2O_2, is the well-known oxygen carrier in the manufacture of sulphuric acid by the old method, since on coming in contact with air it takes up oxygen and is converted into N_2O_4, afterwards in the presence of SO_2 and steam giving up its oxygen and being converted back to N_2O_2, hence the name oxygen carrier.

The liberation of this gas from sodium nitrate, or some compound similar in composition, and sulphuric acid was used several years ago as a fire extinguisher. The gas is very corrosive, and while it *is* not a supporter of combustion, we can hardly see the practical benefit to be derived from its use, unless it is on the theory that the nitric oxide, having a strong afinity for oxygen, would remove the oxygen from the fire and in that way smother it. Rather a far-fetched theory though, and for our part we would as soon be burned to death as be suffocated by the poisonous fumes of nitric oxide, so that it would be unsafe to use in the small fires in which chemicals are used as extinguishers. It is evidently not a success as a fire extinguisher, judging from the above remarks.

The sample of rubber stopper when dropped into concentrated nitric acid caused a copious evolution of N_2O_2, other samples when tried not liberating the gas so readily, although all, even pure gum tubing, decomposed the acid when heated, which would be caused by many other organic substances.

There is evidently some substance used as a filler, in the grade of stoppers used, which rapidly decomposes the acid at the ordinary temperature, and we hope within the next few weeks to determine definitely what the substance is, and in the meantime we would advise druggists to not use anything but glass stoppered bottles in dispensing concentrated nitric acid.

W. A. L.

* * *

The Department of Pharmacy has just received a tablet machine manufactured by the T. J. Stokes Machine Co. of Philadelphia, and it has been placed in position ready for use. This is in accordance with the policy outlined in the MIDLAND last spring in regard to giving the students some practice in the manipulation of machinery, such as is used in manufacturing establishments. This is but a beginning, as we hope to gradually add a number of machines.

Our graduates are entering manufacturing establishments, and while most factories have their own peculiar methods, and quite often special machinery, nevertheless we intend to give the students as much general information as is practical in the time allotted to such work.

The manufacture of tablets is not so simple as some of the books would have us believe. While a number of substances may come under the general formula of "granulate and compress," quite a number of them require a special study of the drugs or chemicals used in order to attain the most satisfactory results.

Tablets have come to stay, and the sooner pharmacists realize that fact and make a study of them the better it will be for them.

Emergency to the real man is simply opportunity. The more frequently we overcome obstacles the easier the overcoming.

CARE IN PRESCRIBING MEDICINES.

It is hardly worth my while to urge the necessity of care in prescribing medicine. A strong argument in favor of small doses is the fact that human life is not endangered by medicine. I can call to mind a series of errors coming under my notice during the past thirty years which might have proven serious. In one case, a prescription of morphine, grs. xx, in four powders, one to be taken every three hours, was made by a prominent physician of this city. The druggist held it until he could see the doctor, and for his pains was informed that "any d-d fool would have known that quinine was wanted." I have seen the ℥ sign used when ʒ was meant, and in one case at least the result was fatal.

It may be said, "I would never make such a mistake," and possibly you would not. But I have made the mistake twice, and though it was corrected, by re-reading the prescription—a practice I advise—in one case I had left the house and was unhitching my horse when the mistake was suggested. In another instance, the idea that I had made the mistake of writing morphine for quinine so impressed itself upon my mind that I turned my horse and made a three miles journey to the drug store as fast as he could travel. The prescription was right, but the shock lasted a good while, and the lesson learned will never be forgotten.

Poisonous drugs should rarely be prescribed in bulk; at least a teaspoonful or tablespoonful should not be a poisonous quantity. I have seen two cases of aconite poisoning where the prescription was right —℞.—Tinc. aconite rad. ℥j; give two drops every two hours. In each case a teaspoonful was taken by mistake, another remedy having been ordered in that quantity. In a case coming to my notice, the tincture aconite had been ordered in a liniment, and a simple mixture for rheumatism to be taken internally. They were mistaken, and the liniment taken internally with fatal results. I have seen one case of gelsemium poisoning, and had one in my practice, by leaving the tincture to be given in ten-drop doses. Fortunately neither case proved fatal, though it required all I could do to tide them over.

It is very bad policy to prescribe an excess of medicine. If but a single dose, or two or three doses will be needed before the next visit, this is all that should be ordered or left. Especialiy is this true of narcotics. If more is left or prescribed it will probably be taken, and may be the beginning of a habit which cannot be broken up. In prescribing opium or morphine to induce sleep, it would be most absurd to say before the patient, "Let him take a dose every three hours until he sleeps." Ten to one in a bad case he would keep wakeful, watching the time for the next dose. Very much better to make it one dose, and say with assurance, "Give him this and he will go to sleep." In this respect narcotics differ from other medicines.—*Ec. Med. Journal.*

WATCH THE SMALL LEAKS.

A great many retail houses have all their profits taken up by not watching the expenses closely enough. A retail merchant may say: "I do not see why it is that I do not make money; I sell plenty of goods and I make a fair profit on everything that I sell, and still at the end of the year my books show that I have come out at the little end of the horn." Undoubtedly this is because the small expenses are greater than the business will allow. There are so many different things in a retail store that need careful watching that the retail business man must be constantly on the alert and constantly eager to do away with all unnecessary expenses. It is the little expenses that count so much in the long run. You may think: "This amounts to only a few dollars, and, while possibly I could get along without it, the little amount which it costs will not cut any figure." Yet, when all these things are taken together, they will be found to more than overtop all the profits which you can make by selling thousands of dollars worth of goods. Retail merchants, as a rule, are entirely to careless about their expenses. They are eager enough to buy at the lowest possible price, and to sell goods at as good a price as they can possibly get, not remembering that these two points are only a part of their business, and that neither of them is of any avail if they allow their running expenses to remain so great that all the profit is consumed. It is a great deal better to have your expense too light—that is, to cut off some things that you really need – rather than have them too heavy. Expenses are something that cannot be attended to just once or twice a year; but they require constant watching, day after day.—*Printers' Ink.*

There is an association in the south called the Sea-Board Air Line and Industrial association. This has four members—two men and two women—in each town on the line of the Southern Railroad corporation. The men look after such business improvements as will benefit the towns commercially, the women after the decorative and beautifying features, such as parks or grounds around schoolhouses, etc. Reports are made to the department each week and, if meeting the road's approval, the improvements suggested are made.—*N. Y. Com.*

TESTED.

BY J. O. E.

Begun in November Midland.

* * George Stanley had spent the four years of college life very much as the average healthy young man spends his—a mixture of hard work and mischievous pranks; acquiring information and misinformation in about equal proportions; settling the world's questions once for all and feeling his own importance undisguisedly and frankly.

As he crossed the lawn between his father's home and that of Henry Leland on the evening of his return—a tall, slender, well-formed young man, with good head and shoulders as a setting for a genial face framed by dark hair and lightened by frank brown eyes, he was a pride, an amusement and an interrogation point to his father,—a joyful promise to his mother and a fine fellow to his friends in general. As far as his own point of view, he had not really considered the matter. He was a well-moustached young man where he had been a boy; a college graduate, who held within himself a sense of power and purpose, on his way to greet a cherished playmate who could not fail to recognize his attainments and sympathize with his ambitions.

He was wholly unprepared for the well poised young womanhood of Margaret as she came to meet him with the same frank greeting as of old. His thought had dwelt upon his own development but pictured Margaret as he had left her. One glance sufficed to show him the well dressed head and long skirt; her beauty and womanly grace. He made no effort to conceal his surprise but turned a humorously puzzled look upon her father with the questions: "*When* did she do it? and *how* was it done?" and in answer to their look of inquiry,—"I *am* five years older than she and I have a moustache! but what is that against a psyche knot and a train?" * * The historian would like to chronicle the tale of the old comradeship renewed; the intellectual tilts; the long talks, earnest or nonsensical, as mood and occasion ruled, while tracing the more complex development of that wonderful undercurrent which binds hearts together for weal or woe, but this is not the province of my story. It was the coming together of two fair natures in youth's springtime; the one well poised, clearly defined and restful; the other alert, ambitious and full of varying possibilities; both true pointed and clean souled. The result was not hard to prophesy and much to be desired. Their union was the fulfillment of a long-cherished hope on the part of Mrs. Stanley and the doctor. As for Henry Leland—he was much attached to George, beheld in him a capable, earnest and promising young man who as the years passed was able to make for himself an enviable record in the field of chemistry and whose love for Margaret was all the most exacting father could desire; but has the man been born who, in a father's thought is quite worthy to share the life of a cherished daughter? Henry Leland felt no question save the inward protest he would feel against any man who presumed to be more to Margaret than her father.

These lives were not joined at once, but after two years had established George in his professional career, he came again in the springtime and while the air was laden with the perfume of blossoming trees, the birds calling to their mates and nature's carpet spread green for their feet, he led Margaret away from the scenes of her childhood to make another home center in a distant city.

He had prepared a cozy house, not so generously roomy as the Leland one, but all satisfactory to Margaret, whose home instinct would have rendered beautiful the plainest habitation.

Here came George's friends as freely as of old those of Henry Leland had gathered about him. The same atmosphere of cheery hospitality prevailed; Margaret never having known any other while George belonged to that order of men who make friends wherever they go.

His work as chemist in the large drug house of Harrison, Raymond & Co. kept him confined to the laboratory during working hours, but this enforced confinement acted as a spur to a mind which dwelt much upon the sociological problems of the day, and the delight of his free hours was to come into contact with all sorts and conditions of men. He saw in the combinations and wierd results which were evolved under his hands as a chemist, many a parable of life, and recognizing the dominating influence of environment and social combinations he developed strange interests wherein he found Margaret's help invaluable; possessing a large sympathy and quick intuition she entertained, drew out hidden histories and

Digitized by Google

smoothed difficulties in a manner which awed her husband while he availed himself of the advantages thus secured.

For three years they lived busy, useful and happy lives together. George was advancing to the head of his profession while Margaret made a quiet social center of the home, proving a helpful friend and blessed inspiration to many beside her husband.

As Henry Leland came and went, always their most beloved guest, he felt at rest for Margaret and believed her future peace secure. These two were in no sense saints, and the necessity for readjustments between them not less frequent than with others. George found himself, as of old, hard pressed to measure up to Margaret's ideals, while Margaret had not yet learned to realize that concerning one matter there may be many points of view. The lines dividing her right and wrong were straight and true, the courage of her innocence undaunted, but in the midst of her strength lay her weakness. Because her intuitions were so true, because the right shone clear to her she could neither understand nor tolerate with patience those whose minds move in curves and whose right seemed to her to join hands with wrong.

Her shielded life knew little of temptation, and there had grown up in her character a scarcely perceptible, but well defined line of hardness. Quickly responsive to any call for sympathy which sprang from illness of body or soreness of heart, she did not draw to herself the confidence of those whose *sin* had found them out.

George, being mortal, found himself every now and then under the ban of her judgment, but as his efforts were usually in the right direction and his inalienable right to silence still intact, there had been occasion for little friction ; while the inherent beauty and unselfishness of her character charmed and held him as of old. Always her lover, he was more amused than disturbed by her too ready condemnation. * * *

It was the fourth year of their marriage before a cloud obscured the fair sky of their peace. At the close of a bright October day, when nature's fruitage lent rich color to the dull city streets, George was hastening home with news of fresh advancement and a heart which rejoiced in his own possibilities ; health and vigor were his ; Margaret was his ; and as he sprang to catch the already moving car, life was very sweet. A careless step, and another moment he lay with mangled foot and dazed head, the center of a curious crowd. They carried him home to Margaret—wounded, but it was thought not seriously. The surgeon, upon whom their circle relied, was out of town and another, well recommended, seemed to understand his profession well enough to manage the case ; but as the days wore on, the foot grew more painful, the inflammation spreading to the knee and the whole condition alarming. By the time Dr. Carroll returned, he found a serious case of blood poison and a life in the balance.

[*To be Continued.*]

After all experience is the only exhaustive dictionary, and the definitions it contains are the only ones which really burn themselves into the memory or adequately interpret the significance of life.

INTOXICANTS.

Extract from London Mail.

Unfortunately, there are more ways than one of getting drunk.

Eau de Cologne has been more or less used for many years. But of late years the quantities sold by chemists are enormous. Chemists will tell you that fashionable ladies buy an enormous amount of eau de cologne that they could not possibly use for toilet purposes.

The novice, who, by the way, would be shocked at the idea of drinking brandy neat, usually begins with five or six drops of eau de cologne taken on a piece of sugar. It gives a glow to the cheeks and a sparkle to the eye. And when a woman is weary after a dance it is delightfully stimulating. From six drops the dose increases to twelve. By and by thirty or forty drops are taken in water. And when well into the habit women drink it by the spoonful.

Of course, it ruins the health, for the lining of the stomach is quickly ruined, sleeplessness follows, and after awhile melancholia sets in. England and the United States are the leading countries in eau de cologne tippling.

Essence of lavender is also becoming a much-used intoxicant. It is quite common for a man to walk into a chemist's and drink a couple of drachms, or even an ounce, of this still more destructive liquor. As an ounce of essence of lavendar is equal to about ninepence worth of public house whiskey, it can be realized how dangerous the practice is.

Pretty similar to these two intoxicants is essence of ginger. But the ginger is even more harmful. Essence of ginger is 84 degrees over proof, or about twice as strong as good whiskey.

It is quite surprising what a lot of people drink ginger on the sly. An able London barrister never goes to court without a bottle of it. Clergymen take it. Literary men take it. Business men take it. But the great consumers are women.

Usually these people begin by taking drops for painful sensations in the stomach. Then they often get up to a pint a day and numerous chemists' customers buy essence of ginger by the gallon.

Capsicum drinking is one of the newest forms of indulgence. Tincture of capsicum is a very valuable medicine when properly used. But if consumed to excess it destroys the body. And the liking some people get for it is extraordinary. An army officer who began taking capsicum as a relief for chilly sensation became so addicted to its use that he could take no fluid without it. He put it in tea, coffee, beer, and even soup. The consequence was that from being a happy, cheery man, he became gloomy and melancholy and in a twelvemonth looked twenty years older.

Quite different from the foregoing are ether and chloroform. These terrible drugs are used by an immense number of persons. Men whom you meet in business and whom you would never suspect of giving way to the worst of all forms of intoxication, go to sleep every night under the influence of ether or chloroform. Chloroform is really not very dissimilar to alcohol. It is, in fact, made from alcohol, and it first excites and then stupefies, precisely like alcohol. In one way it is not so injurious, for it does not injure the substance of the liver and other organs nearly so much. But it kills, all the same.

Some people drink chloroform, others inhale it.

The habit is startlingly common in England, medical men being the most numerous victims. Dr. Kerr says that he found it consumed mostly by males, mostly by doctors and mostly by men between the ages of forty and fifty. After the horrible experience of inhaling the dose there follows a perfectly delicious unconsciousness of all discomfort and all things external to one's self. Beautiful visions are seen. One experiences all the happiness we conceive to exist in Heaven. But this state is very transient. Soon there is a most unpleasant awakening and until the next dose is taken existence is perfect misery. Then ruin progresses very swiftly. Nausea becomes constant, dyspepsia of a severe form comes on, with hatred of food. There is an ever-present burning thirst, a horrible pain in the heart. The victim becomes nervous, languid, drowsy, thin, cold, haggard, worn and utterly hopeless. He has an hour or two of perfect bliss every day and almost twenty-two hours of almost intolerable misery.

The quantity of chloroform used by those accustomed to it is astonishing. One woman was known to have bought a pint of it every day, poured it on her blanket and inhaled it. Yet a single teaspoonful sometimes kills.

Ether is quite like chloroform in its effects. But if you inhale it the action is much slower, while if you drink it the action is quicker than that of chloroform. At

Digitized by Google

first it is most exhilarating. Mixed with whiskey it excites men to madness. It is not so dangerous to life as chloroform. Hence it is more commonly used. It takes a terrible hold of the consumer and many people get drunk on it several times a day. After a time it produces gastritis.

In Ireland some years ago the population of an immense district were, almost every man, woman and child, ether drunkards. From Ireland the practice traveled to Glasgow, down to Lincolnshire and London and even across the Atlantic. It is not quite so extensively used now, but as it is a cheap way of getting drunk, there is a progressive increase of the habit.

THE HYGIENE OF HIGH ALTITUDES.

It is well known that the chemical composition of the atmosphere differs but little, if at all, wherever the sample be taken; whether it be on the high Alps or at the surface of the sea, the relation of oxygen to nitrogen and other constituents is the same. The favorable effects, therefore, of a change of air are not to be explained by any difference in the proportion of its gaseous constituents. One important difference, however, is the bacteriological one. The air of high altitudes contains no microbes, and is, in fact, sterile, whilst near the ground and some hundred feet above it microbes are abundant. In the air of towns and crowded places not only does the microbic impurity increase, but other impurities, such as the products of the combustion of coal, accrue also. Several investigators have found traces of hydrogen and certain hydrocarbons in the air, and especially in the air of pine, oak and birch forests. It is to these bodies, doubtless consisting of traces of essential oils, to which the curative effects of certain health resorts are ascribed. Thus the locality of a fir forest is said to give relief in diseases of the respiratory tract. But all the same, these traces of essential oils and aromatic products must be counted, strictly speaking, as impurities, since they are not apparently necessary constituents of the air. As recent analyses have shown, these bodies tend to disappear in the air as a higher altitude is reached, until they disappear altogether. It would seem, therefore, that microbes, hydrocarbons and entities other than oxygen and nitrogen, and perhaps we should add argon, are only incidental to the neighborhood of human industry, animal life, damp and vegetation.—*Lancet.*

THE BAKING CURE.

Baking alive is the latest thing in American medical science. Three large human bakeries are in operation in the United States – in Chicago, Philadelphia and New York, respectively—and the popularity of the new treatment is growing daily. Bellevue Hospital, New York City, one of the most conservative institutions in America, has in operation a full-sized baking plant, and many doctors of note are prescribing "baking" instead of medicine for certain forms of disease. The application of hot air as a therapeutic agent is an old idea. In fact, it is a very old one. All that is claimed by the modern bakers of persons is the manner in which the heat is applied, and the very high degrees which can be stood – the baking of persons up to 400° Fahr., which is 180° above the boiling point of water, being quite possible without danger to the human system.

When the heat is first turned on the patient experiences no sensations other than mild warmth. A trained nurse is in constant attendance during the baking process, and the temperature, respiration and so forth are carefully watched. Up to about 150° Fahr. little inconvenience is felt. Then the patient becomes thirsty. Sips of water are given him from time to time. The giving of water is thought to add somewhat to the efficacy of the treatment through the gentle reaction which it induces. When 180° have been registered in the central cylinder —the degrees being indicated on a long thermometer – the patient feels thousands of tiny steams of heat impinging against his body. These streams are pouring through the perforations in the circulating jacket. The lower extremities now become somewhat numb, and the feet feel as if, to use a common expression, they had "gone to sleep." One seems now to be literally swimming in perspiration. This is given off from the top of the machine in the form of steam, which comes out through the funnels in a continuous stream.

At 200° one experiences a dreamy sensation, and from this point up to 280° the baking experience is really quite pleasant. Water boils at 212° Fahr., and yet at 280° Fahr. a human being does not suffer the least inconvenience. This degree of heat —280 Fahr.—is the average applied at most of the Sprague machines. It is endured for upwards of an hour. In certain cases, however, much higher temperatures are required. In some conditions from 350° to 400° Fahr. are necessary. Heat at these high degrees is not so very pleasant. The body seems to be literally roasting. The blood at 350° seems actually to be boiling, and can be felt to be coursing through the veins at racehorse speed. The heart thumps wildly, or else seems to have disappeared altogether. Bags of ice are constantly applied to the head when these degrees of heat are administered. Sips of ice water are given from time to time.

A very remarkable fact in connection with the baking is that at times the temperature of one's body is actually raised five or six degrees. In cases of fever this is considered a decided advantage, as it brings on the crisis, and the reaction sets in much more rapidly than it otherwise would. After the baking the patient feels weak. He is then rubbed and made to rest until completely restored to normal condition. A two hours' rest makes one feel as if he had enjoyed a pleasant, dreamless sleep. On going out into the air a species exhileration is experienced, and one seems better fitted for mental and physical exertion than he was before the baking.

The principal forms of disease in which hot dry air is used are gout, rheumatism, inflammation, lithæmia, obesity, œdema, and all forms of pain—congestive, neuralgic and even psychic. Some very remarkable cures have been reported among the 3,000 persons who have already been baked in America. Persons have been able to walk after years of affliction with deforming rheumatism, and in certain cases chronic forms of disease have been cured.

Relative Solubility of Liquids not Miscible with Water.

W. Herz (Journal Soc. Chem. Ind.) has determined the solubilities of certain fluids which are practically insoluble in water, as well as the amount of water such liquids will take up when left in contact together. The figures give the volumes or fractions of volumes which will dissolve in 100 volumes of the solvent, at a temperature of 22° C. (71.°6 F.):

Chloroform in water	0.420
Water in chloroform	0.152
Carbon sulphide in water	0.174
Water in carbon sulphide	0.961
Ligroin in water	0.341
Water in ligroin	0.335
Ether in water	8.110
Water in ether	2.930
Benzol in water	0.082
Water in benzol	0.211
Amylic alcohol in water	3.284
Water in amylic alcohol	2.214
Anilin in water	3.481
Water in anilin	5.220

Expensive habits or tastes are sure to keep the average man scrambling with his head under water most of the time. It requires a tremendous effort of will power to smash such habits, and, after awhile, they become as unmanageable as a runaway horse with the bit in his teeth. Yet, unless you are desirous of traveling the poverty road when you are old and have little strength to battle, you simply *must* cut away, or restrain such habits. It is well known we all expect to save a little next month, or next year, but with too many of us the day never comes until it is forced upon us by unforseen disaster. To save a little every week, is the only road to a comfortable old age. Money is not everything of course, but it commands all the creature comforts for ones declining years when independence is most dearly prized.—*Pulverizing.*

The "Allcock" Plasters
ALWAYS GIVE SATISFACTION.

When a druggist sells the "Allcock" plasters he takes no chances and at the same time renders his customer the best service.

You never knew them to fail. You never had a customer bring one back dissatisfied.

Allcock's Porous Plaster has stood the test of over 40 years use by the public and is acknowledged everywhere to be the best strengthening plaster known.

The Allcock Belladonna Plaster is a new plaster but every druggist may rest assured that it is all that can be desired in a plaster containing as much belladonna extract as is safe to offer the public without the advice of a physician. It is the safest, quickest and most effective belladonna plaster made.

ALLCOCK MFG. COMPANY, (Successors.) Salesrooms—274 Canal St., New York.

TOO MUCH PAY FOR HELP.

In the first place, the average druggist pays too much for his help. I do not mean that he pays too big salaries. I mean that he does more of the detail work himself than he can afford to do. He should do the thinking and let the clerks do the work. Three years ago in an Eastern city I was in a drug store and saw the proprietor working harder than anyone else behind the prescription counter. I told him he did wrong; that he had an opportunity to build up a big business if he would manage the store and let the clerks do the work. Strange to say, he took my advice. At that time he had three clerks. Not long ago I happened to be in his store and he told me he now had eleven clerks; that he had not done any actual work in the store for over a year; that his whole time was devoted to the management of the store; that he was now able to get system and discipline in every department. This is an essential. It was a lesson that I learned a number of years ago from the department stores. I saw there at the head, a despot. Everyone under him had to jump at his beck and call, and yet he was kind hearted and generous to a fault in his personal character. He taught me the same system in my department, the mail order department. He taught me that with thirty or forty mailing clerks, wrapping clerks, buyers and samplers under my supervision, if I attempted to do anything else except oversee them, half of them would shirk their work. By experience I found it to be true. The more I have to do with the drug business the more I find that this in the thing needed—better management. I could not have cited such cases as those I have referred to before, if there had been proper management of those stores. The proprietor should see everything. He ought to be on the floor to welcome customers, to see that they are waited on promptly, to thank them for their patronage, to correct any errors, to make them feel all the time that they are being taken care of and that their patronage is wanted by you.

You may say that nobody but a druggist with half a dozen or more clerks can conduct his business in this way. This is not true. I know a druggist in the suburbs of Buffalo who two years ago started a new drug store without help, and yet he found time to always thank a customer for making a purchase and almost always to open and close the door when a customer left the store. His business has grown from the very first day. Business cannot help but grow when you wait on your customers in this way. They feel that you want them to come there to trade.

—*M. P. Gould in Drug Circ.*

Not to return one good office for another is inhuman; but to return evil for good is diabolical. There are too many even of this sort, who, the more they owe the more they hate. There is nothing more dangerous than to oblige these people; for when they are conscious of not paying the debt they wish the creditor out of the way.

THE CULTIVATED RUBBER TREE.

Native Indian gatherers, intent only upon present gain, cannot be expected to be more thoughtful of the future of a tree than they are of their own, and they either cut so deep as to injure the woody fibre of the tree, or leave it with great gaping wounds that cannot heal. It is inadvisable to draw too heavily from the tree, for other reasons than the direct injury that results from the loss of its life-sustaining fluid. Owing to the soft nature of the tree, a clean incision made in it will drain but a comparatively small area before the swelling wood closes the wound and stops the flow. In order to drain the trees more completely the short-sighted natives do not stop at making a cut but chop out a piece of the bark to prevent the wound filling up. Such an injury soon renders the strongest tree a prey to water, fermentation, ants and beetles that enter the wound and get under the bark.

In a plantation where proper supervision is possible, scientific culture will doubtless do much to overcome many of the evil results of the crude methods of the forests. If even a small per cent of the results obtained from isolated trees can be secured in a rubber plantation, the investment will be a good one. Those who hold out the bait of 1,000 per cent profits in rubber culture have no means of knowing that such results can be obtained. Experienced planters, who have faith in rubber culture, who are planting rubber trees and who have no land to sell are not contemplating any such profits. A conservative planter, who has had years of experience in the tropics of Mexico, figures that at the end of eight years his rubber trees will yield one pound of rubber to the tree. With 275 trees planted to the acre, and his estimated profit of forty cents gold per pound, it is easy to figure out a profit of more than $100 per acre. After eight years, as the trees grow older, the yield will gradually increase until it may reach two pounds. This many look upon as the limit to which a tree may be tapped without danger of injuring the tree and curtailing its life, or at least the production the following year.—*Modern Mexico.*

THE DIRECTION IN WHICH THEIR TALENTS LAY.

It does not follow that, because a youth fails in what he first undertakes, he cannot and will not succeed in something else, says J. Lincoln Brooks in *Success*. History is full of examples of men who have left their marks on the world, but who made an utter failure of what they first started to do. Most of us do not choose our vocations. Accident, chance, environment, location of birthplace, poverty, lack of early opportunities or education, generally have more to do with our position in life than free choice. Apparent trifles often change an entire destiny. An accidental glance at a book, a single lecture, a sermon, or a chance remark, a little encouragement, or some sudden emergency, has in many instances been the determining factor in a life.

"Most men," says Real, "are like plants. They possess properties which chance discovers." Many men have not been conscious even of their own ability or genius until some fortunate circumstance helped them to discover themselves. Some time ago a New York paper published an account of the career of six successful theatrical managers who came to their occupation through mere accident. Lord Erskine, the great English advocate, spent some years in the navy; but, being dissatisfied with that profession, he entered the army. One day, his regiment happening to be quartered in a town where court was held, he sauntered into the court house, while court was in session, and, much to his surprise, was invited to a seat on a bench by the presiding judge, who chanced to recognize him. The young soldier was so stirred up by what he considered the commonplace pleadings of the judges that he made up his mind that he could do as well as that himself, and immediately began the study of law, which resulted in his becoming one of the greatest forensic orators the world ever knew.

Large numbers of people are as unconscious of their strong points as they are of their weak ones. A man or a woman may be born with a strong talent or genius for some special line, and yet be utterly unconscious of it. A. T. Stewart was educated for the ministry, and an idea which an old uncle had installed into his mind, that a call is necessary to success in life, clung to him so tenaciously that he became almost discouraged because he could not hear this call. He tried school teaching, but was not satisfied, and might never have found his real calling had he not loaned to a friend who was anxious to start in business the sum of seventy dollars, the accumulation of his savings. The young business man did not succeed in his venture, and, not having the money to pay Stewart the loan which he had so kindly advanced, he begged him to take in its stead the little shop, the only means of his payment in his possession. Stewart took the unpretentious store, and became a merchant prince.

Jay Gould failed as a storekeeper, tanner, surveyor and civil engineer before he discovered his bent in a railroad office. Wilson, the ornithologist, failed in five different professions before he found his place. Barnum tried fourteen different occupations before he ascertained that he was a born showman. Josh Billings failed as a farmer and auctioneer, but found himself as much at home in comic literature as a fish in water. Phillips Brooks failed as a teacher in the Boston Latin School.

The destiny of General Robert Clive was changed by an apparent trifle. While a youth seeking his fortune in India, being discouraged because he could not find an opening, he went one day to his room, determined to end it all. He loaded his pistol, put the muzzle to his head and pulled the trigger. The weapon did not go off. He then walked deliberately to the window, pointed the pistol in another direction, saying to himself that, if it should go off, he had been saved by a special intervention of Providence. He pulled the trigger, and the report followed instantly. He resolved then and there to make a man of himself, and became one of the greatest generals of his time. With but a handful of European soldiers he secured to the East India Co., and afterwards to Great Britain, a vast and rich country, with two hundred million inhabitants.

Grant, the tanner, who failed at Galena, and Grant, the soldier who won some of the greatest battles of the world, would seem like two widely different men if his story were not so familiar.

John Adams failed signally as a shoemaker. There are few Americans who have not heard the story of his father giving him a piece of leather from which to cut a pair of "uppers," and the boy so literally followed the pattern as to produce in the "uppers" the three-cornered hole by which the pattern hung when it was not in use. Henry Ward Beecher came within one vote of being elected a railroad superintendent. If he had had that vote, America would probably have lost her greatest preacher.

If you do not succeed in what you attempt, after trying your level best; if you do not feel interested in your occupation or profession, and enthusiastic in regard to whatever concerns it, you may be quite sure that you are out of place, and you should never rest until you find your niche in the world.—*The Stationer.*

POLISHING ALUMINUM SCALE-PANS.

If your scale-pans have been badly corroded with corrosive sublimate it is quite likely that no application will restore them to their original brightness. Silver-plating has been suggested for this purpose, but you must be the judges whether this shall be done. It might also be well to first try cleaning the scale-pans with the following application, which is equally well adapted for cleaning any instruments or apparatus of a similar character: Equal parts of oleic acid, water of ammonia and absolute alcohol are mixed, and filtered after settling. The articles to be cleaned are rubbed with the mixture by means of a cloth, and polished with a little powdered tripoli. Another polish successfully used to brighten aluminum ware consists of stearic acid, 1 part; fuller's earth, 1 part; rotten stone, 6 parts. The fuller's earth and rotten stone must be in very fine powder and thoroughly mixed with the stearic acid. Scales and balances require very careful handling, and nothing likely to prove injurious should ever be allowed to come in contact with them. Active chemicals, such as corrosive sublimate, iodine, etc., and deliquescent salts should never be weighed on the metal pans, but always on glass or in tared vessels. The same rule of action should be observed in weighing potent and poisonous drugs.

Cleansing of Mortars.

A very effective means of cleansing mortars is said to be the following: A small quantity of potassium bichromate in fine powder is cautiously mixed with sufficient sulphuric acid to make a thin mass and this mixture applied to the surface of the mortar. After a contact of 12 to 24 hours it is washed off with water. Soap is usually unnecessary.

The odor of iodoform, musk, creosote, etc., may be removed by first washing with warm water, then after thoroughly drying pouring alcohol over the mortar and igniting. If all the odor has not disappeared, the treatment with alcohol is repeated. Rubbing with powdered ergot is said to remove iodoform; ammonia water is effective in the case of valerian; and rubbing with powdered mustard and a little water with all odors. To remove odorous substances from the hands it is recommended to wash them with a moderately strong solution of salicylic acid.—*Phar. Post.*

THERMOMETERS.

Ten Points Worth Knowing About Thermometers.

1. In cold weather thermometers require a longer time to register than in warm, because the mercury is at a lower temperature when placed under the tongue.

2. The mercury in a clinical thermometer cannot be shaken lower than the temperature of the room.

3. A clinical thermometer should not be subjected to a greater heat than 110° F., which is the full registering capacity. A greater heat is sure to damage the instrument.

4. A thermometer is made self-registering by contracting the bore to such an extent that the smallest particles of mercury will not pass without being forced. The expansive force of heat drives it upward, and a downward swinging motion serves to force it back. The above condition makes it impossible to obtain absolute accuracy in a self-registering instrument, as the mercury rises in little jumps, which necessarily vary according to the conditions present in each instance. However, this variation is usually one-tenth of a degree or less, and never exceeds one-fifth of a degree in a reliable instrument.

5. The average normal temperature is 98.6 degrees Fahrenheit, or 37 degrees Centigrade, though many persons in perfect health have abnormal or subnormal temperatures. The temperature varies about one-half of a degree in twenty-four hours, being highest just after the heaviest meal of the day. The temperature of any particular individual does not afford a satisfactory test as to the accuracy of an instrument, since uniformity cannot be depended upon in different persons.

6. Standing with the back to the light facilitates the reading of a thermometer.

7. Thermometer bulbs are made of very thin glass to secure the least possible shrinkage, and to obtain the quickest registration, hence are easily broken. It is a great injustice to the manufacturer to be called upon to replace instruments broken in the hands of the dealer or physician.

8. Small bulb thermometers are much more difficult to shake down, owing to the smaller bore and lighter mercury column, but are not so apt to lose their registration.

9. Reliability is of the utmost importance, as life is often at stake; a thermometer is not cheap at any price if it is inaccurate; economy is bad policy where quality (the vital point in a thermometer) has to be sacrificed.

10. A dealer takes a great risk in having his name engraved on an instrument by a manufacturer whose reliability is in doubt. As quality is not casually observed in a scientific instrument, the maker's guarantee is his only safeguard.—*Can. Drug.*

Waterglass for Preserving Eggs.

Waterglass, or sodium silicate, is used to some extent for preserving eggs, but this agent apparently has a decided drawback. Borntraeger (*Oest Chem. Zeit.*) reports having encountered eggs thus treated in which the albumen, and partly the yolk, had become decidedly gelatinous and horn-like. The explanation is this: The solution was of 10 per cent. strength, sufficiently thin to permit of its entrance into the pores of the shell, thus affording the strongly alkaline silicate to act upon the albumin. The author points out that here a clue may be sought by proper experiment for the formation in nature of horn out of albuminoids through the influence of alkalies or earths.

In the

BARRY TWIN-BULB THERMOMETER

the mercury registers quickly and is easily read because it has a broad magnifying lens. The twin bulb is the cause, and if you are not chary of praise you will applaud it.

DIAMOND SECRETED IN HIS THROAT.

Surgeon General Bidie, C. I. E. (I. M. S., retired), sends a local report of a curious case recenly tried in Calcutta. A young man, having provided himself with a new suit of clothes, walked into a jeweler's shop and asked to look at a parcel of diamonds. He went to the window for better light, and presumably it was discovered that the largest diamond, valued at 10,000 rupees, had disappeared. An assistant noticed that the youth had carried his hand to his mouth suspiciously, and the aid of the police was sought and the culprit sent to jail, where he was placed under medical observation and "treatment." The gem did not appear, and it was suspected that it lay concealed in the man's throat. A skiagram was taken and revealed a foreign body in the throat which could not be dislodged.

At the trial an old criminal swore that the concealment of stolen articles in the throat was a well-known habit of Indian thieves. It has been stated in Gould and Pyle's "Anomalies and Curiosities of Medicine," that some training and preparation are necessary for the success of this experiment. An artificial dilation of the pharynx is produced by the means of a round, leaden bullet, which is "swallowed," and brought up several times a day until a pouch is made which fulfills for stolen articles—coins and jewels—the same function as the crop in birds and rumen in ruminants. This deliberate manufacture of pharyngeal or oesophagal pouch for temporary storage seems to be peculiar to Hindustan.

—*British Medical Journal.*

When a woman has an unhappy love affair, it adds to her misery that she cannot go abroad and tell it.

Ethereal Solution of Soap.

Skinner (British Journal of Dermatology) presents the following, which can be made extempore: Oleic acid one-half ounce, methylated alcohol one-half ounce, strong liquor ammonia q. s.; methylated ether to two ounces. The oleic acid and methylated alcohol are mixed and the ammonia added in order to neutralize the acid, care being taken not to add an excess. Then add the ether, which may be increased to three ounces, if a weaker solution is required. For an antiseptic, ether-soluble oils, etc., may be added. Petroleum spirit or benzine may replace the ether if necessary. The preparation is said to be superior to ordinary soap for cleansing ointment-laden surfaces.

Aloin.

Aloin was prepared in 1851 by Mr. Thomas Smith, Edinburgh, by concentrating an aqueous solution *in vacuo* to the consistence of syrup. The liquid, on standing for two or three days, deposited a crop of aloin, which was purified by solution in hot spirit. Tilden's process was an improvement on Smith's, and consisted in dissolving one part of aloes in ten parts of boiling water, acidulating with hydrochloric acid, and allowing to cool. The liquid is then decanted from the resinous matter, evaporated to two parts, and set aside for a fortnight to crystallise. The crystals are washed with acetic ether, to remove any traces of resinous matter. The aloin from Socotrine aloes is obtained from an alcoholic solution prepared by digestion and boiling. Aloin is not readily soluble in simple solvents, but is rendered soluble by caustic or carbonated alkalies. The medicinal activity, however, is considerably modified.—*Chemist.*

A CENTURY'S ADVANCE IN PRACTICAL SCIENCE AND ART.

V. COMPRESSED AIR.

One hundred years ago we knew little of compressed air, except that when piled up above our heads over one hundred miles deep it compressed itself to a density of 813.67 times lighter than water, and that the varying weight of the winds, as shown by the barometer invented by Evangelista Torricelli in 1643, gave us calms and storms. This instrument shows that the pressure varies with two daily maxima and two daily minima amounts, with the regularity of clockwork. The cause is as yet inexplicable to us.

The question of the utilization of this Ariel-like springiness is what concerns us in this paper. Probably this springiness is most appreciated by those who ride on air compressed into a bicycle tire.

We often wish to use power at a distance from where it is conveniently produced. When the engineers were driving a tunnel four and a half miles through the tough micaceous schist of the Hoosac Mountains they wanted power to work the drills. The Deerfield River was cavorting with tumultuous power at the eastern end. It was set to work condensing air, which ran in pipes into the tunnel and worked the drills as if it had been steam. Having done this work, it expanded, forced out the noxious gas of the explosives, and gave the workmen the sweet air of the outer world for breathing.

We have a proverb about the unbent bow losing its force. Not so the air. Crowd it into a steel cylinder till the pressure is a thousand pounds to an inch, and a year after it is still elbowing its way for room at the rate of a thousand pounds' pressure for every inch. There is just one exception to this: When the pressure reaches fifteen pounds and the temperature is reduced to 181 degrees centigrade below zero, the air gives up the struggle and becomes liquid like water. But raise the temperature, and the sleeping giant awakes with all its former vigor. It is this constancy of resilience that makes compressed air such a useful agent in this workaday world.

At Berne, Switzerland, and between Paris and Nogent-sur-Marne railroad cars are run by filling six boiler-like tanks with an air that has been compressed to a pressure of 2,000 pounds to the square inch, drawn occasionally from a common storage tank by the roadside. It is worked in cylinders in the fame way as steam. There is no smoke, dust, wires or cables about them. One engine does the work for all the cars. A company in Paris sells compressed air as ice is sold here. It costs only 10 cents for 3,000 cubic feet. It drives 2,000 pneumatic clocks, street cars and a vast number of machines. Power can be delivered by compressed air in cities for $21 per horse power per year. Power by other means costs from $60 to $100.

Philadelphia has a system of six-and-a-half-inch pipes into which packages are put. The air is then exhausted in front, and the natural pressure of the air behind drives the packages through with great velocity. Make the pipes larger, and passengers can be put through equally well.

Any mine located within five miles of a waterfall should have all its drilling, hoisting, pumping and crushing done by that distant force.

Great shops have this power in every part of their many acres to bore pin holes or swing ten tons' weight on a crane.

A railway train rushing with all the might of steam and the tread of an earthquake is

WINE OF CARDUI

FOR CASH IT COSTS ONLY:--
$7 84 in one dozen lots.
$7.60 in three dozen lots.
$6.84 in twelve dozen lots.

Presents the most attractive proposition to a retail druggist. The discounts are exceedingly liberal, and the best advertising makes sales easy. Every home needs Wine of Cardui, and a distribution of our advertising with your name on it will make a large proportion of the homes in your neighborhood your customers.

(THEDFORD'S BLACK-DRAUGHT may be included to make up the quantities.)

For a fine assortment of Ladies' Birthday Almanacs, Cardui Books, Weather Prophet Books and Show Cards, address THE CHATTANOOGA MEDICINE CO., Chattanooga, Tenn.

stopped within its own length by compressed air applying the brakes.

A man may carry under his arm a small machine attached by a hose to a compressor, which shall calk a ship, dress marble, spray petroleum for fires, throw paint over the side of a house in ten minutes, head down rivets, etc. One such machine will set 324 rivets an hour, and keep at it all day. These are only a few instances of the many uses to which compressed air is put.

—*Bishop Warren in N. Y. C. A.*

Glycerin of Codein.

In a paper read before the North British Branch of the Pharmaceutical Society of Great Britain, A. Currie (*Brit. and Col. Drug.*) stated that he had had occasion to make a glycerin of codein containing 2 grains in each ounce. At first the codein was dissolved in alcohol, but it was found that unless an excessive amount (2 drams) was used the codein crystalized out on being added to the glycerin. Codein combining readily to form soluble salts with most acids, the solution was made as follows, using heat to hasten solution :

Codein	gr. 2
Acidi hydrochlor. dil	m. 2
Aquæ	m. 20
Glycerin, q. s. ad	oz. 1

This solution developed a yellowish tinge, and a most disgusting odor. The same result happened, only more slowly, when glycerin was added cold. Dilute sulfuric and phosphoric acids gave a solution which kept clear and colorless. Codein alone, heated with water and hydrchloric acid, gave no odor. Glycerin and hydrochloric acid developed the same disgusting odor and yellow tinge. Price's glycerin gave the same reaction in a less degree. Both glycerins conformed to the official test.

I have learned at least one lesson—not to despond. The future need not to be a servile copy of the past. There is a power within us, and more, there is a Power above us, through which we may overcome much and ultimately overcome all things.

—*Channing.*

Release.

Yesterday I looked on one
Who lay as if asleep in perfect peace.
His long imprisonment for life was done.
Eternity's great freedom his release
Had brought. Yet they who loved him called him dead,
And wept, refusing to be comforted.

—H. H.

Methylene-blue in Malaria.

Dr. Smithwick (Merck's Archives) attests to the value of methylene-blue in malaria. He gives a table of results in fifty cases. He finds that in the hemorrhagic type the drug seems to be both a parasiticide and diuretic. In all, treatment was continued ten days after the last chill, and in only one patient was there a relapse. This responded to treatment, which is a contrast with the usual experience with quinine. From the reports of others and his own experience he deduces the following conclusions : 1. Menthylene-blue is a perfect succedaneum for quinine, and may be given whenever the latter drug is indicated in the treatment of malaria of every form and under all conditions with the same confidence that has always attended the administration of quinine. 2. Patients need not be selected on account of idiosyncrasies, as no bad effects ever follow the use of methylene-blue, if given intelligently. 3. It is the remedy to use in malaria with hematuric complications, as it acts in a twofold manner. 4. It is the remedy to be given in malaria occurring during the pregnant period, as it has no oxytoxic effect and will cause a freer action of the kidneys, which is also beneficial.

AJAX TABLETS

(Aphrodisiac.)

Nerve Tonic and Blood Builder.

For all cases of Nervous Debility and Sexual Weakness recommend AJAX TABLETS, the old reliable standard preparation, which has stood the test of years.

Every Druggist, can, without reserve, positively guarantee AJAX TABLETS to cure or money refunded, and we make the guarantee good.

AJAX TABLETS aid digestion and stop unnatural drains.

$4.00 per dozen. **50 Cents per Box.**

Miscellany.

Things to Forget

Forgetting has its pleasures, because it permits the closing of the mind's eyes to harsh experiences and depressing incidents. The blues are a common complaint. If women are most affected with them they are most disastrous to men. They come at different times and in different ways to everyone. They are the lowlands of life, full of miasma, through which all travelers must pass; some oftener than others. The blues feed upon the blues. Miasma breeds miasma. The way to get rid of the dumps is when one is in the lowest spirits to call up before the mental vision memories of the brightest hour. On the contrary, defeat is emphasized and despair made perennial by the remembrance of other defeats and past despairing moments.

It is not a crime to fail, but it is a crime against one's better nature to brood upon failures. The fellow who forgets failures may succeed. He certainly will not if he goes into every new battle cowed and cowering at the recollection of past defeats. Dwellers in a swamp grow to have the lifeless look of the lowlands. Remembrance of the blues makes one blue. No man is ever born a pessimist. He becomes one by forgetting the wrong things.

—*St. Louis Globe-Democrat.*

Antidote Unwittingly Taken With the Poison.

The recent case of a would-be suicide affords some confirmation of certain statements going the rounds of the press regarding alcohol as an antidote for carbolic acid. The experiments and observations of Doctor Seneca D. Powell prove that when alcohol and carbolic acid are mixed in the cavity of a wound, the corrosive action of the acid is neutralized without interfering in the least with its antiseptic properties; and the experience of some of our ambulance surgeons has been favorable to the internal use of alcohol in cases of poisoning from swallowing carbolic acid. The other day a young woman, who was desirous of ending her life, mixed the lethal dose of carbolic acid with some whisky. The result, though unexpected to her, was all that could be desired, for the ambulance surgeon found that the liquor had neutralized the poison and the girl had suffered no serious injury.—*Phil. Med. Jour.*

Vanillin.

Vanillin is developed in the leaves of the vanilla plant by a ferment, or by mineral acids. It has now been proved that a similar combination exists in the fruit. Busse obtained from the Botanical Gardens of Berlin an unripe vanilla pod which was ground and extracted with alcohol at normal temperature. The extract was treated with lead acetate, the excess of lead removed by hydrogen sulphide, and the alcohol removed from the filtrate by heat. A portion of the aqueous fluid was gently heated with a small percentage of sulphuric acid, another equal portion with hydrochloric acid, and a third with a few grains of emulsin and warmed. In all three cases the odor of vanilla was very strong. The product was purified by dissolving in ether and washing the solution with water; on evaporation of the ether a pure vanilla odor was obtained.—*Sci. Am.*

The ague seldom shakes a person to death, but the disease opens the way for a multitude of other complaints. It is estimated that malaria is indirectly responsible for the death of 5,000,000 people a year in India. The British government has long realized the important part played by this disease in that country. The statistics for 1897 show that out of an army of 178,000 white and black troops over 75,000 were admitted to the hospital on account of malarial fevers. No record is made of the number of soldiers who were troubled with the diseases but not admitted to the hospital. If statistics on this disease covering the entire civilized world were gathered, the results would startle the thinking public. Since the mosquito is held responsible for the trouble, it is likely that great efforts would be made to exterminate the insect if the real position which malaria holds in the list of diseases was more fully realized by the public at large.—*Meyer Drug.*

A doctor once presented himself at the Golden Gate for admission, and after passing a fair examination as to his conduct, Saint Peter agreed to permanently admit him if he could pick out Adam and Eve from the assembled angels. The doctor looked around and soon found his progenitors. But Peter was puzzled, and asked the doctor how in the name of the golden harps had he managed to recognize the first couple. "Oh!" said the doctor, "that is quite easy; they are the only ones without an umbilicus."—*Indian Lancet.*

To Prevent Ether Nausea.

Dr. Samuel Edwards, of Baltimore, reports four years' experience with vinegar as a preventive of the nausea which follows the administration of an anesthetic. It is said to prevent both the nausea and vomiting, and also the intense thirst which commonly follow. He reports that in four years' use success has followed the employment of this method in ninety-seven per cent of the cases. No suggestion was given as to the method of operation of the remedy, but so definitely observed an empiric fact is well worthy of further trial by others. Certainly if the remedy is successful in anything like the proportion of cases that is reported, it will prove of the very greatest of value to the operating surgeon, as the nausea following the use of the anesthetic is very often one of the serious complications of the first days after an abdominal operation.

—*Cleveland Journal of Medicine.*

The New Orleans *Times-Democrat* tells amusingly, through an unnamed man, the story of how "Webster's Liver Regulator," which contained about 95 per cent. whisky, made the fortune of one Bill Webster, a one-time resident of Honduras. It appears that Webster, a small trader, once got hold of an assorted lot of liver regulator and took it to Honduras for speculation. In order to evade a tariff of 90 per cent. he dumped the dozen different varieties of regulator in a barrel, paid the duty on bulk regulator and "empty glassware" and rebottled the mixture as soon as he got ashore under the name of "Webster's Eureka Tonic." It seems that the blend must have produced a new chemical compound, and (we quote), "one drink of it would make the quietest citizen in town jump straight up in the air and howl like a catamount, and two drinks would make him fight a circular saw. So the stuff enjoyed an immense run, but when the supply gave out Webster could not duplicate it, no matter how he tried. And so he died of a broken heart." The narrator declared that if the secret of the exact combination is ever found, the inventor "would have to use a steam yacht to carry away his money."

A Liquor Dealer's Statement.

A significant side-light on the change in the liquor-drinking habits of this country is furnished by a man who for years was engaged in the wholesale and retail liquor business in Boston, and who accounts for the present unsatisfactory condition of that trade—unsatisfactory from the standpoint of the liquor dealer—in the following statement: "To begin with," he said, "there is the multiplication of saloons, but of even more moment in my mind is the fact that the younger generation is not drinking as the old did in the past. No matter how good socially men were they thought nothing of setting in for drinking bouts at tables or at the bar. Now the average man, if he drinks at all, either has it at his house, bought in bulk, so that the retailer is cut out, or else he drops in for a drink in a hurry and gets out again. It hurts my business, naturally, but I cannot but help feeling pleased on my humanitarian side by the change."

Wealth in this world is just so much baggage to be taken care of, but a cultivated mind is easy to carry and is a never-failing source of pleasure and profit.

There would be fewer fools if half the thoughts was expended on filling the mind that there is on filling the stomach.

SYNOPSIS OF OHIO LAWS RELATING TO PHARMACY.

PHARMACY LAW.

There are two grades of licentiates, pharmacists and assistant pharmacists. Every pharmacy or store where drugs are sold at retail or where medicines are compounded or dispensed must be under the immediate supervision of a registered pharmacist. An assistant pharmacist can only perform the duties of a pharmacist in a store which is under the supervision of a registered pharmacist. A pharmacist can not have supervision of more than one drug store or pharmacy, nor can he be regarded as being in charge of such when he spends a portion of his time in another occupation.

Physicians may compound or dispense their own prescriptions and keep a stock of drugs for that purpose, but they can not legally sell drugs in the same way as a druggist, nor compound the prescriptions of other physicians.

The following articles may be sold by persons not registered: Copperas, borax, blue vitriol, saltpetre, sulphur, brimstone, licorice, sage, juniper berries, senna leaves, castor oil, sweet oil, spirits of turpentine, glycerine, glauber's salt, cream of tartar, bicarbonate of sodium, quinine, rochelle salts, epsom salts, alum, gum camphor, oil of cinnamon and oil of lemon.

The following articles may be lawfully sold by persons not registered, if put up in boxes, vials or packages by a registered pharmacist or wholesale druggist, and bearing the name of the article, the directions for its use and the name of the firm or person who prepares them: Paregoric, essence of peppermint, essence of cinnamon, essence of ginger, hive syrup, syrup of ipecac, tincture of arnica, syrup of tolu, syrup of squills, spirits of camphor, number six, sweet spirits of nitre, compound cathartic pills, quinine pills and paris green when put up in bottles or boxes, bearing the name of a legally registered pharmacist or wholesale dealer, and labeled as required by Section 4364 54 of the Revised Statutes.

Registration is secured by examination only. Examinations are held in Columbus on the second Tuesdays and Wednesdays of January, May and October. The fee is $5.00 for pharmacist and $3.00 for an assistant pharmacist. Applications must be filed at least five days in advance of any examination.

Applicants for first grade certificates must be at least 21 years old and have at least four years experience in the study and practice of pharmacy.

Assistant pharmacists must be at least eighteen years old and have at least two years experience.

Certificates are issued for three years and are then renewable if the holder is engaged in the practice of of pharmacy in Ohio.

Certificates obtained through fraud or misrepresentation are subject to being revoked.

The board of pharmacy may grant certificates to those registered as pharmacists in other states by examination, if their grades are high enough in the state where the examination was taken, but only when such state recognizes on like terms the holders of Ohio certificates. But few states however interchange with Ohio.

Penalties for violation of the law are from $20 to $100 fine and from twenty to one hundred days imprisonment or both. Each day constitutes a separate offense.

POISON LAW.

Whoever sells or gives away, any quantity of arsenic less than one pound, without first mixing therewith soot or indigo in the proportion of one ounce of soot, or half an ounce of indigo to the pound of arsenic, or except upon the prescription of a physician, sells or gives away any quantity of any article belonging to the class usually denominated poisons, to any minor, or sells or gives away any such article to any person, without having first marked the word "poison" upon the label or wrapper containing the same, and registered in a book to be by him kept for that purpose, the day and date upon which it is sold or given away, the quantity thereof, the name, age, sex and color of person obtaining the same, the purpose for which it is required, and the name and place of abode of the person for whom the same is intended, shall be fined not more than two hundred nor less than twenty dollars.

LABEL LAW.

SECTION 1. Be it enacted by the General Assembly of the State of Ohio, That whenever any pharmacist, druggist or other dealer in poisons, chemicals, medicines and drugs, whether wholesale or retail, shall sell any drug or chemical, an indiscriminate or careless use of which would be destructive of human life, such dealer shall affix to each bottle or package of such drug, chemical or poison, a label printed in red ink, having on it the name of the article by which it is commonly known, the cautionary emblem of the skull and cross-bones, the words "caution and poison," and in addition thereto at least two of the most readily obtainable effective antidotes to such poisonous article.

SEC. 2. Whoever violates the provisions of section one (1) of this act shall upon conviction thereof, before any court having competent jurisdiction, be fined in any sum not exceeding one hundred (100) dollars, nor less than ten (10) dollars.

MORPHINE LAW.

SECTION 1. Be it enacted by the General Assembly of the State of Ohio, That it shall not be lawful for any person, other than a wholesale druggist or other dealer in drugs and medicines, to sell or offer for sale at wholesale, or for any person other than a registered pharmacist or a registered assistant pharmacist, to sell or offer for sale at retail, morphine or any of its salts, in this state, and it shall not be lawful for such person to sell or offer for sale, morphine or any of its salts, in any bottle, vial, envelope or other package, unless the same shall be wrapped in a scarlet paper or envelope, and all bottles or vials used for the above purpose shall contain not more than one drachm each, and shall have in addition to said scarlet wrapper a scarlet label lettered in white letters, and the same must be upon both vial and wrapper, when vials are used, plainly naming the contents of said bottle; and further, that no person shall have the right to change any preparation of morphine from its original package to any other receptacle whatever for the purpose of retailing or dispensing therefrom, but it must be retailed or dispensed only from the original package with scarlet wrapper and scarlet label as aforesaid.

SEC. 2. That any one violating the provisions of the above section shall be guilty of a misdemeanor, and on conviction thereof shall be fined not less than ten or more than fifty dollars, at the discretion of the court, for each and every violation of the preceding section.

SEC. 3. That all laws and parts of laws in conflict with this act be and the same is hereby repealed.

Note Style of Package
Take only "Cosmo."

In the

BARRY TWIN-BULB THERMOMETER

the mercury registers quickly and is easily read because it has a broad magnifying lens. The twin bulb is the cause, and if you are not chary of praise you will applaud it.
If you want to be "right in line" you can get any quantity of these from your jobber—we know he has got them.

BECTON, DICKINSON & CO., Makers,
45 Vesey Street, - - NEW YORK.

WINE OF CARDUI

FOR CASH IT COSTS ONLY:--
$7.84 in one dozen lots.
$7.60 in three dozen lots.
$6.84 in twelve dozen lots.
(THEDFORD'S BLACK-DRAUGHT may be included to make up the quantities.)

Presents the most attractive proposition to a retail druggist. The discounts are exceedingly liberal, and the best advertising makes sales easy. Every home needs Wine of Cardui, and a distribution of our advertising with your name on it will make a large proportion of the homes in your neighborhood your customers.

For a fine assortment of Ladies' Birthday Almanacs, Cardui Books, Weather Prophet Books and Show Cards, address THE CHATTANOOGA MEDICINE CO., Chattanooga, Tenn.

THE ⚜ TUFTS' ⚜ IDEA.

THE first dispensing soda water apparatus, that was something better than a square white marble box, was a Tufts' fountain. Soda fountain aesthetics began with Tufts, and from the beginning Tufts has led the world in the production of artistic soda water fountains. Every successful leader of fashion is quickly imitated, but the imitators copy only what they can see and comprehend. They can not copy mental processes. No man has yet understood all of Shakespeare, for to understand all of Shakespeare, one must be a Shakespeare. The imitators of Tufts are far from copying the real excellence of his work. An imitation always lacks several qualities of the original. Bear in mind that imitators never go below the surface. The really vital features of a Tufts fountain are the many original patented appliances which operate to make the selling of soda water profitable.

It is Tufts' idea to make an apparatus so attractive that it will bring you customers, and so economical in operation that it will make you rich. Imitators may produce handsome fountains, but the interior of the working part of a fountain is the vital point for you. Ask yourself whether forty years' experience of one of the leading inventors and manufacturers of soda water apparatus is not of some value to you? If it is, you have the benefit of it by writing to Tufts for information on how to sell soda water at a profit.

Second-Hand Fountains

Tufts fountain users are expansionists. They quickly outgrow their first, second and even third apparatus. These we take in exchange for larger ones. They are usually but little used. We restore them until practically they are as good as new, and we sell them for a fraction of their real worth. Any old apparatus you may have is of some value to us. Write us about anything you have and do not want, as well as what you do want, either new or second-hand.

COMMUNICATIONS.

Communications on all questions pertaining to the Trade and Profession are wanted. Stamps should be enclosed if rejected communications are desired returned.

QUESTIONS SOLICITED.

We solicit questions on all points of general interest to the trade. Technical questions will be answered by the editor, W. R. Ogier, or Prof. Geo. B. Kauffman. Correspondents must send their names, not for publication, with each query. No attention paid anonymous questions.

Editorial.

THE OLD AND THE NEW.

MOST of the current publications contain reflections, wise and otherwise, upon the end of the century, or the beginning of the new one. It is a prolific theme and we have had in mind to add to the common fund some meditations of our own, but the ground has been so thoroughly covered that our mental machinery apparently unable to take an original revolution has refused to move at all in the popular direction.

The line dividing the old from the new is a very narrow line. But few realize any difference between the one and the other. The affairs of men go on upon the whole just as they did in the 19th century and aside from the emotions created by the transition but few would suspect that a stream was crossed in the middle of a night and a new domain entered which the enterprise of men is to develop and glorify.

To many, if not to most men, there is a peculiar interest in marked events, to some the least things bear a strange burden of thought. to others the new events are laden with visions or dreams of foreboding or anticipation.

The last day of school to young people has a significance that leaves its mark upon the years that follow in the active duties of life. The last hours in the old home, the farmhouse perhaps, that has been the birthplace and the abiding shelter of the youth who is starting to a distant city to make his way in new and untrodden paths,

Digitized by Google

how the memories cluster about the place long after his early friends have passed from it and his brief visits there are no longer made.

Many regard the last day of a year with weird sensations of awe or solemnity and to such the last day of a year and that the closing year of a century came with such emotions greatly enhanced. These periods are seasons for contemplation, for serious retrospect and for hopeful resolve that the future need not be a servile copy of the past. But there should be nothing morbid in the thoughts that come to any one with even an approach to a rational philosophy of human life and destiny.

The methods of marking time are of man's device. There is nothing awesome in them and the closing of one epoch or the opening of another should bring in their train no moods of despondency or despair. Man is a progressive being. Fortunately he has as great tendency to advance upward as to degenerate, and it is the glory of the optimist that the disposition to improve in all his outward development increases as time progresses.

In this view there is nothing but hope for the race as it enters upon the Twentieth Century. It will afford ever increasing opportunities for growth in every department of endeavor and its close will witness men everywhere occupying vastly more advanced ground than the age which we are fondly thinking can never be surpassed.

In America, where the opportunities for seeing life at its best are so splendid, and to the man who has made good use of his opportunities and has right views of what it is to be in harmony with his environment the question, "Is life worth living?" is not a rational question. It is a great privilege to live to have witnessed the close of a century which has made a mark upon the affairs of men which will probably never be eclipsed, no matter what proportions human development may hereafter assume.

It would be a privilege equal to a long draught from the cup of immortality could a man now living who is in step with the march of events and keenly alert to all that is in progress for the elevation and development of mankind, with a sound mind in a sound body, be permitted to live until the close of the Twentieth Century that he might then as through a telescope scan the whole horizon which bounds man's career on earth to contemplate with clear vision the processes of evolution through which he has passed. Such a view would surpass in many respects the apocalyptic vision of St. John and the seer would no longer question the dream of the prophet, the theory of the theologian, the claims of the evolutionist as to the place man is to occupy in the final state of development to which he is journeying.

We would come, therefore, to our readers in this, our first message for the new century, with words of hope and cheer. Life is what we make it. The outward circumstances cannot take away or greatly add to the inward satisfaction we receive from duties well performed, of sacrifices nobly made, of conflicts heroically won in the sphere wherein our lot is cast.

A hundred years from now will, no doubt, witness a vastly different order in the motives and ambitions of men, in the methods by which they pursue their noblest ideals, and we cannot but believe that if one now living could behold the scenes which will then be enacted in the drama of life he would stand amazed as the possibilities and achievements of men were revealed to his questioning mind.

"The mighty Century sinks
Beneath the tideless ocean of the years.
Lo! all the skies are flaming, and the seas,
Blood-red, roll far their glassy, murderous waves.
It is the tragedy of time! But still
Comes victory. Anew the skies are lit
With rosy dawn, the dancing waters smile,
The wild winds blow their trumpets, while the earth
Responds with deep-drawn murmurs of applause.
Our generation views the spectacle
Transcendent. We behold the massive gates
Unfold, through which shall surge the unknown streams
Of life and progress for a hundred years."

—W. R. O.

PROSECUTION OF PHARMACISTS IN PENNSYLVANIA.

IT will be remembered that in October last the Pennsylvania Board of Pharmacy contracted with a detective agency to canvass the state for the purpose of ascertaining to what extent the pharmacy law was being disregarded.

The result of this investigation showed that the law was not generally observed in many of its provisions, and the sensational statement was given out that ninety per cent of the dealers in drugs throughout the state were guilty of transgression of some one or more of its provisions, the greater number of which consisted in the failure to expose renewal receipts for continuation of certificates of registration.

The Board of Pharmacy, acting upon information obtained in this manner, insti-

Digitized by Google

tuted proceedings against a large number of these alleged violators, the chief cause for action being against registered pharmacists for failure to expose renewal receipts or certificates, the number of complaints thus entered aggregating about two hundred. Fines were paid in a few of these cases, many of them were dismissed by the prosecution and a few were contested with the expressed determination of testing the demand of the law as to the exposure of renewal certificates.

The crusade, however, raised a storm of indignation among Pennsylvania pharmacists, and the Board of Pharmacy was charged with all manner of misdoings, both in the method of the investigations and in the prosecutions so summarily begun.

While there appears to have been a reaction in some quarters in favor of the board and a disposition to uphold it in its zeal to enforce the law as it finds it, nevertheless the undercurrent is strongly against it, and we feel warranted in the conclusion that a persistent movement in the direction first taken by the board would not be conducive to the continuation of the present pharmacy law in that State.

Such a view leads to some interesting reflections upon the subject of the enforcement of pharmacy laws in general, and a rather anomalous situation is presented for consideration.

It is a reasonably safe proposition that there would be comparatively few state pharmacy laws to-day but for the active and persistent efforts of the pharmacists in securing their enactment. A very small number of pharmacy laws have originated spontaneously in state legislatures, but in states where these laws exist—which practically includes all the states—pharmacists, individually and collectively have labored with a devotion worthy of a most noble cause to secure them.

The acts are those of the pharmacists; the laws are in the main as the pharmacists drew and presented them; their provisions are presumably thoroughly understood and approved in advance, and when any attempt is made in any state to materially modify what has been attained at such an expense of time and labor, instantly the pharmacists are on deck to protest and prevent, if possible, such efforts. But when the laws of their own creation are to be strictly enforced, that is a matter of another sort altogether.

Experience and observation lead to the conclusion that a rigid enforcement of *all* the requirements of what are termed the most effective pharmacy laws of the several states would not be tolerated by pharmacists who have been the instruments in securing those laws and who are continuously contributing of their means for sustaining them.

If this assumption is warranted, then the Pennsylvania Board of Pharmacy was not judicious either in the method of its investigation or the class of cases selected for prosecution.

What, then, is the duty of a board of pharmacy whose members are under oath to sustain and execute the laws without regard to opposition of any form or character?

This is the problem confronting not only the members of these boards, but executive officers in all departments of civil government.

The records of municipal governments are filled with ordinances the majority of which are unknown to the officials whose duty it is to see that they are observed. So numerous in fact are these that in a city of considerable size, the necessity for a new codification of them every few years is constantly set forth, in order that officers may know what is and what is not law.

The statute books of a state are even more heavily burdened with manifold laws, the existence of many of them being wholly unknown even by those whose business necessitates constant study of such books.

It is scarcely an exaggeration to state that if the attempt should be made to enforce all the provisions of all the laws in any commonwealth, every citizen would be "brought into condemnation, for all have sinned."

Such an effort, if made in a general way, might result in great good, for the revolt aroused thereby would, perhaps, lead the people to see the importance of repealing many obsolete and unwise measures and show the necessity of ending the eternal grist of new legislation which every session of legislative bodies grinds out.

But boards of pharmacy need not assume that they are the most noble of all Romans, and insist upon such an exact compliance with the many details of the pharmacy laws unless it is evident that back of such a bold position is the unwavering support of the pharmacists, and that still more potent influence in a government of the people—*public sentiment*.

When the people do not want laws enforced they will not be enforced, no matter what the character of executive officers may

Digitized by Google

be. If the pharmacists of Pennsylvania or of any other state do not desire to have the pharmacy law rigidly applied, then the board of pharmacy must necessarily yield to the demands of those from whom they have a right to expect better things. A natural inquiry arises in such a condition, "of what use is it then to have laws of this kind, or indeed of any kind if they exist but to be ignored?" It is a fair question and the only plausible answer to be given it is that upon the whole, society is better regulated with a partial enforcement of important features of laws in general than if there was no restraint whatever. Such a reply is not remarkable for the force of its logic, or the clearness of its righteousness, but it is about as consistent as the attitude of the pharmacists toward the laws in which they ostensibly take so much pride.

W. R. O.

PHARMACISTS AND FEES.

THERE is a growing feeling of unrest among registered pharmacists with the requirements of most of the pharmacy laws that certificates of registration must be renewed from time to time. This is especially true in those states where renewals are annual, and while the item of fees paid for such renewals is not a matter of much consequence to each individual, in the aggregate a fee of $2.00 per year from each registered person amounts to a comfortable lump sum secured from a class of persons, most of whom have not a surplus of money. Aside from the fees, it is an annoyance to many to be obliged to keep on the lookout for the date of expiration, to make out and mail applications, to secure drafts or money orders for petty amounts, and to re-frame new certificates or renewal receipts, which the law requires to be exposed.

In Ohio there has, as yet, been no feeling manifested against the renewal system, because Ohio has the least objectionable law of any of the large states, the certificates issued being renewable every three years and the renewal fee being $2.00, or 66⅔ cents per year.

In view of this spirit of dissatisfaction, which will undoubtedly increase rather than diminish, it is somewhat surprising that the session of the American Pharmaceutical Association of 1900 adopted as a "model" for a pharmacy law, one in which the renewal feature was retained.

It is probably true that none of the earlier pharmacy laws could have been secured with an appropriation from the revenues of the state in lieu of the fees collected from registered persons, by which to sustain and operate the laws, but it does not follow that a system which is wholly wrong in principle, and unjust in application should be continued beyond the point of necessity apparent when the system was inaugurated.

It is quite certain that pharmacy laws of one sort or another are not to disappear. They have come to be regarded as an essential element in the legislative code of each state, and it is no longer necessary to assume that if pharmacists are not taxed to sustain boards of pharmacy and enforce the laws they would fail of support at the hands of the legislative power.

If any special privileges or benefits were conferred by the state upon pharmacists when they are licensed thereby to dispense medicines or retail drugs, which are not bestowed upon any other class of persons, then it is reasonable that they should pay for such privileges, but the pharmacist is simply given permission to earn a modest livelihood, if he can, after he has demonstrated his fitness to engage in a vocation which requires a certain degree of learning and skill in the interests of the public welfare.

A pharmacist, of course, should not be registered except upon careful examination, and after his fitness is once determined he should be registered for life, without the payment of any fees whatsoever.

This is the position we have publicly taken for several years—and it is a theory which is rapidly gaining ground among pharmacists. Now that the legislative season is at hand and pharmacy laws will receive a turning over in many states, the time is opportune to determine if it is not only possible but feasible that the expenses of boards of pharmacy shall be paid from the general revenue fund of the state.

W. R. O.

FINE ARTS IN THE PUBLIC SCHOOLS.

A PROPOSITION is abroad in some of the large cities of the country to teach stenography in the public schools. Advocates of the proposition seem to have a good deal to say in its favor which, on the surface, is plausible enough, but on the whole the opponents of the idea have not found it

Digitized by Google

difficult to present some very convincing arguments on their side of the question.

Why should stenography be taught in the common schools any more than any of the fine arts? Why indeed more than instrumental music, or painting or architecture, or engraving, or embroidery, or cooking?

Stenography belongs to the domain of the arts, some call it a profession, and it might appropriately lay some claim to such distinction had it not, like pharmacy, bargained its birthright in the market of incompetency; that is to say, the ranks of stenographers have been burdened with persons seeking an easy and honorable method of earning a livelihood without having sufficient preliminary education to enable them to perform the work that falls to their hands with a fair degree of credit. This condition has brought into disrepute and lowered the dignity of the art itself. Many business and professional men having experience in the employment of stenographers can testify to the difficulty in securing those who have enough knowledge of orthography and syntax to transcribe in respectable form the ordinary business letters which are dictated to them.

If the gentlemen having in charge the education of the youth of the land would lay aside their ambitions for distinction in adding new systems of study to the already too complex curriculum, and devote a portion of their talents and energies in recovering the lost arts of reading, writing, spelling, arithmetic and geography, they would confer a great favor upon the generation now carrying on the world's work, as well as embalm their memories in the minds of the oncoming toilers, by endowing them with some practical knowledge of fundamental subjects.

Find a high school student with a good, general knowledge of the country in which he was born, one who is a fair reader, who can write so that it may be read, a correct speller and has a sufficient knowledge of mathematics to transact the ordinary affairs incident to commercial or industrial life, and you have found a rare specimen. The curriculum through which he has been *propelled* was too full of modern "accomplishments" to give time for those antiquated ones, the possession of which are important for true culture, and upon which all higher education should be based. To teach stenography and other fine arts in the public schools will result in still further encroachments upon the time required for more important studies, and the result will be students with a smattering of a dozen useless branches instead of a good knowledge of a few fundamental ones.

Teach a few things, teach them thoroughly and send the young men and women out into the technical schools with such an equipment as will enable them to speedily fit themselves therein for their chosen work and perform it with satisfaction to themselves and to those who employ them.

To require students of pharmacy to first be graduates from high schools is a good proposition, because the general result would be a better class of pharmacists than is possible without such requirement, but let us begin at the bottom and have a more thorough system of instruction in *important* branches in the public schools.

W. R. O.

THE SALE OF POISONS IN GEORGIA.

A few days ago a bill was introduced into the Senate in Georgia to make it a misdemeanor for persons to sell, give, or in any way furnish to any person either morphine, opium or cocaine, except upon the prescription of a physician. Physicians will be allowed to procure these drugs whenever they wish. It is stated that the bill is the result of disclosures showing the enormous increase in the consumption of these drugs, as reported frequently in the newspapers and by druggists themselves. We cannot see anything to object to in this measure, if the statement above relative to its character is correct. There cannot be too stringent a law to confine the sale of narcotics, and in fact all poisonous drugs, to properly qualified druggists, and by them only to those who have real need for them in a medicinal way. Anything beyond this is a menace and an injury to the people which should not be tolerated.—*Phar. Era.*

THERE will be no dissent to the statement that all poisonous drugs should be sold only by properly qualified druggists, but when it comes to the proposition that qualified druggists may lawfully sell such articles as morphine, cocaine and other similar drugs only when prescribed by physicians we object. Such a law will not in any material sense diminish the consumption of narcotic drugs. It will simply make the physician a middle man between the consumer and the dealer. The same plan has been tried over and over again in the vain effort to restrict the sale of intoxicating liquors. In local option towns in Ohio physicians write prescriptions for three dozen bottles of beer and two gallons of whiskey to be dispensed one pint at a time. No; it cannot be done in that fashion.

Narcotics will be obtained by those addicted to their use in some way or other, and the best method of restricting their

Digitized by Google

use is to treat the habitues as we do the insane, the epileptics and the imbeciles; confine them to hospitals for treatment until the habit is broken, then make it a misdemeanor for a pharmacist to retail narcotic drugs to any person suspected of using them as intoxicants. Some day we will have pharmacists who will not sell in any manner, except when compounding prescriptions, these agents; there are some of this sort now, and the number, we are proud to own, is increasing.

W. R. O.

WILL THEY?

NOW that Congress is about to abolish Schedule B and the stamp tax on proprietary articles, retail druggists are inquiring if manufacturers will reduce the price of their preparations to conform to this reduction. There was a "hurry run" when the stamp law was enacted, on the part of proprietors to advance the value of their wares in order that the retailer might have the pleasure of paying the tax. A few of them, however, announced in bold type that "we pay the war tax," but the majority preferred to shift that patriotic privilege to weaker shoulders, and the retail druggist has been doing that act for two years and a half. This class performed heroic service in securing the repeal of the obnoxious act, and without this service it may be a matter of doubt whether success would have been attained. Now, will the retailer reap the reward of his labor, or will he find that he has toiled to put money into the pockets of manufacturers?

A great many pharmacists are asking this question, and a goodly number were anxious to have some assurance from proprietors on this point before endorsing the matter of repeal of the tax.

We believe there will be a reduction by all fair-minded proprietors who advanced prices to correspond with the stamp tax. But we will see ere long. W. R. O.

Men are like rivers: the water is the same in each, and alike in all; but every river is narrow here, is more rapid there, here slower, there broader, now clear, now cold, now dull, now warm. It is the same with men. Every man carries in himself the germs of every human quality, and some times one manifests itself, sometimes another, and a man often becomes unlike himself, while still remaining the same man.

—*Tolstoi.*

REDUCTION OF WAR REVENUE TAXES.

IT is reported that the Senate Finance Committee is considering some important changes in the War Revenue measure as adopted by the House. There will probably be several weeks' delay in presenting the bill to the Senate, as the Finance Committee are desirous of securing complete and reliable information in regard to the results of the provisions proposed by the House.

Interests, other than those affected by taxes under Schedule B, are very active in their efforts to secure relief. The brewers declare that, if reductions should be made on those articles that are most burdensome to the industries of the people, the tax on proprietary articles and such items should be retained, because the tax on this class involves only a fractional part of the selling price, whereas, in beer it reaches the enormous proportion of forty per cent.

This claim is absurd and unjust, as the House bill proposes to reduce the beer tax from $1.85 to $1.60, and besides the brewers have always without difficulty forced the tax onto the retailers and consumers.

The druggists and those in any way interested in the reduction of the taxes on proprietary articles should not cease the agitation of the question, but should increase their efforts to influence their Senators and Representatives to action that will relieve them from this unjust, burdensome and discriminating tax.

A determination to get well on the part of a sick person has saved many a life. This, of course, would not avail in an incurable case.

Cremeline.

was the name adopted by us some years ago so as to distinguish our brand of Pure Petrolatum. "Cremeline" is well and favorably known to the drug trade of the United States. We are the originators of the idea of using screw-top bottles and we flatter ourselves that we have always put up our goods with a little bit more "style" and "neatness" than the many imitators who bob up serenely.

Prices for the various sizes of Cremeline, will be found under the list of "druggists sundries." Goods supplied by Wholesale Druggists.

DR. W. S. BURKHART, Cincinnati, Ohio.

You Make Money

SELLING

BAR-BEN

By accepting our Special Offer.

With an order for three dozen "Bar-Ben" at $4.00, we will give you one dozen free, and mail you signs and window display. This enables you to double your money, without carrying a large stock, and every box you sell makes a customer for more. Order from your jobber at once or direct, but be sure and specify the wholesale druggist through which you want goods shipped. "Bar-Ben" is the best nerve, brain and blood builder on the market today.

Sell your customers a box and see if they do not tell you so.

EDITORIAL NOTES.

UNDER communications we print a letter received from a pharmacist at Cambridge, O., giving an account of the poisoning of several miners at a town near that city. The article used was essence of ginger. Some peculiar results were noted in the cases, which were rather puzzling to the medical attendants. It is reasonable to suppose that large quantities of so powerful a stimulant as ginger would cause gastric inflammation in an acute form resulting in the death of the persons drinking it. It is also possible that the toxic effect was due to the menstruum used in preparing the essence. We have heard of wood alcohol being used in some establishments for preparing cheap grade of essences, and although there is no evidence of the presence of this article in the preparation which caused the death of these persons, and we are not informed as to whether any examination of it was made to determine what it really did contain.

We think this case or rather these cases of poisoning demanded the most searching investigation by the authorities in order that all the facts as to the cause of the unfortunate affair might be fully known.

* * *

A COMMUNICATION from Mr. T. A. Wooten, Secretary of the National Association of Retail Druggists calls our attention to the fact that the Executive Committee of that body had nothing whatever to do with the acceptance of the offer of a proprietary medicine company to give one dollar for each "ten-dollar order" received to the treasury of the N. A. R. D. In this respect the reflection in our editorial of December issue, entitled "A Serious Mistake," on the acts of the Executive Committee we much regret. Executive officers have heavy responsibilities thrust upon them; they have sins enough to answer for without laying those for which they are innocent against them, and it is remote from our purpose to accuse any individual or set of individuals of that with which they have no connection.

With this correction we stand by the statements made in the editorial mentioned placing the responsibility where it properly belongs, upon the delegates to the N. A. R. D. Deliberative bodies are not always noted for their "deliberations," and measures are adopted frequently without the members voting for them realizing the import of their acts. In this connection it is an interesting inquiry as to the extent which the proposition in question was discussed and with what degree of approval it was accepted. It is rarely difficult to get a measure involving an income through any body of men convened for any purpose. The desire to reach out for and secure money overcomes at the moment all questions of policy and submerges all ideas of wisdom and discretion. This is not always the case, but it happens more frequently than it should.

* * *

THE fools are not all dead at the close of the nineteenth century. In Cincinnati during the holidays some exceedingly smart (?) young men placed powdered cantharides in a glass of beer which was given a young man to drink with the purpose of playing a joke on him. He was, of course, made critically ill and was sent to a hospital in an agony of pain.

Such "jokers" should either find their places in the work house or reformatory, or sent to the asylum for the detention of incurable idiots. They have no right to be at large unless it should be in a colony of imbeciles, where they should have the privilege of playing their jokes on one another.

* * *

THE penmanship of many applicants for Board of Pharmacy examinations is so poor that examiners often find difficulty in attempting to read the written answers to questions given. It is not an unjust theory that a young man in this age who cannot or will not write a plain, legible hand should not be allowed to practice pharmacy. Nor is it unfair to assume that a careless, slovenly habit in an applicant should also deprive him of such privilege. Something more than mental training and the acquirement of theoretical information is necessary in a really good pharmacist. The ability to handle implements, the habit of cleanliness, the idea of accuracy, the constant exercise of caution, the doing of little things with fidelity to the law of precision are all essential qualifications in the duties of a pharmacist.

The writer has seen men attempting to fill prescriptions with no more adeptness in the use of the mortar, the spatula or the graduate measure than an animal. He has seen such men soil a prescription counter with portions of every article he had used in his miserable effort at compounding, then

Digitized by Google

send out his product with a smeared label which could not be read by any person of average ability in deciphering hieroglyphics.

That sort of men are not fit to practice pharmacy, no matter what their heads may contain. They should go out to dig ditches under the supervision of a competent engineer. A little manual training would be a good thing in our schools of pharmacy. But if schools of pharmacy are to teach penmanship, reading, arithmetic and wind up with manual training but little time would be left for pharmacy proper.

* * *

JOHN T. NORRIS is still abroad in the (Ohio) land. This time he has found pastures green in his own city—Springfield, and has caused the arrest of one or more of the prominent druggists there for selling liquors without paying the Dow tax. One of his methods of advertising is to get announcements in the press dispatches that he has secured evidence against druggists in certain cities and towns, each notice giving the names of different places. It is alleged that John is the tail to the kite of the Ohio Liquor League and the profits are divided between the two parties to the agreement.

* * *

THE next meeting of the American Pharmaceutical Association will be held in St. Louis, on September 16th to 21st, 1901. The meeting at Richmond, in May last selected the place of meeting for this year, leaving the Council to fix the time which has just been selected for the above dates. The American Association has not held a meeting in St. Louis since 1871, and it is expected that the meeting this year will be large in numbers and very interesting in its discussions, etc.

* * *

A GOOD pharmacist comes to us with the complaint that he finds it almost impossible to secure young men for service in his store who can be relied upon for fidelity to employer's interests, honesty in relation to his employer's goods and a desire to be decent and respectable in his habits and conversation. He is a man who employs sufficient help that none of his clerks are overworked and he pays good salaries, so that he cannot be called a hard master nor his situations undesirable.

What a misfortune that young men have such distorted views of what life is and is to be. There is no hope for any success of the most transient character in a career of one who has no right ideas of a man's obligation to others, to say naught of those he owes to himself. It is not of great importance what vocation a young man chooses if he has some sense of adaptability to it, but it is of tremendous moment that he has the feeling of loyalty to sound principles of life and is governed in his conduct by righteous ideals.

There is almost everywhere a demand for reliable pharmacists as clerks, and yet scores of men claiming pharmacy as their occupation are now going about from place to place never keeping a position longer than a few weeks or months until their real characters are revealed when they are shifted out to find another victim.

In every department where any responsibility devolves upon employees it is growing more and more the rule that only men of established character are wanted and such men are never found seeking places, the places are calling for the men.

* * *

THE bills known as the pure food and drug bills are to be effectively pushed to passage in the Congress after the holiday recess. There are three bills before the National Legislature with this object in view and there is not much difference in either of them, except as to method of administration.

The druggists of the country appear to have unqualifiedly committed themselves in favor of these measures or some one of them. A majority if not all the State Pharmaceutical Associations has spoken in favor of this sort of legislation, and the American Association is likewise committed to the project. It is safe to assume that the majority of the retail druggists of the country do not know what is comprehended in any of the bills now demanding the attention of Congress and that they stand committed to the support of laws which may cause them not a little embarassment once they have been enacted. The experience with this sort of legislation forces the conclusion that the object sought is not obtained in preventing unscrupulous manufacturers and dealers from getting a market for their product while the innocent, small dealer is made to hold the sack.

We do not believe that any National pure food and drug law will be any more effectual in preventing fraud and sophistication in the manufacture and traffic in food products than the Inter-State Commerce Law has

Digitized by Google

proven to be effectual in preventing discrimination in rates on freight traffic by the railroads of the country. It is the little fellows that always get hurt by such laws while the big rascals escape. But then the law when enacted will furnish some soft places and that is something !

A Dangerous Fake Prescription

The following prescription has been given widespread circulation in the daily papers as a wonderful cure for consumption, discovered by Prof. Hoff, of Vienna:

Acid, arsen	.1
Acid, cinnamic	.3
Kal. carb. dep.	.2
Aqua distill	.5

Make a perfect solution.
Add
Cognac 2.5
Mix.
Sig.—Take after meals, according to instructions of physician.

Pharmaceutically, this prescription will not produce a clear solution with the amount of water present, nor is there sufficient potassium carbonate to effect solution of the acids. Medicinally, the compound is just as bad, worse, because it is distinctly dangerous.—*Ph. Era.*

A Poison Factory.

Not far from the heart of New York city there is, according to the *Sun*, a factory for the manufacture of deadly poisons in quantities large enough to annihilate the entire population of New York. The factory is so guarded that even its next door neighbors need have no fear of it, but the possibilities stored there excite the imagination. No one may enter it without a special permit. The employees are all skilled men, well aware of the danger of the slightest carelessness. They manufacture, among other things, pure anhydrous acid, which is so dangerous that in its pure state it is not placed in the market. There is instant death in its fumes if they are permitted to escape. Nitric acid is stored in another part of the factory in big glass carboys. The men who work in this factory realize that a broken carboy of nitric acid would mean a disaster, and they treat it with the respect it deserves. This factory and others like it are guarded more carefully than a safety deposit vault.—*Spatula.*

A person who never takes advice, invariably takes everything else.

Communications.

GRAND RAPIDS, O., Dec. 18, 1900.

Editor Midland Druggist:

Since Congress is about to repeal the war tax on proprietary medicines, now is the time for retail druggists to assert their rights as regards prices. No doubt there will be a disposition amongst manufacturers to keep up the prices as they did after the war of '61, and we have been paying that tax ever since, as many of them made no reduction.

I have just received an urgent request from a manufacturer to stock up with a full line of his goods in anticipation of large sales owing to the great amount of advertising he was about to do, but the prices remain on one dollar preparations at $8.25 and $8.50.

I have resolved that I will not buy any medicines that the price does not come to $8.00 for dollar preparations. If every druggist will do the same these proprietors will take off the war tax. Forty years is long enough for me to pay stamp duty.

Yours,

A. J. GARDNER.

We have received from a correspondent at Cambridge, O., a communication relating to the poisoning of several persons at Forsyth, a mining settlement five miles from the city of Cambridge. The newspaper reports of December 16th, gave four fatalities and five others seriously or critically ill, but this report appears to be exaggerated.

We give the letter of our correspondent, witholding his name at his request.—[ED.]

CAMBRIDGE, O., December 17, 1900.

Editor Midland Druggist:

No doubt you have received ere this some accounts of the poisoning affair at Forsyth Mines, five miles from this city. From the fact that all sorts of reports are abroad and desiring that you should get the straight of it is my reason for giving the following, which is about as near the facts as can be gathered at this time:

Last Thursday evening a party of Slav miners purchased what was called essence of Jamaica ginger, prepared and labeled by a Baltimore firm, from the Company store. One of the men bought one dozen bottles, each containing about two ounces.

A second member of the party obtained another dozen, and finally a woman made two purchases of one-half dozen each, making thirty-six bottles in all. The party was composed of three men and one woman. One of the men died from the effects of drinking the ginger about seven o'clock in the evening, and the woman died at midnight. The other two men were saved through active efforts of physicians.

A peculiar result, as stated by the physician in charge of the two survivors, is intense dilation of the pupils without reflex action and vision totally obscured.

In view of the physiological action of the mixture in this case, I think it would be interesting to read some standard authority of the action of ginger in excessive quantities. Hoping you will accept this statement in the spirit given for the purpose of giving you and your readers the facts in this distressing case, I am

Very truly yours,

.....O., Dec. 27, 1900.

DEAR SIR:—Kindly inform us if we conflict with any law of the state of Ohio by refusing to fill prescriptions for liquor, or prescriptions containing any liquor."

The above is similar to several letters recently received from different parts of Ohio relating to the dispensing of intoxicating liquors on prescriptions.

We are at a loss somewhat to understand what prompts these inquiries and can only attribute them to the efforts of unscrupulous physicians in local option towns to frighten druggists into filling their prescriptions for intoxicants when the druggist knows they are to be used for other than medicinal purposes.

We have simply to say that we know of no law in Ohio that will require any person to perform any act in connection with his business against his own judgment, or indeed against his own pleasure. A druggist has a right to decline to fill any prescription for any article or combination of articles in his line of business and he is under no obligations whatever to give his reasons for so doing.

So far as selling spiritous liquors is concerned, we repeat what we have before stated in this journal that we would not fill any prescription for intoxicants when

Digitized by Google

we were convinced that they were to be used as beverages, no matter by whom they were written. Further, we would not refuse any person spiritous liquors without a prescription when we were satisfied that the intent was to use such liquors strictly as medicine. Alcohol in its various forms is a valuable medicinal agent; the abuse of it, like the abuse of narcotic drugs in general, does not do away with the proper and lawful necessity for it in many cases, so that if we knew that it was to be used properly we should supply it just as we would calomel, quinine, camphor or any other remedial agent.

Answer to Query.

"Pepsin," Zanesville, Ohio—Asks, "Is there any chemical change to be made with glycerine so as to mix it with a fixed oil?"

We do not understand the purpose of the question. It is well known that glycerine is miscible with fixed oils in nearly all proportions making mixtures which do not readily separate. In other words, glycerine and fixed oils are mutually soluble. It is also well known that glycerine is a natural constituent of fixed oils, indeed, that is where we get it. If "Pepsin" means to ask for a process whereby the proportion of glycerine in natural combination with the fatty acids may be increased we must reply that we know of none.

Ohio Board of Pharmacy.

The regular January meeting of this board was held in Columbus on Monday, January 7th, and continued until Thursday, the 10th. The members of the board were all present and conducted examinations on Tuesday and Wednesday. One hundred and six persons appeared for examination. Full reports with list of those who were successful will appear in the MIDLAND for February.

The next examination of this board will be held in Columbus on Tuesday and Wednesday, May 14th and 15th. Applicants should take notice that applications will not be accepted unless on file in the office of the board not later than Thursday preceding the dates of the examination.

Application blanks and all particulars are furnished by the secretary.

W. R. OGIER, *Secretary*,
Columbus, Ohio.

Dow Law Decision.

A decision of interest to Ohio druggists has just been rendered by Judge Mansfield, of the Harrison county Common Pleas Court. J. S. McBean, a registered pharmacist of Cadiz, Ohio, enjoined the treasurer of the county from collecting the Dow tax for two years, which was assessed against him by the auditor of the county. The petitioner claimed that he was a practicing physician and a registered pharmacist, that he sold liquors only on prescriptions written by himself and other regular physicians. The Court decided the case in favor of the county and the amount Dr. McBean is required to pay is $630. It is reported that the court held that hundreds of prescriptions brought in as evidence by the defendant were not prescriptions at all. We have been unable to obtain a more detailed report in time for this issue of the MIDLAND.

The Missouri Pharmaceutical Association, through its Council, selected Tuesday to Friday, June 18 to 21, inclusive, as the date for the twenty-third annual meeting. Pertle Springs (Warrensburg) is the location. For information about local arrangements address the local secretary, Mr. J. V. Murray, Warrensburg. Other information will be furnished by the secretary, Dr. H. M. Whelpley, 2342 Albion Place, St. Louis.

SITUATION WANUED—By a pharmacist registered in Ohio and Indiana. Long experience. First class references. Single. Address L. M. T., care Midland Druggist. Jan.-3t

SITUAUION WANTED—By an assistant pharmacist. Expect to be full registered at January examination. Experienced. Address T. A. M., care Midland Druggist. Jan.-3t

Distinguishing Between Iron Citrate and Potassium Tartrate.

G. Griggi (Pharm. Zeit.; Drug. Cir.) proposes the following method of distinguishing iron citrate and iron and potassium tartrate, one from the other. Dissolve a few scales of the specimen in five Cc. of water, warming gently, if necessary. Then add five Cc. of a 1:20 sodium salicylate solution. If the salt is iron citrate, the solution at once acquires a more or less dark red color. A solution of iron and potassium tartrate treated in the same way remains uncolored or develops a darker color only after some time.

When we walk under the forest aisles in summer the foliage hides from our vision God's sweet skies; but when the desolating winds of winter have made the branches bare then through these black and naked boughs we may all the better discern the guiding of the eternal stars.—*Richter.*

The "Allcock" Plasters

ALWAYS GIVE SATISFACTION.

When a druggist sells the "Allcock" plasters he takes no chances and at the same time renders his customer the best service.

You never knew them to fail. You never had a customer bring one back dissatisfied.

Allcock's Porous Plaster has stood the test of over 40 years use by the public and is acknowledged everywhere to be the best strengthening plaster known.

The Allcock Belladonna Plaster is a new plaster but every druggist may rest assured that it is all that can be desired in a plaster containing as much belladonna extract as is safe to offer the public without the advice of a physician. It is the safest, quickest and most effective belladonna plaster made.

ALLCOCK MFG. COMPANY, (Successors.) Salesrooms—274 Canal St., New York.

HOW LEMON OIL IS MADE,

The lemons are taken to the laboratory and each is cut lengthwise into three slices. The pulp is first removed and put into a press where it is squeezed in order to obtain the lemon juice which is sold in its natural or concentrated state to the manufacturers of Citric Acid. The residue of the pulp is used for animal food. The peel is put into large baskets which are stored in a cool place for some hours, when it is ready to be pressed. Each workman holds in his left hand a medium-sized sponge of superfine quality, which has been previously washed most carefully and thoroughly. Between the fingers of the same hand he has also small sponges to prevent the loss of any of the oil, which is very volatile. With the right hand the workman takes a piece of peel from the basket which is kept within easy reach, and squeezes it against the sponge, thus forcing the oil through the pores of the rind into the sponge or sponges. When the sponge is full of essence it is squeezed into a tin-lined copper bowl having a lip, which every workman has before him. In order to make sure that the peel has yielded all the essence that can be pressed by hand, the overseer from time to time tests the rejected peel by squeezing it close to a flame. If there is any essence left it is forced through the flame and produces a flash-light. (We have seen children try the same experiment with the peel after having eaten their orange.) This hand-pressed peel is then put into brine and sold to manufacturers of candied lemon. When the tin-lined copper bowl is full it is set aside for a short time in order to permit the impurities to settle, after which the bowl is slowly and carefully decanted and the clear essence emptied into large tin-lined copper vessels. Before this is put into the various sized coppers for shipment, it is passed through filtering paper. This not only perfectly purifies it, but also gives it limpidity. The quantity and quality of essence yielded by the lemon varies according to the season. During November, December and January most of the essence is manufactured, about 1,000 lemons being then required to make 1 ½ lb. of essence. Lemons not fully ripe are preferred as they yield a larger quantity and more fragrant quality of essence than those fully matured. While a small quantity of essence is made during spring and summer, the product lacks the delicate fragrance of that made in winter.

Personal and Trade Notes.

[Items of interest, personal and otherwise to the drug trade, are solicited. No attention paid of anonymous communications, although the name to the sender of such news will not be published.]

—

The MIDLAND has recently had pleasant calls from—

George Wetzel, Lancaster, Ohio.

R. H. Schrader, Nelsonville, Ohio.

Dr. Chas. Stewart, Ashville, Ohio.

Mr. Baird, of Baird Bros., Pataskala, Ohio.

D. H. Squire, of Squire & Son, Ashville, Ohio.

C. S. Todd, Akron, Ohio, has sold out.

Jas. T. Blaser was a visitor in Cincinnati the past week.

W. F. Volk, Westerville, Ohio, has sold out to A. W. Berry.

Dr. J. Corn, of Frazeysburg, was a recent visitor at Columbus.

S. M. Seeds, of Crestline, Ohio, has sold out to A. S. McAtteer.

Geo. Gressel is doing relief work for H. M. Widney, at Zanesville.

Frank Dusenbury and wife, of Sunbury, spent Xmas at Ostrander.

W. H. Tope, of Bowerston, has been succeeded by R. P. Anderson.

Howal Mechling & Co. succeed J. H. Moody & Co., at Thornville, Ohio.

The drug store of R. B. Koch, Larue, Ohio, has been closed by attachment.

Francis M. Miller, of Findlay, Ohio, has been succeeded by J. A. Hutchinson.

J. K. Milroy, Lake View, Ohio, has been succeeded by Thompson & Casselman.

Z. R. Taylor, West Jefferson, Ohio, was a recent caller at the office of the MIDLAND.

J. E. Katzammyer, of North Baltimore, has taken a position with O. B. Ream & Co.

A. C. VanGilder, Pt. Pleasant, W. Va., has returned from a visit to the Queen City.

Tom L. Taylor has purchased the drug store of Dr. J. B. Taylor, at Broadway, Ohio.

Mr. Ed. Middleton, of Middleton's Pharmacy, Malta, spent the holidays at Lancaster.

C. M. Ridgway, Cedarville, has been away for a week, visiting and enjoying himself.

John Wood, of Mt. Sterling, Ohio, is home from college at Ada, Ohio, during the holidays.

We sympathize with Will Mahaffy, the Mt. Vernon druggist, whose mother died last month.

Will Hurch, Mansfield, Ohio, who is attending school at Ada, spent the holidays at his home.

Mr. Walton Parker and sister, Miss Lucy, of Beverly, Ohio, spent the holidays at Parkersburg.

Jim Lytle, of Beagle & Lytle, at Marietta, Ohio, spent New Year's at his former home, Pittsburg.

"Jimmy" Brown, the well known drug clerk of Mansfield, Ohio, spent the Xmas holidays at Greenfield.

A. C. Wallace, the Bellefontaine druggist, died suddenly on Dec. 18th. The business is being continued by his wife.

Mr. Bushwah, formerly with W. H. Donges of Xenia, Ohio, has accepted a position with John Mayer, Dayton, Ohio.

It is rumored that Mr. Stubbefield, formerly with Poage, Elliott & Poage, Ashland, Ky., will start a store in that city soon.

Dick Williams, of Williams & Betterton, New Vienna, Ohio, has just returned from a very pleasant visit with his son, in Illinois.

Will Keife, formerly with Fred Roetting of Huntington, W. Va., has accepted a like position with W. S. Vinson of the same city.

Ambrose Middleton, of Malta, Ohio, paid a brief visit to Marietta lately. If any one doubts the statement they can ask Jim Lytle.

F. A. Wheeler, Mansfield, has replaced his old showcases with an entirely new lot of oak-trimmed cases, improving the looks of the store.

John Byrne, of Columbus, was in Cincinnati last week attending the annual election of officers of the Retail Druggists' Insurance Association, of which he is a director. Mr. Byrne reports business good, and many new members of this enterprising association.

Digitized by Google

Chas. Hosey, formerly with W. S. Vinson, Huntington, W. Va., can now be found behind the counter of Fischer & Streich, Portsmouth, Ohio.

Harry Townsend, for a long time employed in the pharmacies of H. M. Widney, at Zanesville, is attending Ohio Normal University at Ada.

Mr. Wm. Moss, of Moss' Temple Pharmacy, at Cambridge, was calling upon the physicians in Guernsey and Muskingum counties last week.

Mr. Harry Hurd, of Ohio Medical College, Cincinnati, who was called home to Dexter City by the illness of his sister, has returned to Cincinnati.

C. R. Buchanan, of Marietta, has completed his new building on the corner immediately west of the old store, and will occupy same at once.

Jess Blackmer, of Baldwin & Blackmer, Washington C. H., recently made a flying visit to Lancaster, Ohio. These visits are getting to be quite frequent.

"Ote" Green, of Ohio Normal University, spent the holidays with Al. Richards, at Marietta. Ote looks fine and is evidently on good terms with the O. N. U.

The MIDLAND is glad to note that the daughter of Dr. F. H. Hurd, at Dexter City, Ohio, whose illness was reported in our former issue, is convalescent.

Catlettsburg, Ky., has just passed through quite a siege of smallpox and Mr. John C. Hogan, the popular druggist of that place, has sold up to date 2,200 vaccine points.

Fred Woodard, former manager of McCaw's "Woodard Pharmacy," at Dennison, at present attending Scio, spent his vacation with Mr. Geo. S. McCaw, at Dennison.

The drug store of John Strosnider, Williamson, W. Va., was destroyed by fire on the morning of Dec. 30. We have not learned the amount of loss or insurance, if any.

Mr. W. M. Hartinger, the veteran druggist of Middleport, Ohio, made the MIDLAND a pleasant call. Mr. Hartinger has been visiting his son, who is pastor of Grand View Heights M. E. church.

C. M. Oshe, of Zanesville, Ohio, O. S. U., '98, at present with Cline's Pharmacy, at Athens, Ohio, spent Christmas with his former O. S. U. side partner, "Binninger," at Lancaster, Ohio. Carl seems well satisfied with his place with "Hal" Cline, and the satisfaction seems to be mutual.

We learn with regret of the serious illness of Mr. Sol Cline, the senior of Cline & Son, at Albany, Ohio. The issue is anxiously awaited by his many friends in Athens county.

W. P. Gault, of this city, has severed his connection with the Columbus Elastic Waterproof Cloth Co., and can again be found at his old stand, at Oak street and Grant avenue.

Geo. Whipple, for a long time with J. Halliday Cline, Cline's Pharmacy, Athens, Ohio, now attendir g Ada college, spent the holiday vacation at Athens, returning to Ada last week.

The place of J. R. Kelch, Tarlton, Ohio, presents a very busy scene at present. He is getting ready to make sealing-wax for next season, having just closed a very successful year.

Mr. James Garrett, formerly with his brother, J. F. (Jack), at New Concord, has gone to Illinois for the winter. Jim has been in bad health and hopes that a change of scene will be beneficial.

J. H. McCloud has returned from Pennsylvania and has accepted his old position with Jack Garrett, at New Concord. John has many friends in old Muskingum who will be pleased to see him again.

J. H. Moody, formerly of Thornville, but now of Lancaster, Ohio, was also a recent caller. Mr. Moody expects to have the old Beck drug store at Lancaster in a new dress and prime running order very soon.

Frank Valentine, son of R. H. Valentine, of Belle Center, Ohio, was married the latter part of December. Frank has been in the store with his father and expects, now that he is two, to take a deeper interest.

Dr. F. S. Case, formerly of Columbus, but recently of Tiffin, Ohio, has returned to this city. Dr. Case is desirous of engaging in the retail drug business again if a desirable location or store can be purchased.

W. H. Bowoon, at Caldwell, Ohio, has his hands full with his rapidly growing telephone business, and the conducting of his pharmacy, but he is always ready, in fact, tireless. "The Owl" is neat as a pin.

If Dame Rumor can be believed there is a charming young lady in Shelby who will soon become Mrs. H. L. Crowell. Mr. C. is the popular East Side druggist and he doesn't deny giving the young lady a solitaire diamond, but he says it was "only a Xmas gift." The boys say that Harry goes with the diamond.

Digitized by Google

Mr. Geo. E. Hilles, of Barnesville, Ohio, was a visitor perforce for a few days at St. Clairsville last week. Mr. Hilles was called as witness on the trial of Leonard Stephens for murder, whose conviction was secured.

J. B. Davis, Jeffersonville, Ohio, is as "happy as a big sunflower," all because there is a stranger at his house, and a boy, too and born at 2 A. M. Jan. 1st, 1901. The first baby born in Jefferson in the new century. Why shouldn't he be happy?

The litigation between the Hugh S. Stewart Company and Stewart Brothers over the right to use the formulæ for the Stewart medicines and the name still continue and is having the effect of tying up these goods to some extent. Unless soon ended serious injury will result to valuable copyrights.

The factory of the Sanford Mfg. Co. was almost entirely destroyed by fire on the night of Nov. 27. This enterprising company at once began the equipment of a temporary factory and are now ready to supply their products. A new factory is rapidly approaching completion and they will soon be better equipped than before the fire.

Mr. Frank Prame, Shiloh, Ohio, is meeting all comers now with the right hand of fellowship. A year ago last September Mr. P. slightly cut the first finger on his right hand with a penknife. The cut refused to heal and inflamed the right arm to the elbow and till within the last few weeks has remained very sore, rendering Mr. Prame a south-paw. We congratulate him on his recovery.

W. F. Warning & Co., of Blanchester, Ohio, not satisfied with having the prettiest store in Clinton county, have made it complete and next summer can dish up the cooling draught from a very beautiful new soda fountain. The fountain matches the rest of the store and we predict a good business for Will all around. Mr. Herman Clary, the manager, is quite proud of the new addition.

Wm. F. Volk, the Westerville druggist, who was fined $450 for violating the village ordinance regarding the sale of intoxicating liquors, has appealed the case to the Common Pleas Court of Franklin county. Judge Badger ordered the sentence suspended pending a hearing in his court and fixed the bond at $300. This is the second contest between Mr. Volk and the village authorities.

The veteran pharmacist, F. G. Okey, at Caldwell, Ohio, though past the three score and ten, is still doing active duty about his store on the old corner. Mr. Okey is ably assisted by his daughter-in-law, Mrs. Cary Okey.

M. H. Fry succeeds to the business of M. O. Rettig & Co., Chicago, Ohio. Mr. Fry was previously employed as an express agent and is therefore new to the drug business. We wish him success in his new calling.

Mr. C. S. Ashbrook, Mansfield, Ohio, had a narrow escape from a serious fire at his home New Year's eve. Mrs. A. was lighting the Xmas tree for the children on the evening in question and in some manner one of the candles came in contact with a branch of the tree. In a moment the tree was afire and in a short time the parlor and sitting-room furnishings were entirely destroyed. Mrs. Ashbrook was also quite severely burned about the face and hands in trying to extinguish the fire. She is doing as well as can be expected at present.

Mr. Phil Streich, of Fischer & Streich, Portsmouth, Ohio, has been kept closely at home for the past two weeks owing to the serious illness of his son Ralph. The boy was taken with appendicitis and had to be operated upon. The operation was successful and Ralph is improving rapidly, and we hope to see him about soon. Mr. Streich is well pleased with his recovery and thinks he can get down to business again soon.

A meeting of the Columbus druggists' association was held on the evening of Tuesday, January 8. Several matters of importance were under discussion. The most important action was the reaffirming of the purpose of the association to defend any member who may be prosecuted under the Zimmerman law. Formal charges were brought against one member of cutting on the price of proprietaries, and he will be given an opportunity to explain his action at a special meeting to be held Jan. 15. The meeting was largely attended, which shows an increased interest in the organization.

In the back part of the drug store of J. R. Noecker, of Circleville, Ohio, the following sign was posted about Dec. 21st: "Notice—This drug store will be moved Thursday eve., Dec. 27th. By order of the Committee, 7 P. M. sharp." Promptly at the appointed time the roll was called and found but one missing, viz.: Charles

Digitized by Google

Wills. The moving was, however, commenced at once, and by eleven o'clock the old store looked like a hole in the wall, and Mr. Noecker was going full blast by the 28th in his new room. Thanks to the committee of his friends. After it was all over Joe treated them all to light refreshments. By the way, the new room is a dandy and he can well boast of as well appointed a store as there is in town.

Here is how "Old Si," alias "Chemically Pure," alias the Hon. C. P. Calvert, of Cincinnati, begins the new century. We have no doubt when he unwound this that he had enough to warrant his quitting for at least four days:

A TOAST.

Here's to the Year 1901,
The new century just begun.
A long life and happy, to you;
That you may live the century through,
With profit, peace and pleasure,
And all life's joys beyond measure.
Shakespeare.

P. S.—Now quit your drinkin' for four days.
C. P. C.

Castoria Counterfeiter Criminally Convicted—St. Louis Court Convicts Counterfeiter of Popular Remedy.

ST. LOUIS, MO., Dec. 9,—In the Court of Criminal Corrections yesterday a verdict of guilty was returned by a special jury in the case of the State vs. John Bick. The defendant is president of the Palestine Drug Company of this city.

Information in the case was made by representatives of Charles H. Fletcher, of New York, proprietor of Castoria, charging the Palestine Company with imitating the wrappers used on Castoria. It is the second criminal prosecution recently brought by the New York concern here, and both resulted in the conviction of the imitators.
—*New York World, Dec. 10, 1900.*

A POINT OF VIEW.

Perpetual self-seeking, and self-coddling, and avoidance of all avoidable pains and duties ought to make us discontented, and they do. Part of our time and strength we have need to devote to labors whereof the pay comes not in cash, nor in ordinary pleasures or advantages, but in satisfactions which are spiritual and benefit our souls. We all know that theoretically, but in practice we are very apt to overlook it. When we have plenty of food and no appetite, we know that it will pay us better to work up an appetite than to seek new species of tempting food; but when the conditions under which we live are reasonably good, and we have pleasures and privileges in fair quantity and are still restless, we don't always recognize that what we need is not more enjoyments, but a better appetite for those we already command. It is conceivable that when the millennium comes everything will go right in the earth, and for a long time together there will be nothing to bother about. But meantime, while there is so much to bother about, I cannot think anyone entirely fortunate who is not bothered in reasonable proportion to his powers. To have no anxieties, to be subject to no annoyances, to have no unwelcome duties and no occasion for self-denial, is not by any means to be in a good case. Anyone finding himself in such a predicament is bound to go out and hunt up labors and troubles merely to make life worth living. Every one of us is a wheel with cogs in it, meant to fit in with other cogged wheels and turn more or less laboriously and effectively in the great human machine. Either we fit ourselves into that machine or turn with the other wheels, or we go to the scrap-heap.—*From December Scribner.*

Ohio State University Pharmaceutical Association.

The association was addressed Monday evening, January 7th, by Mr. Geo. W. Voss, of Cleveland, member of the State Board of Pharmacy, on "The Pharmacies of Europe." Mr. Voss, together with several friends, including Mr. Heckler, formerly member of the state board, spent three months traveling through Italy, France, Austria, Belgium, Holland, Germany and England. Mr. Voss is therefore able to speak on the subject, at least from a tourist's standpoint.

The proprietors of European pharmacies are generally well-to-do and much more respected for their learning than the pharmacists of this country. It was with difficulty only that Mr. Voss could reach the proprietors, as they spend very little time at their place of business; and what information he got in regard to their ideas and methods of doing business was obtained from the managers and clerks. In several countries, Germany and Austria, for example, the stores are limited by the Government and concessions are granted, which in time become very valuable.

One would naturally expect the pharmacist to become very wealthy under such a system, but the Government protects the people from unscrupulous dealers by placing a price on every article, sending an inspector around quite often to see that the regulation prices have not been exceeded. These inspectors also have the power to condemn and destroy damaged drugs and remove samples for inspection.

The stores are in charge of a manager, assistant manager, several clerks, apprentices and a porter. The helpers are not required to spend so many hours in the store as our clerks. On account of the system of Governmental restriction the stores are considered gold mines.

There is a noticeable absence of patent medicines, toilet articles, show cases and soda water and fancy articles, that go to make the American pharmacy so attractive.

Mr. Voss then gave a general description of his trip, scenery, customs, peculities, &c., and illustrated his talk by several hundred views, which made his description very interesting indeed.

The students enjoyed the evening very much and hope that they will enjoy Mr. Voss' company as much when they appear before him next spring for examination.

NOTES.

The students report a pleasant time at their respective homes during the holiday vacation and come back to their work with renewed energy. This is the term in which the hard work is done.

The second and last volume of King's Dispensatory has arrived, and will be at the library for several days, after which time the students will find it in this department.

Hager's works on pharmacy, two volumes, have been ordered and will be here in several weeks. The advanced students who read scientific German will be pleased to see these books, as they are full of valuable information. They will find it a pleasure, after working hard on German for a year or two, to find such a store of knowledge open to them.

The second year students are just beginning their laboratory work in organic chemistry. The study of the carbon compounds is inexhaustible, and they look forward with pleasure to the term's work.

Mr. H. L. Morris, a junior in the four years' course, and Mr. Louis Eberle took the examination last Tuesday.

Mr. Lefferson has not been taking fencing lessons, he accidentally spilled some carbolic acid on his face and can tell you all about the local anaesthetic effect of phenol. —W. A. L.

With the close of the Fall term come the usual number of conditions and failures in the Department of Pharmacy and it is about the same in the other colleges. The engineering courses as a rule leading in this regard.

Does this mean that we have an exceptionally dull class of students at the University? Indeed, it does not. It means that the students must strive diligently in order to master the work outlined for them.

If this were not the case then the greatest good to the greatest number could not be accomplished. We have some students who find the work as outlined comparatively easy, others who find it impossible to keep up with the classes.

The object of the instructors is to arrange the work so that it will require an

Digitized by Google

effort on the part of all to meet the requirements.

Conditions and failures are blessings in disguise and the student who has not learned that he can do much more work in a given time under such a stimulus, has not learned his true power. He will not be so ready to say can't, or in other words, he will gain confidence. After leaving college students are continually confronted with "conditions and failures," and now is the time to learn how to avoid them.

Sues Druggist Because Her Hair Turned Green.

Lillie Verona, an actress, of No. 132 East Seventeenth street, has instructed her attorney to sue John Kiehl, a druggist at Third avenue and Thirteenth street, for $5,000 damages, alleging that he gave her a chemical which turned her hair green instead of auburn as she desired. Her hair, she claims, was of a golden shade and she desired to change it and on the advice of a hair-dresser she arranged to use a solution of water and powdered henna leaves. The woman did not know that these leaves in powdered form are used for making paints.

She procured ten cents worth and applied the solution. On the following morning she found that her hair had turned green. She tried every method to bring back the original tint, and had experts work on it, but they told her she could only substitute black.

The hair will also fall out, they say. Mr. Kiehl says he sold Miss Verona the genuine henna leaves of the best quality. The woman did not tell him her purpose and it was none of his business anyway.

Even if he should lose the suit Mr. Kiehl will not be out of pocket, as he is insured against any such accident in the Fidelity Title & Casualty Co., whose policies are held by almost every druggist in the city. The company issues policies on such risks up to a limit of $5,000. The proprietor of a store pays $10 for himself, $3 for each full-fledged clerk, $2 for each junior clerk and $1 for each boy on such a policy.

How to Learn Your Friend's Income.

Do you know how to discover a man's income? Ask him what he thinks a comfortable income should be, and divide his answer by two. This is the rule given by a Harvard professor of economics—a shrewd man!—*Boston Journal.*

Sulphonal Poisoning.

According to Dietrich sulphonal is by no means so free from toxic action as is generally supposed. At least thirty cases of death from the use of the drug have been recorded in medical literature, he says. The dose which produces these harmful effects appears to be very variable. Oestreicher quotes a case in which a patient took 1,500 grams of sulphonal in six years without any ill effects. On the other hand, Schulz reports a case which ended fatally, in which only sixteen grams were given in the month, and Helweg another fatal case resulting from the administration of 90 grams in three months. Numerous similar cases have been recorded. In the majority of these, the patients were in a weakened condition, anæmic, with much impaired digestion, so that the sulphonal, which, in healthy individuals is dissociated and reabsorbed with difficulty, in these cases acquired a cumulative action which terminated disastrously. The symptoms of poisoning are intestinal pain, nausea and constipation. The urine is colored a deep cherry red. This coloration is often the first indication of the commencement of the toxic action.

The One Natural Remedy

for **Distemper, Epizootic, Pink Eye, Catarrhal Fever,** among Horses.

One Bottle, Fifty Cents.

3 to 6 doses often cure a case; guaranteed to do so. Acts on the glands and blood, expelling the germs of disease. Acts as preventive, no matter how horses are "exposed" to these diseases. Druggists, give your jobber a trial order, and ask us for advertising matter.

Every Bottle Guaranteed. **SPOHN MEDICAL CO., Goshen, Ind.**

N. A. R. D. Notes.

CHICAGO, January 5, 1901.

The condition of the drug trade of Montana is thus described by Secretary Sid. J. Coffee of the State Association: "The retail drug trade of Montana is in fine shape. Our State Board is active, there are few violations, and our state association is in better shape than ever before. We have only one cutter in the state, and local associations are being formed in every town."

—

The members of many of our local associations are coming to place a high estimate on sociability as a means of improving business conditions and keeping these conditions satisfactory. Many druggists are finding out to their gratification that it puts money into their pockets to be on friendly terms with their neighbors in the trade, to say nothing of the increased satisfaction of doing business.

—

The National Executive Committee will meet in Chicago January 11 and 12. The afternoon of the 11th the Committee will meet the members of the Chicago Retail Druggists' Association, and in the evening Mr. H. L. Kramer will present his check to the Committee for the amount due the Association under the terms agreed upon at the Detroit convention.

—

The work of forming county associations is progressing well in Wisconsin under the direction of Secretary Heimstreet of the Board of Pharmacy.

Since last report Donald Kennedy, Roxbury, Mass., has adopted as his distributing agents the list of jobbers who are now acting as distributers for the seventy proprietors who are giving adherence to the tripartite agreement.

—

The Norfolk, Va., Association has taken on new life and is putting forth vigorous efforts to serve the welfare of its members. A. S. Martin, Jr., is the new secretary.

—

Letters received by the Committee on Legislation from all parts of the country indicate much activity on the part of druggists in the matter of influencing members of the Senate to vote for the Tax Reduction bill which passed the House of Representatives Dec. 15. The vigorous work being done by the Legislative Committee will assist materially in securing the repeal of the tax on medicinal preparations which is now regarded as a certainty.

—

The proceedings of the second annual convention of the N. A. R. D., held in Detroit in September last, may be procured of Secretary Thos. V. Wooten, 153 LaSalle St., Chicago. Societies and individuals will be supplied with any number of copies desired free of expense.

—

One of the officers of the N. A. R. D. writes thus to a correspondent who deplores that no druggist in his city is making more than a scanty living: "There seems to be only one obstacle to the restoration of prices on proprietaries in your city, the apathy of the drug trade there in serving its own best interests. The National Association stands ready to help your druggists, but the initiative must be taken by them-

Digitized by Google

selves. Druggists who sit down and wait for the N. A. R. D. or some other force to do for them what they can do but will not do for themselves are likely to be disappointed in the National Association, because it is not a charitable institution. If they mean business and will go to work in earnest the influence of our association will help them to overcome the obstacles which now seem insurmountable.

—

The Erie County, N. Y., (Buffalo) Association has now a financial secretary who devotes his entire time to the work of the organization which is growing rapidly. Dr. Willis G. Gregory, whom all the delegates to the Detroit convention will remember, is one of the leading spirits of this well-officered society.

—

Since last report the following local societies have been added to the membership roll of the National Association: Atlanta, Ga., Druggists; Charleston, S. C., Association of Retail Druggists; Wayne County, Ind., (Richmond) Druggists; Berkshire County, Mass., (Pittsfield) Druggists; Essex County, N. J. (Newark) Retail Druggists; Binghampton, N. Y., Retail Druggists; Retail Druggists of the Bethlehems, Pa.; Dutchess County, N. Y. (Poughkeepsie) Druggists; Pittston, Pa., Retail Druggists; Lynn, Mass., Druggists; Tarrant County, Texas (Fort Worth) Druggists; Burlington, Vt., Druggists; Ann Arbor, Mich., Retail Druggists; Ohio Valley Druggists. In many cases these organizations represent the entire drug trade of the respective towns and and counties, in others all but a very small proportion. From present indications many new societies will be added in January. Although systematic work by organizers has not yet been started in many parts of the country the work of organization is progressing well.

Carbonated Cod Liver Oil.

By impregnating cod liver oil with carbonic anhydride, the disagreeable taste of the oil is to a great extent masked, alteration of the oil is said to be prevented, and its administration facilitated even in the case of a person who has a strong objection to the oil. Similar advantages are said to be secured in the case of castor oil by saturating it with carbonic anhydride. A German patent has been secured by the Halfenberg Company for the method of preparing effervescent oils.—*Pharm. Jour.*

TESTED.

BY J. O. E.

Begun in November Midland.

There was a silent battle waged over the body of George Stanley in the next few weeks. Dr. Carroll, with all the forces science could bring to his aid, and Margaret, whose strength and tenderness found full scope in this struggle for the life of her beloved, joined determined forces against the great destroyer.

Ah, the heroism of sick chambers! The passionate cry of the heart, hidden behind still face and silent movement. Faintness turned to steady touch for love's sake—while life is but a prayer for dearer life!

The presence of a skilled nurse was no argument for any but absolutely necessary rest, and all the while his consciousness dwelt in that hazy realm where Pain drives the most courageous spirits, George was conscious of one voice, one touch, which more than all else held him to life.

We will not dwell upon the stages of his long illness. The hours of pain in which Margaret's suffering was scarcely less than his; when she bowed shudderingly under his moans and only breathed freely when the doctor quieted him by the use of those narcotics, for which she breathed many a grateful prayer.

The days of suffering came and went; hours of suspense, alternate hope and fear, until at last Margaret received her husband, as one given back from the hand of God; back to life and hope, while hers was to be the joy of wooing again for him the health and strength which were his by nature.

The days of that convalescence were beautiful days, full of thanksgiving and peace. There were many anxious hours and hours of pain still, but always the smile of hope upon them, lightening the dread and soothing the hurt; while the hearts of husband and wife came near to each other as never before. They had faced the great unknown together; they had borne pain as one body; they had prayed as one heart. They were more truly wedded than joy alone could have made them. They thought it was enough, that their trial had met them and passed on. But life is a tireless tester; we gain strength but for fresh use, and learn to walk in the twilight that we may still have vision in the dark. * * *

George Stanley was at his work once more; not rugged as he had been and permanently a little lame, but for the most part comfortable and able to get both joy and profit out of life; while Margaret's heart had room for little else than one glad song of thanksgiving.

It was several months after George had been attending to business before there began to grow up in her mind a vague uneasiness in regard to him.

For awhile he had been almost his old time self; then she noticed that he was often under spells of heavy depression for which he assigned no cause; that, whereas his habit had been uniformly courteous toward her, he became irritable and impatient without reason. She could understand this on no theory except that his health was less clearly established than she had believed, and all her wifely solicitude was to the front once more; but she found it must be a sheathed solicitude, for it seemed less to comfort than to fret him. Her heart grew very anxious and heavy as the days wore on, but as he denied feeling ill and discouraged any suggestion of consulting Dr. Carroll, she said little and tried to think as lightly as possible of his moods.

The day came, however, when she could no longer persuade herself that his condition was normal, and she hastened to consult the doctor.

He comforted her with the belief that these were but symptoms of a weakened nervous system and would pass off with the days, while he offered to drop in informally and see her husband. He came once and again and it was with a very grave face that he met Margaret when next she called. His first question blanched her cheek. Had she known her husband to resort to the use of narcotics since his convalescence? She answered, "A very few times when in pain, but not for months past." She could not believe this of him, as he had always been frank and knew the danger of such a habit. The Doctor thought he knew the symptoms, but said they must watch carefully to make sure. Margaret was indignant. There could be no such necessity! She would ask George directly and learn at once if this were true!

Dr. Carroll told her that concealment was as truly a symptom as any other if the matter was as he feared; but that George Stanley, who had always been the soul of honor, punctilious as to the truth above ordinary men, would in a matter like this continue to mislead her, Margaret could not believe.

Digitized by Google

It was with a heavy but far from hopeless heart that she entered her home that night to find George very like his old self; but when she ventured to touch upon the subject weighing so heavily upon her, his indignant evasiveness made her heart sink. This was *not* the man she had known through the years, and she became more and more certain that a great horror was upon her. Nights like the one Margaret Stanley passed after she left her husband then are life's Gethsemanes.

Could it possibly be she? Sickness and death she had met sweetly, but this was shame—weakness—sin! She had felt herself apart from all this! Her pride cried out until at last she *saw* it and was humbled. Then her true nature arose once more.

What was *she* to be considered in such a crisis? This man whose name she bore had been weak, when for her sake he might have been strong, but could she forget those seasons of pain, in which she thanked God for the surcease of an hour?

For the first time she saw how evil might grow out of misused good; how near to strength lay weakness—and her heart rose in pity toward this man in the thrall of a mighty appetite. On her knees she reached out for strength and patience while she resolved to struggle for the soul of her husband as she had never striven for his life.

The record of the following year is a blurred memory. The tale is not for strange ears.

When with infinite gentleness the proofs of his habit were brought before George Stanley, he confessed with utter humiliation his own contest and defeat. The hours of weakness and distress which came upon him after his return to business had found him with means of relief immediately at hand. It was but natural to use them at first, and, with due knowledge of their danger, to feel himself safe in the using. His story was but the old record of the insidiousness of such practices, with the final awakening to the fact that the strength of his will had gone from him, while even his desire for release had grown faint before the longing for satisfied appetite.

To Margaret's questions as to why he had not told her, his reply stung her beyond words. "Tell *you*, my Margaret! *you* who knew no weakness and had patience with none! I did not dare!"

As the weeks wore on, however, George learned that love in such a heart grows larger on demand, until pride and intolerance flee before it. As she watched patiently beside him, forgiving without reproach every relapse, proving strength, courage and stimulus when his own will seemed impotent, there grew up in his heart a new reverence for this wife who was to prove his salvation.

He learned to lay hold of the faith which uplifted her, until by and by, out of bitterness there came forth sweetness; out of struggle, peace; out of weakness, strength.

In this year of stress and horror, of struggle and defeat, of alternate hope and fear, of final victory and peace, these two had gone away from their home circle to make the fight alone; so that there were few who knew of the dread evil which had almost overwhelmed them.

As the year passed, all who knew them felt that here, at least, was a perfect union; for that their lives were sweetly bound together none who saw them could doubt.

The friends of Margaret's girlhood beheld in her uplifted beauty but the natural blossoming of the promised flower, while the dignity and thoughtfulness of the man—who was older and firmer, with a tense line or two upon the clear-cut face—was but the fulfillment of just hopes.

Only the few hearts knew that her beauty was made perfect through suffering, while the strength of his manliness was born of love's sacrifice.

[THE END.]

The Angel Without Wings.

Call her Duckie, if you please,
And she blushes, and she sighs;
Say she's chic and straightway she's
Wafted into sunny skies;
Call her Birdie and she's glad;
Call her Goosie and she's gay—
Say she's just a hen, and then
Something warm will be to pay.

EXAMINATION QUESTIONS—VIRGINIA BOARD OF PHARMACY.

REGISTERED PHARMACISTS.

1. (*a*) What is Labarraque's Solution, and what are its principal uses? (*b*) What is the most important of the allotropic forms of phosphorus? (*c*) What are its properties? What is the Sp. Gr. of — (*d*) Hydrochloric Acid? (*e*) Sulphuric Acid?

2. (*a*) Are the official inorganic acids and dilute acids of uniform strength? (*b*) How is HCl made on a commercial scale? (*c*) What impurity causes the yellow color sometimes present in HCl? (*d*) What is the color test for Potassium Salts? (*e*) What is the color test for Sodium Salts?

3. (*a*) How are granulated effervescent salts prepared? (*b*) What is Magnesia and how prepared? (*c*) How may Ferri Oxidum Hydratum be prepared quickly for use? (*d*) What is the official name for Basham's Mixture? (*e*) What is Monsel's Solution?

4. (*a*) What is Dialysis? (*b*) What is Diachylon plaster and how is it made? (*c*) Mention one or more tests for Argentum. (*d*) What is the common name for Argenti Nitras Dilutus and how much $AgNO_3$ does it contain? (*e*) What element is used more largely than any other in the metallic state?

5. (*a*) How is citrine ointment prepared? (*b*) What is produced when cellulose is treated with nitric acid? (*c*) Name the official collodions. (*d*) How is flexible collodion made? (*e*) How does No. 8 acetic acid compare with the official acid in strength and Sp. Gr.?

6. (*a*) What is Amylum and how is it obtained? (*b*) What is Glucose? (*c*) What is Grape Sugar? (*d*) What effect do Alkalies exert on Glycyrrhizin? (*e*) What is the theory of fermentation?

7. (*a*) How is alcohol deodorized? (*b*) How is Absolute Alcohol obtained? (*c*) What is Trichloraldehyde? (*d*) What is Trichlormethane? (*e*) What fluid extracts contain Acetic Acid?

8. (*a*) Name a volatile oil containing Sulphur. (*b*) Name a volatile oil containing Nitrogen. (*c*) What is Glycerine and how much absolute Glycerine should it contain? (*d*) What two classes of soaps are recognized by the Pharmacopoeia? (*e*) Describe the composition of each.

9. (*a*) Name the classes from which official animal products are derived. (*b*) Give one example for each class. (*c*) How is Pepsin prepared? (*d*) How is Cod Liver Oil prepared? (*e*) Of what three principles do fats usually consist and what are their physical properties?

10. (*a*) What are Alkaloids chemically? (*b*) Where are they found? (*c*) Name the ingredients in Emulsion Chloroform and state how it should be prepared. (*d*) What is the weight and shape directed in the Pharmacopoeia for rectal, urethral and vaginal Suppositories? (*e*) Name the source and uses of acetone.

11. (*a*) State the plants yielding Thymol. (*b*) Give its medical properties and dose. (*c*) Give the common name of Krameria. (*d*) State what part of the plant is used. (*e*) Its principal preparations and their doses.

12. State the official portion of (*a*) Cassia Fistula. (*b*) Fœniculum. (*c*) Ipecacuanha. (*d*) Hydrastis. (*e*) Hyoscyamus.

13. (*a*) From what is Salicylate of Eserine derived? (*b*) Give its official Latin name. (*c*) State its dose. (*d*) Give the official name and habitat of Irish Moss. (*e*) Give the official name and habitat of Iceland Moss.

14. (*a*) What is Stillingia? (*b*) Give the habitat. (*c*) State under what common name it is known. (*d*) What is a Rhizome? (*e*) What are Stamens?

15. What part of the plant do the following drugs represent? And give their official Latin names: (*a*) Calabar Bean. (*b*) Lupulin. (*c*) Kino. (*d*) Golden Seal. (*e*) Lactucarium.

16. Define the following terms: (*a*) Qualitative Analysis. (*b*) Quantitative Analysis. (*c*) Gravimetric Analysis. (*d*) Volumetric Analysis. (*e*) Normal Solution.

17. (*a*) Give method for the preparation of Sulphuric Acid. (*b*) Give a test for its identification. (*c*) How is Sulphurous Acid prepared? (*d*) Name the elements known as Halogens. (*e*) Mention their chief characteristics.

18. Show by an equation the reaction which takes place when Sulphuric Acid acts upon Carbonate of Potash, and how much Sulphate Potash is obtained from 50 per cent. of acid, using the following atomic weights: S—32. O—16. K—40. C—12.

(*a*) What is Sweet Spirits Nitre chemically? (*b*) How is it prepared? (*c*) How is it tested quantitatively? (*d*) What is its official strength? (*e*) What are its medical properties?

20. Give the official name and method of preparation of the following: (*a*) Salol. (*b*) Carbolic Acid. (*c*) Salicylic Acid. (*d*) Ether. (*e*) Iodoform.

REGISTERED ASSISTANT PHARMACISTS.

1. What is the metric standaad for (*a*) Weight? (*b*) Length? (*c*) Capacity? (*d*) Express one inch in Metric System. (*e*) What is the rule for converting fluid ounces into cubic centimetres?

2. (*a*) What is the specific gravity of a substance soluble in water, if 400 grains of the substance loses in oil 236 grains, the specific gravity of the oil being .920? (*b*) Give the method of finding specific gravity of solids insoluble in, but lighter than, water. (*c*) Convert 40° C. into its equivalent in Fahr. (*d*) Convert 86° Fahr. into its equivalent in C. (*e*) What is meant by the terms fine powders and coarse powders?

3. Define the following: (*a*) Ignition. (*b*) Fusion. (*c*) Calcination. (*d*) Deflagration. (*e*) Carbonization.

4. What is the difference between evaporation and distillation? (*b*) What is fractional distillation? (*c*) What is torrefaction? (*d*) What is incineration? (*e*) What is sublimation?

5. (*a*) What is the difference between simple solution and chemical solution? (*b*) Mention six ways in which clarification may be effected. (*c*) What is percolation? (*d*) Name the process by which prepared chalk is obtained. (*e*) Describe the official process for making Lime Water.

6. Mention the process of solution in making the following aqueous solutions: (*a*) Aq. Creosote. (*b*) Aq. Chloroform. (*c*) Aq. Hydrogeni Dioxidi. (*d*) Aq. Anisi. (*e*) Aq. Aurantii Flor.

7. (*a*) Name the two classes into which liquors are divided. To which do the following belong: (*b*) Liq. Arsen. et Hydrargyri Iodidi? (*c*) Liq. Ammonii Acet.? (*d*) Mention the five official methods of making syrups. (*e*) Name one example under each.

8. (*a*) How many glycerites are official? (*b*) Name them. (*c*) What are Spirits? (*d*) Name the five ways in which they are prepared. (*e*) By what four ways are infusions usually made?

9. What wine is used in making the official wines? (*b*) What per cent. of alcohol should it contain? (*c*) What are Oleoresins? (*d*) How are they prepared? (*e*) By what four ways are infusions usually made.

10. (*a*) Should the ingredients in Dilute Nitro-Hydrochloric Acid be mixed together at once? (*b*) Why? (*c*) What is turpeth mineral, and what is its dose? (*d*) Name the most important products resulting from the destructive distillation of cellulose and lignin. (*e*) What is the difference between fermentation and putrefaction?

11. Give official Latin names and parts employed of the following: (*a*) American Helebore. (*b*) Lobelia. (*c*) Virginia Snake Root. (*d*) Burdock. (*e*) Foxglove.

12. (*a*) Give a description of Ammoniac and its official Latin name. (*b*) State whether it is a gum, gum resin or resin. (*c*) What is the dose of Codeine? (*d*) From what is it derived? (*e*) What is the official Latin name of the drug?

13. Prunus Virginiana. (*a*) Give habitat. (*b*) State the effect produced upon the bark by maceration with water. (*c*) Give the official preparations. (*d*) What is the official portion of Hops? (*e*) What is Manna?

14. (*a*) Define Materia Medica and Toxicology. (*b*) Give the name of the science which treats of crude drugs. (*c*) Ichthyocolla. Give common name. (*d*) From what obtained? (*e*) Name its uses.

15. (*a*) What is Gum Arabic? (*b*) Name two of the most common varieties. (*c*) Its official preparation. (*d*) Give the habitat of Jaborandi. (*e*) Name its active principle and dose.

16. (*a*) What is matter? (*b*) In what three states does it exist? (*c*) What is an element? (*d*) Define Cohesion. (*e*) Define Adhesion.

17. What is (*a*) an atom? (*b*) a molecule? (*c*) a symbol? (*d*) a chemical formula? (*e*) a chemical equation?

18. Define each of the following terms: (*a*) Synthesis. (*b*) Analysis. (*c*) Molecular weight. (*d*) Chemical Affinity. (*e*) Quantivalence.

19. What is (*a*) an acid? (*b*) an alkali? (*c*) a metal? (*d*) a base? (*e*) a salt?

20. Give chemical formula for each of the following: (*a*) Sulphuric Acid. (*b*) Epsom Salts. (*c*) Carbonate Soda. (*d*) Salts of Tartar. (*e*) Sugar of Lead.

PRACTICAL PHARMACY.

1. Make six powders.
2. Make six pills.
3. Make two Rectal and two Vaginal Suppositories.
4. Make half-pint Tinct. Gentian Comp.
5. Make Plaster 3 x 4.
6. Make 4 ozs. 50 per cent. Emulsion Cod Liver Oil.
7. Make 1 oz. Ointment.
8. Make 4 ozs. Emulsion Amygdalæ.
9. Identify ten specimens.
10. Criticise five prescriptions.

A monopoly is a good deal like a baby. A man is opposed to it on general principles until he has one of his own.

A Few Wise Words to College Students.

When you go out from school you will find "the other fellow." He has not been to college, but he is occupying the place which you want, and he is four years ahead of you. He will stay there, too, unless the work you get in college better prepares you for his place. If a person can do one thing, and do it well, he will be worth something. It makes no difference what you do, as long as you do it better than it has ever been done before.

There is no visible opening in any line you might select. On the other hand, there is a splendid opening if you can try a case better than any other attorney. There are many attorneys, but not so many lawyers; many pedagogues, but few teachers; many medical men, but few doctors. One-fourth of the lawyers in Chicago can try a case no better now than when they began, and all through Wisconsin there are women who can cook no better than they could the day they were married—and they are told so three times a day.

The world is ready to pay any price for excellence. The difficulty with the average man, and the rest of them, is that they do not pay enough attention to detail. No matter what profession you master, you must also master detail.

—*Governor Shaw, of Iowa.*

To be honest, to be kind, to earn a little and spend a little less, to make upon the whole a family happier for his presence, to renounce when that shall be necessary and not to be embittered; to keep a few friends but these without capitulation, above all on the same grim condition, to keep friends with himself—here is a task for all that a man has of fortitude and delicacy. He has an ambitious soul who wouid ask more; he has a hopeful spirit who should look in such an enterprise to be successful. There is, indeed, one element in human destiny that not blindness itself can controvert; whatever else we are intended to do we are not intended to succeed; failure is the fate allotted. It is so in every art and study; it is so above all in the continent art of living well. Here is a pleasant thought for the year's end, and for the end of life—only self-deception will be satisfied, and there need be no despair for the despairing.

HOW TO JOIN THE AMERICAN PHARMACEUTICAL ASSOCIATION.

President J. F. Patton, of York, Pa., has announced the following members of the special committee on membership. Each person has charge of the work of obtaining applications for membership in the State, Territory, City or Province named. If you desire to join the Association apply to your local representative:

STATES AND TERRITORIES.

Alabama—A. E. Brown, Mobile.
Arizona—Harry Brisley, Prescott.
Arkansas—W. W. Kerr, Batesville.
California—J. J. B. Argenti, 2944½ Mission Street, SanFrancisco.
Colorado—Frederick Steinhauer, 1553 Larimer Street, Denver.
Connecticut—Charles A. Rapelye, Hartford.
Delaware—H. K. Watson, Wilmington.
District of Columbia—S. L. Hilton, 1023 South Twenty-second Street, Northwest, Washington.
Florida—Walter I. Woodman, St. Augustine.
Georgia—S. P. Watson, Atlanta.
Idaho—D. E. Smithson, Emmet.
Illinois—H. H. Rogers, Kankakee.
Iowa—Fletcher Howard, Des Moines.
Indiana—Leo Eliel, South Bend.
Kansas—Charles L. Becker, Ottawa.
Kentucky—C. S. Porter, Somerset.
Louisiana—Wm. M. Levy, 420 Magazine Street, New Orleans.
Maine—Edward A. Hay, Portland.
Maryland—Wm. C. Powell, Snow Hill.
Massachusetts—F. M. Harris, Worcester.
Michigan—J. W. T. Knox, 121 Twentieth Street, Detroit.
Minnesota—F. J. Wulling Minneapolis.
Missouri—H. M. Pettit, Carrollton.
Nebraska—A. V. Pease, Fairbury.
Nevada—Wm. A. Brown, Winnemucca.
New Hampshire—J. B. Baril, Manchester.
New Jersey—George W. Parisen Perth Amboy.
New York—Clay W. Holmes, Elmira.
North Carolina—E. V. Zoeller, Tarboro.
North Dakota—Herbert E. White, Jamestown.
Ohio—George B. Kaufmann, Columbus.
Oregon—Louis Blumauer, Portland.
Pennsylvania—J. A. Koch, Pittsburg.
Rhode Island—James O'Hare, Providence.
South Carolina—O. E. Thomas, Columbia.
South Dakota—David F. Jones, Watertown.
Tennessee—A. B. Rains, Columbia.
Texas—E. G. Eberle, Dallas.
Utah—Fred J. Hill, 80 West Second South Street, Salt Lake City.
Vermont—Collins Blakely, Montpelier.
Virginia—A. E. G. Klor, Newport News.
Washington—Sophus Joergensen, LaConner.
West Virginia—Wm. H. Williams, Wheeling.
Wisconsin—H. C. Schrank, 437 East Water Street, Milwaukee.

PROVINCES.

Province of Manitoba—Chas. Flexon, Clarendon Hotel, Winnipeg.
Province of Nova Scotia—C. F. Simson, Halifax.
Province of Ontario—Henry Waters, Ottawa.
Province of Quebec—R. W. Williams, Three Rivers.

CITIES.

City of Baltimore—A. R. L. Dohme, Pratt and Howard Streets.
City of Boston—W. L. Scoville, St. Botolph and Garrison Streets.
City of Brooklyn—W. C. Anderson.
City of Chicago—Andrew Scherer, 383 North State Street.
City of Cincinnati—Albert Wetterstroem, 435 Colerain Street.
City of Cleveland—George W. Voss, 680 Woodland Avenue.
City of Detroit—Joseph Helfman, 82 East Montcalm Avenue.
City of Louisville—O. C. Dilly, 2101 West Walnut Street.
City of Montreal—J. E. Morrison, P. O. Box 683.
City of New Orleans—F. C. Godbold, 5535 Magazine Street.
City of New York—Charles S. Erb, 121 Amsterdam Avenue; R. R. Lampa, 50 Clinton Avenue.
City of Philadelphia—F. W. E. Stedem, Broad Street and Fairmount Avenue.
City of St. Louis—H. F. Hassebrock, Nineteenth and Wright Streets.
City of St. Paul—Charles T. Heller, 33 West Tenth Street.
City of Minneapolis—A. D. Thompson, 101 South Washington.
Army and Navy of the United States—W. W. H. Huntington, United States Naval Station, Newport, R. I.

The Council Committee consists of Henry M. Whelpley, chairman, 2342 Albion Place, St. Louis, Mo.; H. M. Whitney, North Andover Depot, Mass.; J. W. Gayle, Frankfort, Ky.; James H. Beal, Scio, Ohio; E. A. Ruddiman, Nashville, Tenn.; Lewis C. Hopp, Cleveland, Ohio; T. Roberts Baker, Richmond, Va.

A COMMERCIAL TRAINING COURSE IN COLLEGES OF PHARMACY.*

BY JOSEPH P. REMINGTON.

COLLEGES of pharmacy were created for the purpose of training young men in their vocation. Naturally and primarily, their first function is to make students proficient in technic, and when the colleges were founded in America, chemistry and materia medica were recognized as foundation studies, and they are considered as such to-day.

The early history of pharmaceutical education reveals a curious but, nevertheless, strong tendency to thwart and oppose the efforts of the far-sighted pioneers who saw in the education and training of the young the gradual uplifting of the craftsmen who were entrusted with the responsible duties of making and dispensing medicines.

Very slowly the colleges fought their way, and it required nearly half a century of earnest self-sacrificing labor to demonstrate the fact, which should have been recognized from the beginning, that education was a key which would solve mysteries and develop great possibilities.

In some cases, undoubtedly, self-interest on the part of the employer, or petty jealousy, led a preceptor to advise an assistant to keep away from colleges; that he, himself, had no use for these expensive and time-consuming new-fangled ideas, but that he could learn from his "boss" far more than upstart teachers could give him; and even to this day men can be found who use the same talk. Many a poor student in the past has been compelled to earn every penny for his college education and has succeeded in spite of enormous drawbacks and hindrances; but the colleges steadily continued their work, becoming stronger every year, and succeeded in spite of the most dire prophecies of disaster and failure.

Nearly every advance was met with determined opposition, and how sad it is to hear the wail of some old rule-of-thumb druggist, who has discovered, late in life, that all along he has been on the wrong side, and many an honest opponent has confessed to the writer in language something like this:

"If, when I was a young man, I could have foreseen the value of an education and could have begged or borrowed the money to go to college, I would have done so and have been saved years and years of toil, and what has taken me a long time to learn through the happenings of experience I could have acquired in two years of training. Naturally, I do not want to admit that I do not know my business. I can't acknowledge that these young fellows just out of college know as much as I do. I cannot afford to do it, and in some things they do not know as much as I do; but I have seen to it that my son has not been deprived of the advantages which I threw away, and I sent him to the best college that I could find. But then, the colleges in my days were small affairs, and the system of instruction imperfect; but I must say that there are some things taught in the colleges which I have no use for. The point that I see clearly is that those early days of one's life, when the mind is receptive and accustomed to study (having just come from school) are the least valuable in a man's business life, and then is the time when the foundation can be laid strong, sure and deep."

The writer has no desire to dwell upon this aspect, for it has its pathetic side, and, happily, education is rapidly working a cure. Now, if this presents a true picture of the past, is it not true that the same reasoning is equally applicable to branches of pharmaceutical instruction other than those recognized as theoretical, or knowledge obtained through the study of books? The answer to this is found in the magnificent equipment of our laboratories in the colleges and the great strides made in practical teaching in our universities and technical schools.

No college can be considered to-day worthy of the name which does not place in the hands of its students the mortar, pestle and spatula, the test-tube and the burette, and the microscope and culture apparatus; and it must not be admitted for a moment that the laboratory instruction, while useful in giving a student polish and finish, fails to equip him with knowledge which will be valuable in his future life as a bread winner.

But the writer wishes to call attention at

*Read at the annual meeting of the Pennsylvania Pharmaceutical Association, June, 1900. Reprinted from Amer. Jour. Pharm.

Digitized by Google

this time to a branch of education which has been in the past sadly neglected; it is that of commercial training. That pharmacy is a business as well as a profession comes home strongly to that student who is so unfortunate as to have a lop-sided mind, and who vainly thinks that all he has to do to reach highest success is to study books and, like the closet naturalist, gets his knowledge of life from studying the works of others.

What an awakening comes to such an one who, after winning gold medals and prizes galore in his examinations, finds when he gets behind the counter that his magnificent memory for facts will not avail him as much as he thought when he comes to roll pills, fold powders and meet the perplexing details of every-day counter practice. And it is this phase of college education which is the great stumbling block to the employers who are successful, practical business men. One frequently hears from such men the remark: "Send me a good clerk, I don't want a gold medal man."

The aim in every good college of pharmacy should be to neglect no department of knowledge which might make its graduates successful pharmacists, and no effort should be spared to entirely cover the ground. Impressed with these convictions the writer, ten years ago, expressed the opinion that business methods should be taught in our colleges of pharmacy. Gradually this thought has been working its way. With some educators the idea at once took root; others again approved, but deemed the time inopportune; others still were to be found who thought it outside the functions of a college of pharmacy to teach business methods. Possibly the greatest number to-day are willing to give any rational plan for accomplishing the object a fair trial.

Within four years this opportunity has been taken advantage of by the writer in the Philadelphia College of Pharmacy, and fortunately, through the liberality and progressiveness of the trustees of the Philadelphia College of Pharmacy it was made possible to establish an optional course on commercial training. This course has been successfully inaugurated by Prof. F. G. Ryan, and so far as it has gone has thoroughly demonstrated its practicability.

The object of the course is to teach students in pharmacy simple methods of bookkeeping, which will enable the pharmacist to know at any time and at short notice whether he is making money or losing it; proper methods of drawing checks, drafts, promissory notes and even how to write orders on wholesale druggists: in fact, to so train him in correct and accurate methods that when he takes a position or opens a store he will not be absolutely at sea in these important particulars. How few retail druggists throughout the country have ever been systematically instructed in these vital details.

Every wholesale druggist who has been made acquainted with the plan of the new course speaks of it in most encouraging terms. Those who oppose every innovation simply because it never has been done before will, of course, be in evidence. One can almost anticipate the objections of the chronic objectors. "Why don't the employer teach assistants bookkeeping?" The answer to this is, what percentage of employers are using to-day simple, proper methods of keeping their books? How many druggists know at the end of the year how much money they have lost or made? What percentage of losses are made in a year through carelessness and improper methods of keeping books? How many clerks are imbued with a proper sense of the responsibility and duty to their employers to accurately record sales?

Unfortunately, the scientific and professional pharmacist too often inherits a contempt for such routine work as bookkeeping, and if fortune smiles upon such an one and business pours in upon him in spite of his limitations, does he not frequently have to employ some bookkeeper who knows nothing of pharmacy and is good for nothing else in the store? And if the employer knows nothing of bookkeeping, has he not literally turned the keys of his business life into the hands of the enemy?

It is probably too much to expect at once complete approval of the ideas which are advanced in this paper; but the writer sincerely trusts that in the near future no college graduate shall be permitted to receive his diploma until he has passed a satsatisfactory examination in commercial training; and of the college which first successfully inaugurates such a course and compels the students at some time to pass an examination in this department, it is safe to say that her graduates will be sought for and preferred by employers because, while they have been thoroughly trained in the knowledge which will enable them to perform all of their duties as chemists and pharmacists, they are not likely to become commercial failures and lose the results of their hard-earned labors by failing to know

Digitized by Google

"what they have made," add to "what they have made, and, in fact, cover the whole ground."

One other objection may be heard: "Why don't the man who needs training of this kind go to a commercial college?" The answer to this is that none of the commercial colleges have ever thought it worth while to establish a course suited for pharmaceutical students, and it is not likely that they could make such a course remunerative to the commercial college because of the limited number of students who would voluntarily take such instruction.

The courses in commercial colleges are, moreover, very elaborate and usually cast upon lines involving large operations, and the instructors in such colleges are not familiar with the special needs of pharmaceutical business. This paper may be concluded by quoting a remark of a college graduate of ten years' standing, who said: "I only wish that I could have taken a course in commercial training instead of the special course which I took at college. I am sure I would now be making a comfortable living, for it would have enabled me to have saved many business losses and some bitter experiences that I have gone through, because I thought business details and methods too insignificant to give them time and thought at a time in my life which I could have easily spared for this practical work."

It is probable that the great depression through which the drug business has been passing in late years has brought home to many the need of such training, and the words of the graduate above quoted will doubtless find an echo in the minds of many similarly situated.

Man was made to mourn, but widower's are limited to a year.

No Reflection on His Stomach.

Capt. Reid, of the United States transport Sherman, has been running between San Francisco and Manila with troops for over a year. He has had some funny experience and in a letter to his father, in Pittsburg, lately, told the following story of an Irish recruit who was going over to join the Fourth cavalry. The big trooper had got outside the Farallones on her voyage west, when she began to feel the heave of the Pacific. Of course, most of the soldiers became seasick, and the majority of them were hanging over the rail in various stages of dejection. The Irish recruit held out as long as possible, but he soon felt a few premonitory qualms and began paying tribute to Neptune, like others.

The captain in charge of the craft was passing along the deck, putting a kind word here and a sentence of encouragement there. He came to "Mike" and, stopping beside him, said:

"You're pretty bad, my lad."

"Oi am," said the soldier, trying to stand at attention and salute his superior, "an' I suppose th' docthor can't do anythin' fur me?"

"I'm afraid not. Poor fellow, you have a weak stomach."

The Irishman bristled up at this in indignation.

"Oi don't know about thot," he gasped. "Oi notice Oi'm throwin' as far as any av th' rest av them."—*Pittsburg News.*

The roses of pleasure seldom last long enough to adorn the brow of him who plucks them; and they are the only roses which do not retain their fragrance after they have lost their beauty.

Surgeons' Rubber Gloves.

Made of Thin, Pure, Fine Para Rubber,
Which does not interfere with the Sense of Touch.

The surface of the rubber used in these gloves is of a peculiar finish and allows of a firm hold on ligatures and ligaments.

A Druggist's Troubles.

Before purchasing this uptown drug store the young graduate in pharmacy, whose father had let him have the money to go into business for himself, spent about half a day in standing across the street in a spot where he wouldn't attract attention, in order to watch the doors of the drug store, so as to find out what sort of a trade it had. The number of persons he saw going into the store satisfied him, and so he paid the figure and took the store over. He closed the plant up for a couple of days in order to have repairs made and to restock, and then, one morning last week, he opened up for business, a fine feeling of proprietorship inflating him.

Quite a lovely young thing, with a huge feather boa, was the first to enter.

"I want a two-cent stamp," she said, tendering the young graduate in pharmacy a $20 bill.

"Er—uh—I don't believe I can change that note," said the new proprietor, wondering inwardly at the nerve of the lovely young thing, and saying to himself, "It's a wonder she wouldn't offer to buy a nickel piece of soap or something to have that bill changed."

"Oh, indeed!" said the lovely young creature with the boa, haughtily. She gave the young pharmacist a freezing succession of looks and swept out.

A little boy was the next. He had a piece of paper in his hand, and he walked hesitatingly up to the new proprietor of the drug store.

"Ah, just let me have that prescription, my little man," said the pharmacist, extending his hand.

"It ain't no 'scription," replied the kidlet. "Maw, she wants t' set th' kitchen clock, an' says t' me t' come here and fin' out what time it is an' t' have th' man put it down on a piece o' paper, so's I wouldn't fergit it," and the youngster held out the piece of paper. The young graduate in pharmacy disappointedly took it, jotted down the time on it and the boy plodded out. The new proprietor idly picked up the little frame that he had already bought for the purpose of framing the first bill he took in over his counter and sighed a bit.

The next was a little girl.

"Well, what did your mamma send you for?" asked the new proprietor, beaming upon the child.

"Mamma didn't send me," said the little girl, "but I came over to see if you had any cigar boxes. I want to make a wagon for my dolly."

The new proprietor plowed around in his cigar showcase and found an empty cigar box, and handed it over to the child with another stifled sigh.

The next to come in was a middle-aged man, not badly dressed.

"Hey, there, doc, what's good for a stomach ache?" he inquired of the young graduate in pharmacy. "My youngest boy is bellerin' with a stomach ache, and my wife's down town, and I don't know what to do for him."

"Jamaica ginger's a pretty good thing for that," said the young graduate in pharmacy, starting for the part of the store where he kept his stock of Jamaica ginger.

"That so?" said the middle-aged man, starting for the door. "Good thing. I've got a bottle of that over at the house, and I'll give the kid a dose of it," and he went out.

Another small boy slouched in, clutching a dime in his grimy little right fist.

Digitized by Google

"Paw, he wants a pack of playin' cards for ten cents," said the youngster.

"Don't keep playing cards, son," replied the new proprietor, a bit curtly. "Neither do I keep hay or horseshoe nails," he growled under his breath, as the boy ambled out.

A hatchet-faced woman rushed in a little later on.

"Young man," she said to the new proprietor, "do you know where the Tinkatink family, that used to live up the street, are now living?"

"No'm," replied the young graduate in pharmacy, drearily.

"Don't know where they moved to?" said the hatchet-faced woman in a tone of surprise mingled with reproach. "Why that is queer. Are you perfectly sure that you don't know where the Tinkatinks moved to?"

"Yes'm," replied the pharmacist.

"Yes'm what?" said the hatchet-faced woman, raucously. "Do you mean that you do not know where the Tinkatinks moved to and just don't want to tell me?"

"I never heard of the Tinkatink family in all my life, ma'am," said the new proprietor, miserably.

"Well, why didn't you say so in the first place?" wrathfully declaimed the hatchet-faced woman, moving toward the door. "The idea of your keeping me waiting this way—the very idea!" and she banged the floor as she went out.

A fat, rosy-faced, well-groomed man was the next to enter.

"Well, I ought to sell this one a bottle of tooth powder or something," said the young pharmacist to himself as he advanced.

"Morning," said the rosy-cheeked man. "I'm Dr. Pulsefeel, practicing around the corner. Be glad to send you my patients living in this neighborhood. Nice little place you've fitted up, eh? How's trade?

"Well, I haven't had an idle moment since I took down the shutters," truthfully replied the young graduate in phamacy.

—*Washington Star.*

All for the Best.

"They say that women have a very deficient sense of humor," remarked Willie Wishington.

"Yes," answered Miss Cayenne. "And perhaps it is just as well. If we had too much discrimination in such matters we couldn't smile at so many well meant masculine efforts to be funny."

Human Tears to Cure Disease.

The Persians still believe that human tears are a remedy for certain chronic diseases. At every funeral the bottling of the mourners' tears is one of the chief ceremonial rites. Each of the mourners is presented with a sponge with which to mop off his face and eyes, and after the burial these sponges are presented to the priest, who squeezes the tears into bottles. This custom is one of the oldest known in the East, and has probably been practiced by the Persians for thousands of years.

—*From the Philadelphia Record.*

Ah, to listen—no, not to listen, but to hear the chirp and call of birds, and the hum and buzz of insects as brilliant and almost as large as birds, with the bright, bright sunshine all around, with the soft breeze blowing—no, no—breathing, gently breathing from the fresh blue sea, touching and tickling your cheek like down; to see along the beach the rare, dusky beauties sporting and swimming in the dancing, sparkling waves! and to long to be diving among them as you long for a drink of water, oh, the paradise it is!

—*King of Andaman.*

Laxative Bromo Quinine

Is a Valid Trade Mark, And Must Not Be Imitated.

The Paris Medicine Company won a suit in the United States Circuit Court for the District of Indiana, establishing the validity of **Laxative Bromo Quinine** as a trade mark, and perpetually enjoining the defendant, Newton C. Davis, of Frankfort, Indiana, from using these or any similar words to describe a medicinal preparation of his manufacture. On account of the popularity of **Laxative Bromo Quinine,** it still has a few imitations put up under similar names, which are calculated to deceive the public.

A rank imitation is manufactured by a concern at Detroit, and suit against them is now pending in the courts, and the indications point to a favorable decision in behalf of the Paris Medicine Company. The Paris Medicine Company will bring suit at once against any and all infringes of their product.

There is no excuse for druggists handling imitations of **Laxative Bromo Quinine,** as long as the Paris Medicine Company deal with the Druggists on the same liberal basis as heretofore.

The Genuine LAXATIVE BROMO QUININE is for sale by all Wholesale Druggists.

We quote the moderate price of { $3.50 per dozen for the 50c. size. / $7.00 per dozen for the $1.00 size.

Dr. Caldwell's Pepsin Syrup is prepared and guaranteed by

Pepsin Syrup Company, Monticello, Ills., U. S. A.

POLITENESS, THE LUBRICATOR OF BUSINESS.

There is nothing that costs less than courtesy, and few things which yield better returns, irrespective of cost. In the business world with its mad scramble after dollars, fierce competition for trade and general eagerness to devote the whole twenty-four hours of the day to money-making, it is not infrequently that courtesy is laid aside as being too much trouble, and taking too much time. And yet, not one of these busy men fails to appreciate true politeness when he is the recipient of it. We except from this only the "natural born" boor, and that disagreeable character is so rarely seen that he may be left out of consideration in business life.

But though politeness is appreciated by ninety-nine hundredths of the people, it is quite too often neglected. The street car conductor demands your fare in the same tone that a footpad would use in calling on you to deliver your pocketbook; he does it, not from ill-will, but because the passengers treat him the same way, and should he by any chance ask for a fare from a man who had already paid, the probabilities are that the man would turn on him with curses and insults, as if he had attempted some heinous crime. And the conductor's superiors in the service treat him with the same discourtesy, and as a rule are the recipients of the same kind of treatment from their own chiefs.

There is no little truth in the philosophy of the old Southern darkey who said that whenever he saw a man going around cursing and abusing everyone else, he was only getting even for the cursing and abuse he himself had to take from the boss; and that the man who expected everybody to bow and scrape when he passed, was only making up for the bowing and scraping he had to do to his own superiors.

The greatest and most common trouble in this respect, however, is of a negative rather than a positive nature. In short, it is not so much downright discourtesy as it is the omission of those little acts of politeness that go so far to smooth one's pathway and make everything pleasant for all who come in contact with him. Applying this to the everyday routine of the drug store, is there not a lesson to be learned? It matters not that it is as old as the hills themselves, he who knows it not should learn. As a factor in business success, it

Digitized by Google

is not to be ignored. As one of the little things that help to make life pleasant and keep the wrinkles away from the corners of one's eyes, it is worth trying.

A successful business man whose name is known far and wide, not only in this country but in the Old World as well, said to the writer not long ago: "One may think politeness is superficial and insincere, but it is a splendid lubricator, and as a mere acquirement toward financial success I would back the polite clerk or principal against the merely learned one." This is indeed expert testimony and worth heeding. Looked on as a sordid business proposition, politeness pays.

And why should it not? Nothing is more reasonable. The clerk, who otherwise qualified, adds politeness to his own stock in trade, is certainly more pleasant for customers to deal with. He draws business to the store, makes himself more and more valuable to his employer in this way and wins recognition of his value in increasing salary, for if his employer does not give him the desired raise some one else will. His transactions become larger, his functions in the business more important. The same genial qualities that helped to bring his first successes, aid him equally well in larger transactions. His good nature coupled with his business qualification, inspire faith on the part of those with whom he deals, and so on his influence widens in a constantly increasing circle, just as the wave made by throwing a pebble in the water.

Politeness is the lubricator of business. It is more—it is the magic word with which to woo Success. And finally all true politeness consists not merely in certain set forms of speech and action, but springs from the heart, and is but the outward expression of genuine good-will towards others, respect for their feelings and regard for their rights.

It costs nothing, anyone may have it, and yet it is never cheap. Isn't it worth having after all?—*New Idea.*

A New Pill.

An old darky woman was told by her physician to get a dose of compound cathartic pills from the druggist. On seeing the physician again, she said, "Doctor, that druggist just laughed and laughed when I asked him for those pills." The doctor said, "Why, what did you ask him for?" The old darky said, "Why, I asked him for a dose of confound cathedral pills, same as you told me."—*Exchange.*

I allus argy that a man
Who does about the best he can
Is plenty good enough to suit
This lower mundane institute.
No matter ef his daily walk
Is subject for his neighbor's talk
And critic-minds of ev'ry whim
Jest all git up and go fer him.

How to Make a Drug Store Pay.

In answer to this query a wag would naturally say, "enter suit"—but we'll pass over that.

Taking it for granted that you understand the business in which you are engaged, that you are a thorough pharmacist, a good financier, a close buyer, with progressive ideas; that your clerks are reputed to be first-class drug men and also good salesmen (combinations that bear the same ratio to the masses that yellow fire crackers bear to the red ones); that your stock is well assorted and your stand considered as "A1"—and if, with all these advantages your bank account doesn't seem to grow, then there are leaks, and you must go on a still hunt for them and stop them as soon as possible.

Of course, your clerks are honest, well-meaning fellows, but what kind of a system do you observe in handling every transaction? When night comes and you review the day's business, can you approximate the amount of profit in the gross sales for that day? If you cannot, then you have not the full control over your affairs that you should have. You should know more than any one else about the smallest detail of your establishment.

Again, do you know that all of your clerks are sufficiently interested in your welfare to always sell your goods at a legitimate profit? Why shouldn't you know about this? A clerk may, to all outward appearances, be what is termed a "hustler," but the gross sales of any one clerk are not always an index of his worth to you. See that an itemized record is made of his every transaction, and judge of this matter for yourself, whether your stock is being given away or sold.

Of course you keep a want book in which are noted, more or less punctually, the shortages in the regular stock. But now and then you will see a clerk go forward to wait on a prospective customer; a few words are exchanged, possibly some stock is shown, but the would-be buyer walks out without purchasing, and the clerk goes back to his routine duties. This may happen a dozen or more times during the day. Did you ever stop to consider that your lost customer is going straight to the store of your competitor? Why are you losing this business? If something out of your usual line of drugs or sundries is called for, possibly the clerk did not deem it of sufficient importance to note in the want book. Then arises the question, "Who is running your business, you or your clerk?" Perhaps you may never have a second call for that article, and then you may never have a second visit from that customer.

You can't buy everything that is called for, because it would take a bigger store than yours to hold it all. I have devised a plan by which the buyer of the stock can judge for himself whether or not an article is called for often enough to merit a place on the shelf. The scheme is, in my conceit, purely original, as I have never seen it in operation elsewhere. It is this: Have printed forms in pats placed conveniently for the employes and worded as follows:

NO SALE.

Salesman.....
Customer (transient or regular)...(white), (colored.)
Article Wanted.....
Priced at.....
If in stock, state reason why sale was lost.
.....
If not in stock, state as nearly as possible kind, quality and price of article wanted.
.....

YOUR WINDOW

Will attract or repel trade. It all depends how you dress it. We can help you make it attractive. Our "**Palmo Tablet**" displays are novel, unique and original. We furnish them to only one dealer in a locality.

Palmo Tablets **is the new Nerve Tonic, which costs you $4.00 per dozen, retails for 50 cents, and is not cut.**

Particulars for the asking.

THE S. R. FEIL COMPANY, - Cleveland, Ohio.

Digitized by Google

This form, properly filled out each time a sale is lost for any reason whatever, may be filed with the cashier, if your trade is sufficiently brisk to warrant the cashier system. If not, then have a file placed in some accessible place where outsiders will not be apt to see them. A perusal of these slips each night will furnish you with much food for thought. You can jot down in your want book such items as you may see fit, and reserve the balance of the slips for comparison with future slips. Some of these slips have a humorous vein, and at the same time will give you an opportunity to "coach" a clerk who may think he knows it all. For instance, I have before me a slip filled out by the Junior, as follows:

NO SALE.

Salesman..... "H." .....
Customer....."Transient"....("White.")....(Colored.)
Article Wanted....."Pipe Clay, 15c. worth."....
Priced at....."Sent him to the milliner."....
If in stock, state reason why sale was lost.
..... "Probably wanted clay pipes."....
If not in stock, state as nearly as possible kind, quality and price of article wanted.
....."Not in stock."....

—"*Dad.*," *Myer Bros. Druggist.*

The old, old story of leaning too far out of the window and dropping four stories.

"Are you alive?" gasped the policeman, as he lifted the burden gently.

"Thank goodness!" murmured the burden faintly.

Ah, you are thankful for your life!"

"N-no, sir; I am thankful that porous plaster on my back has been loosened. I've been trying to get it off for days."

—*Chicago News.*

Success is like a load of hay;
One has to climb to get on top
And then if he attempts to ride
With idle legs hung o'er the side
There comes a jolt, a clutch, a slide—
And down he goes, kerflop.—*S. E. Kiser.*

Would Gladly Take the Dose.

On one of the recent warm days, a sour-visaged, middle-aged, fussy old lady got on one of the smoking seats on an open car in the subway. Next her sat a man who was smoking a cigar. More than that, the lady, sniffing, easily made out that the man had been eating onions. Still more than that, she had the strongest kind of suspicion that he had been drinking beer. The lady fussed and wriggled, and grew angrier, and looked at the man scornfully. Presently she could endure it no longer. She looked at him squarely and said:

"If you were my husband, sir, I'd give you a dose of poison!"

The man looked at her. "If I were your husband," said he, "I'd take it."

When Thomas T. Crittenden was Governor of Missouri he had a colored hostler who always stood much in awe of his employer. One of his traits was that he was unduly apologetic about trifles; but one night, when the Governor's favorite horse died, the old negro was in a dire dilemma, and the case apparently was beyond the man's power of palliation. He wandered aimlessly about the stable for a long time, fearing to break the news to his employer. Fiually he mustered sufficient courage to approach the Governor. When he had turned his hat around several times in his hands, and had swallowed equally as often, he said:

"Guv'ner, that yere black horse of yours ain't a-goin' to live berry long."

The Governor looked in surprise and asked:

"What makes you think that, Ben?"

"Ca'se he am dead," the negro said laconically.

"What is the single tax, mamma?"

"I don't know. Don't you worry about it, child. Your papa will find some way to get out of paying it."—*Chicago Tribune.*

-NAVICULINE-

Every Horseman Knows its Merits.

I will guarantee Professor Mannington's Celebrated Naviculine To cure lameness, no matter how caused, quicker than any other preparation in the market. It is the most powerful paint that has ever been used for Splints, Spavins, Curbs, Bowed Tendons, Knuckling, Weak Kidneys, Shoulder Lameness, Buckshins, Quittor, Navicular Disease, Sprung Legs, Ringbone, Saddle Galls, Shoe Boils, Farcy, Windgalls, Founder Scratches, Grease Heels, Overreach, Thoroughpin, and all bony enlargements, etc. This paint has been used at Newmarket, England, G. B., with immense success; it penetrates muscles, membrane, and tissues to the very bone itself.

☞NOTICE!—Horses entered in valuable stakes may continue their regular work whilst using this valuable preparation. It will not blemish or destroy the hair on any part to which it is applied. Horses need not now be kept standing in the stable eating their heads off through lameness; it is absorbent and exercise assists action thereof.

Blisters, Liniments and Embrocations are counter-irritants, not absorbents, being composed mostly of grease; it is impossible for them to reach the muscles, tendons, joints, and absorbent glands. "NAVICULINE" will reach them all; it does not contain any grease. Ask your druggist to order it for you; he will do so; it is invaluable to Horsemen, Trainers, Stockraisers, Farmers, etc. Be sure and ask for Professor Mannington's Celebrated "NAVICULINE," Yellow Label.

Many well known Owners and Trainers have used this valuable preparation, and will testify to its merits.

PRICE, $3.00 PER BOTTLE.

We solicit questions on all points of general interest to the trade. Technical questions will be answered by the editor, W. R. Ogier, or Prof. Geo. B. Kauffman. Correspondents must send their names, not for publication, with each query. No attention paid anonymous questions.

Editorial.

DOW TAX DECISION.

BRIEF mention was made in our January number of a decision of Judge Mansfield of the Common Pleas Court in Harrison county, Ohio, in the case of McBean vs. the Treasurer of Harrison County, to restrain the collection of the Dow liquor tax, which had been assessed against the plaintiff by the Auditor of that county. We quote at some length from the decision of the Court, which will no doubt be of general interest to Ohio retail druggists:

"When we consider the habits of the witnesses touching the use of intoxicants as testified by them, the frequency of the salse, the flimsy and fugitive nature of their several maladies, including bad colds, sore throats, pain in the breast, nervous prostration, antidote for opium habit, and numerous diseases, the suggestion of the buyer that he thought whisky would do him good, and the prompt agreement of the plaintiff with the buyer after a cursory examination, the entire lack of directions as to use, the fact that when other remedies were prescribed they were usually sold without mixing with the whisky; the fact that no prescriptions were presented, and the further fact that several of these witnesses testified that they were not patients of the plaintiff, we might well conclude in the language of a case already cited that 'this is more like selling whisky than practicing medicine.'

Digitized by Google

"The fact that the party needed whisky as a medicine, or that it was the proper remedy, or that it was sold as and for medicine is not sufficient. The burden is on the plaintiff to go further and show that he honestly believed that the party was not only getting it for medicinal purposes, but that he would actually use it as a medicine, and not as a beverage.

"Every druggist who sells intoxicating liquors for mechanical or pharmaceutical purposes upon the mere statement of the buyer that he wants it for such purposes takes the risk of convincing a court or jury that he acted in good faith, and that he honestly believed it would be used for such purpose, and only for such purpose, and if the person to whom he sells it is known to him to be a person who uses such liquors to excess as a beverage, then the risk of convincing a court or jury of the good faith of the transaction is proportionately increased, and his case is lost when the act is done."

This decision is in line with the position the MIDLAND has taken and repeatedly announced as the proper attitude of pharmacists toward the sale of intoxicating liquors. A reputable pharmacist should not make such sales to persons who are in the habit of getting intoxicated, nor should he sell liquors upon pretexts which are flimsy and readily detected. It is not enough that a person says that he wants whisky for pain in his stomach or some equally improbable indisposition. Pharmacists are not easily duped; they are rather alert than otherwise and can usually detect the motive with which a customer is actuated when in quest of something which is more or less contraband. An experience of many years in the retail drug business gives us reason to speak with some assurance on this point, and we believe it possible for the average retailer to determine with considerable accuracy when it is proper to sell any article about which a question is raised as to such sale being in contravention of any law.

When he has honestly exercised his judgment with the purpose of refusing sales to improper persons, he can sustain himself in what sales he does make in any tribunal where he is given a fair hearing. A clean conscience is a wonderful safeguard to any man, and when he is in possession of one he has little to fear from the inquisitions of inspectors, the bullying methods of detectives or trials by courts.

NOT A QUESTION OF TROUBLE.

AN inquirer writes us to know if a friend of his, a recent applicant for registration as pharmacist by the Ohio Board of Pharmacy, failed to pass by reason of having had some trouble with the board. This is a specimen of inquiries which flow into the office of the board of pharmacy after the results of any examination are announced. We would have small hope in any statement we might make of convincing many of its sincerity, but to such queries as the one we mention we beg to say that the person named had no difficulty with any member of the board of pharmacy before which he appeared for examination, and further that it would not have made any difference if he had so far as the results of his examination are concerned. Men are not rejected from malice or personal feeling any opinion to the contrary notwithstanding. We think we know some little of human nature, we have a pretty conceit that we have a slight degree of insight into the motives of men with whom we have become rather intimately acquainted, and in all candor we must assert that after many years we have yet to find the first member of any board of pharmacy who seemed anxious to "get even" with any applicant for any real or fancied cause for such action. We believe that as a rule applicants who appear before boards of pharmacy are treated with more than usual consideration, and that more errors are committed in the way of leniency towards all applicants than severity in requiring them to reach a specific standard, and further that men are rated solely upon their merits as shown by their examinations regardless of any other favorable or unfavorable influence. In a statement of this kind we have small hope of overcoming in great measure contrary views which are so widely prevalent. It is a singular fact in human experience that men prefer to believe in the worst things in their fellows rather than in the best, to impute small motives rather than give credit for breadth of view. There is an innumerable number of mean men walking upon the earth's crust, but there is also a host which no man thinks of counting whose impulses are noble and true, who will not descend to little deeds, but who walk erect conscious of integrity of purpose no matter how deficient they may be in judgment.

OHIO PHARMACEUTICAL ASSOCIATION.

THE annual meeting of this organization will be held in Dayton, O., during the month of June, the exact date we are unable to announce, if, indeed, the time has been definitely fixed. There should be a large attendance at this meeting if this time-honored association is to maintain its influence among Ohio pharmacists. The meetings of the last few years have not been largely attended, and Dayton was chosen this year in order that there might be no occasion for complaint from those residing in central and southern Ohio that they could not quickly and conveniently reach the place of meeting. This year's attendance will go far toward showing where the real friends of the old Ohio State Association are.
